Message from the TESTBEDS 2015 Chairs:

Welcome to the Sixth International Workshop on Testing Techniques for Event Based Software (TESTBEDS 2015). This edition of TESTBEDS is co-located with the 30th IEEE/ACM International Conference on Automated Software Engineering (ASE).

The aim of the TESTBEDS Workshop is to bring together researchers and practitioners working on theory, techniques and applications that concern testing of event-based software/system. All submitted papers were reviewed by three different elements of the program committee. Three papers were rejected, and 6 were accepted.

The technical program of the Workshop contains five research papers and a tool demo paper on a variety of topics, such as GUI testing, mobile application testing, model driven and pattern-based testing of event-based software. Papers accepted are from a variety of countries: Japan, United States of America, Portugal and Italy.

Organizing this event would not have been possible without the engagement of a team of people. We thank all the authors of submitted papers for their contributions and the TESTBEDS Program Committee for their reviews and for selecting an excellent programme.

We sincerely hope that your participation in the TESTBEDS 2015 workshop will become a rewarding experience.

Ana C. R. Paiva, Faculty of Engineering of the University of Porto, Portugal
Anna Rita Fasolino, University of Naples Federico II, Italy
