Trustworthy/Security/Privacy Computing

Security of Mobile Agent-Based Web Applications ................................................................. 107
  Chung-Ming Ou, C.R. Ou, and Yao-Tien Wang
Zero-Configuration Security Module for LAMP Application System .................................. 113
  Shann-Chiuen Wu, Yung-Chung Ku, and Tzao-Lin Lee
Integration and Implementation of Secured IP Based Surveillance Networks .................... 117
  Charles C. Castello, Jeffrey Fan, Tse-Shun Chou, and Hong-Ming Kuo
Trusted Assessment of Web Services Based on a Six-Dimensional QoS Model ..................... 123
  Nan Guo, Tianhan Gao, and Bin Zhang

Multimedia Services and Intelligent Systems

Efficient Decoding of Systematic (41, 21, 9) Quadratic Residue Code .................................. 128
Deciding the Number of Color Histogram Bins for Vehicle Color Recognition .................... 134
  Ku-Jin Kim, Sun-Mi Park, and Yoo-Joo Choi
Modeling the Examinee Ability on the Computerized Adaptive Testing Using
  Adaptive Network-Based Fuzzy Inference System ................................................................. 139
  Cha-Hwa Lin, Kai-Pei Chen, and Chih-Hung Tsai
P2P Service-Oriented Community Coordinated Multimedia: Modeling Multimedia
  Applications as Web Services and Experience ........................................................................ 145
  Jiehan Zhou, Mika Rautiainen, and Mika Ylianttila
A Novel Approach to Quantify Novelty Levels Applied on Ubiquitous Music
  Distribution ............................................................................................................................... 150
  Marcelo Keese Albertini, Kuan-Ching Li, and Rodrigo Fernandes de Mello

Wireless, Sensor and Ad Hoc Networks

Markov Chain-Based Trust Model for Analyzing Trust Value in Distributed
  Multicasting Mobile Ad Hoc Networks .................................................................................. 156
  Ben-Jye Chang, Szu-Liang Kuo, Ying-Hsin Liang, and De-Yu Wang
An Overlay Multicast Protocol for Multimedia Applications in Mobile Ad Hoc
  Networks ................................................................................................................................. 162
  Marjan Naderan Tahan, Hamid R. Rabiee, Fatemeh Saremi, and Zeinab Iranmanesh
Hierarchical Genetic Algorithms for Channel Allocation in Wireless Networks ..................... 168
  Yao-Tien Wang, Chung-Ming Ou, and Hsiang-Fu Yu
An Adjustable Target Coverage Method in Directional Sensor Networks ............................. 174
  Yuei-Ren Chen, Bo-Sheng Chiou, Juun-Ming Chen, and Woei Lin
Discovering and Selecting Reliable Service in Mobile Ad Hoc Networks ............................ 181
  Weiyu Chen, Weimei Sun, Jiaqi Dong, Zhouyao Zhang, and Yingxiao Xu
Efficient Broadcast Authentication in Wireless Sensor Networks ............................................ 187
  Zhiqiang Du, Kun Wang, and Lihua Zhou
Mobile/Network Computing

Distributed Fuzzy Score-Based Clustering Algorithm for Mobile Ad Hoc Networks .............................................................193
   Sahar Adabi, Sam Jabbehdari, Ali Rezaee, and Sepideh Adabi

An Efficient Rekeying Scheme for Multicast and Broadcast (M&B) in Mobile WiMAX ..........................................................................................................................199
   Hung-Min Sun, Shih-Ying Chang, Shuai-Min Chen, and Chien-Chien Chiu

Secure and Efficient Handover Schemes for Heterogeneous Networks ....................................................................................205
   Hung-Min Sun, Shuai-Min Chen, Yao-Hsin Chen, Heng-Jeng Chung, and I-Hung Lin

Dynamic Subscription Permission: Extending the Depth of Demand-Controlled Flooding .................................................................211
   Doug Lundquist and Aris Ouksel

Modeling and Analyzing the Instantaneous Stability for Application Layer Multicast .................................................................217
   Jijun Cao, Jinshu Su, and Chuning Wu

A Novel Radio Resource Management Scheme with HPWRR Scheduling Algorithm in Link Adaptive Mobile WiMAX Network .........................................................................................225
   Bor-Jiunn Hwang, I-Shyan Hwang, Bo-Feng Guo, and Ruey-Rong Su

A Novel Hierarchical Network Selection Strategy with Adaptive QoS Level Scheme in 2-Tier Multi-rate Mobile WiMAX Networks .............................................................................231
   Bor-Jiunn Hwang, I-Shyan Hwang, and Shao-Jyun Wun

A DHCPv6 Based IPv6 Autoconfiguration Mechanism for Subordinate MANET .....................................................................................237
   Shubhranshu Singh and Ashutosh Bhatia

Performance Analysis of SLTC – A Stable Path, Low Overhead, Truthful and Cost Efficient Routing Protocol in MANETs with Selfish Nodes .................................................................243
   Fatemeh Saremi, Hamid Mousavi, and Ali Movaghar

Cluster, Parallel and Distributed Computing

Parallel Loop Self-Scheduling for Heterogeneous Cluster Systems with Multi-core Computers .................................................................................................251
   Chao-Chin Wu, Lien-Fu Lai, and Po-Hsun Chiu

Scheduling Deadline-Constrained Checkpointing on Virtual Clusters ..................................................................................257
   Blaise Omer Yenke, Jean-François Mehaut, and Maurice Tchuente

Web Services for MPI-Based Parallel Applications on a Rocks Cluster ..............................................................................265
   Pitch Sajjipanon and Sudsanguan Ngamsuriyaraj

Effectively Deploying Virtual Machines on Cluster ..................................................................................................................271
   Song Wu, Jinyan Yuan, Wei Gao, Xuanhua Shi, and Hai Jin

