2011 Fourth International Conference on Business Intelligence and Financial Engineering

BIFE 2011

Table of Contents

Preface ...................................................................................................................................................... xviii
Organizing Committee ............................................................................................................................ xx
Program Committee .................................................................................................................................. xxi
Reviewers ................................................................................................................................................. xxvi
Co-sponsors ............................................................................................................................................. xxvii
Technical Co-sponsors ............................................................................................................................. xxviii
Workshops ............................................................................................................................................... xxix

Artificial Intelligence
The Optimization of Network Text Filtering Model Based on the Hownet and Concept Expansion ................................................................. 1
   Shiying Yu and Junren Ming

Business Competitors Analysis Based on Rough Set Theory: A Case of Business Partner Dynamic Selection .................................................. 5
   Yufeng Zhang, Lei Zhou, and Chao He

The Study on Early Warning of Online Public Crisis Based on Intelligent Meta Search Engine ........................................................................ 9
   Zhan-ping Wang and Xiao Xiao

Research of Intelligent Intrusion Detection System Based on Web Data Mining Technology ........................................................................ 14
   Wenguang Chai, Chunhui Tan, and Yuting Duan

A Combination Forecasting Method Based on GEP .................................................................................. 18
   Dabin Zhang, Jingguang Zhang, Ran Cheng, and Wensheng Zhang
Artificial Neural Networks
Forecasting Exchange Rate Volatility with Linear MA Model and Nonlinear GABP Neural Network
Zhigang Huang, Guozhong Zheng, and Yaqin Jia
The Use of Grey Verhulst Model in the Prediction of Operating Activity Cash Flow
Jin Su and Jianyong Zhou
The Forecast of Price Index Based on Wavelet Neural Network
Huang Dongdong and Zen Wenhong

Evolutionary Algorithms
Micro-foundation of Industrial Clusters’ Evolution: Implications from a Simulation Approach
Tao Wang
Business Cycle Index Forecasting of Grey Model Optimized by Genetic Algorithm
Huayun Yu and Dabin Zhang

Support Vector Analysis
Least Square Support Vector Machine Based on Improved Particle Swarm Optimization to Short-term Forecasting
Dabin Zhang, Sen Peng, Yuting Duan, and Wensheng Zhang
Support Vector Machine Based Forecasting of the Contract Prices of Stock Index Futures
Yuanyuan Yang, Mingche Su, Yang Zhou, and Chucong He
Price Prediction of Stock Index Futures Based on SVM
Hezhong Dai, Yichi Zhang, and Dapeng Wang
Data Collaboration and Predictability of Financial Index
Xiaoxiao Feng and Wenqi Duan

Portfolio Optimization
A Novel Time-Scale Feature Based Hybrid Portfolio Selection Model for Index Fund
Zheng Li, Yun Liu, Shaohua Tan, Bingwu Liu, and Juntao Li
Optimal Portfolio and Consumption in Modified Black-Scholes Model
Zhefei He
OLAP and Data Warehousing

The Mechanism as to How High-Tech Products Import Affect Their Export:
Evidence from a China's Panel .................................................................72
  Mingrong Wang, Mingxi Wang, and Dabin Zhang

Volatility Research Based on SHIBOR ..................................................77
  Xiaofeng Zhang, Lan Yao, and Qi Yang

A Study of the USDX Predication Based on ARIMA and GARCH Models ..................................................82
  Zhiwei Liu and Ya Lv

Product Named Entity Recognition Using Conditional Random Fields ..................................................86
  Fang Luo, Han Xiao, and Weili Chang

Financial Diagnosis

The Analysis of Shareholder Theory and Stakeholder Theory .................................................................90
  Yanru Zhang

The Economic Performance and the Quantity and Ratio of Currency Crisis
under the Exchange Rate Regimes with Differentiating the Periods ..................................................93
  Yunpeng Song, Yanping Zhao, and Haizhen Yang

Risk Management

Analysis of the Relationship between the Employee Training and the Level
of the Risk Management of Village Bank in China .................................................................97
  Shaoqiang Qu and Qiquan Zhang

Risk Control of Stock Index Futures in China Based on EGARCH-VaR Model ........................................101
  Zhiwei Liu and Xiang Yang

