# Table of Contents

20th International Conference on Advanced Information Networking and Applications (AINA 2006)

**Volume 1**

Message from the General Co-Chairs and Program Committee Chairs ............................................................... xvii
Message from the Steering Committee Chair .......................................................................................................... xviii
Committees .................................................................................................................................................... xix
Reviewers ....................................................................................................................................................... xxvii

**Keynote 1: Intelligent WEB Services: Are They Coming?**  
Erich J. Neuhold

Session A1: P2P Networks

Service-Oriented Trustworthiness of Acquaintances in Peer-to-Peer Overlay Networks ........................................ 3  
Kenichi Watanabe, Yoshio Nakajima, Naohiro Hayashibara, Tomoya Enokido,  
Makoto Takizawa, and S.M. Deen

Freelib: Peer-to-Peer-Based Digital Libraries .................................................................................................. 9  
A. Amrou, K. Maly, and M. Zubair

HyMoNet: A Peer-to-Peer Hybrid Multicast Overlay Network for Efficient Live Media Streaming .................. 15  
Bin Chang, Yuanchun Shi, and Nan Zhang

Resources Availability for Peer to Peer Systems ............................................................................................... 21  
Georges Da Costa, Corine Marchand, Olivier Richard, and Jean-Marc Vincent

Session B1: Video-on-Demand and Video Streaming

Popularity Analysis of a Video-on-Demand Service with a Great Variety of Content Types.  
Influence of the Subject and Video Characteristics ......................................................................................... 29  
Xabiel G. Pañeda, R. García, D. Melendi, M. Vilas, and V. García

Internal Popularity of Streaming Video and Its Implication on Caching .............................................................. 35  
Jiang Yu, Chun Tung Chou, Xu Du, and Tai Wang

An Improved Multiple Description Video Coding Method Using GOB Alternation and Low  
Quality Macroblock Update ............................................................................................................................... 41  
Yangli Wang and Chengke Wu

Session C1: Ad Hoc Networks Routing Algorithms

A Novel Geographic Routing Algorithm for Ad Hoc Networks Based on Localized  
Delaunay Triangulation ..................................................................................................................................... 49  
Peng He, Jiandong Li, and Lei Zhou

Ad-Hoc Network Routing Using Co-operative Diversity .................................................................................... 55  
Michael A. Tope, John C. McEachen, and Albert C. Kinney
An Enhanced Zone-Based Routing Protocol for Mobile Ad Hoc Networks Based on Route Reliability.............................................................................................................. ............................................61
Akio Koyama, Yoshitaka Honma, Junpei Arai, and Leonard Barolli

Session D1: Fault Tolerance

Collaborative Fault Diagnosis in Grids through Automated Tests ..................................................................................................................69
Alexandre Duarte, Francisco Brasileiro, Walfredo Cirne, and José Alencar Filho

On the Quality of Service of Failure Detectors Based on Control Theory ..........................................................75
Naixue Xiong, Yan Yang, Jianxun Chen, and Yanxiang He

From Failure Detectors with Limited Scope Accuracy to System-Wide Leadership ..................................................81
Achour Mostefaoui, Sergio Rajasbaum, Michel Raynal, and Corentin Travers

Design of a Notification System for the $\varphi$ Accrual Failure Detector ...............................................................................................87
Naohiro Hayashibara and Makoto Takizawa

Session A2: Multimedia Applications

An Approach to Distributed Intelligent Robot Networking Based on Mental Image Directed Semantic Theory ..........................................................95
Masao Yokota and Genci Capi

A QoS Ontology Language for Web-Services .............................................................................................................101
Ioannis V. Papaioannou, Dimitrios T. Tsesmetzis, Ioanna G. Roussaki, and Miltiades E. Anagnostou

DiVES: A Distributed Support for Networked Virtual Environments ................................................................................107
A. Bonotti, L. Genovali, and L. Ricci

VRE-NET: A QoS-Supported Network Subsystem for Multimedia Applications ........................................................113
Hui Cheng and Steve Goddard

