Foreword .................................................................................................................................vii
Preface ........................................................................................................................................viii
Committees ..................................................................................................................................ix

Technical Papers
Model for the Effectiveness Estimation of Simulation-Based Acquisition 
by Considering the Value of Modeling and Simulation .................................................................3
Hae Young Lee, Hyung-Jong Kim, Jiwon Seo, and Hyunju Cha

Cost Estimation of Simulation Models for the Effectiveness Estimation 
of Simulation-Based Acquisition .....................................................................................................7
Hae Young Lee and Hyung-Jong Kim

Current Trends in Usability Evaluation Methods: A Systematic Review .......................................11
Freddy Paz and José Antonio Pow-Sang

Data Integration Progression in Large Data Source Using Mapping Affinity .................................16
Bagrudeen Bazeer Ahamed, Thirunavukarasu Ramkumar, 
and Shanmugasundaram Hariharan

The Effect of Database System Application to Alleviate Chronic Obstructive 
Pulmonary Disease .........................................................................................................................22
Seong-Ran Lee

A Design of Efficient Medical Information System to Enhance Health 
Behaviors After Radical Prostatectomy ..........................................................................................26
Seong-Ran Lee

Construction for Balanced Boolean Function with Maximum Algebraic 
Immunity ...........................................................................................................................................32
Yindong Chen, Wei Tian, and Ya-Nan Zhang
Optical Illusion Effect by Histogram Analysis .................................................................35
    Gwanggil Jeon, Eunju Kim, and Nam Kook Kim

A Survey on Encryption Schemes in Wireless Sensor Networks ..................................39
    Haythem Hayouni, Mohamed Hamdi, and Tai-Hoon Kim

A Survey on Security Models, Techniques, and Tools for the Internet of Things ..........44
    Raja Benabdessalem, Mohamed Hamdi, and Tai-Hoon Kim

Quantitative Risk Management for Communication and Information Systems:
State-of-the-Art and Challenges ..................................................................................49
    Raed Labassi, Mohamed Hamdi, and Tai-Hoon Kim

Author Index ..................................................................................................................55
