## Keynotes

- Document Driven Disciplined Development of Software .......................... 2  
  - *D. Parnas*
- The Challenges of Managing a Global Software Engineering Capability: Theory to Practice ......................... 4  
  - *D. Barbagallo*
- Virtual Machines, Managed Code and Component Technology ................................. 5  
  - *J. Gough*

## Session 1A: Model Driven Development

  - *A. MacDonald, D. Russell, and B. Atchison*
- Consistent Code Generation from UML Models .................................................................... 23  
  - *Q. Long, Z. Liu, X. Li, and H. Jifeng*
- Extending UML for Model Composition ........................................................................ 31  
  - *J. Estublier and A. Ionita*

## Session 1B: Requirements Engineering

- Improving Goal and Role Oriented Analysis for Agent Based Systems .................................. 40  
  - *P. Kuan, S. Karunasekera, and L. Sterling*
- Tackling the Complexity of Requirements Engineering Process Improvement by Partitioning the Improvement Task ............................................................ 48  
  - *U. Nikula and J. Safianiemi*
- Merging Requirements Views with Incompleteness and Inconsistency ....................................... 58  
  - *A. Martinez, J. Arias, and A. Vilas*

## Session 1C: Project Management

  - *J. Verner and N. Cerpa*
- Evaluation of Effects of Pair Work on Quality of Designs ......................................................... 78  
  - *H. Al-Kilidar, P. Parkin, A. Aurum, and R. Jeffery*
- Defining Autonomic Computing: A Software Engineering Perspective ........................................ 88  
  - *P. Lin, A. MacArthur, and J. Leaney*
**Session 2A: Testing, Analysis, and Verification**

A UML Approach to the Generation of Test Sequences for Java-Based Concurrent Systems .............. 100  
S.-K. Kim, L. Wildman, and R. Duke

A Tool to Support Perspective Based Approach to Software Code Inspection ........................................... 110  
L. Chan, K. Jiang, and S. Karunasekera

Obtaining Probabilistic Dynamic State Graphs for TPPAL Processes ..................................................... 118  
J. Pardo, V. Valero, M. Ruiz, F. Cuartero, and G. Diaz

**Session 2B: Formal Methods**

A Process-Based Semantics for Message Sequence Charts with Data ..................................................... 130  
C.-A. Chen, S. Kalvala, and J. Sinclair

A Formal Method for Program Slicing ..................................................................................................... 140  
Y. Zhang, B. Xu, and J. Gayo

Towards a Schema Representation through Design Matrices ................................................................. 149  
S. Gómez and H. Duong

**Session 2C: Architecture 1**

Supporting Dynamic Software Tool Integration via Web Service-Based Components ....................... 160  
N. Yap, H. Chiong, J. Grundy, and R. Berrigan

Operational Management Contracts for Adaptive Software Organisation ............................................... 170  
A. Colman and J. Han

Parsing and Semantic Modelling for Software Engineering Applications ............................................... 180  
W. Irwin, C. Cook, and N. Churcher

**Session 3A: Measurement and Experimentation**

Adapting the Personal Software Process (PSP) to Formal Methods ......................................................... 192  
A. Babar and J. Potter

Automatic Measurement of a QoS Metric for Web Service Recommendation ...................................... 202  
N. Thio and S. Karunasekera

Detecting Indirect Coupling ..................................................................................................................... 212  
H. Yang, E. Tempero, and R. Berrigan

**Session 3B: Formal Component Technology**

Refinement Laws for Verifying Library Subroutine Adaptation ................................................................. 224  
C. Fidge, P. Robinson, and S. Dunne

Specification-Based Retrieval Strategies for Component Architectures .................................................. 233  
D. Hemer

A Formal Description of Design Patterns Using OWL ............................................................................ 243  
J. Dietrich and C. Elgar

**Session 3C: Maintenance and Reuse**

Software Reuse across Robotic Platforms: Limiting the Effects of Diversity ........................................... 252  
G. Smith, R. Smith, and A. Wardhani

A Comparison of Reverse Engineering Tools Based on Design Pattern Decomposition ........................... 262  
F. Arcelli, S. Masiero, C. Raibulet, and F. Tisato
ReArchJBs: A Tool for Automated Software Architecture Recovery of JavaBeans-Based Applications
C.-A. Sun, J. Zhou, J. Cao, M. Jin, C. Liu, and Y. Shen

Session 4A: Architecture 2

Formulating the Architectural Design of Enterprise Applications as a Search Problem
T. Al-Naeem, F. Dabous, F. Rabhi, and B. Benatallah

A Study of the In-Practice Application of a Commercial Software Architecture
R. Barrow, K. Frampton, M. Hamilton, and B. Crossman

Practical Application of Formal Methods for Specification and Analysis of Software Architecture
C. Maxwell, A. Parakhine, and J. Leaney

Session 4B: Education

Curriculum Development in Educating Undergraduate Software Engineers — Are Students Being Prepared for the Profession?
J.-G. Schneider, L. Johnston, and P. Joyce

Quality Assurance in a Student-Based Agile Software Engineering Process
A. Marrington, J. Hogan, and R. Thomas

Session 4C: Components

Deriving Systems Level Security Properties of Component Based Composite Systems
K. Khan and J. Han

Demonstrating the Effectiveness of Exclusion Control for Components
J. Potter, A. Shanneb, and E. Yu
