## Table of Contents

*21st IEEE International Conference on Advanced Information Networking and Applications (AINA 2007)*

Message from the General Chairs ................................................................. xv
Message from the Program Chairs ............................................................... xvi
Message from the Steering Chair ............................................................... xvii
Organizing Committee .............................................................................. xviii
Reviewers ................................................................................................. xxix

---

### Keynote Speeches

- **Public Computing—Challenges and Solutions** ........................................ 1  
  Yi Pan, Georgia State University, USA
- **Filling the Generation Gap—Convergence in Wireless Networking** .......... 3  
  Victor C.M. Leung, University of British Columbia, Canada
- **Designing the Future Internet** ............................................................... 5  
  Arjan Durresi, Louisiana State University, USA

### Session 1A: Ad-Hoc Networks

- **Experimental Performance Evaluation of a Pro-Active Ad-hoc Routing Protocol in Out- and Indoor Scenarios** ............................................ 7  
  Giuseppe De Marco, Makoto Ikeda, Tao Yang, and Leonard Barolli
- **Power and Delay Analysis of the WEAC Protocol Based MANET Under Video Transport** ................................................................. 15  
  Hafiz M. Asif and Tarek Sheltami
- **A Distributed Correlative Power Control Scheme for Mobile Ad hoc Networks Using Prediction Filters** ..................................................... 23  
  Basel Alawieh, Chadi Assi, and Wessam Afib

### Session 1B: Web Services and Applications

- **A Multi-Layer and Multi-Perspective Approach to Compose Web Services** ............................................................... 31  
  Djamil Benslimane, Zakaria Maamar, Yehia Taher, Mohammed Lahkim, Marie-Christine Fauvet, and Michael Mrissa
- **Deployment of Service-Oriented Applications Integrating Physical and IT Systems** ................................................................. 38  
  Antonin Chazalet and Philippe Lalanda
- **Optimizing Performance of Web Service Providers** ................................. 46  
  Dmytro Dyachuk and Ralph Deters
Session 1C: Network Security and Trustworthy Systems

TS-Trees: A Non-Alterable Search Tree Index for Trustworthy Databases on Write-Once-Read-Many (WORM) Storage .................................................................54
   Jian Pei, Man Ki Mag Lau, and Philip S. Yu
Load-Balancing SSL Cluster Using Session Migration ..................................................62
   Ryosuke Hatsugai and Takamichi Saito
Agri-Food Traceability Management Using a RFID System with Privacy Protection .............68
   P. Bernardi, C. Demartini, F. Gandino, B. Montrucchio, M. Rebaudengo, and E.R. Sanchez

Session 1D: P2P Computing

A Class-Based Search System in Unstructured P2P Networks ............................................76
   Juncheng Huang, Xuqi Li, and Jie Wu
DHTs over Peer Clusters for Distributed Information Retrieval ...........................................84
   Odysseas Papapetrou, Wolf Siberski, Wolf-Tilo Balke, and Wolfgang Nejdl
OntSum: A Semantic Query Routing Scheme in P2P Networks Based on Concise Ontology Indexing .................................94
   Juan Li and Son Vuong

Session 2A: Scalable Computing

Designing Configurable Publish-Subscribe Scheme for Decentralised Overlay Networks ................................................102
   Lipo Chan and Shanika Karunasekera
Fighting Erosion in Dynamic Large-Scale Overlay Networks ...........................................110
   R. Baldoni, S. Bonomi, L. Querzoni, A. Rippa, S. Tucci Piergiovanni, and A. Virgillito
Performance Analysis of an Active Flow Control Mechanism with Entry Threshold
in InfiniBand Network .........................................................................................................118
   Shihang Yan, Irfan Awan, and Geyong Min

Session 2B: Agent-Based Computing

Fault Detection and Recovery in a Transactional Agent Model ...........................................126
   Youhei Tanaka, Naohiro Hayashibara, Tomoya Enokido, and Makoto Takizawa
Agent Based Approach to Minimize Energy Consumption for Border Nodes
in Wireless Sensor Network ..............................................................................................134
   Elhadi Shakshuki and Haroon Malik
A Virtual Travel Agent System for M-Tourism with Semantic Web Service Based Design
and Implementation .............................................................................................................142
   Yves T.F. Yueh, Dickson K.W. Chiu, Ho-Fung Leung, and Patrick C.K. Hung

