Contents

Preface
Welcome Message from the Chairs .............................................................. iii

Keynotes
Wikipedia and How to Use it for Semantic Document Representation
  Ian H. Witten — University of Waikato, New Zealand ................................. 1
Unifying Testing and Analysis through Behavioral Coverage
  Matthew B. Dwyer — University of Nebraska, USA ............................... 2

Testing I
Automated Web Application Testing Using Search Based Software Engineering
  Nadia Alshahwan and Mark Harman — UCL, UK ................................. 3
Auto-Locating and Fix-Propagating for HTML Validation Errors to PHP Server-side Code
  Hung Viet Nguyen, Hoan Anh Nguyen, Tung Thanh Nguyen, and Tien N. Nguyen — Iowa State University, USA .............................. 13
Scaling Up Automated Test Generation: Automatically Generating Maintainable Regression Unit Tests for Programs
  Brian Robinson, Michael D. Ernst, Jeff H. Perkins, Vinay Augustine, and Nuo Li — ABB Corporate Research, USA; University of Washington, USA; MIT, USA; ABB Robotics, Cyprus ................................. 23

Testing II
Heap Cloning: Enabling Dynamic Symbolic Execution of Java Programs
  Saswat Anand and Mary Jean Harrold — Georgia Tech, USA ....................... 33
Automatic Generation of Load Tests
  Pingyu Zhang, Sebastian Elbaum, and Matthew B. Dwyer — University of Nebraska-Lincoln, USA ................................. 43
Symbolic Search-Based Testing
  Arthur Baars, Mark Harman, Youssef Hassoun, Kiran Lakhotia, Phil McMinn, Paolo Tonella, and Tanja Vos — Universidad Politécnica de Valencia, Spain; UCL, UK; King’s College London, UK; University of Sheffield, UK; Fondazione Bruno Kessler, Italy ................................. 53

Testing III
Automated Documentation Inference to Explain Failed Tests
  Sai Zhang, Cheng Zhang, and Michael D. Ernst — University of Washington, USA; Shanghai Jiao Tong University, China ................................. 63
Generating Program Inputs for Database Application Testing
  Kai Pan, Xintao Wu, and Tao Xie — University of North Carolina at Charlotte, USA; North Carolina State University, USA ................................. 73
Prioritizing Tests for Fault Localization through Ambiguity Group Reduction
  Alberto Gonzalez-Sanchez, Rui Abreu, Hans-Gerhard Gross, and Arjan J. C. van Gemund — Delft University of Technology, Netherlands; University of Porto, Portugal ................................. 83

Software Model Checking
Identifying Future Field Accesses in Exhaustive State Space Traversal
  Pavel Parízek and Ondřej Lhoták — University of Waterloo, Canada ................................. 93
Model Checking Distributed Systems by Combining Caching and Process Checkpointing
Watcharin Leungwattanakit, Cyrille Artho, Masami Hagiya, Yoshinori Tanabe, and Mitsuharu Yamamoto — University of Tokyo, Japan; National Institute of Advanced Industrial Science and Technology, Japan; National Institute of Informatics, Japan; Chiba University, Japan ......................................................... 103

Supporting Domain-Specific State Space Reductions through Local Partial-Order Reduction
Péter Bokor, Johannes Kinder, Marco Serafini, and Neeraj Suri — TU Darmstadt, Germany; EPFL, Switzerland; Yahoo! Research Barcelona, Spain ................................................................. 113

Analysis, Verification, and Validation
Scalable and Precise Symbolic Analysis for Atomicity Violations
Malay K. Ganai — NEC Labs, USA ...................................................................... 123

DC2: A Framework for Scalable, Scope-Bounded Software Verification
Franjo Ivančić, Gogul Balakrishnan, Aarti Gupta, Sriram Sankaranarayanan, Naoto Maeda, Hiroki Tokuoka, Takashi Imoto, and Yoshiaki Miyazaki — NEC Labs, USA; University of Colorado at Boulder, USA; NEC Inc., Japan ..................................................... 133