Session B2: Secure Mechanisms and DoS

Practical Group Signatures from RSA ..................................................................................................................211
Shi Cui, Xiangguo Cheng, and Choong Wah Chan

DoS Packet Filter Using DNS Information .............................................................................................................216
Tsuyoshi Chiba, Takashi Katoh, Bhed Bahadur Bista, and Toyoo Takata

Distributed Key Management for Secure Role Based Messaging ........................................................................132
Gansen Zhao, Sassa Otenko, and David Chadwick

Service Discovery with Denial-of-Service Attack Resistance Using Risk Evaluation .............................................138
Tomohiro Nakagawa, Motoharu Miyake, Yu Inamura, and Hiroshi Inamura

Session C2: Routing Algorithms

V6Gene: A Scalable IPv6 Prefix Generator for Route Lookup Algorithm Benchmark .............................................147
Kai Zheng and Bin Liu
A Routing Load Balancing Policy for Grid Computing Environments

Rodrigo Fernandes de Mello, Luciano José Senger, and Laurence Tianruo Yang

Routing Inference Based on Pseudo Traffic Matrix Estimation

Ziqian Liu and Changjia Chen

Hybrid Multipath Routing Algorithms for Load Balancing in MPLS Based IP Network

Kyeongja Lee, Armand Toguyeni, and Ahmed Rahmani

Session D2: Distributed Systems and Models

Target Selection by Similarity Preserve Hash in Distributed System for Geographical Origin Identification of Vegetables

Nobuyoshi Sato, Minoru Uehara, Jin Tamaoka, Koichiro Shimomura, Hirobumi Yamamoto, and Kenichi Kamijo

Evaluation of a Marketable Quality and Profitability Model Considering General Distribution

Valbona Barolli, Heihachiro Fukuda, Leonard Barolli, and Makoto Takizawa

DLB: A Novel Real-Time QoS Control Mechanism for Multimedia Transmission

Jian Li and YeQiong Song

An Integrated Information System for Protein Identification

Hui-Huang Hsu, Chao-Hsun Yang, Cheng-Wet Hsieh, and Chien-Chung Cheng

Session A3: Context-Aware Systems

FollowMe: On Research of Pluggable Infrastructure for Context-Awareness

Jun Li, Yingyi Bu, Shaxun Chen, Xiangping Tao, and Jian Lu

A Context-Aware System Based on Service-Oriented Architecture

Damião R. de Almeida, Cláudio de Souza Baptista, Elvis R. da Silva, Cláudio E.C. Campelo, Hugo F. de Figueirêdo, and Yuri A. Lacerda

Designing a Quality-Aware Discovery Mechanism for Acquiring Context Information

Maria Chantzara, Miltiades Anagnostou, and Efstathios Sykas

An Improved Method of Task Context Switching in OSEK Operating System

Zhaoxue Wu, Hong Li, Zhigang Gao, Jie Sun, and Jiang Li

Efficient Search Mechanisms in a Context Distribution System

Irene Sygkouna, Miltiades Anagnostou, and Efstathios Sykas

Session B3: Intrusion Detection

A Clustering-Partitioning Algorithm to Find TCP Packet Round-Trip Time for Intrusion Detection

Jianhua Yang, Shou-Hsuan Stephen Huang, and Ming D. Wan

Dual RSA Accumulators and Its Application for Private Revocation Check

Hiroaki Kikuchi

An Intrusion Detection System Using Alteration of Data

Fumiaki Nagano, Kohei Tatara, Toshihiro Tabata, and Kouichi Sakurai
Efficient Packet Matching for Gigabit Network Intrusion Detection Using TCAMs
Ming Gao, Kenong Zhang, and Jiahua Lu

Finding the Longest Similar Subsequence of Thumbprints for Intrusion Detection
Ming D. Wan, Shou-Hsuan Stephen Huang, and Jianhua Yang

Session C3: Network Architectures and Modeling
A Component Interconnection Model for Interactive Digital Television Systems
Carlos Silva, Adilson B. Lopes, Glêdson Elias, Guido Lemos, and Maurício Magalhães

Extension of BGP to Support Multi-domain FICC-Diffserv Architecture
Ha Trung Phan and Doan B. Hoang