Service Composition, Management and Applications

A Cost Model for Participating Roles Based on Choreography Semantics ..................................................................................277
   Ravi Shankar Pandey and B.D. Chaudhary

Formal Semantics and Verification of BPMN Transaction and Compensation ..................................................................................284
   Tsukasa Takeamura
On Novel Economic-Inspired Centrality Measures in Weighted Networks .................................................................291
  Yufeng Wang and Akihiro Nakao
Building Quick Service Query List Using Wordnet for Automated Service Composition .................................................................297
  Kaijun Ren, Jinjun Chen, Nong Xiao, Junqiang Song, and Jinyang Li
Enterprise Interaction Ontology for Change Impact Analysis of Complex Systems .........................................................303
  Aman Kumar, Preethi Raghavan, Jay Ramanathan, and Rajiv Ramnath
Design and Implementation of a Low Cost DNS-Based Load Balancing Solution for the SIP-Based VoIP Service .................................................................310
  Jenq-Shiou Leu, Hui-Ching Hsieh, Yen-Chiu Chen, and Yuan-Po Chi
Timing Constraints Specification and Verification for Web Service Compositions .........................................................315
  Guiilan Dai, Rajuab Liu, Chongchong Zhao, and Changjun Hu
A Study in the Affect and Cognition of Consumers on Blog Usage ........................................................................323
  Yung-Chih Yen, Tung-Lin Chuang, Chia-Chen Yen, and Jih-shih Hsu
Combinatorial Reverse Auction Based on Lagrangian Relaxation ........................................................................329
  Fu-Shiung Hsieh and Shih-Min Tsai
On Information Lifecycle Management .........................................................................................................................335
  Sabah Al-Fedaghi
A Rewriting Logic Approach to OWL-S Composite Process Formal Specification .................................................................343
  JunFeng Wu and HuaiKou Miao
Dynamic Reliable Service Routing in Enterprise Service Bus .........................................................................................349
  Bin Wu, Shijun Liu, and Lei Wu
Decentralized Execution of Composite Service in MANETs .........................................................................................355
  Weiei Wu, Zhuoyao Zhang, Weiyu Chen, Bo Peng, and Yingxiao Xu
Composite Service Recovery Based on LSP Tunnel Recovery ......................................................................................361
  Yingxiao Xu and Weiwei Sun
Computer-Aided Privacy Requirements Elicitation Technique ......................................................................................367
  Seiya Miyazaki, Nancy Mead, and Justin Zhan
Autonomic Model for Service-Aware Storage ..............................................................................................................373
  Zhaobin Liu, Wenyu Qu, and Keqiu Li

Service Oriented Architecture and Modeling

Scenario Analysis of the Mobile Voice Services Market ..............................................................................................378
  Hannu Verkasalo, Kim Lindqvist, and Heikki Hämmäinen
A Hybrid Method for k-Anonymization .......................................................................................................................385
  Jun-Lin Lin, Meng-Cheng Wei, Chih-Wen Li, and Kuo-Chiang Hsieh
An Integrated Telecom and IT Service Delivery Platform ..............................................................................................391
  Xu Shao, Teck Yoong Chai, Teck Kiong Lee, Lek Heng Ngoh, Luoying Zhou, and Markus Kirchberg
Semantic Web Service Discovery and Composition Based on AI Planning and Web Service Modeling Ontology ..............................................................................397
  Sayed Gholam Hassan Tabatabaei, Wan Mohd Nasir Wan Kadir, and Suhaimi Ibrahim
A New Approach to Web Services Characterization ................................................................. 404
    Yan Liu, Mingguang Zhuang, Qingling Wang, and Guannan Zhang

Using Logically Hierarchical Meta Web Services to Support Accountability in Mashup Services ................................................................. 410
    Ali Khalili and Shahriar Mohammadi

The Process Conducting and Member Audit in the Distributed Enterprise Modeling ...................... 416
    Cai Zhiming and Yin Jun

Service-Oriented Reliable Problem Solving Environment for Scientific Computation ....................... 421
    Canccn Liu, Weimin Zhang, Zhigang Luo, Hai Liu, and Lin Xiao

Virtual Prairie: Going Green with Volunteer Computing .................................................................... 427
    Malek Smaoui, Marc Garbey, and Cendrine Mony

Provision of Pedagogical Resources in Service-Oriented Instructional Environments ...................... 435
    I-Ching Chen, Shueh-Cheng Hu, and Dong-Her Shih

Influencing Models in Automated One-to-Many Negotiation ............................................................. 439
    Kapil Kapani and Arobinda Gupta

Abstract State Machine Models for Basic Service-Oriented Architectures ..................................... 445
    Markus Kirchberg

The Development of a Ubiquitous Geographic Information Service by Using Service-Oriented Architecture .................................................................................. 453
    Sheng-Ming Wang and Fu-Mei Chen

Resource Selection Strategies for a CNP-Based Resource Management Model ................................... 458
    Chien-Min Wang, Hsi-Min Chen, Chun-Chen Hsu, and Jonathan Lee

A Tale of Clouds: Paradigm Comparisons and Some Thoughts on Research Issues ....................... 464
    Lijun Mei, W.K. Chan, and T.H. Tse

Resource Sharing by Multilingual Expression Services ....................................................................... 470
    Masaki Gotou, Hirofumi Yamaki, Daisuke Yanagisawa, Masamitsu Ukai, Masahiro Tanaka, and Toru Ishida

Modeling Web Services Composition with Transaction Extension for Performance Evaluation ................ 476
    Yanxiang He, Liang Zhao, Zhao Wu, and Fei Li

Online Optimization in Application Admission Control for Service Oriented Systems .................... 482
    Hadi Bannazadeh and Alberto Leon-Garcia

