Keynote Speeches

The Crucial Role of Information Communication Technology in Western Australia ................................................................. 1
Lyn Beazley
Data Integration at Scale: From Relational Data Integration to Information Ecosystems ............................................................ 2
Michael L. Brodie
Design of Network Based Software ................................................................. 4
Bogdan M. Wilamowski
A Photonics Based Intelligent Airport Surveillance and Tracking System ................................................................. 11
I.H. White, M.J. Crisp, and R.V. Penty
Next Decade of Social, Economical and Ethical Challenges—Perspectives of a Networked World ..................................................... 17
A. Min Tjoa
Socio-Natural Thought Semantic Link Network: A Method of Semantic Networking in the Cyber Physical Society ............................................. 19
Hai Zhuge
Cloud Computing: Issues and Challenges ..................................................... 27
Tharam Dillon, Chen Wu, and Elizabeth Chang
Accountability Computing for E-society .................................................................34

Kwei-Jay Lin, Joe Zou, and Yan Wang

Session 1: Performance Modelling and Evaluation 1

Performance Evaluation of Database Designs ......................................................42

Rasha Osman, Irfan U. Awan, and Michael E. Woodward

Performance of Weighted Fair Queuing System with Multi-class Jobs ..................50

Amina Al-Sawaai, Irfan U. Awan, and Rod Fretwell

Enhanced DR-Tree for Low Latency Filtering in Publish/Subscribe Systems ..........58

Luciana Arantes, Maria Gradinariu Potop-Butucaru, Pierre Sens, and Mathieu Valero

RED and WRED Performance Analysis Based on Superposition of N MMBP Arrival Process ..................................................................................................................66

Lee Booi Lim, Lin Guan, Alan Grigg, Iain W. Phillips, Xingang Wang, and Irfan U. Awan

Session 2: Performance Modelling and Evaluation 2

Performance Analysis of VCP Controller on DCCP Traffic ...............................74

Hanliu Chen, Oliver W.W. Yang, and Yang Hong

Comparative Analysis and Evaluation of Botnet Command and Control Models .................................................................................................................................82

Pavan Roy Marupally and Vamsi Paruchuri

Simulation-Based Performance Evaluation of the SNDP Protocol for Infrastructure WMNs .........................................................................................................................90

Glêdson Elias, Mateus Novaes, Gustavo Cavalcanti, and Daniel Porto

Session 3: Routing and Broadcast Mechanism

An Adaptive Routing Protocol for Bus Networks ...............................................98

Luobei Kuang, Ming Xu, and Zhijun Wang

Adaptive Clustering Protocol for Wireless Networks ..........................................105

Arjan Durresi, Vamsi Paruchuri, and Leonard Barolli

PRoPHET+: An Adaptive PRoPHET-Based Routing Protocol for Opportunistic Network ..................................................................................................................112

Ting-Kai Huang, Chia-Keng Lee, and Ling-Jyh Chen

Multicast QoS Routing Using Collaborative Path Exploration ..........................120

Jaipal Singh

Session 4: Distributed and Parallel Systems 1

High Performance Computing on Demand: Sharing and Mutualization of Clusters .........................................................................................................................126

Rodrigue Chakode, Jean-François Méhaut, and François Charlet

An Implementation of NaryRAID ........................................................................134

Yuji Nakamura and Minoru Uehara
Algorithms for Reducing the Total Power Consumption in Data Communication-Based Applications ................................................................. 142

Tomoya Enokido, Kota Suzuki, Ailxier Aikebaier, and Makoto Takizawa

A Comparative Study on the Performance of the Parallel and Distributing Computing Operation in MatLab .......................................................... 150

Mohammed Goryawala, Magno R. Guillen, Ruchir Bhatt, Anthony Mcgoron, and Malek Adjouadi

Session 5: Distributed and Parallel Systems 2

Pitcher: Enabling Distributed Parallel Computing with Automatic Thread and Data Assignments ........................................................................... 158

Chonglei Mei, Hai Jiang, and Jeff Jenness

Distributed Orchestration of Pervasive Services ............................................................................................................................... 166

Leonardo Mostarda, Srdjan Marinovic, and Naranker Dulay

Integrating Load Balancing into Channelization Strategy in Publish/Subscribe .................................................................................. 174