A Behavioral Characteristics Model for Flexible Distributed System
Akiko Takahashi, Takuo Suganuma, Toru Abe, Yukio Iwaya, and Tetsuo Kinoshita

Performance Modeling of IEEE 802.11 DCF Using Equilibrium Point Analysis
Xingang Wang, Geyong Min, and John E. Mellor

Session D3: Cluster and Grid Computing
Accelerating the HMMER Sequence Analysis Suite Using Conventional Processors
John Paul Walters, Bashar Qudah, and Vipin Chaudhary

Mobile Location Estimation by Density-Based Clustering for NLoS Environments
Cha-Hwa Lin, Juin-Yi Cheng, and Chien-Nan Wu

Sharing Checkpoints to Improve Turnaround Time in Desktop Grid Computing
Patricio Domingues, João G. Silva, and Luis Silva

Online Multi-criterion Optimization for Dynamic Power-Aware Camera Configuration in
Distributed Embedded Surveillance Clusters
A. Maier, B. Rinner, W. Schriebl, and H. Schwabach

D³G: Novel Approaches to Data Statistics, Understanding and Preprocessing on the Grid
Alexander Wöhrer, Lenka Nováková, Peter Brezany, and A Min Tjoa

Session A4: Scheduling
An $O(\log p)$ Algorithm for the Discrete Feedback Guided Dynamic Loop Scheduling
Tatiana Tabirca, Sabin Tabirca, and Laurence T. Yang

A Token-Based Distributed Scheduling for Mesh Networks with Chain Topologies
Ting-Chao Hou, Chien-Yi Wang, and Ming-Chieh Chan

Discrete LQ Rate Control Schedule System for Multimedia Transmission
Xiaofei Zhou and Kenneth Ong

Adaptive Algorithm for Revenue Maximization in WFQ Scheduler
Lari Kannisto, Ari Viinkainen, Jyrki Joutsensalo, and Timo Hämäläinen
Session B4: Multimedia Systems and Protocols

HAMS: Heterogeneous Asynchronous Multi-source Streaming Protocol to Realize Scalable Multimedia Communications ................................................................. 347
  Satoshi Itaya, Naohiro Hayashibara, Tomoya Enokido, and Makoto Takizawa

Enhanced Anonymous Auction Protocols with Freewheeling Bids ................................................................. 353
  Ya-Fen Chang and Chin-Chen Chang

A New MAC Protocol for Wi-Fi Mesh Networks ................................................................................. 359
  Tzu-Jane Tsai, Hsueh-Wen Tseng, and Ai-Chun Pang

Session C4: Agent-Based Systems

Learning Observer Agents ......................................................................................................................... 367
  Elhadi Shakshuki, Abdur Matin, and Abdul Wasey Matin

Dynamic Ontology Integration in a Multi-agent Environment .......................................................................... 373
  S.M. Deen and K. Ponnamperuma

An Empirical Evaluation of a Sentinel Based Approach to Exception Diagnosis in Multi-agent Systems ................................................. 379
  Nazaraf Shah, Kuo-Ming Chao, Nick Godwin, Anne James, and C-F Tasi

Session D4: Sensor Network Applications

Constrained Flooding: A Robust and Efficient Routing Framework for Wireless Sensor Networks .......... 387
  Ying Zhang and Markus Fromherz

SecRout: A Secure Routing Protocol in Sensor Networks ............................................................................. 393
  Jian Yin and Sanjay Madria

A Simple Probabilistic Analysis of Sensor Data Fluctuations in the Real World ........................................ 399
  Kaoru Hiramatsu, Takashi Hattori, Tatsumi Yamada, and Takeshi Okadome

Session A5: Distributed Systems

Role-Based Concurrency Control for Distributed Systems ........................................................................... 407
  Tomoya Enokido and Makoto Takizawa

A Simple, Safe Reconfigurable Object Model with Loosely-Coupled Communication ................................... 413
  Kentaro Oda, Hiroki Najima, Yoshihiro Yasutake, and Takaichi Yoshida