Session 2C: Distributed Algorithms

Design of a Decentralized Algorithm for Deploying Services within Networked Nodes ............150
   Emir Hammami and Thierry Villemur
Grid-Aware Evaluation of Regular Path Queries on Spatial Networks ................................158
   Zhuo Miao, Dan Stefanescu, and Alex Thomo
The Effect of Node Failures in Substar Reliability of a Star Network—A Combinatorial Approach .................................166
   Shahram Latifi and Venka Palaniappan
Session 2D: Distributed Data Management

Role-Based Concurrency Control in a Subject- and Purpose-Oriented (SPO) View................................................................. 171
  Tomoya Enokido, Valbana Barolli, and Makoto Takizawa
Multiple Entity Types Wireless Broadcast Database System.................................................................................................. 179
  Agustinus Borgy Waluyo, Feng Zhu, David Taniar, Bala Srinivasan, and Wenny Rahayu
Improving Distributed Join Efficiency with Extended Bloom Filter Operations ..................................................................... 187
  Loizos Michael, Wolfgang Nejdl, Odysseas Papapetrou, and Wolf Siberski

Session 3A: Wireless Sensor Networks I

LENO: LEast Rotation Near-Optimal Cluster Head Rotation Strategy in Wireless Sensor Networks ................................. 195
  Yong Wu, Zhong Chen, Qi Jing, and Yong-Cai Wang
A Tree-Based Energy-efficient Algorithm for Data-Centric Wireless Sensor Networks ...................................................... 202
  Yean-Fu Wen, Frank Yeong-Sung Lin, and Wen-Cheng Kuo
A Hierarchical Key Establishment Scheme for Wireless Sensor Networks ................................................................. 210
  Jamil Ibriq and Imad Mahgoub
A Distributed and Dynamic Data Gathering Protocol for Sensor Networks ............................................................. 220
  Hüseyin Özgür Tan, Ibrahim Körpeoğlu, and Ivan Stojmenović

Session 3B: Autonomic Computing and Systems

Considering Runtime Restrictions in Self-Healing Distributed Systems.................................................................................. 228
  Christoph Danne, Viktor Dück, Benjamin Kloepper, and Matthias Tichy
Detecting Anomalous Events in Ubiquitous Sensor Environments Using Bayesian Networks and Nonparametric Regression ............................................................................................................. 236
  Sun Yong Kim, Miyuki Imada, and Masakatsu Ohta
Collision Prevention Using Group Communication for Asynchronous Cooperative Mobile Robots ...................................... 244
  Rami Yared, Xavier Défago, and Matthias Wiesmann
Modeling for NASA Autonomous Nano-Technology Swarm Missions and Model-Driven Autonomic Computing ................................................................. 250
  Michael Hinchey, Yuan-Shun Dai, C. A. Rouff, James L. Rasha, and Mingrui Qi

Session 3C: Innovative Networking

A Protocol vSCSI for Ethernet-Based Network Storage ........................................................................................................... 258
  Dan Feng, Jun Ye, and Zhan Shi
Optimization of Update Intervals in Dead-Peer-Detection Using Adaptive Fuzzy Logic ......................................................... 266
  Vesselin Tzvetkov
Improving Throughput-delay Performance by Merged Packet Routing in Wirelessly Controlled Interactive Power Networks ....................................................................................................................... 274
  Muhammad Tahir and Sudip K. Mazumder
Event Based Extensible Interactive Transparent Networking: Performance Study with Fast TCP Principles ......................................................... 281
  Javed I. Khan, Pradeep K. Punnam, and Raid Zaghal

Session 3D: Multimedia Systems and Protocols

SIP Extensions to Support (Micro)payments ...................................................................................................................... 289
  Antonio Ruiz-Martínez, Juan A. Sánchez-Laguna, and Antonio F. Gómez-Skarmeta
Session 4A: Distributed Data Processing