Model E-contract Update by Coloured Activity Net ........................................................................... 488
    H.F. Lai, J.L. Hong, and W.H. Jeng

Efficient Dynamic Policy Monitoring in Service Oriented Architectures ....................................... 494
    Hakan Hacigümüs

Minimized Domain Knowledge for SOA-Based Interoperability ................................................. 500
    Azin Dehmoobad and Kamran Sartipi
Web Services, Technologies and Applications

Web 2.0 Toolbar: Providing Web 2.0 Services for Existence Web Pages ................................................................. 507
Ming-Chih Hsieh, Yung-Wei Kao, and Shyan-Ming Yuan

A Web Mining Architectural Model of Distributed Crawler for Internet Searches
Using PageRank Algorithm ........................................................................................................................................ 513
Animesh Tripathy and Prashanta K. Patra

SHTM: A Semantic Hierarchy Transaction Model for Web Services Transactions .............................................. 519
Yingyuan Xiao and Hua Zhang

A Formal Basis for Cross-Checking ebXML BPSS Choreography and Web Service Orchestration .................................................. 524
W.L. Yeung

Adaptive Learning Sequencing for Course Customization: A Web Service Approach .................................................. 530
Ivan Madjarov and Abdelkader Betari

Towards Service Supervision for Public Web Services ............................................................................................ 536
Masahiro Tanaka, Yohei Murakami, and Toru Ishida

WAGA: A Flexible Web-Based Framework for Grid Applications ............................................................................... 542
Xuanhua Shi, Zhao Chen, Hai Jin, Song Wu, and Ke Fan

Modeling and Analysis of a Web Service Firewall Using Coloured Petri Nets ......................................................... 548
Zobeideh Aliannezhadi and Mohammad Abdollahi Azgomi

Timing Failures Detection in Web Services ................................................................................................................ 554
Nuno Laranjeiro, Marco Vieira, and Henrique Madeira

EADRM: A Framework for Explanation-Aware Distributed Reputation Management of Web Services .................................................. 560
Wanita Sherchan, Shonali Krishnaswamy, and Seng W. Loke

An Optimal Web Services Integration Using Greedy Strategy ......................................................................................... 568
Wen Ouyang and Min-Lang Chen

Ubiquitous/Pervasive Computing/RFID Technologies

PSMP: A Fast Self-Healing and Self-Organizing Pervasive Service Management Protocol for Smart Home Environments .................................................................................................................. 574
Chun-Feng Liao, Ya-Wen Jong, and Li-Chen Fu

Design of MyServer: A Residential Server in Smart Home Systems ........................................................................ 580
Wei-Chung Teng, Yu-Chun Pao, and Sheng-Luen Chung

Analysis of Context-Aware Network Selection Schemes for Power Savings ............................................................. 587
Pravin Pawar, Bert-Jan van Beijnum, Hermie Hermens, and Dimitri Konstantas

Hide and Not Easy to Seek: A Hybrid Weaving Strategy for Context-Aware Service Provision in a Smart Home ........................................................................................................................................ 595
Ching-Hu Lu, Yung-Ching Lin, and Li-Chen Fu

An RFID Encoding Method for Supply Chain Management .............................................................................................. 601
Kuen-Fang Jea and Jen-Ya Wang
Varying Pseudonyms-Based RFID Authentication Protocols with DOS Attacks
Hung Yu Chien .................................................................................................................................................607

DOS Attacks on Varying Pseudonyms-Based RFID Authentication Protocols ..................................................615
Hung-Yu Chien

Poster Papers (I)
The Design of Intelligent Sensor Network Based on Grid Structure .................................................................623
Fu-Chien Kao, Yun-Sheng Tsai, Andy S. Chiou, Shinping R. Wang, and Chang-Yu Huang

Adding Quality of Service Extensions to the Associativity Based Routing Protocol for Mobile Ad Hoc Networks (MANET) ...................................................................................................................631
Ayman Mansour Murad, Bassam Al-Mahadeen, and Nuha Mansour Murad

Secure and Survivable Group Communication over MANET Using CRTDH Based on a Virtual Subnet Model ...........................................................................................................................................638
Md. Aminul Haque Chowdhury, Muhammad Ikram, and Ki-Hyung Kim

Improving the Survivability of WSNs with Biological Characters Based on Rejuvenation Technology ...............644
Wei Wei, Yong Qi, Xin He, Wei Wang, Ruidong Li, and Hui He

AIR: Agent and Ontology-Based Information Retrieval Architecture for Mobile Grid ...........................................650
Yue-Shan Chang, Yu-Cheng Luo, and Pei-Chun Shih

The Mechanism and Requirements for Detecting the Cross-Service Attack ..........................................................656
Seung-Hee Oh, Deok Gyu Lee, and Jongwook Han

Understanding Cyber Trust Using a Triadic Functioning Analysis ...........................................................................662
Wen-Kung Lin, Chieh-Peng Lin, and Chou-Kang Chiu

Effective Security Safeguard Selection Process for Return on Security Investment .................................................668
Do Hoon Kim, Taek Lee, and Hoh Peter In

Towards the Interoperability between GTRS and EUMEDGRID ...........................................................................674
Heithem Abess, Roberto Barbera, Mohamed Jemni, and Sadok Mazigh

A Passive Geographical Routing Protocol in VANET ...............................................................................................680
Guangtao Xue, Jinsheng Feng, and Minglu Li

Efficient Bit-Parallel Multipliers in Composite Fields ...............................................................................................686
Chiou-Yng Lee and Pramod Kumar Meher

Implementation of a Security Access Control Model for Inter-organizational Healthcare Information Systems ...........692
Hongmei Chi, Edward L. Jones, and Lang Zhao

Poster Papers (II)
Research on Ontology Component Description Model Based on the Semantic Web ............................................697
Wenjing Li, Yucheng Guo, Weizhi Liao, and Rongwei Hang

Hierarchical Routing Architecture for Integrating IPv4 and IPv6 Networks .........................................................703
Huai-Jen Liu and Pang-Shih Liu

An Load Balancing Strategy of FTP Server-Cluster Based on JXTA .....................................................................707
Linlan Liu, Jian Shu, Binquan Chen, and Shuangjian Liang
An Integrated Service Model for Telecare System

Chin-Hsing Chen, Wen-Tzeng Huang, You-Yin Chen, and Yuan-Jen Chang

How “Hard Science” and Engineering Enhance Service-Dominant Economy

Morakot Raveewan and William G. Ferrell Jr.