PARM: A Physically-Aware Reference Model for Overlay Internetworking ................................................. 419
  Hanh Le, Doan Hoang, and Andrew Simmonds

Coordination Design ......................................................................................................................................... 425
  Hilda Tellioğlu

Session B5: Multimedia Modeling and Applications

A Distributed Virtual Reality Framework for Korea-Japan High-Speed Network Testbed ................................ 433
  Hiroaki Nishino, Shinji Yamabiraki, Yong-Moo Kwon, Yoshihiro Okada, and Kouichi Utsumiya
Large-Scale Media Delivery Using a Semi-reliable Multicast Protocol
  Christiane M. Bortoleto, Lau Cheuk Lung, and Frank Siqueira

Equation Based Congestion Control for Video Transmission over WCDMA Networks
  Antonios Alexiou, Dimitrios Antonellis, and Christos Bouras

Remote Trust with Aspect-Oriented Programming
  Paolo Falcarin, Riccardo Scandariato, and Mario Baldi

Session C5: Multicasting

Scaling Multicast Communications by Tracking Feedback Senders
  Achmad Husni Thamrin, Hiroyuki Kusumoto, and Jun Murai

A Near-Optimal Multicast Scheme for Mobile Ad Hoc Networks Using a Hybrid Genetic Algorithm
  Chien-hung Liu, Tzu-Chiang Chiang, and Yueh-Min Huang

Video Transcoding Using Network Processors to Support Dynamically Adaptive Video Multicast
  Mohammad Shorfuzzaman, Rasit Eskicioglu, and Peter Graham

Multicast Routing Using Genetic Algorithm Seen as a Permutation Problem

Session D5: Wireless Networks

A Link Layer Assisted Fast Handoff Scheme Using the Alternative Path Approach
  Chung-Ming Huang, Meng-Shu Chiang, and Jin-Wei Lin

smartAR: A Proposal of IP Micro-mobility Protocol for Single and Simultaneous Movements Scenario
  Giuseppe De Marco and Leonard Barolli

Adaptive Timeout Policies for Wireless Links
  George Xylomenos and Christos Tsilopoulos

An Adaptive Multipath Protocol for Efficient IP Handoff in Mobile Wireless Networks
  Ken C.K. Tsang, Roy S.C. Ho, Mark C.M. Tsang, Cho-Li Wang, and Francis C.M. Lau

Session A6: Mobile and Wireless Ad Hoc Networks

Secure and Continuous Management of Heterogeneous Ad Hoc Networks
  Arjan Durresi, Vijay Bulusu, Vamsi Paruchuri, and Leonard Barolli

An Efficient Coverage-Based Flooding Scheme for Geocasting in Mobile Ad Hoc Networks
  Larry Hughes and Atekeh Maghsoudlou

Efficient Packet Scheduler for Wireless Ad Hoc Networks with Switched Beam Antennas
  Gilles Grimaud, Antoine Honoré, Hervé Meunier, and David Simplot-Ryl

MUDSOM: Mobile User Database Static Object Mining
  John Goh and David Taniar

MIS Protocol for Secure Connection and Fast Handover on Wireless LAN
  Hitoshi Morioka, Hiroshi Mano, Motoyuki Ohmori, and Masataka Ohta
Session B6: Network Analysis

Time Scaling Analysis of Jitter Propagation Property ................................................................. 541
Takuo Nakashima

BPB: A Method for Transparently Obtaining Network Path Characteristics Close to the Sender .......... 547
Sven Hessler, Jean-Alexander Müller, and Michael Welzl

A Fast Adaptive Statistical Genetic Motion Search Algorithm for H.264/AVC ........................................ 553
Tianbing Xu and Weidong Chen

Performance Analysis of Buffer Allocation Schemes under Heterogeneous Traffic with Individual Thresholds ........................................................................................................ 559
Lan Wang, Geyong Min, and Irfan Awan

The Packet Loss Effect on MPEG Video Transmission in Wireless Networks ........................................ 565
Cheng-Han Lin, Chih-Heng Ke, Ce-Kuen Shieh, and Naveen K Chilamkurthy

