TABLE OF CONTENTS

3RD IEEE SYMPOSIUM ON
APPLICATION-SPECIFIC SYSTEMS AND SOFTWARE ENGINEERING TECHNOLOGY

Message from the Program Co-Chairs ............................................................... viii
Organizing Committee ................................................................................... ix
Program Committee ....................................................................................... x

KEYNOTE SESSION

Global Information Grid - DoD Information Technology for the 21st Century
Raymond Paul, DoD

PANEL SESSION

“Software Engineering—Challenges and Techniques”
Moderator: Farokh B. Bastani, University of Texas at Dallas
Panelists: Ravi Appan, Nortel Networks
Bill Bressler, Nortel Networks
Bhavani Thuraisingham, MITRE
Stephen Yau, Arizona State University
Victor Winter, Sandia National Labs

PAPER SESSION: WEB-BASED AND INTERNET TECHNOLOGIES

Chair: Sukumaran Nair, Southern Methodist University

Discovery of Web Frequent Patterns and User Characteristics from Web
S. Dua, E. Cho, and S. Iyengar

Designing User Interface for Web Interactive Systems ......................... 9
A. Filho, R. de Barros, and H. Liesenberg

A Web-Based Architecture of Racks and Parts for Manager and Agent Assembly .......... 17
M. Chen

PAPER SESSION: WIRELESS SYSTEMS

Chair: Victor Winter, Sandia National Labs

Load-Balancing Clusters in Wireless Ad Hoc Networks ......................... 25
A. Amis and R. Prakash

Scheduling Multimedia Information Delivery Over Unicast Wireless Channels .......... 33
B. Prabhakaran
PAPER SESSION: TESTING TECHNIQUES
Chair: Sitharama S. Iyengar, Louisiana State University

Augmenting Sequence Constraints in Z and its Application to Testing ................................................. 41
   W. Tsai, V. Agarwal, B. Huang, and R. Paul
Regressive Model Approach to the Generation of Test Trajectories ..................................................... 49
   B. Taylor and B. Cukic
Predicting Testability of Program Modules Using A Neural Network .................................................... 57
   T. Khoshgoftaar, E. Allen, and Z. Xu

INDUSTRIAL SESSION: TECHNIQUES FOR CREATING DEPENDABLE SOFTWARE/SYSTEMS
Chair: W. Eric Wong, Telecordia

A Toolsuite for Testing Real-Time Ada Applications ................................................................................ 65
   Y.-H. Lee, Y. Byun, J. Xiao, O. Goh, W. Wong, and A. Lee
Analysis of a Multi-Layer Fault-Tolerant COTS Architecture for Deep Space Missions .......................... 70
   S. Chau, L. Alkalai, and A. Tai

PAPER SESSION: SOFTWARE REUSE, REQUIREMENT, AND QUALITY PREDICTION
Chair: Bojan Cukic, University of West Virginia

A Case Study of a Reusable Component Collection ................................................................................. 79
   W. Frakes
An Application of Fuzzy Clustering to Software Quality Prediction ..................................................... 85
   X. Yuan, T. Khoshgoftaar, E. Allen, and K. Ganesan
Composing Requirements for Goal-Oriented System Behaviors Using an Extended Form of Use Case ................................................................. 91
   Y. Lee, J. Ryoo, J. Stach, and E. Park
A Black Box Framework for An Application Protocol Stack .................................................................. 96
   A. Conte and L.-P. Anquetil

KEYNOTE SESSION

How to Obtain Accurate Estimates in a Real-Time Environment Using Full Function Points .................. 105
   Fred Bootsma, Nortel Networks

PANEL SESSION

“Software Reuse in Practice”
Moderator: William Frakes, Virginia Tech
Panelists: Charles Krueger, BigLever Software, Inc.
   Ira Baxter, Semantic Designs Inc.
   Sourav Bhattacharya, Arizona State University

Practical Software Reuse .......................................................................................................................... 115
   W. Frakes
Software Product Line Reuse in Practice ................................................................. 117
C. Krueger

Design Reuse and Scale: Keys to Practical Code Generation and Large Scale Software Maintenance .................................................. 119
I. Baxter

COTS Integration: Essential for Network Engineering ........................................... 121
S. Palangala and S. Bhattacharya

PAPER SESSION: SYSTEMS TECHNIQUES FOR COMMUNICATION NETWORKS
Chair: Biao Chen, University of Texas at Dallas

QoS Measures and Implementations Based on Various Models for Real-Time Communications .................................................. 125
J. Ding, M. Kirkpatrick, and E. Sha

A Survivability Assessment Tool for Restorable Networks .................................. 130
H. Cankaya and V. Nair

Gateway Routing: A Cluster Based Mechanism for Recovery from Mobile Host Partitioning in Cellular Networks .......................... 135
S. Raghunathan, S. Venkatesan, and R. Prakash

PAPER SESSION: APPLICATION-SPECIFIC MODELING AND EVALUATION TECHNIQUES
Chair: S. Venkatesan, University of Texas at Dallas

Improved Testing Using Failure Cost and Intensity Profiles ............................... 143
S. Ntafos and V. Pocciun-Benson

Fingerprint Registration Using Genetic Algorithms ........................................... 148
H. Ammar and Y. Tao

A Dynamic Memory Measuring Tool for C++ Programs .................................... 155
W. Lee, J. Chang, and Y. Hasan

PAPER SESSION: SPECIALIZED SYSTEMS AND SOFTWARE ENGINEERING TECHNIQUES
Chair: Ravi Prakash, University of Texas, Dallas

Automating the Development of Pattern-Oriented Designs for Application Specific Software Systems ........................................... 163
S. Yacoub, H. Xue and H. Ammar

Issues in Realization of an Execution Time Analyzer for Distributed Real-Time Objects .................................................. 171
K. Kim, L. Choi, and M. Kim

How to Manage Real-Time Transactions in Non-Strict Context ....................... 179
S. Saad-Bouzefrane and B. Sadeg

AUTHOR INDEX ........................................................................................................ 187