Haibiao Chen, Bethong Jin, and Fengliang Qi

A Specialized Tool for Simulating Lock-Keeper Data Transfer .............................................................................................................. 182

Feng Cheng, Thanh-Dien Tran, Sebastian Roschke, and Christoph Meinel

Session 6: Distributed and Parallel Systems 3

Transmit Power Allocation for Precoded Distributed MIMO OFDM Systems .............................................................................................. 190

Reza Holakouei, Adão Silva, and Atilío Gameiro

Using Dynamic Programming Techniques to Detect Multi-hop Stepping-Stone Pairs in a Connection Chain ........................................................................ 198

Ying-Wei Kuo, Shou-Hsuan Stephen Huang, Wei Ding, Rebecca Kern, and Jianhua Yang

Consensus in Anonymous Distributed Systems: Is There a Weakest Failure Detector? .................................................................................. 206

François Bonnet and Michel Raynal

Recommender Systems for Human Resources Task Assignment ............................................................................................................ 214

Pedro Isaias, Cristiane Casaca, and Sara Pifano

Session 7: Service Oriented Architecture

Minimizing Execution Costs when Using Globally Distributed Cloud Services .......................................................................................... 222

Suraj Pandey, Adam Barker, Kapil Kumar Gupta, and Rajkumar Buyya

Schedule Distributed Virtual Machines in a Service Oriented Environment .......................................................................................... 230

Lizhe Wang, Gregor von Laszewski, Marcel Kunze, and Jie Tao

Software-as-a-Service and Versionology: Towards Innovative Service Differentiation ......................................................................................... 237

Youakim Badr and Guy Caplat

A Visual Semantic Service Browser Supporting User-Centric Service Composition ............................................................................................ 244

Jian Yu, Quan Z. Sheng, and Paolo Falcarin
Session 8: Communication Technology and Protocols 1

An Identifier-Based Architecture for Native Vertical Handover Support ..............................................................252
   Walter Wong, Marcus Giraldi, Mauricio Ferreira Magalhães, and Fábio Verdi

DACS System’s Implementation Method to Realize the Next Generation Policy-Based Network Management Scheme ..............................................................260
   Kazuya Odagiri, Shogo Simizu, Rihito Yaegashi, Masaharu Takizawa, and Naohiro Ishii

A Scalable Peer-to-Peer Group Communication Protocol ..........................................................................................268
   Isamu Tsuneizumi, Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

TCP Testing: How Well Does ns2 Match Reality? ....................................................................................................276
   Martin Bateman and Saleem Bhatti

Session 9: Communication Technology and Protocols 2

Network Integrated Transparent TCP Accelerator .........................................................................................................285
   Jeongkeun Lee, Puneet Sharma, Jean Tourrilhes, Rick McGeer, Jack Brassil, and Andy Bavier

Integrated Modeling, Generation and Optimization for Packet based NoC Topology ....................................................293
   Cai Jueping, Liu Zheng, Du Ming, Li Zan, and Yao Lei

Bounded Fano Decoders over Intermediate Hops Excluding Packet Retransmission ....................................................299
   Khalid A. Darabkh and Backer N. Abu-Jaradeh

Maximizing Bandwidth Using Disjoint Paths ............................................................................................................304
   Ruen Chze Loh, Sieteng Soh, and Mihai Lazarescu

Session 10: Communication Technology and Protocols 3

Applying TCP-Friendly Congestion Control to Concurrent Multipath Transfer .........................................................312
   Thomas Dreibholz, Martin Becke, Jobin Pulinthanath, and Erwin P. Rathgeb

Exploiting Spectrum Usage Patterns for Efficient Spectrum Management in Cognitive Radio Networks .................320
   Changwoo Lee and Wonjun Lee

Improving Reliability Calculation with Augmented Binary Decision Diagrams .........................................................328
   Johannes U. Herrmann

Community-Aware Scheduling Protocol for Grids ....................................................................................................334
   Ye Huang, Amos Brocco, Nik Bessis, Pierre Kuonen, and Beat Hirsbrunner

Session 11: Autonomic and Advanced Network Systems 1

Flow Vector Prediction in Large IP Networks ...........................................................................................................342
   Tarem Ahmed