A Staged Capability Improvement Model for Software Small and Medium Enterprises (SMEs)

Moiz Qyser A.A., S. Ramachandram, and Asshar Farhan

Detecting Media Format Support of the Media Renderer with Microsoft DirectShow

Chih-Yung Wang, Chun-Yi Tsai, and Tzao-Lin Lee

The Skills of Electronic Commerce for Students in Departments of Business

Management in University Science and Technological Schools

Chun-Mei Chou, Chien-Hua Shen, and Yu-Je Lee

A 3D Model Retrieval System Using the Derivative Elevation and 3D-ART

Jau-Ling Shih, Ting-Yen Huang, and Yu-Chen Wang

On the Studies of Syllable Segmentation and Improving MFCCs for Automatic Birdsong Recognition

Chih-Hsun Chou, Pang-Hsin Liu, and Bingjing Cai

Fusion of Static and Transitional Information of Cepstral and Spectral Features for Music Genre Classification

Chang-Hsing Lee, Jau-Ling Shih, Kun-Ming Yu, Hwai-San Lin, and Ming-Hui Wei

The 2008 International Symposium on Modeling, Assembly and Management for Service Oriented Engineering (MamSOE-08)

Cluster, Grid, P2P and Cooperative Computing Technologies

Extending BPEL2.0 for Grid-Based Scientific Workflow Systems

Huajian Zhang, Xiaoliang Fan, Ruisheng Zhang, Jiazao Lin, Zhili Zhao, and Lian Li

A Fuzzy-Based Adaptive Agent for Grid Services

Ali Rezaee, Amir Masoud Rahmani, and Sahar Adabi

MIFAS: Medical Image File Accessing System in Co-allocation Data Grids

Chao-Tung Yang, Chiu-Hsiung Chen, Ming-Feng Yang, and Wen-Chung Chiang

A Network Bandwidth-Aware Job Scheduling with Dynamic Information Model for Grid Resource Brokers

Chao-Tung Yang, Fang-Yie Leu, and Wen-Jen Hu

Performance Comparison of Load Balancing Algorithms through Code Migration in Distributed Desktop Computing Grids

Makoto Yoshida and Kenji Sakamoto

Interorganizational Workflow Collaboration Based on Local Process Views

Donghui Lin and Toru Ishida

Nash Equilibrium: Better Strategy for Agents Coordination

Lasheng Yu, Emmanuel Masabo, and Chantal Mutimukwe

RSQS: Resource-Saving Multi-query Scheduling in Wireless Sensor Networks

Yuan Zheng, Ming Liu, and Jiannong Cao
Using Frequent Workload Patterns in Resource Selection for Grid Jobs ......................................................... 807

  Tyng-Yeu Liang, Siou-Ying Wang, and I-Han Wu

Modelling the Sharing of Resources across Collaborative Sessions .............................................................. 813

  Bruce Spencer and Sandy Liu

Implementation of a Diskless Cluster Computing Environment in a Computer Classroom ....................................... 819

  Chao-Tung Yang, Wen-Feng Hsieh, and Hung-Yen Chen

Trustworthy/Security/Privacy Computing

Hiding Information Employing Reduplicating Embedding ............................................................................. 825

  Chin-Feng Lee, Lin-Yi Chuang, and Chin-Chen Chang

Highly Efficient ID-Based Ring Signature from Pairings ............................................................................... 829

  Hung Yu Chien

Cryptanalysis and Improvement of an 'Efficient Remote Mutual Authentication and Key Agreement' ....................... 835

  Jian Wang, Haihang Wang, and Chengxiang Tan

Invalidation of Mailing List Address to Block Spam Mails ........................................................................... 841

  Kenichi Takahashi, Akihiro Sakai, and Kouichi Sakurai

Zero-Configuration Personal Firewall for DLNA DMS ................................................................................. 847

  Shann-Chiuen Wu, Yung-Chung Ku, and Tzao-Lin Lee

Modeling the Trust with ECT in E-auction Loyalty .................................................................................. 851

  Chwen-Yea Lin, Chien-Chung Tu, and Kwoting Fang

Intrusion Resistant SOAP Messaging with IAPF ..................................................................................... 856

  Navya Sidharth and Jigang Liu

Multimedia and Intelligent Systems

Planning Locative Media within Physical Space and Collaborative Workspace ............................................... 863

  Rung-Huei Liang and Yin-Huan Chen

A Rule-Based Event Handling Model ........................................................................................................ 869

  Yingwei Luo, Xiaolin Wang, Xinpeng Liu, Zhou Xing, Xiao Pang, and Haibo Wang

Clothing Identification Based on Edge Information ...................................................................................... 876

  Ku-Jin Kim, Sun-Mi Park, and Yoo-Joo Choi

Implementing Speech-Recognition Microprocessor into Intelligent Control-System of Home-Appliance ......................... 881

  Chun-Liang Hsu, Sheng-Yuan Yang, and Wei-Bin Wu

Implementation and Evaluation of Minimal UPnP Scheduled Recording .......................................................... 886

