Proceedings

Third IEEE International Conference on
Automatic Face and Gesture Recognition
Table of Contents

Foreword ........................................................................................................................................ xii
Introduction to the FG'98 Program ................................................................................................. xiii
Conference Committee .................................................................................................................... xiv
Program Committee ....................................................................................................................... xv
List of Additional Reviewers ........................................................................................................... xvi

Invited Speaker
Session Chair: Masahiko Yachida, Osaka University
Nonverbal Information Recognition and Its Application to Communications ......................... 2
Ryohei Nakatsu, President, ATR MIC Research Laboratories

Session P1: Extraction of Trajectory and Modeling
Session Chairs: Larry Davis, Maryland University
Kosuke Sato, NAIST
Extracting Gestural Motion Trajectories ...................................................................................... 10
M.-H. Yang and N. Ahuja
Recognizing Temporal Trajectories Using the Condensation Algorithm ..................................... 16
M.J. Black and A.D. Jepson
Dynamic Models of Human Motion .............................................................................................. 22
C.R. Wren and A.P. Pentland

Session P2: Face Recognition and Verification
Session Chairs: Cris Taylor, University of Manchester
Hiroshi Murase, NTT
Beyond Eigenfaces: Probabilistic Matching for Face Recognition .............................................. 30
B. Moghaddam, W. Wahid, and A. Pentland
Face Verification based on Morphological Shape Decomposition ............................................. 36
A. Tefas, C. Kotropoulos, and I. Pitas
A Robust Face Identification against Lighting Fluctuation for Lock Control ......................... 42
M. Doi, K. Sato, and K. Chihara
The FERET Verification Testing Protocol for Face Recognition Algorithms ......................... 48
S.A. Rizvi, P.J. Phillips, and H. Moon

Poster Session PD1: Extraction and Detection of Gaze, Face and Head
A Multi-Scale Morphological Method for Human Posture Recognition ..................................... 56
Y. Li, S. Ma, and H. Lu
Face Indexing on Video Data - Extraction, Recognition, Tracking and Modeling ..................... 62
Y. Ariki, Y. Sugiyama, and N. Ishikawa
Scale Invariant Face Detection Method Using Higher-Order Local Autocorrelation Features Extracted from Log-Polar Image ................................................................. 70
K. Hotta, T. Kurita, and T. Mishima

</tbody>
</table>
Lip Motion Capture and Its Application to 3-D Molding
M. Okubo and T. Watanabe

Session P3: Face as a Deformable Object
Session Chairs: Shimon Edelman, University of Sussex
Naokazu Yokoya, NAIST

Gender and Ethnic Classification of Face Images
S. Gutta, H. Wechsler, and P.J. Phillips

Coding Facial Expressions with Gabor Wavelets
M. Lyons, S. Akamatsu, M. Kamachi, and J. Gyoba

Temporal Differences in Eye and Mouth Movements Classifying Facial Expressions of Smiles
S. Nishio, K. Koyama, and T. Nakamura

Invited Speaker
Session Chair: Kenji Mase, ATR MIC

1ms VLSI Vision Chip System and Its Applications
Speaker: Masatoshi Ishikawa, Associate Professor, University of Tokyo

Session P4: Tracking and Segmentation of Moving Figures
Session Chairs: Micheal Black, Xerox PARC
Jun Ohya, ATR MIC

I. Haritaoglu, D. Harwood, and L.S. Davis

Tracking and Segmenting People in Varying Lighting Conditions Using Colour
Y. Raja, S.J. McKenna, and S. Gong

Reach Out and Touch Space (Motion Learning)
L. Goncalves, E. Di Bernardo, and P. Perona

Session P5: Feature Extraction, Detection and Learning
Session Chairs: Thomas Huang, University of Illinois
Shigeo Morishima, Seikei University

Locating Salient Facial Features Using Image Invariants
K.N. Walker, T.F. Cootes, and C.J. Taylor

Spatiotemporal Analysis of Face Profiles: Detection, Segmentation, and Registration
E. Dariush, S.B. Kang, and K. Waters

Facial Contour Extraction Model
T. Yokoyama, Y. Yagi, and M. Yachida

Learning to Identify and Track Faces in Image Sequences
G.J. Edwards, C.J. Taylor, and T.F. Cootes