Utilizing WiMAX as a Public Safety Network in Jordan ...........................................................................................350
   Nidhal Kamel Taha El-Omari and Mohamad H. Alzaghal
Hybrid Communication Reconfigurable Network on Chip for MPSoC .................................................................356

Liu Zheng, Cai Jueping, Du Ming, Yao Lei, and Li Zan

An Overlay Multicast that Supports a Distinguished QoS Based on Service Levels and User Environments in the Next Generation Network ..............................................................362

Boyoung Rhee and Sunyoung Han

Session 12: Autonomic and Advanced Network Systems 2

The Power of Orientation in Symmetry-Breaking .........................................................................................................369

Satya Krishna Pindiproli and Kishore Kothapalli

A PCA Analysis of Daily Unwanted Traffic ................................................................................................................377

Kensuke Fukuda, Toshio Hirotsu, Osamu Akashi, and Toshiharu Sugawara

The Cost Effective Pre-processing Based NFA Pattern Matching Architecture for NIDS ..................................................385

Yeim-Kuan Chang, Chen-Rong Chang, and Cheng-Chien Su

Iterative Route Discovery in AODV .........................................................................................................................392

Nashid Shahriar, Syed Ashker Ibne Mujib, Arup Raton Roy, and Ashikur Rahman

Session 13: Internet Computing and Applications 1

A Particle Swarm Optimization-Based Heuristic for Scheduling Workflow Applications in Cloud Computing Environments ........................................................................................................400

Suraj Pandey, Linlin Wu, Siddeswara Mayara Guru, and Rajkumar Buyya

Whois Based Geolocation: A Strategy to Geolocate Internet Hosts ........................................................................408

Patricia Takako Endo and Djamel Fawzi Hadj Sadok

A DSL-Based Approach to Software Development and Deployment on Cloud .............................................................414

Krzysztof Sledziewski, Behzad Bordbar, and Rachid Anane

Internet Host Geolocation Using Maximum Likelihood Estimation Technique ..........................................................422

Mohammed Jubaer Arif, Shanika Karunasekera, Santosh Kulkarni, Ajit Gunatilaka, and B. Ristic

Session 14: Internet Computing and Applications 2

CAPTCHA Using Strangeness in Machine Translation .................................................................................................430

Takumi Yamamoto, J.D. Tygar, and Masakatsu Nishigaki

A Proposal of an Associating Image-Based Password Creating Method and a Development of a Password Creating Support System ........................................................................438

Masayuki Fukumitsu, Takashi Katoh, Bhed Bahadur Bista, and Toyoo Takata

CloudAnalyst: A CloudSim-Based Visual Modeller for Analysing Cloud Computing Environments and Applications ..................................................................................................................446

Bhathiya Wickremasinghe, Rodrigo N. Calheiros, and Rajkumar Buyya

Mapping the Blogosphere with RSS-Feeds ....................................................................................................................453

Justus Bross, Matthias Quasthoff, Philipp Berger, Patrick Hennig, and Christoph Meinel
Session 15: Ad Hoc and Sensor Networks 1

A Modified QRD-M Algorithm Based on Layer Branch Pruning for MIMO Systems .......................................................... 461
Xue Xin, Xiaohui Li, Yongqiang Hei, Weiyi Yin, and Guanghui Yu

Genetic Algorithms for Efficient Placement of Router Nodes in Wireless Mesh Networks .......................................................... 465
Fatos Xhafa, Christian Sánchez, and Leonard Barolli

Ranjan Panda, Damith Chinthana Ranasinghe, Ajith Parlikad, and Duncan McFarlane

A Novel Spatial TDMA Scheduler for Concurrent Transmit/Receive Wireless Mesh Networks ......................................................... 481
Kwan-Wu Chin, Sieteng Soh, and Chen Meng

Session 16: Ad Hoc and Sensor Networks 2

Probabilistic Proactive Routing with Active Route Trace-Back for Highly Mobile Ad Hoc Networks .......................................................... 489
Keyvan Kashkouli Nejad, Xiaohong Jiang, and Jianhua Ma

Mobility Effects of Wireless Multi-hop Networks in Indoor Scenarios ................................................................................ 495
Makoto Ikeda, Masahiro Hiyama, Leonard Barolli, Fatos Xhafa, Arjan Durresi, and Makoto Takizawa