Formalizing Hardware/Software Interface Specifications
Juncao Li, Fei Xie, Thomas Ball, Vladimir Levin, and Con Mcgarvey — Microsoft Inc., USA; Portland State University, USA ................................................................................................. 143

Safe Asynchronous Multicore Memory Operations
Matko Botinčan, Mike Dodd, Alastair F. Donaldson, and Matthew J. Parkinson — University of Cambridge, UK; Imperial College London, UK; Microsoft Research Cambridge, UK ............................................................................. 153

Models
A Rule-Based Approach to the Semantic Lifting of Model Differences in the Context of Model Versioning
Timo Kehrer, Udo Kelter, and Gabriele Taentzer — University of Siegen, Germany; Philipps-Universität Marburg, Germany 163

A Model-driven Framework for Guided Design Space Exploration
Ábel Hegedüs, Ákos Horváth, István Ráth, and Dániel Varró — Budapest University of Technology and Economics, Hungary 173

Automated Extraction of Architecture-Level Performance Models of Distributed Component-Based Systems
Fabian Brosig, Nikolaus Huber, and Samuel Kounov — KIT, Germany ................................................................................................................................. 183

Debugging
Precomputing Possible Configuration Error Diagnoses
Ariel Rabkin and Randy Katz — UC Berkeley, USA .................................................. 193

An Optimal Strategy for Algorithmic Debugging
David Insa and Josep Silva — Universidad Politècnica de Valencia, Spain ................ 203

Localizing SQL Faults in Database Applications
Sarah R. Clark, Jake Cobb, Gregory M. Kapfhammer, James A. Jones, and Mary Jean Harrold — Georgia Tech, USA; Allegheny College, USA; UC Irvine, USA .................................................................................. 213

Documentation, Traceability, and Program Understanding
Improving Automated Documentation to Code Traceability by Combining Retrieval Techniques
Xiaofan Chen and John Grundy — University of Auckland, New Zealand; Swinburne University of Technology at Melbourne, Australia .................................................................................. 223

Iterative Mining of Resource-Releasing Specifications
Qian Wu, Guangtai Liang, Qianxiang Wang, Tao Xie, and Hong Mei — Peking University, China; North Carolina State University, USA ...................................................................................... 233

Flexible Design Pattern Detection Based on Feature Types
Ghulam Rasool and Patrick Mäder — COMSATS Institute of Information Technology, Pakistan; Johannes Kepler University, Austria .................................................................................................... 243

Software Maintenance I
Towards More Accurate Retrieval of Duplicate Bug Reports
Chengnian Sun, David Lo, Siau-Cheng Khoo, and Jing Jiang — National University of Singapore, Singapore; Singapore Management University, Singapore ........................................................................ 253
A Topic-based Approach for Narrowing the Search Space of Buggy Files from a Bug Report
Anh Tuan Nguyen, Tung Thanh Nguyen, Jafar Al-Kofahi, Hung Viet Nguyen, and Tien N. Nguyen — Iowa State University, USA 263

Specifying and Detecting Meaningful Changes in Programs
Yijun Yu, Thein Than Tun, and Bashar Nuseibeh — Open University, UK; Lero, Ireland 273

Software Maintenance II
Self-Adaptive Software Meets Control Theory: A Preliminary Approach Supporting Reliability Requirements
Antonio Filieri, Carlo Ghezzi, Alberto Leva, and Martina Maggio — Politecnico di Milano, Italy 283

Generalizing Evolutionary Coupling with Stochastic Dependencies
Sunny Wong and Yuanfang Cai — Siemens Healthcare, USA; Drexel University, USA 293

Differential Precondition Checking: A Lightweight, Reusable Analysis for Refactoring Tools
Jeffrey L. Overbey and Ralph E. Johnson — University of Illinois at Urbana-Champaign, USA 303