  Chun-Yi Tsai and Tzao-Lin Lee

The Spacecraft Automatic Testing System Based on Workflow ...................................................................... 890

  Dan Yu, Gang Ye, Shilong Ma, Naixue Xiong, and Laurence T. Yang

Design and Implementation of a Videotext Extractor on Dual-Core Platform ................................................... 896

  Chih-Lun Fang, Tsung-Han Tsai, and Ren-Chih Kuo
Wireless, Sensor and Ad Hoc Network

A New Dynamic Access Control in Wireless Sensor Networks ................................................................. 901
   Hui-Feng Huang and Kuo-Ching Liu

Development of a Novel Bidirectional Control Telecare System over a Wireless
Sensor Network and the Internet ............................................................................................................... 907
   You-Yin Chen, Wen-Tzeng Huang, Chin-Hsing Chen, and Yuan-Jen Chang

An Effective Link Adaptation Method in Cooperative Wireless Networks .................................................. 914
   Karim Djouani, Jun Chen, Abdellah Akharraz, and Kamel Barkaoui

A Distributed Prefix Allocation Scheme for Subordinate MANET ............................................................. 920
   Ashutosh Bhatia and Shubhranshu Singh

Binary Countdown for Quality of Service in Ad Hoc and Sensor Networks ............................................ 926
   Chi-Hsiang Yeh

Pervasive/Mobile/Network Computing

Fairness-Based Scheduling Algorithm for TDD Mode IEEE 802.16 Broadband Wireless Access Systems ............................................................... 931
   Sheng-Tzong Cheng, Bo-Fu Chen, and Chih-Lun Chou

The Study of the Handoff for the Wireless Network .................................................................................. 937
   Chung-Hsin Liu

Zigbee- Research into Integrated Real-Time Located Systems .................................................................... 942
   Chung-Hsin Liu and Chih-Chieh Fan

An Optimization Method to Develop AAA Architectures with MIPv6 Mobility Support ............................................................... 948
   Ma Wenjing, Song Mei, Zhang Yong, Lin Xin, and Zhang Huan

USB Device Sharing Server for Office Environment .................................................................................. 953
   Cheng-Ying Ing and Tzao-Lin Lee

Using Data Mining Techniques in Development of MURA Geometric Prediction Module for Large Area Photomask ........................................................................... 957
   Wen-Hsing Kao, Jason C. Hung, and Victoria Hsu

Service Composition, Management and Applications

Application and Evaluation of Wireless Transmission Technique at Construction Job-site ............................................................... 963
   Lee-kuo Lin, Chiu-ching Tuan, and Che-jen Chen

A Unified Framework for Digital Content Management Business Model-Ring-Tone Download as Case Study ........................................................................... 969
   Dengwen Wei, Zaobin Gan, and Xiongbo Xia

An Institutional Analysis on the Vicissitudes of a Micro-payment Platform ............................................... 975
   Jen Wei Chen, Dershing Luo, and Ching-Cha Hsieh

Providing Service Innovation for Creative Life .......................................................................................... 981
   Kang-Lin Peng and Ming-Chu Lin

xv
Integration and Application of Web-Service-Based Expert System and Computer Maintenance Management Information System ............................................................... 987

Chung C. Chang and Li-Wei Sung

Using Support Vector Machine and Sequential Pattern Mining to Construct Financial Prediction Model ........................................................................................................ 993

Shu-Chuan Lo, Ching-Ching Lin, and Yao-Chang Chuang

A Stochastic Performance Model Supporting Time and Non-time QoS Matrices for Web Service Composition ............................................................................... 999

Zhao Wu, Yanxiang He, Haowen Liu, Liang Zhao, and Hua Shen

A Case Study on the Multicriteria Selection of Software Components .......................................................................................................................... 1005

Thomas Neubauer, Jan Pichler, and Christian Stummer

Service Oriented Architecture and Modeling

Developing Continuous Audit and Integrating Information Technology in E-business ................................................................. 1013

Chun-Hsiu Yeh, Tsui-Ping Chang, and Wei-Cheng Shen

Modeling the Mediating Role of Online Social Capital in Social Support and Service IT Usage ........................................................................................................ 1019

Yuan Hui Tsai, Chieh-Peng Lin, and Chou-Kang Chiu

The Internet Service Provider's Dilemma: User Friendly Design or Robust Security Mechanism? ......................................................................................... 1024

Chung-Chi Shen and Jyh-Shen Chiou

A Service-Oriented Modeling Technique for Domain-Specific Software ................................................................................................. 1026

Changjun Hu, Feng Jiao, Chongchong Zhao, and Huayu Li

Service-Oriented Enterprise Cooperation: Modeling Method and System ................................................................................................. 1032

Huiping Lin, Sheng Liu, and Yushun Fan

MPaySmart: A Customer Centric Approach in Offering Efficient Mobile Payment Services .................................................................................................. 1038

Vahid Rahimian and Jafar Habibi

Customers’ Perception on Attitude Towards E-auction ......................................................................................................................... 1044

Chien-Chung Tu, Chwen-Yea Lin, and Kwoting Fang

Web Services, Technologies and Applications

Developing the Continuous Assurance Embedded Continuous Audit Web Services ................................................................. 1049

Chun-Hsiu Yeh, Tsui-Ping Chang, and Wei-Cheng Shen

Ontology-Supported Portal Architecture for Scholar’s Webpages ......................................................................................... 1055

Sheng-Yuan Yang and Chun-Liang Hsu

Generating Semantic Web Services Using Lattices and SAWSDL ......................................................................................... 1061

Phi Nguyen and Sam Chung

A Pragmatics Web Service Oriented Approach to Understanding the Semantics of Concepts ........................................................................ 1069