Service Invocation over Content-Based Communication in Disconnected Mobile Ad Hoc Networks .................................................. 503
Yves Mahéo and Romeo Said

A Fully Dynamic and Self-Stabilizing TDMA Scheme for Wireless Ad-hoc Networks .................................................................. 511
Bezawada Bruhadeshwar, Kishore Kothapalli, and Indira Radhika Pulla

Session 17: Ad Hoc and Sensor Networks 3

A Study on Sensor Multiplicity in Optical Fiber Sensor Networks .................................................................................. 519
Nobutoshi Abe, Yusuke Arai, Michiko Nishiyama, Norihiro Shinomiya, Kazuhiro Watanabe, and Yoshimi Teshigawara

RBP: Reliable Broadcasting Protocol in Large Scale Mobile Ad Hoc Networks .......................................................... 526
Subrata Saha, Syed Rafiul Hussain, and A.K.M. Ashikur Rahman

Active Data Selection for Sensor Networks with Faults and Changepoints ............................................................................ 533
Michael A. Osborne, Roman Garnett, and Stephen J. Roberts

Gradient Based Routing Support for Cooperative Multi-channel MAC in Ad Hoc Wireless Networks .............................................. 541
Stepan Ivanov, Dmitri Botvich, and Sasitharan Balasubramaniam
Investigating Impact of Quorum Construction on Data Processing in Mobile Ad Hoc Networks

Takahiro Hara, Sanjay Kumar Madria, and Shojiro Nishio

Session 18: Privacy and Trust Management

New Approach to Quantification of Privacy on Social Network Sites

Tran Hong Ngoc, Isao Echizen, Kamiyama Komei, and Hiroshi Yoshiura

Trustworthiness among Peer Processes in Distributed Agreement Protocol

Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Privacy-Preserving Collaborative Filtering Protocol Based on Similarity between Items

Minako Tada, Hiroaki Kikuchi, and Sutheera Puntheeranurak

Towards Trust Establishment for Spectrum Selection in Cognitive Radio Networks

Sazia Parvin, Song Han, Li Gao, Farookh Hussain, and Elizabeth Chang

Session 19: Mobile Networks and Applications 1

A Tree Graph Model Based on Mobile Environment

Wei Liu and Zhoujun Li

BPE Acceleration Technique for S/W Update for Mobile Phones

Ryozo Kiyohara and Satoshi Mii

An Efficient Scalable Trajectory Based Forwarding Scheme for VANETs

Houda Labiod, Nedal Ababneh, and Miguel García de la Fuente

An Efficient Telematics Service Discovery Scheme over the Centralized Vehicular Peer-to-Peer (C-VP2P) Telematics Service Platform

Chung-Ming Huang, Chia-Ching Yang, and Chun-Ming Hu

Session 20: Mobile Networks and Applications 2

A Novel Cache Management Using Geographically Partial Matching for Location-Based Services

Chung-Ming Huang, Ming-Sian Lin, and Wen-Yao Chang

CoMiHoC: A Middleware Framework for Context Management in MANET Environment

Waskitho Wibisono, Arkady Zaslavsky, and Sea Ling

RF-Based Indoor Locating System for NLOS Environment

Hoon Choi, Sanghyun Son, Jamje Kim, and Yunju Baek
Session 21: Mobile Networks and Applications 3

AACK: Adaptive Acknowledgment Intrusion Detection for MANET with Node Detection Enhancement .......................................................... 634

A. Al-Roubaiey, T. Sheltami, A. Mahmoud, E. Shakshuki, and H. Mouftah

Session 22: Mobile Networks and Applications 4

A Cross-Layer Decision for Mobile IP Handover .............................................................. 641

Mohamed Alnas, Irfan U. Awan, and D.R.W. Holton

A Novel Cross Layer Intrusion Detection System in MANET ............................................. 647

Rakesh Shrestha, Kyong-Heon Han, Dong-You Choi, and Seung-Jo Han

A Secure Key Management Model for Wireless Mesh Networks ........................................ 655

Li Gao, Elizabeth Chang, Sazia Parvin, Song Han, and Tharam Dillon

Session 23: Multimedia Systems and Applications

Bright Pupil Detection in an Embedded, Real-Time Drowsiness Monitoring System .......................................................... 661