Session P6: Hand Gesture Analysis
Session Chair: Norihiro Hagita, NTT

Hand Gesture Estimation and Model Refinement Using Monocular Camera
Ambiguity Limitation by Inequality Constraints
N. Shimada, Y. Shirai, Y. Kuno, and J. Miura
Tracking Hand Dynamics in Unconstrained Environments .................................................. 274
Y. Azoz, L. Devi, and R. Sharma

Poster Session PD2: Identification of Face and Expression
Evolution of Optimal Projection Axes (OPA) for Face Recognition ...................................... 282
C. Liu and H. Wechsler
Partial Face Recognition Using Radial Basis Function Networks ........................................ 288
K. Sato, S. Shah, and J.K. Aggarwal
Face Recognition Using Binary Image Metrics ........................................................................ 294
B. Takács and H. Wechsler
Interpreting Face Images Using Active Appearance Models .................................................. 300
G.J. Edwards, C.J. Taylor, and T.F. Cootes
Face Identification Using a 3D Gray-Scale Image - A Method for Lessening Restrictions on Facial Directions ............................................................................................................. 306
S. Tsutsumi, S. Kikuchi, and M. Nakajima
Real-Time Face Recognition Using Feature Combination ...................................................... 312
C. Nastar and M. Mitschke
Face Recognition Using Temporal Image Sequence .................................................................. 318
O. Yamaguchi, K. Fukui, and K. Maeda
Expression Recognition from Time-Sequential Facial Images by Use of Expression Change Model ................................................................................................................................. 324
M. Wang, Y. Iwai, and M. Yachida
Hatched Image Representation of Human Faces Based on a Cognitive Model ......................... 330
D. Shibata, T. Nakamura, M. Yamada, H. Seki, and H. Itoh
Discriminant Analysis of Principal Components for Face Recognition ................................... 336
W. Zhao, R. Chellappa, and A. Krishnaswamy
Facial Image Reconstruction by Estimated Muscle Parameter ................................................ 342
T. Ishikawa, H. Sera, S. Morishima, and D. Terzopoulos
Face Recognition from Unfamiliar Views: Subspace Methods and Pose Dependency ............... 348
D.B. Graham and N.M. Allinson
Online Facial Expression Recognition Based on Personalized Galleries .................................. 354
H. Hong, H. Neven, and C. von der Malsburg
Statistical Analysis of Gabor-Filter Representation .................................................................. 360
P. Kalocsai, H. Neven, and J. Steffens
Multimodal Human Emotion/Expression Recognition .............................................................. 366
L.S. Chen, T.S. Huang, T. Miyasato, and R. Nakatsu
Curvature-Based Face Surface Recognition Using Spherical Correlation — Principal Directions for Curved Object Recognition ................................................................. 372
H.T. Tanaka, M. Ikeda, and H. Chiaki
Facial Expression Space for Smooth Tele-Communications ................................................... 378
K. Ohba, T. Tsukada, T. Kotoku, and K. Tanie
Toward Automation of Learning: The State Self-Organization Problem for a Face Recognizer ................................................................................................................................. 384
J.J. Weng and W.-S. Hwang
Automated Facial Expression Recognition Based on FACS Action Units ................................. 390
J.J. Lien, T. Kanade, J.F. Cohn, and C.-C. Li
Feature-Point Tracking by Optical Flow Discriminates Subtle Differences in Facial Expression ................................................................. 396
  J.F. Cohn, A.J. Zlochower, J.J. Lien, and T. Kanade
Generalizing Capacity of Face Database for Face Recognition ................................................................. 402
  S.Z. Li and J. Lu

Invited Speaker
  
  Session Chair: Shigeru Akamatsu, ATR HIP
  
Corporations between Human and Computer Recognition of Faces ........................................................................................................ 408
  Speaker: Vicki Bruce, Professor, Department of Psychology, University of Stirling
  by Vicki Bruce, A. Mike Burton, and Peter J.B. Hancock

Session P7: Gesture Recognition
  
  Session Chairs: Jim Rehg, DEC
  Osamu Hasegawa, ETL
  
View-Based Interpretation of Real-Time Optical Flow for Gesture Recognition ............................................. 416
  R. Cutler and M. Turk
Gesture Recognition Using HLAC Features of PARCOR Images and HMM Based Recognizer ................................................................. 422
  T. Kurita and S. Hayamizu
Real Time Gesture Recognition Using Eigenspace from Multi Input Image Sequence......................................................... 428
  T. Watanabe and M. Yachida