Efficient Query Processing for Large XML Data in Distributed Environments ........................................................... 317
Hiroto Kurita, Kenji Hatano, Jun Miyazaki, and Shunsuke Uemura
Selective Querying in Sensor Networks: Parameters and Strategies ........................................................................... 323
John Meyer, Fatma Mili, and Imad Elhajj
DHHT-RAID: A Distributed Heterogeneous Scalable Architecture for Dynamic Storage Environments ............... 331
Gunmar Schomaker
On Rejecting Outliers by Smirnov Test for Massive Data Input System in Vegetable Geographical Origin Identification System .......................................................... 340
Nobuyoshi Sato, Minoru Uehara, Koichiro Shimomura, Hiroyuki Yamamoto, and Kenichi Kamiyo

Session 4B: Mobile Systems and Applications

QOMET: A Versatile WLAN Emulator ..................................................................................................................... 348
Razvan Beuran, Lan Tien Nguyen, Khin Thida Latt, Junya Nakata, and Yoichi Shinoda
A Proxy-Based Integrated Cache Consistency and Mobility Management Scheme for Mobile IP Systems ............... 354
Weiping He, Ing-Ray Chen, and Baoshan Gu
On-Demand Real-Time Information Dissemination: A General Approach with Fairness, Productivity and Urgency ........................................................................... 362
Chih-Lin Hu

Session 4C: Ubiquitous Computing and Systems

Geo-Linda: A Geometry Aware Distributed Tuple Space ............................................................................................. 370
Julien Pauty, Paul Couderc, Michel Banâtre, and Yolande Berbers
Home-Explorer: Search, Localize and Manage the Physical Artifacts Indoors .......................................................... 378
Bin Guo and Michita Imai
Automating Overlay Networks Management ........................................................................................................... 386
I. Al-Oqily and A. Karmouch
4VP*: A Novel Meta OS Approach for Streaming Programs in Ubiquitous Computing ........................................ 394
Yaoxue Zhang and Yuezhi Zhou

Session 4D: Security and Intrusion Detection

A Stateful Real-Time Intrusion Detection System for High-Speed Network .............................................................. 404
Sourour Meharouech, Adel Bouhoula, and Tarek Abbes
Detection of Silent Worms Using Anomaly Connection Tree ................................................................. 412
   Nobutaka Kawaguchi, Hiroshi Shigeno, and Kenichi Okada
Towards Quantifying the (In)Security of Networked Systems ............................................................ 420
   Xiaohu Li, T. Paul Parker, and Shouhuai Xu
A Cost-Sensitive Model for Preemptive Intrusion Response Systems .................................................. 428
   Natalia Stakhanova, Samik Basu, and Johnny Wong

Session 5A: Mobile Networks

VIP: A Virtual Interface-Based Approach for Vertical Handover in Single-Subnet Networks ...................... 436
   Wei-Cheng Xiao, Shih-Hsuan Tang, and Cheng-Fu Chou
Cross Layer Fast Handoff for SIP .......................................................................................................... 443
   Eunchul Cha, Kyounghee Lee, and Myungchul Kim
An Application-driven MAC-layer Buffer Management with Active Dropping for Real-Time Video Streaming in 802.16 Networks ................................................................. 451
   James She, Fen Hou, and Pin-Han Ho

Session 5B: Ubiquitous Networking

A Data Fusion Approach to Mobile Location Estimation based on Ellipse Propagation Model within a Cellular Radio Network ................................................................................................. 459
   Junyang Zhou and Joseph Kee-Yin Ng
Traffic Flow Based EDCF for QoS Enhancement in IEEE 802.11e Wireless LAN ...................................... 467
   Eunjun Choi, Wonjun Lee, and Timothy K. Shih
A Mobility-Aware and Cross-Layer Based Middleware for Mobile Ad Hoc Networks ............................. 474
   Mieso K. Denko, Elhadi Shakshuki, and Haroon Malik

Session 5C: Security and Authentication

One-Pass Authentication and Key Agreement Procedure in IP Multimedia Subsystem for UMTS ............... 482
   Chung-Ming Huang and Jian-Wei Li
Specifying Kerberos over EAP: Towards an Integrated Network Access and Kerberos Single Sign-on Process ...................................................................................................................... 490
   Saber Zrelli and Yoichi Shinoda
FAST: Fast Autonomous System Traceback ............................................................................................. 498
   Vamsi Paruchuri, Arjan Durresi, and Leonard Barolli