Salvatore Vitabile, Alessandra De Paola, and Filippo Sorbello

A Transport Protocol for Multimedia Transmission in Overlay Networks .......................... 669

Byung-Seok Kang, Kwangcheol Shin, In-Young Ko, and Pyoung-Yun Kim

A Survey on Multimedia Communicating Technology Based on Spatial Audio Coding .......................... 675

Naixue Xiong, Shuixian Chen, Jing He, Yanxiang He, Athanasios T. Vasilakos, Jong Hyuk Park, and Yan Yang

Session 24: Pervasive and Ubiquitous Computing

User-Excentric Service Composition in Pervasive Environments ....................................... 682

Noha Ibrahim, Stéphane Frénot, and Frédéric Le Mouël

Modeling and Measuring Quality of Context Information in Pervasive Environments ............ 690

José Bringel Filho, Alina Dia Miron, Ichiro Satoh, Jérôme Gensel, and Hervé Martin

Interactive Home Supervision Application—Think Visually .............................................. 698

Julia Kantorovitch and Ilkka Niskanen

Context-Aware Mobile Services Transactions ...................................................................... 705

Muhammad Younas and Soraya Kouadri Mostéfaoui

Underground Wireless Communications for Monitoring of Drag Anchor Embedment Parameters: A Feasibility Study .................................................. 713

Alvin Valera, Hwee-Pink Tan, and Ma Xiaoping
Session 25: Security Intrusion Detection Systems 1

A Fast Flowgraph Based Classification System for Packed and Polymorphic Malware on the Endhost ................................................................. 721
Silvio Cesare and Yang Xiang

Modbus/DNP3 State-Based Intrusion Detection System ........................................... 729
Igor Nai Fovino, Andrea Carcano, Thibault De Lacheze Murel, Alberto Trombetta,
and Marcelo Masera

Efficient Algorithms for Dynamic Detection and Resolution of IPSec/VPN Security Policy Conflicts .............................................................................. 737
Salman Niksefat and Masoud Sabaei

Collusion Attack Resistance and Practice-Oriented Threshold Changeable Secret Sharing Schemes ............................................................................... 745
Xiujie Zhang and Mingxing He

Session 26: Security Intrusion Detection Systems 2

MARS: Multi-stage Attack Recognition System .......................................................... 753
Faeiz Alserhani, Monis Akhlaq, Irfan U. Awan, Andrea J. Cullen, and Pravin Mirchandani

Against Spyware Using CAPTCHA in Graphical Password Scheme .......................... 760
Liming Wang, Xiuling Chang, Zhongjie Ren, Haichang Gao, Xiyang Liu, and Uwe Aickelin

Intrusion Tolerant Services Through Virtualization: A Shared Memory Approach ........................................................................................................ 768
Valdir Stumm Júnior, Lau Cheuk Lung, Miguel Correia, Joni da Silva Fraga, and Jim Lau

An Adaptive Approach to Detecting Black and Gray Hole Attacks in Ad Hoc Network ................................................................................................. 775
Jiwen Cai, Ping Yi, Jialin Chen, Zhiyang Wang, and Ning Liu

Session 27: Security Intrusion Detection Systems 3

Empirical Analysis of Attackers Activity on Multi-tier Web Systems ............................. 781
Katerina Goseva-Popstojanova, Brandon Miller, Risto Pantev, and Ana Dimitrijevikj

Key Parameters in Identifying Cost of Spam 2.0 ......................................................... 789
Farida Ridzuan, Vidyasagar Potdar, Alex Talevski, and William F. Smyth

Web Spambot Detection Based on Web Navigation Behaviour .................................. 797
Pedram Hayati, Vidyasagar Potdar, Kevin Chai, and Alex Talevski

Session 28: Wireless Sensor Neworks 1

A Dynamic Normalized Weighting Based Context Reasoning in Home-Based Care ........................................................... 804
Hyun Lee, Jae Sung Choi, and Ramez Elmasri

Energy Constrained Dominating Set for Clustering in Wireless Sensor Networks .......................................................... 812
Julia Albath, Mayur Thakur, and Sanjay Madria
Experimental Analysis of a Wireless Sensor Network Setup Strategy Provided by an Agent-Oriented Middleware

