# 2009 Advances in Social Network Analysis and Mining

**ASONAM 2009**

## Table of Contents

### Conference Information

[Conference Information](#) .................................................................................................................................xii

## Full Papers

### Applications of Social Networks

- *A Journey to the Core of the Blogosphere* .................................................................1  
  *Darko Obradović and Stephan Baumann*

- *Structural Hole and Personal Innovativeness in a Bureau of Health* ......................7  
  *Hsieh-Hua Yang, Hung-Jen Yang, Fen Fen Huang, and Ke-Wu Yao*

- *Exploratory Study of Intra-Organizational Learning from Social Network Perspective within a Spanish Knowledge Intensive Company* .................................................................13  
  *Jesús David Sánchez de Pablo González del Campo, Miha Škerlavaj, Fátima Guadamillas Gómez, and Vlado Dimovski*

### Privacy and Meta Aspects

- *A Trustable Reputation Scheme Based on Private Relationships* ........................................19  
  *Shin-Yan Chiou, Shih-Ying Chang, Ghita Mezzour, Adrian Perrig, and Hung-Min Sun*

- *The Economic Benefits of Web Mining* ........................................................................25  
  *David Kinzel, Micah Klettke, Paul Uppal, Naheed Visram, Keivan Kianmehr, Reda Alhajj, and Jon Rokne*

### Social Aspects

- *Getting Online but Still Living Offline: The Complex Relationship of Technology Adoption and In-person Social Networks* .........................................................33  
  *Cynthia Putnam and Beth Kolko*

- *An Analytical Way to Find Influencers on Social Networks and Validate their Effects in Disseminating Social Games* .................................................................41  
  *Erica Suyeon Kim and Steve Sangki Han*

- *Impact of Using Semantic Social Networks on Organizations* .........................................47  
  *Ali Fatalian, Zahra Amin Nayeri, and Mohammad Azadnia*
Groupthink and Peer Pressure: Social Influence in Online Social Networks
Groups ........................................................................................................................................................................53
*Pan Hui and Sonja Buchegger*

Collaborative Intensity in Social Networks .................................................................................................................................60
*Klaus Stein and Steffen Blaschke*

**Algorithms for Social Networks**

Spectral Counting of Triangles in Power-Law Networks via Element-Wise Sparsification ..........................................................66
*Charalampos Tsourakakis, Petros Drineas, Eirinaios Michelakis, Ioannis Koutis, and Christos Faloutsos*

AHSCAN: Agglomerative Hierarchical Structural Clustering Algorithm for Networks ...........................................................................72
*Nurcan Yuruk, Mutlu Mete, Xiaowei Xu, and Thomas A.J. Schweiger*

A Multi-Agent Based Decentralized Algorithm for Social Network Community Mining ...........................................................................78
*Bo Yang, Jing Huang, Dayou Liu, and Jiming Liu*

**Detecting Various Aspects in Social Networks**

Detecting Structural Changes and Command Hierarchies in Dynamic Social Networks ........................................................................83
*Romain Bourqui, Frédéric Gilbert, Paolo Simonetto, Faraz Zaidi, Umang Sharan, and Fabien Jourdan*

Automatically Detecting Points of Interest and Social Networks from Tracking Positions of Avatars in a Virtual World ......................................................................................................................................................89
*Frank Kappe, Bilal Zaka, and Michael Steurer*

Filtering Spam in Social Tagging System with Dynamic Behavior Analysis ....................................................................................95
*Bo Liu, Eman Zhai, Huiping Sun, Yelu Chen, and Zhong Chen*

The Dynamics of Actor Loyalty to Groups in Affiliation Networks ........................................................................................................101
*Hossam Sharara, Lisa Singh, Lise Getoor, and Janet Mann*

Social Network Discovery Based on Sensitivity Analysis ...............................................................................................................107
*Tarik Crnovrsanin, Carlos D. Correa, and Kwan-Liu Ma*

**Recommendation and Prediction**

A Collaborative and Content Based Event Recommendation System Integrated with Data Collection Scrapers and Services at a Social Networking Site ...................................................................................113
*Mehmet Kayaalp, Tansel Özyer, and Sibel Taryan Özyer*

Using Social Network to Predict the Behavior of Active Members of Online Communities .....................................................................................................................119
*Aleš Žiberna and Vasja Vehovar*
Trade-offs between Agility and Reliability of Predictions in Dynamic Social Networks Used to Model Risk of Microbial Contamination of Food ........................................................................125

Artur Dubrawski, Purnamrita Sarkar, and Lujie Chen

Predicting Links in Social Networks Using Text Mining and SNA .........................................................................131

Alon Bartal, Elan Sasson, and Gilad Ravid

Automatic Mapping of Social Networks of Actors from Text Corpora: Time Series Analysis .................................................................137

