Each year, ATS proudly presents the Best Paper Award to the author(s) of the most outstanding paper from those presented at the previous year’s symposium. The candidates for this coveted honor are initially selected based solely on the numerical ratings of the reviewers and symposium attendees, as recorded on the review forms and the session rating cards. The Best Paper Award Judges then carefully review the candidate papers as published in the proceedings. Each judge provides a ranking of the papers. This ranking is then compiled to select the best paper. In case of a tie, if possible, attendee feedback, specific comments by the reviewers, etc. are used to break the tie.

The paper selected by the ATS’01 Best Paper Award Judges for the Best Paper Award is:

**Effective Techniques for High-Level ATPG**

*by Fulvio Corno, Gianluca Cumani, Matteo Sonza Reorda, and Giovanni Squillero*

Congratulations to the winners!

The ATS’01 Best Paper Award Judges are listed below. ATS extends a special thanks to these individuals for completing the review and ranking the papers on very short notice.

Jwu E. Chen, *Chung-Hua University, Taiwan*
Kazumi Hatayama, *Hitachi, Ltd., Japan*
Hiromi Hiraishi, *Kyoto Sangyo University, Japan*
Christian Landrault, *LIRMM, France*
Michel Renovell, *LIRMM, France*
Prab Varma, *Veritable Inc., USA*
Shiyi Xu, *Shanghai University, China*