Tales Heimfarth, Edison Pignaton de Freitas, Carlos Eduardo Pereira, Armando Morado Ferreira, Flávio Rech Wagner, and Tony Larsson

Modeling and Evaluating the Reliability of Cluster-Based Wireless Sensor Networks

Hamed Yousefi, Kambiz Mizanian, and Amir Hossein Jahangir

Prioritizing Information for Achieving QoS Control in WSN

Atif Sharif, Vidyasagar Potdar, and A.J.D. Rathnayaka

Session 29: Wireless Sensor Networks 2

Mobile Element Path Planning for Time-Constrained Data Gathering in Wireless Sensor Networks

Khaled Almi'ani, Anastasios Viglas, and Lavy Libman

Symbolic Routing for Location-Based Services in Wireless Mesh Networks

Harald Weinschrott, Frank Dürr, and Kurt Rothermel

Mitigating Sandwich Attacks Against a Secure Key Management Scheme in Wireless Sensor Networks for PCS/SCADA

Hani Alzaid, DongGook Park, Juan González Nieto, and Ernest Foo

Communication Scheme to Support Sink Mobility in Multi-hop Clustered Wireless Sensor Networks

Seungmin Oh, Euisin Lee, Soochang Park, Juhyun Jung, and Sang-Ha Kim

Session 30: Wireless Sensor Networks 3

On Barrier Coverage in Wireless Camera Sensor Networks

Kuei-Ping Shih, Chien-Min Chou, I-Hsin Liu, and Chun-Chih Li

A Hybrid Technique for Efficient Medium Access Control in Wireless Sensor Networks

Thi Hong Hanh Le and Makoto Takizawa

Routing Loops in DAG-Based Low Power and Lossy Networks

Weigao Xie, Mukul Goyal, Hossein Hosseini, Jerald Martocci, Yusuf Bashir, Emmanuel Baccelli, and Arjan Durresi

Energy-Aware, Self-Deploying Approaches for Wireless Sensor Networks

Shih-Chang Huang

Session 31: Wireless Sensor Networks 4

Employing IEEE 802.15.4 for Quality of Service Provisioning in Wireless Body Area Sensor Networks

Huasong Cao, Sergio González-Valenzuela, and Victor C.M. Leung

Sink-Initiated Geographic Multicasting Protocol in Wireless Sensor Networks

Jeongcheol Lee, Euisin Lee, Soochang Park, Hosung Park, and Sang-Ha Kim
Tradeoffs among Delay, Energy and Accuracy of Partial Data Aggregation in Wireless Sensor Networks .................................................................917

Wayungerile Li, Masaki Bandai, and Takashi Watanabe

Real-Time Data Dissemination Based on Reactive and Restricted Zone Search in Sensor Networks .................................................................925

Juhyun Jung, Soochang Park, Euisin Lee, Seungmin Oh, and Sang-Ha Kim

Session 32: Wireless Sensor Networks 5

An Energy Aware Routing Protocol with Sleep Scheduling for Wireless Sensor Networks .........................................................................................933

Amulya Ratna Swain, R.C. Hansdah, and Vinod Kumar Chouhan

Applications of Wireless Sensor Networks in the Oil, Gas and Resources Industries .................................................................................................941

Mohammad reza Akhondi, Alex Talevski, Simon Carlsen, and Stig Petersen

Taxonomy of Wireless Sensor Network Cyber Security Attacks in the Oil and Gas Industries .................................................................949

Pedram Radmand, Alex Talevski, Stig Petersen, and Simon Carlsen

Session 33: Interaction in Web Services

From Communities of Web Services to Marts of Composite Web Services ...........................................................................................................958

Zakaria Maamar, Leandro Krug Wives, Ghazi Al-Khatib, Quan Z. Sheng,
Antônio Rodrigo Delepiane de Vit, and Djamal Benslimane

YASA-M: A Semantic Web Service Matchmaker .................................................................................................................................966

Yassin Chabeb, Samir Tata, and Alain Ozanne

Using Recommendation to Limit Search Space in Web Services Discovery ........................................................................................................974

Mohamed Sellami, Walid Gaaloul, Samir Tata, and Mohamed Jmaiel

Environmental Sustainability and Improved Quality of Life Through Service Convergence Technologies ........................................................................982