Zhai Sheping, Wang Hai, and Wei Juanli
Web-Oriented Architectures: On the Impact of Web 2.0 on Service-Oriented Architectures

Gunnar Thies and Gottfried Vossen

A Minimum Coverage Dynamic Adaptive Method for Concurrent Web Service Composition

Zhengdong Zhu, Xuehan Dong, Yahong Hu, Weiguo Wu, and Zengzhi Li

ScriptOrc: A Specification Language for Web Service Choreography

A.K. Bhattacharjee and R.K. Shyamasundar

A SOAP-Based Streaming Content Delivery Framework for Multimedia Web Services

Gibson Lam and David Rossiter

Web Service Selection Based on Analytical Network Process Approach

Manish Godse, Rajendra Sonar, and Shrikant Mulik

A Framework of Web Services Description and Discovery Based on OWL-S and Domain Ontology

Changjun Hu, Huayu Li, and Xiaoming Zhang

The First International Workshop on Wireless Network Algorithms (WiNA-08)

Session I Sensor Networks

Algorithms for Transmission Power Control in Biomedical Wireless Sensor Networks

Ashay Dhamdhere, Vijay Sivaraman, Vidit Mathur, and Shuo Xiao

Energy-Efficient and Traffic-Dispersive Event Contour Tracking in Multi-sink Wireless Sensor Networks

Jehn-Ruey Jiang, Jih-Wei Wu, and Guan-Shien Du

Enhancing the Key Pre-distribution Scheme on Wireless Sensor Networks

Tzu-Hsuan Shan and Chuan-Ming Liu

Session II Ad Hoc and Sensor Networks

A Gradient-Based Dynamic Load Balance Data Forwarding Method for Multi-sink Wireless Sensor Networks

Rei-Heng Cheng, Shiuan-Yea Peng, and Chiming Huang

Adaptive Collision Avoidance through Implicit Acknowledgments in WSNs

Daniele Messina, Marco Ortolani, and Giuseppe Lo Re

Non-deterministic Geographic Forwarding in Mobile Ad Hoc Networks

Israat Tanzeena Haque

Hop-by-Hop TCP over MANET

Yao-Nan Lien and Yi-Fan Yu
Session III Mobile Networks and WLAN

Improving the Bandwidth Consumption of File Sharing in Mobile Networks through Clustering ................................................................. Ulf Wehling and Steffen Rothkugel

A Cross-Layer Link Adaptation Algorithm for IEEE 802.11 WLAN with Multiple Nodes ................................................................. Chiapin Wang and Tsungnan Lin

On Achieving Maximum Channel Utilization for IEEE 802.11n WLAN ................................................................. Yaw-Wen Kuo and Tung-Lin Tsai

Partitioning Scheme Based on Convolution Characteristic Values of RSS Measuring from APs .......................................................... Chi-Kuang Hwang and Hung-Min Yuan

The 2008 International Workshop on E-Commerce Services and Applications (ECSA 2008)

Session I

An Empirical Study of Sellers’ Information Manipulation in the Online Auction Market ................................................................. Che-hui Lien and Jyh-Jeng Wu

Content-Based Trust Mechanism for E-commerce Systems ................................................................. Yu Zhang, Huajun Chen, Xiaohong Jiang, Hao Sheng, Linhua Zhou, and Tong Yu

The Influence of Passion and Compulsive Buying on Online Auction Addiction ................................................................. Chih-Chien Wang and Yu-Tzu Chen

The Strategic Impact of Inter-organizational Information Systems – A Dynamic Capabilities Analysis ................................................................. Ying-Hueih Chen, I-Chieh Hsu, and Yu-Chung Chen

Session II

Analyzing Security of RFID Tag Reading Protocols Based on Binary Tree Traversal ................................................................. Gen-Yih Liao and Hsiu-Fen Hsieh

A Study on the Interface Usability of B2C Hypermarket E-commerce Website ................................................................. Hui-Juan Hu, Jen Yen, and Shing-Sheng Guan

Applying Context-Aware RBAC to RFID Security Management for Application in Retail Business ................................................................. Mei-Yu Wu, Chih-Kun Ke, and Wen-Ling Tzeng

Mining Negative Sequential Patterns for E-commerce Recommendations ................................................................. Sue-Chen Hsueh, Ming-Yen Lin, and Chien-Liang Chen
The 2008 International Workshop on Dependable and Secure Services Computing (DSSC 2008)

Service Availability of Systems with Failure Prevention ................................................................. 1219

Felix Salfner and Katinka Wolter

Introducing Role-Based Access Control to a Secure Virtual Machine Monitor: Security Policy Enforcement Mechanism for Distributed Computers ................................................................. 1225

Manabu Hirano, Takahiro Shinagawa, Hideki Eiraku, Shoichi Hasegawa,
Kazumasa Omote, Koichi Tanimoto, Takashi Horie, Kazuhiro Kato, Takeshi Okuda,
Eiji Kawai, and Suguru Yamaguchi

A Service-Oriented Framework for Quantitative Security Analysis of Software Architectures ........................................................................................................................................................................... 1231

Yanguo Liu, Issa Traore, and Alexander M. Hoole

Contract-Based Security Monitors for Service Oriented Software Architecture ................................................................. 1239

Alexander M. Hoole and Issa Traore

Beyond Smart: Enabling Cognition in a Wireless Home Network Environment ................................................................. 1246

Chi-Yi Lin and Szu-Chi Wang

A Study and Implementation of Vulnerability Assessment and Misconfiguration Detection ................................................................................................................................................................................................... 1252

Ching-Huang Lin, Chih-Hao Chen, and Chi-Sung Laih

The 2008 International Workshop on Services Integration and Management for Modern Service Industry (SIM4MSI-08)

A Flexible Framework for Semi-automatic Web Services Composition ................................................................. 1258