Product Lines, Knowledge Acquisition, and Software Processes
A Performance Comparison of Contemporary Algorithmic Approaches for Automated Analysis Operations on Feature Models
Richard Pohl, Kim Lauenroth, and Klaus Pohl — University of Duisburg-Essen, Germany 313

Finding Relevant Answers in Software Forums
Swapna Gottipati, David Lo, and Jing Jiang — Singapore Management University, Singapore 323

Ning Chen, Steven C. H. Hoi, and Xiaokui Xiao — Nanyang Technological University, Singapore 333

Prediction and Ecological Inference
Local vs. Global Models for Effort Estimation and Defect Prediction
Tim Menzies, Andrew Butcher, Andrian Marcus, Thomas Zimmermann, and David Cok — West Virginia University, USA; Wayne State University, USA; Microsoft Research, USA; GrammaTech Inc., USA 343

Capacity Planning for Event-based Systems using Automated Performance Predictions
Christoph Rathfelder, Samuel Kounav, and David Evans — FZI, Germany; KIT, Germany; University of Cambridge, UK 352

Ecological Inference in Empirical Software Engineering
Daryl Posnett, Vladimir Filkov, and Premkumar Devanbu — UC Davis, USA 362

Short Papers I
Detection of Feature Interactions using Feature-Aware Verification
Sven Apel, Hendrik Speidel, Philipp Wendler, Alexander von Rhein, and Dirk Beyer — University of Passau, Germany; Simon Fraser University, Canada 372

Querying Source Code with Natural Language
Markus Kimmig, Martin Monperrus, and Mira Mezini — TU Darmstadt, Germany; University of Lille, France 376

Coverage Rewarded: Test Input Generation via Adaptation-Based Programming
Alex Groce — Oregon State University, USA 380

Mendel: Source Code Recommendation based on a Genetic Metaphor
Angela Lozano, Andy Kellens, and Kim Mens — Université Catholique de Louvain, Belgium; Vrije Universiteit Brussel, Belgium 384

Optimizing the Automatic Test Generation by SAT and SMT Solving for Boolean Expressions
Paolo Arcaini, Angelo Gargantini, and Elvina Riccobene — Università degli Studi di Milano, Italy; Università di Bergamo, Italy 388

Code-Based Automated Program Fixing
Yu Pei, Yi Wei, Carlo A. Furia, Martin Nordio, and Bertrand Meyer — ETH Zurich, Switzerland 392

Taming Changes With 1.x-Way Architecture-Implementation Mapping
Yongjie Zheng and Richard N. Taylor — UC Irvine, USA 396

Evaluating Test Selection Strategies for End-User Specified Flow-Based Applications
Kristina Winbladh and Anand Ranganathan — University of Delaware, USA; IBM Research Watson, USA 400

</table>
Run-time Systems Failure Prediction via Proactive Monitoring
Pengcheng Zhang, Henry Muccini, Andrea Polini, and Xuandong Li — Nanjing University, China; Hohai University, China; University of L’Aquila, Italy; University of Camerino, Italy
484

Towards an Approach and Framework for Test-Execution Plan Derivation
Soham Sundar Chakraborty and Vipul Shah — AMD, India; Tata Research Development and Design Centre, India
488

Statistical Debugging with Elastic Predicates
Ross Gore, Paul F. Reynolds, Jr., and David Kamensky — University of Virginia, USA; University of Texas at Austin, USA
492

Diagnosis of Software Failures Using Computational Geometry
Edward Stehle, Kevin Lynch, Maxim Shevertalov, Chris Rorres, and Spiros Mancoridis — Drexel University, USA
496

GitBAC: Flexible Access Control for Non-Modular Concerns
Mark Robinson, Jianwei Niu, and Macneil Shonle — University of Texas at San Antonio, USA
500

