SPECIAL ACKNOWLEDGMENT

Data Processing Program for Technical Papers

To maintain good control over the status of the three hundred technical papers submitted for this conference from receipt through distribution to reviewers, return from reviewers, final review and selection, and final disposition, a special data processing program was written to keep track of status and issue timely status reports. Special acknowledgment is made of the work of Mrs. Bernice Bjerke, who wrote the program, and to Aerospace Corporation for underwriting the costs of writing, operating and documenting the system.