Meisam Aboudi and Alex Talevski

Session 34: Security  Authentication and Access Control 1

Adaptive and Distributed Access Control in Cognitive Radio Networks ...........................................................................................................988

Gianmarco Baldini, Stefano Braghin, Igor Nai Fovino, and Alberto Trombetta

An Authentication Model for Wireless Network Services .................................................................................................................................996

Huy Hoang Ngo, Xiaping Wu, Phu Dung Le, and Bala Srinivasan

Controlling File Distribution in the Share Network Through Content Poisoning .................................................................................................1004

Masahiro Yoshida, Satoshi Ohzahata, Akihiro Nakao, and Konosuke Kawashima
Session 35: Security Authentication and Access Control 2

HealthPass: Fine-Grained Access Control to Portable Personal Health Records ...........................................1012
   Robert Steele and Kyongho Min
Towards More Trustable Log Files for Digital Forensics by Means of “Trusted Computing” .................................................1020
   Benjamin Böck, David Huemer, and A. Min Tjoa
InnoDB Database Forensics ..............................................................................................................................1028
   Peter Frühwirt, Marcus Huber, Martin Mulazzani, and Edgar R. Weippl
A Quadratic, Complete, and Minimal Consistency Diagnosis Process for Firewall ACLs ...........................................1037
   S. Pozo, A.J. Varela-Vaca, and R.M. Gasca

Session 36: Security Authentication and Access Control 3

Beyond Fixed Key Size: Classifications Toward a Balance Between Security and Performance ...........................................1047
   Abdullah Almuhaideb, Mohammed Alhabeeb, Phu Dung Le, and Bala Srinivasan
Non-interactive Information Reconciliation for Quantum Key Distribution .................................................1054
   Stefan Rass and Peter Schartner

Session 37: WLAN, RFID, and OFDM Systems

Enabling Scalable RFID Traceability Networks ........................................................................................................1061
   Quan Z. Sheng, Yanbo Wu, and Damith Ranasinghe
Increasing TCP Throughput and Fairness in Cognitive WLAN over Fiber .........................................................1069
   Alireza Attar, Haoming Li, and Victor C.M. Leung
Admission Control and System Capacity Assessment of WiMAX with ACM and nb-LDPC Codes—Simulation Study with ViMACCS ns2 Patch .................................................................1077
   Adam Flizikowski, Witold Hołubowicz, Marcin Przybyszewski, and Sławomir Grzegorzewski

Session 38: Security: Architecture and Protocols

Secure Communication for Internet Payment in Heterogeneous Networks ......................................................1085
   Refka Abdellaoui and Marc Pasquet
IDSec: An Identification Layer Security Model ........................................................................................................1093
   Walter Wong, Mauricio Ferreira Magalhães, and Fábio Verdi
Resist Intruders’ Manipulation via Context-Based TCP/IP Packet Matching ..............................................1101
   Yongzhong Zhang, Jianhua Yang, Santhoshkumar Bediga, and Stephen S.-H. Huang
Deployment of a Secure Wireless Infrastructure Oriented to Vehicular Networks ...........................................1108
   Pedro J. Fernández Ruiz, Cristian A. Nieto Guerra, and Antonio F. Gómez Skarmeta
Automatic Application Signature Construction from Unknown Traffic ......................................................1115
   Yu Wang, Yong Xiang, and Shun-Zheng Yu

xvi
Session 39: Grid and P2P Computing

Simulation Analysis of Moving Peer Influence on Location-Aware P2P Network ................................................................. 1121
Atsushi Tagami, Shigehiro Ano, and Yoichi Tomiura

Propagation Modeling of Peer-to-Peer Worms ................................................................. 1128
Xiang Fan and Yang Xiang

MeTree: A Contribution and Locality-Aware P2P Live Streaming Architecture ......................... 1136
Huey-Ing Liu and I-Feng Wu

Grid of Segment Trees for Packet Classification ........................................................................ 1144
Yeim-Kuan Chang, Yung-Chieh Lin, and Chen-Yu Lin

Session 40: Database Processing and Data Mining

Towards Near Real-Time Data Warehousing ........................................................................... 1150
Li Chen, Wenny Rahayu, and David Taniar

Data Mapping, Matching and Loading Using Grid Services ...................................................... 1158
Ejaz Ahmed, Nik Bessis, Yong Yue, and Muhammad Sarfraz