Gexin Li, Haijiang Hai, and Zhiwen Hu

A Novel Network Selection Algorithm in Next Generation Heterogeneous Network for Modern Service Industry ........................................................................................................................................................................... 1263

Hao Hu, Wenan Zhou, Shu Zhang, and Junde Song

Exploring a Semantic Publish/Subscribe Middleware for Event-Based SOA ................................................................. 1269

Jianfeng Qian, Jianwei Yin, Dongcai Shi, and Jinxiang Dong

Service Behavioral Adaptation Based on Dependency Graph ........................................................................................................................................................................... 1276

Bin Wu, Shuiuang Deng, Jian Wu, Ying Li, Li Kuang, and Jianwei Yin

Proxy-Based Web Service Security ........................................................................................................................................................................... 1282

Jian Wu and Zhimin Huang

OTJFast: Processing Ordered XML Twig Join Fast ........................................................................................................................................................................... 1289

Jinhua Jiang, Gang Chen, Lidan Shou, and Ke Chen

A CAVLC-Based Blind Watermarking Method for H.264/AVC Compressed Video ........................................................................................................................................................................... 1295

Lihua Tian, Nanning Zheng, Jianru Xue, and Tao Xu

A Flexible Transformation Scheme between the 'OR' of BPMN and 'Link' of BPEL ........................................................................................................................................................................... 1300

Lin Bai and Jun Wei

Verifying Consistency of Web Services Behavior ........................................................................................................................................................................... 1308

YuYu Yin, Ying Li, ShuiGuang Deng, and Wu Jian
The First International Workshop on Multimedia, Information Privacy and Intelligent Computing Systems (MPIS '08)

Session I

Effective \(\Sigma-\Delta\) Background Estimation for Video Background Generation ...............................................................1315
  Fan-Chei Cheng and Yu-Kuang Chen
RGB Intensity Based Variable-Bits Image Steganography ..........................................................1322
  Mohammad Tanvir Parvez and Adnan Abdul-Aziz Gutub
Removable Visible Watermarking in JPEG Compression Domain ..........................................................1328
  F.H. Yeh, G.C. Lee, and Y.T. Lin
Threshold Secret Image Sharing by Chinese Remainder Theorem ..........................................................1332
  Shyong Jian Shyu and Ying-Ru Chen

Session II

Redundant Picture Coding Using Residual-Adaptive Polyphase Downsampling
for H.264 Error Resiliency ..........................................................................................................................1338
  Jie Jia and Hae-Kwang Kim
Laundering and Repackaging of Multimedia Content in Content Distribution Systems ..................1344
  Alain Durand, Marc Joye, and Mohamed Karroumi
Content Based Image Retrieval Using Localized Line Segment Groupings ...........................................1352
  Nishat Ahmad, Youngan An, and Jongan Park
The Study of Intrusion Prediction Based on HsMM ..................................................................................1358
  Zhang Zhengdao, Peng Zhumiao, and Zhou Zhiping

Session III

Privacy Concealments: Detective Strategies Unveiling Cyberstalking on Internet ..................................1364
  Da-Yu Kao, Shih-Jeng Wang, Kush Mathur, Saransh Jain, and Frank Fu-Yuan Huang
Signcryption Scheme with Standardized Verification Algorithm ..........................................................1369
  Raylin Tso
A Restricted Undeniable Designated Verifier Signature ...........................................................................1375
  Atsushi Koide, Raylin Tso, Takeshi Okamoto, and Eiji Okamoto
Improvement of a Dynamic Accumulator at ICICS 07 and Its Application in Multi-user
Key-Based Retrieval on Encrypted Data ...................................................................................................1381
  Peishun Wang, Huaxiong Wang, and Josef Pieprzyk

Session IV

Measuring the Effectiveness and the Fairness of Relation Hiding Systems ..............................................1387
  Andreas Pashalidis
Machine-to-Machine Technology Applied to Integrated Video Services Via Context Transfer ................1395
  Shu-Ching Wang, Tzu-Chih Chung, and Kuo-Qin Yan
A QoS Routing Protocol Supporting Unidirectional Links in MANETs ..............................................1401
  Dong Wushi, Chen Niansheng, and Sun Qiang
Design and Implementation of Campus Gate Control System Based on RFID .......................................................1406
    Liu Ting-Kuo and Yang Chung-Huang

A Dynamic Competition Analysis on the Personal Computer Shipments in Taiwan
Using Lotka-Volterra Model ..........................................................................................................................1412
    Su-Yun Chiang, Gwo-Guang Wong, Yiming Li, and Hsiao-Cheng Yu

2008 International Workshop on Computational Engineering and Management (CEM-08)

Session A

Prediction Model for Warranty Costs: A Case Study of a LCD Monitor Company ........................................1418
    Louis Y.Y. Lu and Chih-Chyi Chiang

A Symbiosis Model for New Product Development through Open Innovation Process .................................1424
    Chia-Han Yang, Joseph Z. Shyu, and Yimin Li

An Automatic Stock Market Forecasting and Portfolio Selection Mechanism Based on VPRS, ARX and Grey System .................................................................1430
    Kuang Yu Huang and Chuen-Jiuan Jane

Distance Effect and Cognitive Proximity: A Study of Space Competition Strategy in Tourism Industry ..........................................................1436
    Ching Chang, Shih-Ming Ou, and Zong-Wei Zhu

Session B

The Impact of Enterprise Resource Planning Systems on the Efficiency of Taiwanese Firms .................................................................1441
    Bi-Huei Tsai

Equal Area Estimation of Three-Parameter Logistic Model for Item Response Theory ..................................1447
    Shih-Ching Lo