Client-side Web Application Slicing
Josip Maras, Jan Carlson, and Ivica Crnković — University of Split, Croatia; Mälardalen University, Sweden
504

Short Papers III
Supporting Activity Based Computing Paradigm in Global Software Development
Paolo Tell and Muhammad Ali Babar — IT University of Copenhagen, Denmark
508

Inferred Dependence Coverage to Support Fault Contextualization
Fang Deng and James A. Jones — UC Irvine, USA
512

Using Model-based Assurance to Strengthen Diagnostic Procedures
Robyn Lutz, Jeremy Johnson, and Ann Patterson-Hine — Jet Propulsion Lab, USA; Iowa State University, USA; NASA Ames, USA
516

Fault-Localization Using Dynamic Slicing and Change Impact Analysis
Elton Alves, Milos Gligoric, Vilas Jagannath, and Marcelo d’Amorim — Federal University of Pernambuco, Brazil; University of Illinois at Urbana-Champaign, USA
520

Improving Source Code Search with Natural Language Phrasal Representations of Method Signatures
Emily Hill, Lori Pollock, and K. Vijay-Shanker — Montclair State University, USA; University of Delaware, USA
524

Deviation Management during Process Execution
Marcos Aurélio Almeida da Silva, Xavier Blanc, and Reda Bendraou — LIP6, France; LaBRI, France
528

PRECIS: Inferring Invariants using Program Path Guided Clustering
Parth Sagdeo, Viraj Athavale, Sumant Kowshik, and Shobha Vasudevan — University of Illinois at Urbana-Champaign, USA
532

Automated Planning for Feature Model Configuration based on Stakeholders’ Business Concerns
Samaneh Soltani, Mohsen Asadi, Marek Hatala, Dragan Gašević, and Ebrahim Bagheri — Simon Fraser University, Canada; Athabasca University, Canada
536

An Adaptive Approach to Impact Analysis from Change Requests to Source Code
Malcom Gethers, Huzefa Kagdi, Bogdan Dit, and Denys Poshyvanyk — College of William and Mary, USA; Wichita State University, USA
540

Domain and Value Checking of Web Application Invocation Arguments
William G. J. Halfond — University of Southern California, USA
544

Mixed Constraints for Test Input Generation – An Initial Exploration
Shadi Abdul Khalek, Vidya Priyadarshini Narayanan, and Sarfraz Khurshid — University of Texas at Austin, USA
548

Enhancing Architectural Recovery Using Concerns
Joshua Garcia, Daniel Popescu, Chris Mattmann, Nenad Medvidovic, and Yuanfang Cai — University of Southern California, USA; Jet Propulsion Laboratory, USA; Drexel University, USA
552

Search-Based Fault Localization
Shaowei Wang, David Lo, Lingxiao Jiang, Lucia, and Hoong Chuin Lau — Singapore Management University, Singapore
556

Towards Requirements Aware Systems: Run-time Resolution of Design-time Assumptions
Kristopher Welsh, Pete Sawyer, and Nelly Bencomo — Lancaster University, UK; INRIA Paris - Rocquencourt, France
560

Generating Essential User Interface Prototypes to Validate Requirements
Massila Kamalrudin and John Grundy — University of Auckland, New Zealand; Swinburne University of Technology at Hawthorn, Australia
564
Automatically Exploring How Uncertainty Impacts Behavior of Dynamically Adaptive Systems
Andres J. Ramirez, Adam C. Jensen, Betty H. C. Cheng, and David B. Knoester — Michigan State University, USA . 568