Session 5D: Wireless Sensor Networks II

Uniformity and Efficiency of a Wireless Sensor Network’s Coverage ..................................................... 506
   Md Ashiqur Rahman and Sajid Hussain
An Optimal Approach for Image Transmission in Multi-Rate Wireless Sensor Network ............................. 511
   Honggang Wang, Dongming Peng, Wei Wang, and Hamid Sharif
Collaborative Signal Reinforcement in Sensor Networks ........................................................................... 519
   Tingting Meng and Peter Athanas
Session 6A: Localization for Wireless Sensor Networks

An Adaptive Localized Algorithm for Multiple Sensor Area Coverage ................................................................. 525
  Antoine Gallais and Jean Carle
Efficient Minimum Cost Area Localization for Wireless Sensor Network with a Mobile Sink ............................. 533
  Saad Ahmed Munir, Wenbin Yu, and Jian Ma
Localization in Time and Space for Sensor Networks .......................................................................................... 539
  Horacio A.B.F. de Oliveira, Eduardo F. Nakamura, Antonio A.F. Loureiro, and Azzedine Boukerche

Session 6B: Group Communication Systems

An Authentication and Access Control Framework for Group Communication Systems in Grid Environment .......................................................... 547
  Deqing Zou, Laurence T. Yang, Weizhong Qiang, Xueguang Chen, and Zongfen Han
Depth-Latency Tradeoffs in Multicast Tree Algorithms ......................................................................................... 555
  Michael T. Helmick and Fred S. Annexstein
A Distributed Coordination Protocol for a Heterogeneous Group of Peer Processes ........................................ 565
  Ailixier Aikebaier, Naohiro Hayashibara, Tomoya Enokido, and Makoto Takizawa

Session 6C: Mobile QoS Management

Quantitative Analysis of Location Management and QoS in Wireless Mobile Networks ........................................ 573
  Yan Zhang, Laurence T. Yang, Jianhua Ma, Jun Zheng, Mingzuo Zhou, and Shaoqiu Xiao
Multipath Cellular Network Architecture for Quality Assured Multimedia Delivery ........................................... 580
  Abdullah Al Yusuf and Manzur Murshed
Three Dimension QoS Deviation Based Scheduling in Adaptive Wireless Networks ........................................... 588
  Ramtin Kazemi, Mohammad Hossien Yaghmaee, and Jalil Chiti-zadeh

Session 6D: Pervasive Computing and Systems

Pervasive Service Composition in the Home Network ............................................................................................. 596
  André Bottaro, Anne Gérodolle, and Philippe Lalanda
Fuzzy Recommendation towards QoS-Aware Pervasive Learning ......................................................................... 604
  Zhiwen Yu, Norman Lin, Yuichi Nakamura, Shoji Kajita, and Kenji Mase
UMP-PerComp: A Ubiquitous Multiprocessor Network-Based Pipeline Processing Framework for Pervasive Computing Environments ................................................................. 611
  Mitsunori Kubo, Baoliu Ye, Arata Shinozaki, Takayuki Nakatomi, and Minyi Guo

Session 7A: Wireless Sensor Networks III

Evaluating the Feasibility of Traffic-Based Intrusion Detection in an 802.15.4 Sensor Cluster .................................. 619
  Vojislav Mišić and Jobaida Begum
Integrated Design of Grid-Based Routing in Wireless Sensor Network ................................................................. 625
  Yen-Wen Chen and Chin-Shiang Kuo
Near-Optimal Node Clustering in Wireless Sensor Networks for Environment Monitoring .................................... 632
  Dawei Xia and Natalija Vlajic
On Slave-Slave Bridging with Non-Acknowledged GTS Access in 802.15.4 Beacon Enabled Networks ..................... 642
  Jelena Mišić
Session 7B: Dependable Computing

T2CP-AR: A System for Transparent TCP Active Replication
Narjess Ayari, Denis Barbaron, Laurent Lefevre, and Pascale Primet

Policy-based Adaptable Service Systems Architecture
Paramai Supadulchai and Finn Arve Aagesen

Efficient Analysis of Systems with Multiple States
Liudong Xing

Anonymous Stabilizing Leader Election Using a Network Sequencer
Matthias Wiesmann and Xavier Défago

Session 7C: Innovative Systems and Applications

Delfos: The Oracle to Predict Next Web User’s Accesses
B. de la Ossa, J.A. Gil, J. Sahuquillo, and A. Pont