Session C6: Internet Applications

Bandwidth Allocation and Pricing in Multimode Network .................................................................. 573
Jyrki Joutsensalo, Ari Viinikainen, Mika Wikström, and Timo Hämäläinen

Traffic Distribution over Equal-Cost-Multi-paths Using LRU-Based Caching with Counting Scheme ........ 579
Wei Lin, Bin Liu, and Yi Tang

Context and Time Dependent Risk Based Decision Making ................................................................ 585
Omar Khadeer Hussain, Elizabeth Chang, Farookh Khadeer Hussain, Tharam S. Dillon, and Ben Soh

An Efficient Transaction Commit Protocol for Composite Web Services ............................................. 591
Muhammad Younas, Kuo-Ming Chao, Chi-Chun Lo, and Yinsheng Li

A Real Trading Model Based Price Negotiation Agents ....................................................................... 597
Yoshizo Ishihara, Runhe Huang, and Jianhua Ma

Session D6: Network Applications and Algorithms

A Mini-slot Router Architecture for TDM Wavelength Optical WDM Networks ................................. 605
Yoong Cheah Huei and Pung Hung Keng

Adaptive Object Placement in Object-Based Storage Systems with Minimal Blocking Probability ........ 611
Dan Feng and Lingjun Qin

Semi-blind Joint Data Equalization and Channel Estimation for Meteor Burst Communication.................. 617
Zan Li, Jian Shen, Jueting Cai, and Jueping Cai

Bounding Delay through a Buffer Using Dynamic Queue Thresholds ............................................... 623
L. Guan, M.E. Woodward, and I.U. Awan

On Performance of Parallel iSCSI Protocol for Networked Storage Systems ....................................... 629
Qing (Ken) Yang
Session A7: Sensor Networks

Statistically Delay-Guaranteed, Energy-Optimal Data Delivery Scheme in Wireless Sensor Networks .......................................................... 637
Seungkyu Bac and Cheeha Kim

Distributed Tuning Attempt Probability for Data Gathering in Random Access Wireless Sensor Networks ............................................................... 643
Haibo Zhang and Hong Shen

Virtual Grid Spatial Reusing Algorithm for MAC Address Assignment in Wireless Sensor Network .............................................................. 649
Ye Tian, Min Sheng, and Jiandong Li

Session B7: Ubiquitous Systems

A Dangerous Location Aware System for Assisting Kids Safety Care ............................................................................................................ 657
Katsuhiro Takata, Jianhua Ma, and Bernady O. Apduhan

A Ubiquitous Education Support Method Based on Analysis of Learning Patterns Using Rule-Based Reasoning ........................................... 663
Shengguo Sun, Mizuo Kansen, Qiu Han, Tongjun Huang, Aiguo He, and Zixue Cheng

Enhancing Ontology-Based Context Modeling with Temporal Vector Space for Ubiquitous Intelligence .................................................. 669
Shermann S.M. Chan and Qun Jin

Performance-Related Ontologies for Ubiquitous Intelligence Based on Semantic Web Applications .......................................................... 675
Isaac Lera, Carlos Juiz, and Ramon Puigjaner

Session C7: Next Generation Networks

Efficient Error Recovery for Multimedia Data Transmission over 3G Cellular Broadcast Networks ......................................................... 683
Joonho Lee, Kyungtae Kang, Yongwoo Cho, Jumu Kim, and Heonshik Shin

Network and System Performance Management for Next Generation Networks ........................................................................................ 689
Olli Alanen, Timo Hämäläinen, and Eero Wallenius

Parallel “GroupBy-Before-Join” Query Processing for High Performance Parallel/Distributed Database Systems ................................ 693
David Taniar and Wenny Rahayu

Session D7: P2P Systems

The Design and Implementation of a P2P-Based Composite Event Notification System ............................................................................. 701
Simon Courtenage and Steven Williams

An Interest-Based Architecture for Peer-to-Peer Network Systems ........................................................................................................ 707
Wen-Tsuen Chen, Chi-Hong Chao, and Jeng-Long Chiang