Session P8: Classification of Face and Expression
  
  Session Chairs: P. Jonathon Phillips, NIST
  Yoshinori Kuno, Osaka University
  
Gaze Estimation Using Morphable Models ......................................................................................................................... 436
  T.D. Rikert and M.J. Jones
Spotting Segments Displaying Facial Expression from Image Sequences Using HMM ..................................................................................... 442
  T. Otsuka and J. Ohya
Physical Facial Model Based on 3D-CT Data for Facial Image Analysis and Synthesis ......................................................................................... 448
  Y. Aoki and S. Hashimoto
Comparison Between Geometry-Based and Gabor-Wavelets-Based Facial Expression Recognition Using Multi-Layer Perceptron  ......................................................................................... 454
  Z. Zhang, M. Lyons, M. Schuster, and S. Akamatsu

Poster Session PD3: Gesture Tracking and Recognition and Applications
  
Color-Based Hands Tracking System for Sign Language Recognition ......................................................................................... 462
  K. Imagawa, S. Lu, and S. Igi
Manipulative Hand Gesture Recognition Using Task Knowledge for Human Computer Interaction ......................................................................................... 468
  K.-H. Jo, Y. Kuno, and Y. Shirai
Cue Circles: Image Feature for Measuring 3-D Motion of Articulated Objects Using Sequential Image Pair ......................................................................................... 474
  J.-M. Chung and N. Ohnishi
Geometric-Imprints: A Significant Points Extraction Method for the Scan&Track Virtual Environment
S.K. Semwal and J. Ohya

User Localisation for Visually-Based Human-Machine-Interaction
H.-J. Boehme, U.-D. Braumann, A. Brakensiek, A. Corradini, M. Krabbes, and H.-M. Gross

Real-Time Human Posture Estimation Using Monocular Thermal Images
S. Iwasawa, K. Ebihara, J. Ohya, and S. Morishima

Multiple-Human Tracking Using Multiple Cameras
A. Utsumi, H. Mori, J. Ohya, and M. Yachida

A Prototype System for Intuitive Film Planning
M. Hoch

View Alignment with Dynamically Updated Affine Tracking
F. de la Torre, S. Gong, and S. McKenna

PersonSpotter - Fast and Robust System for Human Detection, Tracking and Recognition
J. Steffens, E. Elagin, and H. Neven

3-D Human Motion Sensing by Artificial Retina Chips
H. Kage, K. Tanaka, and K. Kyuma

A New Robust Real-Time Method for Extracting Human Silhouettes from Color Images
M. Yamada, K. Ebihara, and J. Ohya

Design and Evaluation of Gesture Interface of an Immersive Walk-through Application for Exploring Cyberspace
R. Kadobayashi, K. Nishimoto, and K. Mase

MMID: Multimodal Multi-view Integrated Database for Human Behavior Understanding
Y. Nakamura, Y. Kimura, Y. Yu, and Y. Ohita

A Gesture Interface for Human-Robot-Interaction
J. Triesch and C. von der Malsburg

Description and Recognition of Human Gestures Based on the Transition of Curvature from Motion Images
A. Nishikawa, A. Ohnishi, and F. Miyazaki

A Real-Time Continuous Gesture Recognition System for Sign Language
R.-H. Liang and M. Ouhyoung

J.E. Viallet, M. Collobert, R. Feraud, and O. Bernier

Active Hand Tracking
J. Martin, V. Devin, and J.L. Crowley

Realtime Gesture Recognition under the Multi-Layered Parallel Recognition Framework of QVIPS
T. Kirishima, K. Sato, H. Narita, and K. Chihara

Finding Pose of Hand in Video Images: A Stereo-Based Approach
Q. Delamarre and O. Faugeras

Meaningful Gestures for Human Computer Interaction: Beyond Hand Postures
C. Hummels and P.J. Stappers
Priority and Segmentation Algorithm for the 3-D Motion Estimation of Two Heads Partly Overlapped ........................................................................................................597
M.C. Park, M. Kaneko, H. Harashima, and T. Naemura

Session P9: Applications
Session Chairs: Peter Stucki, University of Zurich
Shuji Hashimoto, Waseda University

Skill Recognition ..................................................................................................................604
M. Yamamoto, T. Kondo, T. Yamagiwa, and K. Yamanaka
Iamascope: A Musical Application for Image Processing ....................................................610
S. Fels and K. Mase
A Virtual Mirror Interface Using Real-Time Robust Face Tracking ................................616
T. Darrell, G. Gordon, J. Woodfill, and M. Harville

Author Index ......................................................................................................................623