Symbiotic Audio Communication on Interactive Transport
Javed I. Khan and Olufunke I. Olaleye

Self-Adapting and Agent-Based Personalized Courseware Model
Cao Jiuxin, Mao Bo, Luo Junzhou, and Ge Liang

Trusted Gossip: A Rumor Resistant Dissemination Mechanism for Peer-to-Peer
Information Sharing
Arindam Mitra and Muthucumaru Maheswaran

Session 7D: Multimedia Modeling and Applications

3D-Wavelet Based Secure and Scalable Media Streaming in a Central-Controlled P2P Framework
Zhijia Chen, Hao Yin, Chuang Lin, and Lu Ai

On the Design of an Efficient Architecture for Supporting Large Crowds of Autonomous Agents
Miguel Lozano, Pedro Morillo, Juan M. Orduña, and Vicente Cavero

Spatial-Temporal Method for Image Restoration in Aged Motion Pictures
Rong-Chi Chang and Timothy K. Shih

A Visual Bookmark Sharing System Considering Retrieval Scenes and its Evaluations
Shoichi Nakamura, Hirokazu Shirai, Hiroaki Kaminaga, Setsuo Yokoyama, and Youzou Miyadera

Session 8A: Internet and Web Computing Systems

Packet Scheduling for the Proportional Differentiation Model Based on Measurement Windows
Alencar de Melo, Mauricio Ferreira Magalhães, and Juan Manuel Adán-Coello

A Bridge Linking Ubiquitous Devices and Grid Services
Hiroyuki Morohoshi, Runhe Huang, Jianhua Ma, and Ying Huang

Implementing a Peer-to-Peer Web Browser for Publishing and Searching Web Pages on Internet
Heverson Borba Ribeiro, Lau Cheuk Lung, Altair Olivo Santin, and Neander Larsen Brisola

Robust and Large Scale Distributed Disaster Information System over Internet
Hiroyuki Echigo, Hiroaki Yuze, Tsuyoshi Hoshikawa, Kazuo Takahata, Nobuhiro Sawano, and Yoshitaka Shibata
Session 8B: Network Control and Performance Evaluation

Design and Buffer Sizing of TCAM-Based Pipelined Forwarding Engines ............................................................. 769
Yufeng Li, Han Qiu, Xiaozhuo Gu, Julong Lan, and Jianwen Yang
Integrated TDM in Single-Hop Slotted All-Optical OPS Networks............................................................................ 777
Akbar Ghaffar Pour Rahbar and Oliver Yang
Experimental Analysis of Peer-to-Peer Streaming in Cellular Networks................................................................. 784
Almudena Diaz, Pedro Merino, Laura Panizo, and Álvaro M. Recio
Comparison of Throughput Performance for the IEEE 802.11a and 802.11g Networks........................................... 792
Puttipong Mahasukhon, Michael Hempel, Song Ci, and Hamid Sharif

Session 8C: Communication Technology

Analysis of the Thresholds for Regular Low-Density Erasure Codes ........................................................................... 800
Jianjun Mu and Xinmei Wang
An Improved Analysis on the Loss Performance of Optical Bursts ........................................................................... 805
Mushi Jin and Oliver W.W. Yang
Stepwise Log Summarizing Method for Real-Time Network Event Handling ......................................................... 812
Masahiro Nagao, Gen Kitagata, Takuo Suganuma, and Norio Shiratori
Optimal Training Sequences for Frequency-Selective MIMO Correlated Fading Channels........................................... 820
Jiyong Pang, Jiandong Li, Linjing Zhao, and Zhuo Lu

Session 8D: Intelligent and Semantic Computing

Using SPC Table to Strengthen SCORM Compliant Assessment ................................................................................. 825
Wen-Chih Chang, Hui-Huang Hsu, Timothy K. Shih, Liang-Yi Chung, and Yu-Wen Yen
A Service Oriented Architecture for Extracting and Extending Sub-Ontologies in the Semantic Grid ...................... 831
Andrew Flahive, Wenny Rahayu, David Taniar, Bernady O. Apduhan, Carlo Wouters, and Tharam Dillon
A P2P Network Protocol for Efficient Choreography of Web Services ...................................................................... 839
Muhammad Younas, Irfan Awan, Robert Holton, and David Duce
Combinatorial Fusion Criteria for Robot Mapping ...................................................................................................... 847
Damian M. Lyons, D. Frank Hsu, Qiang Ma, and Liang Wang