Operational Risk Measurement: A Nonparametric Approach Using
Cornish-Fisher Expansion ...........................................................................105
  Jichuang Feng, Jianping Li, Jianming Chen, Yingqi YangHuo, and Weiquan Liu

Business Data Mining

The Enlightenment of Foreign Open Educational Resources .................................................................110
  Yuhai Li and Lu Zhang

Study on Predictive Model of Customer Churn of Mobile Telecommunication
Company .................................................................................................114
  Yu-bao Chen, Bao-sheng Li, and Xin-quan Ge

Collaborative Tagging Mechanism and Standardization Control in Douban ........................................118
  Huixiang Xiong, Lianhua Gao, Ying Xu, and Zuofang Liao
Analysis of Financial News Impact on Stock Based on a Statistical Learning Method with News Density ...............................................................................................................................122

Feng Wang, Xiaodong Li, and Chenxiao Dou

Empirical Analysis on the Cities' GDP and the Main Economic Indicators of High-Tech Industrial Parks ..........................................................................................................................126

Yu-Chen Song and Sha Zhen

Application of Random-SMOTE on Imbalanced Data Mining ..........................................................................................................................130

Jia Li, Hui Li, and Jun-Ling Yu

Multivariate Analysis of Real Option Value Based on Grey Relational Model ..........................................................................................................................134

Zheng-Xin Wang and Ling-ling Pei

The Analysis on the Sensitivity of Steel Enterprise to Iron Ore Price ..........................................................................................................................138

Yingming Mao and Han Qiao

Customer Relationship Management
Construction and Optimization of Recruitment Websites in China ..........................................................................................................................143

Yihong Zhan and Yanyan Yan

User Compatibility Management in Library Service Interaction ..........................................................................................................................147

Qingrong Guo

The Effects of Customer Relationship Management on New Product Design ..........................................................................................................................151

Lifeng Tu

Assessing the Relationship among Service Quality, Customer Satisfaction and Behavioral Intentions in Online Shopping Environments ..........................................................................................................................155

Jing He and Yun Bai

Business Decision Analysis
Optimization of the Dynamic Vehicle Routing Problem with Increasing Scale ..........................................................................................................................160

Xin Tian, Meihong Lu, and Yuzhang Ding

Pricing Decision of Mergers and Acquisitions ..........................................................................................................................165

Xin-qing Luo

Marketing Outsourcing of Chinese Sports Clubs: A SWOT-AHP Analysis ..........................................................................................................................169

Zhaohui Liu

The Impact of Relational Embeddedness to Intellectual Property Risks in Industry-University-Institute Cooperation ..........................................................................................................................175

Yang Xiao and Yulan Huang

CS-based Strategy for Chinese Commercial Banks in Service Marketing ..........................................................................................................................180

Xilin Kuang

Non-parametric Method to Estimate PIN (Probability of Informed Trading) in China Stock Market ..........................................................................................................................185

Yang Liu and Liu Liu
The Supervision of Non-financial Third-Party E-Payment Platforms in China

Xuewen Gui, Wenjun Zhou, and Yueting Wu

Principles and Strategies of Optimizing E-Commerce Enterprise Niche

Chengcong Zhou and Cequn Lou

Analysis of the E-Commerce Application Status in China’s Household Appliance Industry

Hui Xu, Qing Cai, and Xuewen Gui

Business Process Models of Enterprise in Collaborative Commerce Using CPN

Xuedong Wang, Jin Mao, Yujie Cao, and Hui Xie

Measurement of Synergetic Degree of Enterprise E-Commerce Business Process

Xuedong Wang, Pingyang Huang, Shenyun Wu, and Zigeng Shi

Path Choice of Business Process Reengineering of Enterprise E-Commerce

Xuedong Wang, Qian Xia, Yanli Yu, and Kun Fan

The Utilization of Cloud Computing in Network Collaborative Commerce Chain

Qian Li and Nanqiang Xia

The Construction of Enterprise Knowledge Map Based on Business Process

Jinsong Gao, Xuxiong Fu, Yanqi Liang, Yanfang Liu, and Ming Zhao

Analysis on Business Model of Chinese Aquatic E-Business

ZhuoFan Yang, ZhiGang Zhang, and ShuHua Ren

On the Topic Maps-Based Digital Library Knowledge Organization Model

Shiguo Lv and Lixin Xia

The Research on SMEs' Adoption of B2B E-Market

Hong-li Hu

Characterizing and Modeling the Structure of Competitive Journal Network

Shumin Hui

Integration: Knowledge Management and Business Intelligence

Lei Cheng and Peng Cheng

Asset Pricing Model

Analysis of Financial Correlation Matrix Using Random Matrix Theory

Zhu Meiying and Zhang Bin

Can the Industry Index Become Another Market Variable? Empirical Evidence from the Listed Banks in Shanghai Stock Exchange

