Industrial Track at the 9th International Conference on Availability, Reliability and Security (ARES-IND 2014)

Welcome Message from Workshop Organizers

Welcome to the ARES Industrial Track session,

The Industrial Track Workshop (ARES-IND 2014) provides a mutual platform for knowledge exchange between practitioners and researchers. For this track, we have invited submissions of state-of-the-art practice and scientific experience reports from implemented projects and industrial applications, including a keynote speech and a tutorial, and thus encourage industrial practitioners to participate in a research focused ARES Conference.

This second ARES Industrial Track Workshop is organized into two sessions to meet the objectives of the industry track and promote innovations for a broad scope of industries. This is intended to stimulate interesting, practical, applicable as well as visionary discussion during the Industrial Track, and the whole Conference, too.

The ARES-IND 2014 Organizing Committee

Gerald Quirchmayr, University of Vienna Austria
Edgar Weippl, SBA Research, Austria
Juhani Anttila, International Academy for Quality (IAQ), Finland
Kari Jussila, Aalto University School of Science, Finland