Session 9A: Wireless Sensor Networks IV

How to Study Wireless Mesh Networks: A Hybrid Testbed Approach ...................................................................... 853
Alexander Zimmermann, Mesut Günes, Martin Wenig, Ulrich Meis, and Jan Ritzerfeld
Collaborative Synchronization for Signal Reinforcement in Sensor Networks.......................................................... 861
Todd B. Fleming and Peter Athanas
Data Stream Based Algorithms for Wireless Sensor Network Applications ............................................................ 869

Session 9B: High-Performance Computing

Parallel Lossless Data Compression Based on the Burrows-Wheeler Transform ....................................................... 877
Jeff Gilchrist and Aysegul Cuhadar
RouteGA: A Grid Load Balancing Algorithm with Genetic Support ........................................................................ 885
Rodrigo F. de Mello, José A. Andrade Filho, Luciano J. Senger, and Laurence T. Yang
Multiprocessor Simulator System Based on Multi-Way Cluster Using Double-Buffered Model
Arata Shinozaki, Masatoshi Shima, Minyi Guo, and Mitsunori Kubo

Session 9C: Communication Protocols and Analysis

Performance Evaluation of Multicast Cost Sharing Mechanisms
Nandan Garg and Daniel Grosu

Markov Chain Model for Performance Analysis of Transmitter Power Control in Wireless MAC Protocol: Towards Delay Minimization in Power-Network Control
Muhammad Tahir and Sudip K. Mazumder

Dynamic Bandwidth Allocation in SIP Based MPLS
Mohamed El Hachimi, Bernard Tremblay, Michel Kadoch, and Maria Bennani

Session 9D: Web-Based Computing

Un-Biasing the Link Farm Effect in PageRank Computation
Arnon Rungsawang, Komthorn Puntumapon, and Bundit Manaskasemsak

A Thesaurus Construction Method from Large ScaleWeb Dictionaries
Kotaro Nakayama, Takahiro Hara, and Shojiro Nishio

Applying Web-based Networking Protocols and Software Architectures for Providing Adaptivity, Personalization, and Remotization Features to Industrial Human Machine Interface Applications
Alessandro Bozzon, Marco Brambilla, Piero Fraternali, Paolo Speroni, and Giovanni Toffetti

Session 10A: Fault Tolerance Networks

Reliable Strict Quality-of-Service with Unreserved Backup Paths
I. Chen and M.R. Ito

On Quantifying Fault Patterns of the Mesh Interconnect Networks

Relaxed Failure Recovery Process for Reliable Quality-of-Service Using Unreserved Backup Paths
I. Chen and M.R. Ito

Session 10B: Grid Computing

Immediate Mode Scheduling of Independent Jobs in Computational Grids
Fatos Xhafa, Leonard Barolli, and Arjan Durresi

QoS-Based Network Service Broker for High-Performance Grid Applications
Qiang Duan, Michelle Telly, and Neeta Seetha

Mapping a Group of Jobs in the Error Recovery of the Grid-Based Workflow within SLA Context
Dang Minh Quan and Jorn Altmann

A Grid Services-Oriented Architecture for Efficient Operation of Distributed Data Warehouses on Globus
Pascal Wehrle, Maryvonne Miquel, and Anne Tchounikine
Session 10C: Network Analysis and Modeling

Modeling and Analysis of Interrupt Disable-Enable Scheme ................................................................. 1000
    K. Salah and K. Elbadawi
Analytical Modelling of Hybrid PQ-GPS Scheduling Systems under Long-Range Dependent Traffic ................................................................. 1006
    Xiaolong Jin and Geyong Min
An Analytical Performance Model for the Spidergon NoC ................................................................. 1014
    Mahmoud Moadeli, Ali Shahrahi, Wim Vanderbauwhede, and Mohamed Ould-Khaoua
Stochastic Modeling and Analysis of GRED-I Congestion Control for Differentiated Bursty Traffic ................................................................. 1022
    Lan Wang, Geyong Min, and Irfan Awan

Author Index ................................................................................................................................................. 1031