Fengjun Liu

A Comparison of Multifractal Models for Assets Returns in Economic Perspective

Jian Zhong and Xin Zhao
Inflation Rate Generator Based on VAR Model .................................................................325
   Sha Ni

Portfolio Selection Theory
Optimal Portfolio of Liability and Risky Assets under Safety-First Rule ........................328
   Yuanyao Ding and Huihong Liu
A Study of Delegated Portfolio Management Based on Overconfidence ........................333
   Fu-hua Guo
An Empirical Investigation of International Asset Allocation from Chinese Perspective ........336
   Qin Zhang and Mei Yu

Asset Pricing and Valuation
   Mingxi Wang, Bianling Ou, Mingrong Wang, and Shouyang Wang
A Game Analysis of the Supervision Model for Preventing Tunneling Behavior in China's Family Firms .................................................................345
   Minghao Shen and Jing Tang
Evolutionary Game Analysis of Supervision Strategy for Behavior of Public Institution Leaked Customers Information ..................................................349
   Jin Su and Jianyong Zhou

General Equilibrium Theory
Asset Prices, Monetary Policy and China's Economic Fluctuations ...............................353
   Zi Zhou and Yawu Zheng
Measurement of Monetary Liquidity in China .................................................................357
   Xianhua Wei, Yueyan Zhang, Zelin Xie, and Zhuo Wei

Trading Strategy Theory
A Correction of LSV Herding Measure ............................................................................362
   Mei Chen and Liang Guo
Complex System: Theoretic Review of Pairs Trading Links ...........................................367
   Susheng Wang and Yongguan Mai
   Miaoxin Chen and Rui Bao
Corporate Governance Theory and Model

The Design of Sharing Contract and the Explanation of Contract Government Paradox Based on Fairness Preference ................................................................. 376
    Meirui Zhong, Na Tan, and Xing Chen

Value Creation Capacity, Enterprise Performance and Corporate Governance: Evidence from Chinese Listed Companies on GEM .......................................................... 381
    Shu Gong and Yongli Chen

Does CSR Have the Effects of Injury Insurance? Based on the Event Study of China Listed Companies with Violations ................................................................. 386
    Yong Xu and Yanjun Jiang

Corporate Social Responsibility and Firm Performance ............................................ 390
    George Yungchih Wang and Wen-Hsi Lydia Hsu

Systematic Risk and Corporate Governance Risk - An Empirical Research of Chinese Listed Companies ................................................................. 395
    Li Feng and Tongying Liang

Option Pricing

Contingent Claims Pricing in Markovian Switching Model with Consumption ......................... 400
    Zhefei He, Jun Li, and Qiong Wang

Numerical Patent Analysis with the Fuzzy Pay-Off Method: Valuing a Compound Real Option ............................................................................................................. 405
    Mikael Collan, Robert Fullér, Xiaolu Wang, and József Mezei

Pricing of Bi-direction European Option Under the mixed Brownian-fractional Brownian model ........................................................................................................ 410
    Feng Xu

Coupon Bond Option Pricing on the Basis of Multiple Factors Affine Term Structure Model of Interest Rates ........................................................................................................ 414
    Wenyu Liu, Minghuan Xiong, Xiaoguang Wang, and Rongxi Zhou

Theory Basis of Option Pricing Methods ........................................................................ 418
    Li Ling