Exploiting Rateless Coding in Structured overlays to Achieve Data Persistence ......................... 1165
H.B. Ribeiro and E. Anceaume

An Enhanced Global Index for Location-Based Mobile Broadcast Services .............................. 1173
Agustinus Borgy Waluyo, David Taniar, Bala Srinivasan, and Wenny Rahayu

Outsourced XML Database: Query Assurance Optimization ..................................................... 1181
Andrew Clarke and Eric Pardede

Session 41: Intelligent Computing and Applications 1

Analyzing Human Behavior Using Case-Based Reasoning with the Help of Forensic Questions ........................................................................... 1189
Wolfgang Boehmer

Metaverses as a Platform for Game Based Learning ..................................................................... 1195
Kristoffer Getchell, Iain Oliver, Alan Miller, and Colin Allison

Neural Network Trainer through Computer Networks ................................................................ 1203
Nam Pham, Hao Yu, and Bogdan M. Wilamowski

Compensation of Sensors Nonlinearity with Neural Networks .................................................. 1210
Nicholas J. Cotton and Bogdan M. Wilamowski

Session 42: Intelligent Computing and Applications 2

Delta-equalities of Complex Fuzzy Relations ........................................................................... 1218
Guangquan Zhang, Tharam Singh Dillon, Kaiyuan Cai, Jun Ma, and Jie Lu

A Japanese Calligraphy Trainer Based on Skill Acquisition Through Haptization ...................... 1225
Hiroaki Nishino, Kouta Murayama, Tsuneo Kagawa, and Kouichi Utsumiya
MagicNET: Security System for Protection of Mobile Agents ................................................................. 1233
    Awais Shibli, Imran Yousaf, and Sead Muftic
An Ant-Colony-Optimization Based Approach for Determination of Parameter Significance of Scientific Workflows ................................................................................................................. 1241
    Fakhri Alam Khan, Yuzhang Han, Sabri Pllana, and Peter Brezany

Session 43: Semantics Collaborative Systems 1
Knowledge Sharing Effectiveness Measurement ............................................................................................. 1249
    B. ZadJabbari, P. Wongthongham, and F.K. Hussain
Using Ontology for Personalized Mobile Message Computation .................................................................... 1255
    Li-Hua Li, Fu-Ming Lee, Yu-Chien Chou, and Tsung-Jen Pu
Automatic Method for Author Name Disambiguation Using Social Networks .................................................. 1263
    Dongwook Shin, Taehwan Kim, Hana Jung, and Joongmin Choi
An Information Platform for Low-Literate Villagers .................................................................................... 1271
    Ashir Ahmed, Lutfe Kabir, and Hiroto Yasuura

Session 44: Semantics Collaborative Systems 2
A Two-Phase Approach to Subscription Subsumption Checking for Content-Based Publish/Subscribe Systems ............................................................................................................................................ 1278
    Xiulei Qin, Jun Wei, Wenbo Zhang, Hua Zhong, and Tao Huang
Integrating Recreational Fishing Behaviour within a Reef Ecosystem as a Platform for Evaluating Management Strategies ....................................................................................................................................... 1286
    Lei Gao and Atakelty Hailu
Semantic Driven Self-Adaptation of Communications Applied to ERCMS .................................................. 1292
    Ismael Bouassida Rodriguez, Jérome Lacouture, and Khalil Drira
Extracting Named Entities and Synonyms from Wikipedia ............................................................................. 1300
    Christian Bøhn and Kjetil Nørvåg

Session 45: Semantics Collaborative Systems 3
Aletheia—Improving Industrial Service Lifecycle Management by Semantic Data Federations ............................................................................................................................................................................ 1308
    Steffen Kunz, Franziska Brecht, Benjamin Fabian, Markus Aleksy, and Matthias Wauer
Improving Graduate Employability by Using Social Networking Systems .................................................... 1315
    Zhe Jing, Elizabeth Chang, Omar Hussain, and K.L. Chin
Human-Computer Interaction Experiments—Immersive Virtual Reality Applications for the Mining Industry ......................................................................................................................................................... 1323
    Tomasz P. Bednarz, Con Caris, Jeremy Thompson, Chris Wesner, and Mark Dunn

Author Index ..................................................................................................................................................... 1328