Visual and Operational Impacts of Variable Speed Limit Signs on Bus Drivers on Freeways Using Driving Simulator .................................................................1453
    Chien-Yen Chang and Chai-Chun Li

A Computerized Feature Reduction Using Cluster Methods for Accident Duration Forecasting on Freeway .................................................................1459
    Ying Lee and Chien-Hung Wei

Session C

Material Acquisitions in Academic Libraries .................................................................................................1465
    Tsu-Feng Ho, Shyong Jian Shyu, and Yi-Ling Wu

A Dynamic, Real Time and Non-interference Quantitative Measurement Technique on Diagnosing Instructional Condition for Adaptive E-learning .................................................................1471
    Pi-Shan Hsu, Te-Jeng Chang, Chien-Pen Chuang, and Ming-Hsiung Wu

A Study of Web 2.0 Website Usage Behavior Using TAM 2 ........................................................................1477
    Mei-Ying Wu, Han-Ping Chou, Yung-Chien Weng, and Yen-Han Huang
Data Hiding Scheme Using Covering Codes in Halftone Images Based on Error Diffusion

Ruey-Ming Chao, Yu-An Ho, and Yen-Ping Chu

An Improved Time-Bound Hierarchical Key Assignment Scheme

Qingyu Xu, Mingxing He, and Lein Harn

The First International Workshop on Ubiquitous Network Computing (UNC-08)

Session I

A Tender Algorithm of Improved Distributed System Resource Management

Wei Xiong and Xu Xianbing

A Color Clustering Algorithm for Cloth Image

Xinrong Hu, Naixue Xiong, Shuqin Cui, Wang Hui, and Jianchun Wang

Web Service Programs Described in a Rule-Based Language

Shuichi Nakanishi, Muneyuki Shimokura, and Tadashi Ohta

Design and Implementation of Embedded SNMP Network Management Manager in Web-Based Mode

Xinyi Wu, Yong Zhu, and Xiaolong Deng

Session II

MPACP: An Approach for Automatic Matching of Parallel Application Communication Patterns

Chao Ma, Yanxiang He, and Naixue Xiong

Research on Mobile-Agent Based Data Access Model in Pervasive Computing Environment

Li Fan and Jiang WeiJian

Ubiquitous Business Model by Seamless Integration of Photo and Location Information

Jeong-In Ju, Jong Chul Lee, and Kyoung Jun Lee

Design of Tag Match Advertising System and the Evaluation of the Business Model

Jungho Jun and Kyoung Jun Lee

Session III

Innovative Call Routing: Concept and Experimental Observations

Hui-Na Chua, Patrick Legrand, Karyn Wei-Ju Khoo, Simon Ringland, and Bruno Legat

A Weight-Based Dynamic Replica Replacement Strategy in Data Grids

Wuqing Zhao, Xianbin Xu, Naixue Xiong, and Zhuowei Wang

A Two-Stage Image Segmentation Method Based on Watershed and Fuzzy C-Means

Yong Zhu, Naixue Xiong, and Ruhan He

Web-Based Request Behavior Comprehension

Kong Weiguang

Verifying Consistency of Web Services Behavior Using Type Theory

YuYu Yin, JianWei Yin, Ying Li, and ShuiGuang Deng
Session IV

X-ray Image Enhancement Based on Wavelet Transform .................................................................1568
  Jiao Feng, Naixue Xiong, and Bi Shuoben

Study on Weaving Process at Software Architectural level .............................................................1574
  Youcong Ni, Shi Ying, Jing Wen, Linlin Zhang, Peng Ye, and Jiajing Zhang

Loop Detection for Energy-Aware High Performance Embedded Processors ........................................1578
  Na Ra Yang, Gilsang Yoon, Jeonghwan Lee, Intae Hwang, Cheol Hong Kim,
  and Jong Myon Kim

Garment Image Retrieval on the Web with Ubiquitous Camera-Phone ................................................1584
  Ruhan He, Kaiming Liu, Naixue Xiong, and Yong Zhu

The First International Workshop on Vechicular Networking (VON-08)

VON Routing

ABSRP- A Service Discovery Approach for Vehicular Ad Hoc Networks ........................................1590
  Brijesh Kadri Mohandas, Amiya Nayak, Kshirasagar Naik, and Nishith Goel

Access Gateway Discovery and Selection in Hybrid Multi-hop Relay Vehicular Network ..........................1595
  Shang-Pin Sheng, Ben-Yue Chang, and Hung-Yu Wei

Routing and Address Assignment Using Lane/Position Information in a Vehicular Ad

  Takashi Kato, Kohei Kadowaki, Takahiro Koita, and Kenya Sato

Vehicular Network .................................................................................................................................1600

Destination Discovery Oriented Position Based Routing in VANET .....................................................1606
  Eric HsiaoKuang Wu, Pratap Kumar Sahu, and Jagruti Sahoo

VON System, Security, Applications

LMAM: A Lightweight Mutual Authentication Mechanism for Network Mobility in Vehicular Networks .................................................................1611
  Ming-Chin Chuang and Jeng Farn Lee

An SDR-Based Wireless Communication Gateway for Vehicle Networks ...........................................1617
  Boncheol Gu, Junyoung Heo, Sangchul Oh, Namhoon Park, Gwangil Jeon,
  and Yookun Cho

Realistic Simulation of V2X Communication Scenarios ........................................................................1623
  Tobias Queck, Björn Schünemann, Ilja Radusch, and Christoph Meinel

Virtual Access Points for Stream Based Traffic Dissemination ............................................................1628
  D. Camara, N. Frangiadakis, F. Filali, A.A.F. Loureiro, and N. Roussopoulos

Optimizing Pseudonym Updation for Anonymity in VANETS ............................................................1633
  Brijesh Kumar Chaurasia and Shekhar Verma

Author Index .............................................................................................................................................1638