Price of Asian Option by Operator Splitting Methods ................................................. 421
    Huadong Zhang and Yulian Fan
Futures Pricing and Transaction
Dynamic Effects in International Carbon Emission Markets: Evidence from ECX CER
Hengyu Wu, Genhua Hu, Siyi Qin, and Jixian Liu
Index Futures and Spot Index Volatility: Evidence from China Stock Market
Xicai Guo
Research of the Term Structure of Interest Rates Based on Improved J-LSSVR
Cunhou Liu, Binbin Chen, and Rongxi Zhou
Testing for Linear and Nonlinear Granger Causality between the Carbon Spot and Futures Prices
Ying Gao, Bin Li, and Ziran Li

Risk Analysis and Evaluation
On the American Put Option with Ambiguity
Guoqing Zhao
The Research of Stock Index Futures Margin Setting Model Based on Wavelet Analysis Method and Technology
Jia Liu, Yaming Zhang, and ShiYong Li
The U.S. Economy Recovery Trend after Financial Crisis
Zhiwei Liu and Xuefei Wang
Ways to Avoid the Risk of Intellectual Innovation Based on Technology System
Guangbing Ji and Fengxia Xu
The Issue and Risk Analysis of the Credit Card
Ying Yin and Liang-rong Song
Computer Simulation on Industry Pipeline Gas Leakage and Dispersion
Dehong Zhou
Securities Analysts' Behavior and IPO Initial Return Rate in China Based on Quantile Regression
Xinyu Wang and Min He
Measurement and Comparison of Operational Risk under the New Basel Capital Accord
XiaoXia Deng and XiaoYun Yang
The Design of the Incentive Contract of Venture Capital under Asymmetric Information
Huiwen Zou and Xizhi Zhou
## Credit Evaluation and Analysis

An Empirical Analysis on the Causes and the Management Status of Credit Risk in Enterprises’ International Operation

*Mei Hong and Hongruisi Wang*

Microfinance in China’s Poor Area and Its Impact to Loan Type - Evidence from Xinjiang Uygur Autonomous Region

*Bo Yang, Paerhati Jialali, and Xianhua Wei*

The Applied Research of Credit Scoring Combination Model Based on SA-GA Algorithm

*Minghui Jiang, Fenghua Ji, and Rui Li*

The Development of American Rating Agencies Driven by Rating-Dependent Regulations

*Yu Wu*

Continual Improvement of Small and Medium Enterprises Credit Structure in Inclusive Financial System

*Junxiang Liu and Yuhua Zhao*

## Project Management and Project Performance Evaluation

Internal Control, a Key Issue of Farmer Specialized Cooperatives

*Xiaobao Hao*

Lagging Social Impact Assessment for Public Project Management in China: Inappropriate Method or Lack of Interest

*Yanhai Zhao and Ye Yao*

The Network Engagements in the Public Project Supervision

*Zhang Luo, Daqin Zhu, Shuyu Xiang, and Tuantuan Wang*

Study of Research on Government Performance Management: The Application of Measurement System in Literatures

*Meili Zhu*

Internet Data-Based Quantitative Analysis of Township Government Performance Evaluation in China

*Guochong Xu*

The Study of the Truth of Performance Information Based on SEM

*Yuan Ma*

Building Performance Audit Control System: The New Trend of Performance Audit of Western Countries

*Meihua Lu*
Policy Performance Evaluation of Local Government: Value Orientation and Influencing Factor ................................................................. 535

Lei Zhao

Minjuan Lin and Yuan Ma

Index Design for Local Government Performance Evaluation Based on Data Mining .......................................................................................... 544

Zhuo Yue and Shang Huping

A Survey and Analysis of Low-Carbon Awareness and Capability of Low-Carbon Living in China ........................................................................ 549

Zhijuan Wu and Ying Yang

Development of Performance Evaluation Index System about China's Public Rental Housing Project ................................................................. 553

Xiaofang Hu

Local Government Performance Evaluation in China: Deadlocks and a Data Mining Way to Get Out ................................................................. 558

Huping Shang and Chunhua Hui

Evaluate the Chinese Cadres' Managerial Competence of County and Department Level Based on Competing Values Framework ........................................ 562

Huping Shang and Yishu Li

Influences and References of the Program Assessment Rating Tool in U.S. on Chinese Local Government Performance Management ........................................ 567

Wensheng He, Lingling Liao, and Yan Wang

A Study on the Management Organization Construction Principles and Methods in Initiating Stage of Public Project ........................................ 572