Tool Demonstrations
iDiff: Interaction-based Program Differencing Tool
Hoan Anh Nguyen, Tung Thanh Nguyen, Hung Viet Nguyen, and Tien N. Nguyen — Iowa State University, USA . 572
CloneDifferentiator: Analyzing Clones by Differentiation
Zhenchang Xing, Yinxing Xue, and Stan Jarzabek — National University of Singapore, Singapore . 576
Implementing Efficient Model Validation in EMF Tools
Gábor Bergmann, Ábel Hegediš, Ákos Horváth, István Ráth, Zoltánn Ujhelyi, and Dániel Varró — Budapest University of Technology and Economics, Hungary . 580
JPF-AWT: Model Checking GUI Applications
Peter Mehlitz, Oksana Tkachuk, and Mateusz Ujma — NASA Ames, USA; University of Oxford, UK . 584
The CORE System: Animation and Functional Correctness of Pointer Programs
Ewen Maclean, Andrew Ireland, and Gudmund Grov — Heriot-Watt University, UK; University of Edinburgh, UK . 588
APIExample: An Effective Web Search Based Usage Example Recommendation System for Java APIs
Lijie Wang, Lu Fang, Leye Wang, Ge Li, Bing Xie, and Fuqing Yang — Peking University, China . 592
BEST: A Symbolic Testing Tool for Predicting Multi-threaded Program Failures
Malay K. Ganai, Nipun Arora, Chao Wang, Aarti Gupta, and Gogul Balakrishnan — NEC Labs, USA; Columbia University, USA . 596
Decomposing Feature Models: Language, Environment, and Applications
Mathieu Acher, Philippe Collet, Philippe Lahire, and Robert B. France — Université Nice Sophia Antipolis/CNRS, France; Colorado State University, USA . 600
SAUML: A Tool for Symbolic Analysis of UML-RT Models
Karolina Zurowska and Juergen Dingel — Queen’s University, Canada . 604
TestEra: A Tool for Testing Java Programs Using Alloy Specifications
Shadi Abdul Khalek, Guowei Yang, Lingming Zhang, Darko Marinov, and Sarfraz Khurshid — University of Texas at Austin, USA; University of Illinois at Urbana-Champaign, USA . 608
MAJOR: An Efficient and Extensible Tool for Mutation Analysis in a Java Compiler
René Just, Franz Schweiggert, and Gregory M. Kapfhammer — Ulm University, Germany; Allegheny College, USA . 612
jCT: A Java Code Tomograph
Markus Lumpe, Samiran Mahmud, and Olga Goloshchapova — Swinburne University of Technology at Hawthorn, Australia . 616
Generating Realistic Test Models for Model Processing Tools
Pit Pietsch, Hamed Shariat Yazdi, and Udo Kelter — University of Siegen, Germany . 620
Guided Test Visualization: Making Sense of Errors in Concurrent Programs
Saint Wesonga, Eric G. Mercer, and Neha Rungta — Brigham Young University, USA; NASA Ames, USA . 624
The Capture Calculus Toolset
Robert J. Hall — AT&T Labs Research, USA . 628
A Symbolic Model Checking Framework for Hierarchical Systems
Truong Khanh Nguyen, Jun Sun, Yang Liu, and Jin Song Dong — National University of Singapore, Singapore; Singapore University of Technology and Design, Singapore . 633

Doctoral Symposium
Automatically Detecting the Quality of the Query and its Implications in IR-based Concept Location
Sonia Haiduc — Wayne State University, USA . 637
Using Formal Concept Analysis to Support Change Analysis
Xiaobing Sun and Bixin Li — Southeast University, China . 641
A Framework for Managing Uncertainty in Self-Adaptive Software Systems
Naeem Esfahani — George Mason University, USA . 646
Toward Consistency Checking of Natural Language Temporal Requirements
Wenbin Li — University of Kentucky, USA . 651
Analyzing Temporal Properties of Abstract Models
Amirhossein Vakili — University of Waterloo, Canada

Improving Spectrum-Based Fault Localization Using Proximity-Based Weighting of Test Cases
Aritra Bandyopadhyay — Colorado State University, USA

Automatic Assessment of Software Documentation Quality
Andreas Dautovic — Johannes Kepler University, Austria
