2007 IEEE Asia-Pacific Services Computing Conference  
**APSCC 2007**

### Message from the General Chair.............................................................................. x

### Organizing Committee.............................................................................................. xi

### Program Committee.................................................................................................. xii

## Foundations of Services Computing

Automated Resource Management Framework for Adjusting Business Service Capability .................. 3  
*Yonglin Xia and Jun Wei*

Coordinating Service Distribution through Cooperative "YuuZuu" Reservations ............................. 10  
*Kazuo Miyashita, Kazuyuki Masuda, and Fumitaka Higashitani*

Scenario-Based Petri Net Approach for Collaborative Business Process Modelling ..................... 18  
*Xin Wang, Yanchun Zhang, and Hao Shi*

A Context-Aware Service Matchmaking Method Using Description Logic ................................. 26  
*Hai Wang, Zengzhi Li, Bo Yang, and Hong Xia*

Considering Cultural Issues in E-Business Solutions ................................................................ 33  
*Kyeong Kang*

Third Parth Subsidy is Not Effective towards Improving the Trading Efficiency for Most E-Business Markets ................................................................. 40  
*Lung Ngai, Lian-chen Liu, Cheng Wu, and Ling-juan He*

## Wireless Sensor Networks

A Secure Routing Protocol with Malicious Nodes Detecting and Diagnosing Mechanism for Wireless Sensor Networks .......................................................... 49  
*Yuan-xi Jiang and Bao-hua Zhao*

Joint Sink Mobility and Data Diffusion for Lifetime Optimization in Wireless Sensor Networks ........ 56  
*Yu Gu, Hengchang Liu, Fei Song, and Baohua Zhao*

Secure Location Verification Using Hop-Distance Relationship in Wireless Sensor Networks .......... 62  
*Yongsheng Liu, Hao Zhou, and Baohua Zhao*

An Energy-Efficient TDMA MAC for Wireless Sensor Networks ............................................ 69  
*Rong Gang Bai, Yu Gui Qu, Yang Guo, and Bao Hua Zhao*

Energy Efficient Multi-rate Based Time Slot Pre-schedule Scheme in WSNs for Ubiquitous Environment .................................................................................. 75  
*Wei Wei, Yong Qi, Saiyu Qi, Di Hou, Wei Wang, Min Xi, and Qingsong Yao*
Grid/Utility/Web Computing

FuzMOD: A Fuzzy Multi-ontology Web Service Discovery System .......................................................... 197
   Duy Ngan Le, Angela Eck Soong Goh

A Formal Model for Web Service Composition and Its Application Analysis ............................................. 204
   Bixin Li, Yu Zhou, Ying Zhou, Xufang Gong

Modeling Web Browser Interactions Using FSM ...................................................................................... 211
   Huakou Miao, Zhongsheng Qian, Tao He

Commodity-Market Based Services Selection in Dynamic Web Service Composition ...................................... 218
   Ni Wancheng, He Lingjuan, Liu Lianchen, and Wu Cheng

Experiences with the EUChinaGrid Project - Implementing Interoperation between gLite and GOS ...... 224
   Bingheng Yan, Zhongxin Wu, Dongbo Yang, and Depei Qian

Resource Availability Evaluation in Service Grid Environment ..................................................................... 232
   Hu Zhoujun, Hu Zhigang, and Liu Zhenhua

Enabling Mass Customization through Semantic Web Services ..................................................................... 239
   Haifeng Liu, Wee-Keong Ng, Bin Song, Xiang Li, and Wen-Feng Lu

Novel Framework for Policy Based Scheduling and Quality of Service on Grid .......................................... 246
   Moohum Lee, Janguk In, Euiin Choi, and Bonghoi Kim

Context-Aware Web Service Selection Based on Multi-aspects Regulating ................................................ 254
   Wu Zhongxin, Yang Dongbo, Wang Yongjian, Yan Bingheng, and Qian Depei

Efficient Analysis of BPEL 2.0 Processes Using π-Calculus ........................................................................ 266
   Matthias Weidlich, Gero Decker, and Mathias Weske