Multi-node Global Directory Construction in Peer-to-Peer Systems ....................................................................................................... 713
InSung Kang, HongSoo Kim, SungJin Choi, MaengSoon Baik, and ChongSun Hwang
Session A8: Dependability

Supporting Runtime Reconfiguration on Network Processors ................................................................. 721
Kevin Lee and Geoffrey Coulson

IN-Managed SIP Network: A Case Study in Network Convergence .......................................................... 727
Natalia Kryvinska and Do van Thanh

Emergent Topology Control Based on Division of Labour in Ants .............................................................. 733
Peter Janacik, Tales Heimfarth, and Franz Rammig

Session B8: Wireless Ad Hoc Network Applications

A Cross-Layer Feature for an Efficient Forwarding Strategy in Wireless Ad Hoc Networks ......................... 741
Lamia Romdhani and Christian Bonnet

On Avoiding RTS Collisions for IEEE 802.11-Based Wireless Ad Hoc Networks ....................................... 747
Kuei-Ping Shih, Chih-Yung Chang, Hung-Chang Chen, and Chien-Wen Chang

Location Management of Replicas Considering Data Update in Ad Hoc Networks .................................... 753
Takahiro Hara

Tuning Rules in TCP Congestion Control on the Mobile Ad Hoc Networks ............................................... 759
Shin-Jer Yang and Yung-Chieh Lin

Session C8: Web-Based Systems

Querying Registry-Published Mathematical Web Services ............................................................................ 767
Rebhi Baraka and Wolfgang Schreiner

An Analysis of Internet Data Update Behaviors .......................................................................................... 773
John P. Sustersic, Ali R. Hurson, and Robert M. Nickel

Word Sense Determination Using WordNet and Sense Co-occurrence ...................................................... 779
Che-Yu Yang and Jason C. Hung

On Promoting Ad Hoc Collaboration among Messengers ........................................................................ 785
Zakaria Maamar, Qusay H. Mahmoud, and Abdelouahid Derhab

Fuzzy Consensus on QoS in Web Services Discovery .............................................................................. 791
Wei-Li Lin, Chi-Chun Lo, Kuo-Ming Chao, and Muhammad Younas

Session D8: QoS

A Study for Providing Better Quality of Service to VoIP Users ................................................................ 799
Y. Bai and M.R. Ito

Experiments with QoS-Aware Gaming-on-Demand Service .................................................................... 805
Jukka-Pekka Laulajainen, Tiia Sutinen, and Sari Järvinen

Probabilistic QoS Routing in WiFi P2P Networks ....................................................................................... 811
S. Rajasekhar, I. Khalil, and Z. Tari
Providing Quality of Service in IEEE 802.11 WLAN

Chunming Liu and Chi Zhou

Session A9: Real Time Systems

The Impact of End-to-End vs. Link-Layer Mechanisms on Real-Time Performance over Wireless Links

Panagiotis Papadimitriou, Vassilis Tsaoussidis, and Ageliki Tsioliaridou

Combinatorial Fusion Criteria for Real-Time Tracking

D. Frank Hsu, Damian M. Lyons, and Jizhou Ai

Session B9: Access Control and Congestion Control

Call Admission Control Scheme with Bandwidth Borrowing in Integrated Services Network

Tae Chul Hong, Kun Seok Kang, Do-Seob Ahn, and Ho-Jin Lee

An Enhanced Congestion Control Mechanism in InfiniBand Networks for High Performance Computing Systems

Shihang Yan, Geyong Min, and Irfan Awan

Vulnerabilities of Internet Access Mechanisms from Mobile Ad Hoc Networks

Gautam Das, M. Fazio, M. Villari, and A. Puliafito

Session C9: Security and Authentication

Methods to Forge ElGamal Signatures and Determine Secret Key

Jing-mei Liu, Xiang-guo Cheng, and Xin-mei Wang

Authenticating Video Streams

Shintaro Ueda, Shin-ichiro Kaneko, Nobutaka Kawaguchi, Hiroshi Shigeno, and Ken-ichi Okada