Xiuling Ma

Evolutionary Analysis on Cooperative Behavior of Cluster Enterprises in Supply Chain Network ............................................................................. 575

Yana Su, Guorong Chai, Linling Gong, and Zhenchao Li

The Risk Aversion of CERs Financing ............................................................................................................................................ 580

Guoxing Zhang, Peng Liu, and Yanhai Zhao

Analysis the Influence Factors Correlations of Environmental Protection Industry Investment and Financing in China ........................................ 583

Wenjun Wang and Ming Cheng

Researching the Changes of CO2 Stock Based on the PLSR Method in Shaanxi ............................................................................................. 586

Wenjun Wang and Xiaozhen Ma
Entry and Exit Decisions in a Symmetric Duopoly Option Game Model ..........................................................591
  Li Gong and Jin Tian

Can Marketing Ethics Create Market Competitive Advantage? An Empiric Test
Based on Value Engineering ....................................................................................................................594
  Zhiyuan Li, Yanhai Zhao, and Xiulan Zhou

Game Equilibrium and Countermeasures of Knowledge-sharing Enterprises
Under Repeated Gaming and Market Supervision ..................................................................................598
  Zhiyuan Li, Xiao Ma, and Rong Yang

Other Financial Engineering Applications
Effects of RMB Interest Rate and Exchange Rate Adjustment on Trade
Balance ..................................................................................................................................................602
  Chengying He, Kaijiang Yu, and Zuoyin Shao

Calculations of Special Annuities under Random Rates of Interest ....................................................607
  Lingchen Liu, Xiuping Yang, Wanpeng Lei, and Ting Li

Analysis on Demands for Agricultural Science and Technology Based
on Bayesian Network ..........................................................................................................................610
  Junfeng Li and Jiangao Niu

How Does China's Tight Monetary Policy Affect the Inflation: A Structural
Dynamic Factor Model Approach .........................................................................................................614
  Bianling Ou, Mingxi Wang, and Mingrong Wang

Wealth Effect of Stock Market on Residents' Consumption: In the Angle
of National and Regional .........................................................................................................................619
  Biao Wang

Analysis of the Nature of Embedded Options of Cash Discounts ..........................................................624
  Ze-hao Min

Dynamic Optimization of Commercial Bank Major Channels ..............................................................627
  Qun Zhang, Zhonghui Dong, and Zhian Zhu

Research on the Superior Rate of Return Based on Event Study ..........................................................631
  Jilin Zhang

Analysis of the Behavior of Fund Investment in China on the Basis of LSV
Herding Measure ....................................................................................................................................637
  Zheng-qiang Zuo and Mei Chen

Zero-Beta Characteristic of CAT Bonds ..................................................................................................641
  Zhengru Tao

The Correlation between the First-Day Return and the Investor Sentiment
on the GEM Board in China ....................................................................................................................645
  DaPing-Zhao and Yong-Fang
Experiments on Relationship between Risk Preferences and Returns ........................................649
   Limin Wang, Ye He, and Chao Gao

Funds Issuance and Market Volatility .................................................................................654
   Limin Wang, Xiaohui Zhu, and Yajia Xue

Analysis of Assets Distribution and Price Volatility-Based on Behavioral
Financial Experiment ........................................................................................................658
   Limin Wang, Fei Tian, and Xiangdong Liu

Solving Principal-Agent Problem with Dynamic Programming Method ..........................662
   Xiaoyu Ren

An OWA Operator Based Approach to Aggregate Group Opinion by Similarity
Degree ..............................................................................................................................665
   Jian Wu and Qing-Wei Cao

The Setting of Initial Allocation Approaches of Carbon Emission Permits ......................668
   Wei Zheng and Rongda Chen

Insurance Funds Involved in the Affordable Housing Construction Investment
for Risk Management .......................................................................................................671
   Daijun Zhang and Wei Chen

The Influence from Stock Index Futures to Stock Market Volatility .................................676
   Zheng Fang and Rong Da Chen

The Feasibility of Using Gold to Maintain the Value of Stock Assets during
the Crisis ........................................................................................................................679
   Sheng Ye and Rong da Chen

Evaluation and Classification of Commercial Bank Customer Value ..............................682
   Yanyan Peng

Author Index .......................................................................................................................687