Easy-To-Use Programming Model for Web Services Security ..................................................................... 275
   Yumi Yamaguchi, Hyen-Vui Chung, Masayoshi Teraguchi, and Naohiko Uramoto

Platform EGO Web Service Gateway ........................................................................................................ 283
   Xiaohui Wei, Jishan Gao, Xiaolei Ding, and Shutao Yuan

Balanced Job Assignment Based on Ant Algorithm for Computing Grids ................................................... 291
   Ruay-Shiung Chang, Jih-Sheng Chang, and Po-Sheng Lin

A Hierarchical Agent Framework for Tuning Application Performance in Grid Environment ...................... 296
   Ajanta De Sarkar, Srabani Kundu, and Nandini Mukherjee

A Lightweight Method of Web Service Ontology Merging Based on Concept Lattice .................................... 304
   Hong Xia, Zengzhi Li, Hai Wang, and Yu Gu

A Visualization Framework for Web Service Discovery and Selection Based on Quality of Service ......... 312
   Fang Fang Chua, Hao Yuan, and Soo Dong Kim

A Pre-reasoning Based Method for Service Discovery and Service Instance Selection in Service Grid Environments ................................................................. 320
   Kaijun Ren, Junqiang Song, Jinjun Chen, Nong Xiao, and Cancan Liu
Rapid and Automated Deployment of Monitoring Services in Grid Environments ................................... 328
Mei Yiduo, Dong Xiaoshe, Li Junyang, Xu Jing, and Xue Zhenghua

Semantic Web Service Composition by Consistency-Based Model Refinement ..................................... 336
Rajesh Thiagarajan, Markus Stumptner, and Wolfgang Mayer

Automated Question Answering Using Semantic Web Services .............................................................. 344
Minsu Jang, Joo-Chan Sohn and Hyun Kyu Cho

Web Service in Context and Dependency-Aware Service Composition .................................................. 349
Jiehan Zhou, Eila Niemelä, Juho Perälä, and Daniel Pakkala

Implementation of Monitoring and Information Service Using Ganglia and NWS for Grid Resource Brokers ........................................................................................................................ 356
Chao-Tung Yang, Tsui-Ting Chen, and Sung-Yi Chen

A One-Way File Replica Consistency Model in Data Grids ......................................................................... 364
Chao-Tung Yang, Wen-Chi Tsai, Tsui-Ting Chen, and Ching-Hsien Hsu

Service-Centric Computing Models

Agent Based Mediation Architecture for Federated Digital Library Services .................................... 375
Xuelin Shi, Ying Zhao, and Xiangjun Dong

A Service-Oriented Architecture for Semantic Recommendation and Integration of Products/Application Services (SOA-RIPAS) in Globalization ........................................................ 382
Chen Li, Jiayin Qi, Wei Wei, and Huaying Shu

Investigating the Potential of Service Oriented Architectures to Realize Dynamic Capabilities .......... 390
Haresh Luthria, Fethi Rabhi, and Michael Briers

Modeling QoS Attributes and Metrics for Evaluating Services in SOA Considering Consumers' Perspective as the First Class Requirement ................................................................. 398
Si Won Choi, Jin Sun Her, and Soo Dong Kim

A Complex Virtual Screening Computing Platform Based on SOA .......................................................... 406
Pengfei Liu, Shoubin Dong, Yicheng Cao, Zhengping Du, and Zhike Mao

Service Computing Process Integration and Management

Exploiting CoBTx-Net to Verify the Reliability of Collaborative Business Transactions .......................... 415
Haiyang Sun and Jian Yang

An Agent Scheduling Optimization for Call Centers ................................................................................. 423
Chiaki Hishinuma, Masaaki Kanakubo, and Takuma Goto

Colored Petri Net Based Automatic Service Composition ........................................................................ 431
Zhuzhong Qian, SangLu Lu, and Li Xie

Semantics Based Enterprise Modeling for Automated Service Discovery and Service Composition .... 439
Wang Chu and Depei Qian

A Distributed Algorithm for Service Commitment in Allocating Services to Applications ................... 446
Hadi Bannazadeh and Alberto Leon-Garcia