James A. Danowski and Noah T. Cepela

From Social Networks to Behavioral Networks in Recommender Systems ........................................................................143

Ilham Esslimani, Armelle Brun, and Anne Boyer

Predicting the Nexus between Post-Secondary Education Affordability and Student Success: An Application of Network-Based Approaches .............................................................................................................149

Ashwin Arulselvan, Pilar Mendoza, Vladimir Boginski, and Panos Pardalos

Models for Social Networks

A Matrix Alignment Approach for Collective Classification ..........................................................................................................................155

Jerry Scripps, Pang-Ning Tan, Feilong Chen, and Abdol-Hossein Esfahanian

Possible Occurrence of Scale-Free Topology in Highly Statistically Associated Polymorphic Positions in Two Potyviral Proteins ......................................................................................................................160

Ioannis N. Manoussopoulos and Ioanna Zevlekari

Modeling a Store's Product Space as a Social Network ..........................................................................................................................164

Troy Raeder and Nitesh V. Chawla

Social Network Model Based on Keyword Categorization ..................................................................................................................170

Prantik Bhattacharyya, Ankush Garg, and S. Felix Wu

Waiting Time Sensitivities of Social and Random Graph Models .........................................................................................................176

Dominik Dahlem and William Harrison

Defining a Universal Actor Content-Element Model for Exploring Social and Information Networks Considering the Temporal Dynamic .....................................................................................................................182

Claudia Müller, Benedikt Meuthrath, and Sabina Jeschke

Definition and Measures of an Opinion Model for Mining Forums ...................................................................................................188

Anna Stavrianou, Julien Velcin, and Jean-Hugues Chauchat

Models of Communication Dynamics for Simulation of Information Diffusion ......................................................................................194

Konstantin Mertsalov, Malik Magdon-Ismail, and Mark Goldberg

Social Network Analysis

Networks Evolving Step by Step: Statistical Analysis of Dyadic Event Data ..........................................................................................200

Ulrik Brandes, Jürgen Lerner, and Tom A.B. Snijders

Developing Compelling Social-Enabled Applications with Context-Based Social Interaction Analysis .................................................................................................................................206

Ryan Skraba, Mathieu Beauvais, Johann Stan, Abderrahmane Maaradji, and Johann Daigremont
Automatic Mapping of Social Networks of Political Actors from Large Collections of News Stories .......................................................... 212
    Noah T. Cepela and James A. Danowski

Exploring Emergent Semantic Communities from DBLP Bibliography Database ........................................................................................................ 219
    Zhixing Huang, Yan Yan, Yuhui Qiu, and Shuqiong Qiao

A Fuzzy Approach to Social Network Analysis ................................................................. 225
    Matteo Brunelli and Michele Fedrizzi

Combining Social Network Analysis and Sentiment Analysis to Explore the Potential for Online Radicalisation ........................................................................... 231
    Adam Bermingham, Maura Conway, Lisa McInerney, Neil O’Hare, and Alan F. Smeaton

Data Mining and Identification

Local Community Identification in Social Networks ........................................................................ 237
    Jiyang Chen, Osmar Zaïane, and Randy Goebel

Mining the Dynamics of Music Preferences from a Social Networking Site .................................................. 243
    Nico Schlitter and Tanja Falkowski

Prying Data out of a Social Network ....................................................................................... 249
    Joseph Bonneau, Jonathan Anderson, and George Danezis

Representation, Visualization, and Interaction

Egocentric Information Abstraction for Heterogeneous Social Networks ........................................... 255
    Cheng-Te Li and Shou-De Lin

Integrated Representation and Visualisation of the Dynamics in Computer-mediated Social Networks ............................................................................................... 261
    Andreas Harrer, Sam Zeini, and Sabrina Ziebarth

Harnessing Wisdom of the Crowds Dynamics for Time-Dependent Reputation and Ranking ............................................................. 267
    Elizabeth M. Daly

Transformation of Online Representation through Time ................................................................ 273
    Roya Feizy, Ian Wakeman, and Dan Chalmers

Short Papers

Applications of Social Networks

Social Network Analysis as Knowledge Discovery Process: A Case Study on Digital Bibliography .................................................................................. 279
    Michele Coscia, Fosca Giannotti, and Ruggero Pensa

An Integrated Workflow Management Solution for Heritage Information Mashups .......................................................... 284
Dynamics and Evolution Patterns of Business Networks ................................................................. 290
  
  Brigitte Gay and Eloïse Loubier

Online Police Station, A State-of-Art Italian Semantic Technology against Cybercrime ................................................................. 296
  
  Federico Neri, Paolo Geraci, Gianluca Sanna, and Liviana Lotti

Privacy and Meta Aspects

A Retrospective Review of Social Networks .................................................................................. 300
  