On Compromising Password-Based Authentication over HTTPS

Takamichi Saito, Ryosuke Hatsugai, and Toshiyuki Kito

Improvement of a Convertible Undeniable Partially Blind Signature Scheme

Song Han, Elizabeth Chang, Tharam Dillon, and Jie Wang

Session D9: Network Measurement and Management

Feedback-Based Worm Containment

Sanjeev Dwivedi

A Bulk-Retrieval Technique for Effective Remote Monitoring in a Mobile Environment

Glenn Mansfield Keeni, Kazuhide Koide, Takeo Saitoh, and Norio Shiratori

SENS: A Scalable and Expressive Naming System Using CAN Routing Algorithm

Hoaison Nguyen, Toshio Oka, Hiroyuki Morikawa, and Tomonori Aoyama

ACTM: Anomaly Connection Tree Method to Detect Silent Worms

Nobutaka Kawaguchi, Yasuke Azuma, Shintaro Ueda, Hiroshi Shigeno, and Ken-ichi Okada
Session A10: Mobile Network Algorithms and Applications

Novel WPDM System Based on Channel Identification for Multipath Fading Channels .............................................. 909
  Lei Zhou, Jiandong Li, and Peng He

Adaptive Power Control Using Channel State Information Gradient for Mobile Radio Systems ...................................... 915
  L. Wang, C.C. Tsimenidis, and A.E. Adams

Multi-hop Mesh Networking for UWB-Based 802.15.3 Coverage Extension .......................................................... 920
  Zhong Fan

Optimized Integrated Registration Procedure of Mobile IP and SIP with AAA Operations ............................................. 926
  Peng Xu, Jian-Xin Liao, Xiao-Ping Wen, and Xiao-Min Zhu

A New Approach for Locating Mobile Stations under the Statistical Directional Propagation Model ........................... 932
  Kenneth Man-Kin Chu, Joseph Kee-Yin Ng, and Karl R.P.H. Leung

Session B10: Middleware Systems and Architectures

Using Temporary Properties to Provide Leasing Functionality in CORBA ................................................................. 941
  Markus Aleksy and Axel Korthaus

Performance Analysis of iSCSI Middleware Optimized for Encryption Processing in a Long-Latency Environment ......................................................... 947
  Kikuko Kamisaka, Saneyasu Yamaguchi, and Masato Oguchi

An Integrated Middleware Architecture for Digital Data Broadcasting ........................................................................ 953
  Ha Yoon Song and Hyun-Cheol Hwang

QoS Specification and Management in a Middleware for Distributed Multimedia Systems .................................... 959
  Adilson Lopes, Frederico Amaro, Glêdson Elias, Guido Lemos, and Mauricio F. Magalhães

A Flexible Middleware System for High Definition Omni-directional Video Transmission over IP Network .................. 965
  Yuya Maita, Koji Hashimoto, and Yoshitaka Shibata

Session C10: Network Security

A Scalable Anonymous Server Overlay Network ........................................................................................................... 973
  Henry Tsai and Aaron Harwood

Secrecy Analysis of Purchase Transaction in Electronic Purses .................................................................................... 979
  Il-Gon Kim, Hyun-Seok Kim, Ji-Yeon Lee, Inhye Kang, and Jin-Young Choi

Towards an Ontology-Based Security Management .................................................................................................... 985
  Bill Tsoumas and Dimitris Gritzalis

Session D10: P2P Applications

Peer-to-Peer Usage Analysis: A Distributed Mining Approach ...................................................................................... 993
  Florent Masseglia, Pascal Poncelet, and Mgueulonne Teisseire

Peer-Tree: A Hybrid Peer-to-Peer Overlay for Service Discovery ................................................................................ 999
  Jing Tie, Hai Jin, Shengli Li, Xuanhua Shi, Hanhua Chen, and Xiaoming Ning
A Demand and Contribution Based Bandwidth Allocation Mechanism in P2P Networks:
A Game-Theoretic Analysis .............................................................. 1005
Huiye Ma and Ho-fung Leung

Load Sharing in Peer-to-Peer Networks Using Dynamic Replication................................. 1011
S. Rajasekhar, B. Rong, K.Y. Lai, I. Khalil, and Z. Tari

Author Index .................................................................................. 1017