  Petros Xanthopoulos, Ashwin Arulselvan, Vladimir Boginski, and Panos Pardalos

Twins (1): Extending SQL to Support Corporation Privacy Policies in Social Networks ...................... 306
  
  Sampson Pun, Amir H. Chinaei, and Ken Barker

Can Friends Be Trusted? Exploring Privacy in Online Social Networks ............................................. 312
  
  Frank Nagle and Lisa Singh

Clustering

Content-Based Clustering for Tag Cloud Visualization ......................................................................... 316
  
  Arkaitz Zubiaga, Alberto P. García-Plaza, Victor Fresno, and Raquel Martínez

Search Results Clustering Using Nonnegative Matrix Factorization (NMF) ........................................... 320
  
  Hussam Dahwa Abdulla, Martin Polovincak, and Vaclav Snasel

Recommendation and Prediction

Predicting User Behaviour to Facilitate Efficient Provision of Health Applications .................................. 324
  
  Mohamad El-Hajj and Robert S. Hayward

Intelligent Advertising for User Generated Content through Sentiment Analysis .................................... 330
  
  Guang Qiu, Jiajun Bu, Chun Chen, and Feng Zhang

A Method for Identifying Malicious Activity in Collaborative Systems with Maps .................................. 334
  
  Vasco Furtado, Thiago Assunção, Marcos de Oliveira, Mairon Belchior, and Jonathan D’Orleans

Models and Data Mining

A Visual Data Mining Approach to Find Overlapping Communities in Networks ................................. 338
  
  Jiyang Chen, Osmar Zaïane, and Randy Goebel

Dynamic and Static Influence Models on Starbucks Networks .......................................................... 344
  
  Minkyoung Kim, Byoung-Tak Zhang, and June-Sup Lee

Reducing Social Network Dimensions Using Matrix Factorization Methods ....................................... 348
  
  Václav Snášel, Zdeněk Horák, Jana Kočíbová, and Ajith Abraham

ix
**Visualization, Interaction, and Social Aspects**

Browsing Unbounded Social, Linked Data Instances with User Perspectives ................................................................. 352
  *Hyun Namgoong, Sungkwoon Yang, Mina Song, and Hong-Gee Kim*

Dynamics of Inter-Meeting Time in Human Contact Networks ......................................................................................... 356
  *Eiko Yoneki, Dan Greenfield, and Jon Crowcroft*

**Posters**

Identify Implicit Social Network by RST/FL Framework ................................................................................................. 362
  *Hong Feng Lai*

History-Based Email Prioritization .............................................................................................................................. 364
  *Ronald Nussbaum, Abdol-Hossein Esfahanian, and Pang-Ning Tan*

An Application of Multicriteria Weighted Graph Similarity Method to Social Networks Analyzing .................................................. 366
  *Zbigniew Tarapata and Rafal Kasprzyk*

SQL Privacy Model for Social Networks .................................................................................................................. 369
  *Maryam Majedi, Kambiz Ghazinour, Amir H. Chinaei, and Ken Barker*

A New Community Detection Algorithm Based on Makov-Chains and a Team Formation Model .................................................. 371
  *Patrick J. McSweeney, Kishan Mehrotra, and Jae C. Oh*

Knowledge-reuse Networks of an On-line PBL Framework ............................................................................................ 373
  *H.H. Yang, J.C. Yu, H.J. Yang, L.M. Chen, and L.H. Kuo*

The Social Network Induced by the Common Knowledge of Proverbs ............................................................................. 375
  *Matthias Funk and Armando Mendes*

Graph Mining Framework for Finding and Visualizing Substructures Using Graph Database ......................................................... 379
  *Swapnil Shrivastava and Supriya N. Pal*

**Workshop on Mining Social Networks for Decision Support**

Mining Proximal Social Network Intelligence for Quality Decision Support ...................................................................... 381
  *Yuan-Chu Hwang*

Ranking Learning on the Web by Integrating Network-Based Features .............................................................................. 387
  *Yingzi Jin, Yutaka Matsuo, and Mitsuru Ishizuka*

The Use of Social Network Analysis in Knowledge Diffusion Research from Patent Data ...................................................... 393
  *Chao-Chih Hsueh and Chun-Chieh Wang*

Mining Target-oriented Fuzzy Correlation Rules in Telecom Database ............................................................................. 399
  *Hao-En Chueh, Nancy P. Lin, and Nien-Yi Jan*

Text Document Classification and Pattern Recognition .................................................................................................. 405
  *Qin Wu, Eddie Fuller, and Cun-Quan Zhang*

Mining Organizational Networks for Layoff Prediction Model Construction ...................................................................... 411
  *Huo-Tsan Chang, Hui-Ju Wu, and I-Hsien Ting*
Investigation of Network Structure in Taiwan Automobile Industry .................................................. 417

Chang-Jan Yu and Ting-Lin Lee

Author Index .................................................................................................................................................. 425
