## Crowdsourcing

- Patching Traceroute Using Geographic Information In Neutrality Inference ........................................... 1
  - Feng Tian, Lei Wang, Xinyang Liu, and Shan Gao

- A Pseudonym Based Anonymous Identity Authentication Mechanism for Mobile Crowd Sensing .......... 10
  - Pengchen Ma, Dan Tao, and Tinyu Wu

- Exploring Diversified Incentive Strategies for Long-Term Participatory Sensing Data Collections ............. 15
  - Xinna Ji, Dong Zhao, Hao Yang, and Liang Liu

- Utility-Driven Approximate Task Allocation for Crowdsourcing ............................................................. 23
  - Ran Bi, Xiaolin Fang, and Guozhen Tan

- Social-Aware Backbone-Based Multicast Routing in Mobile Opportunistic Networks ............................... 31
  - Di Zhang, Huadong Ma, and Dong Zhao
Privacy and Security I

Privilege Escalation Detecting in Android Applications ................................................................. 39
  Xingqiu Zhong, Fanping Zeng, Zhichao Cheng, Niannian Xie, Xiaoxia Qin,
  and Shuli Guo

Secured Data Storage Scheme Based on Block Chain for Agricultural
Products Tracking ............................................................................................................................. 45
  Chao Xie, Yan Sun, and Hong Luo

A Review of Signcryption Schemes Based on Hyper Elliptic Curve ........................................... 51
  Shamsher Ullah, Xiang-Yang Li, and Lan Zhang

Mining Anomalous Usage of Sensitive Data through Anomaly Detection ............................... 59
  Xin Jin, Yan Xiong, Wenchao Huang, and Zhaoyi Meng

Text and Image Mining I

Research and Implementation of a Multi-label Learning Algorithm for Chinese
Text Classification ............................................................................................................................ 68
  Xun Wang, Huan Liu, Zeqing Yang, Jiahong Chu, Lan Yao, Zhibin Zhao,
  and Bill Zuo

Chinese Character Embedding Based Semantic Query Algorithm
for Semi-structured Corpora ............................................................................................................. 77
  Shengzhe Li, Chunhong Zhang, Xuan Zhang, Hang Li, Yang Ji, and Xiaofeng Qiu

Predicting Stock Price Returns Using Microblog Sentiment for Chinese Stock
Market ............................................................................................................................................... 87
  Tong Sun, Jia Wang, Pengfei Zhang, Yu Cao, Benyuan Liu, and Degang Wang

Mobile-Deblur: A Clear Image Will on the Smart Device ............................................................. 97
  Jun Tan, Kang Yang, Shiwei Song, Tianzhang Xing, and Dingyi Fang

Security and Privacy II

A Verified Secure Protocol Model of OAuth Dynamic Client Registration ................................ 106
  Caimei Wang, Yan Xiong, Wenchao Huang, Huihua Xia, Jianmeng Huang,
  and Cheng Su

A Verifiable Single Keyword Top-k Search Scheme against Insider Attacks
over Cloud Data .............................................................................................................................. 111
  Hua Dai, Xiangyang Zhu, Geng Yang, and Xun Yi

Big Data Model of Security Sharing Based on Blockchain ............................................................ 117
  Li Yue, Huang Junqin, Qin Shengzhi, and Wang Ruijin

SCPIR-V: An Optimized CPIR-V Algorithm for Privacy Protection Nearest
Neighbor Query .............................................................................................................................. 122
  Botao Wang, Ang Li, Shizhuo Deng, and Fanshuai Meng
Algorithm Design and Analysis

MESA: An Efficient Matching Scheme in Content-Based Publish/Subscribe System with Simplified Bayesian Approach ................................................................. 208
  Qixu Wang, Dajiang Chen, Zhe Ding, Zhen Qin, and Zhiguang Qin

A Cluster-Based Hidden Markov Model for High-Level State Discovery from Time Series .................................................................................................................. 218
  Hao Luo, Zhenyu Wu, and Xinning Zhu

A Hybrid Deep Representation Learning Model for Time Series Classification and Prediction ...................................................................................................................... 226
  Yang Guo, Zhenyu Wu, and Yang Ji

Cluster-Based Best Match Scanning for Large-Scale Missing Data Imputation .......................................................... 232
  Weiqing Yu, Wendong Zhu, Guangyi Liu, Bowen Kan, Ting Zhao, and He Liu

Evaluation and Design of Non-cryptographic Hash Functions for Network Data Stream Algorithms ........................................................................................................ 239
  Guang Cheng and Yang Yan

Mobile Computing and Internet of Things I

WiFi-ZigBee Coexistence Based on Collision Avoidance for Wireless Body Area Network ....................................................................................................................... 245
  Mengjiao Tang, Yubo Jin, and Lan Yao

IFRAT: An IoT Field Recognition Algorithm Based on Time-Series Data .......................................................... 251
  Shuai Guo, Zhongwen Guo, Zhijin Qiu, Yingjian Liu, and Yu Wang

Efficient CSI Correction with CFO for Uplink MU-MIMO Networks ........................................................................... 256
  Kun Zhao, Wei Xi, Jinsong Han, Zhi Wang, Yaoxuan Yuan, and Jizhong Zhao

Cooperative D2D for Content Delivery in Heterogeneous Networks ........................................................................ 265
  Xiaoyan Zhao, Peiyuan Yuan, Yajun Chen, and Pei Chen

LIU: Localization via Fusion of IMU and Ultrasonic Positioning .................................................................................. 272
  Hao Zhang, Weitong Sun, Haicheng Ji, Xiaojun Wu, and Gang Lu

Scheduling and Optimization II

PMSTCOM: A Novel Replication Consistency Maintenance Strategy in Cloud Storage System .......................................................... 277
  Jun Li and Mengshu Hou

An Anti-collision Algorithm Based on Task Scheduling Model in RFID System .......................................................... 284
  Shijie Zhou, Qihe Liu, Jin Xu, and Yaqi He

An Optimal Load-Aware Base Station Sleeping Strategy in Small Cell Networks Based on Marginal Utility .................................................................................................................................. 291
  Yiwei Xu and Jin Chen
Cloudlet Placement and Minimum-Delay Routing in Cloudlet Computing ..........................................................297
   Jiaying Meng, Wenbin Shi, Haisheng Tan, and Xiangyang Li

Robust Task Scheduling Strategy for Big Data Clusters .......................................................................................305
   Zixiang Wang, Zhoubin Liu, Zhan Huan, Xiaoyun Kong, and Xiaolu Yuan

**Mobile Computing and Internet of Things II**

A Scheduling Algorithm of Events with Uncertain Timestamps for CPS ..........................................................313
   Fangfang Li, Chong Liu, Ge Yu, and Zhe Chen

Robust and Fast Similarity Search for Fingerprint Calibrations-Free Indoor Localization ........................................320
   Fugui He, Chenshu Wu, Xiancun Zhou, and Yiyang Zhao

Smart Meter Data Analytics Based on Modified Streaming k-Means .................................................................328
   Wendong Zhu, Weiqing Yu, Bowen Kan, and Guangyi Liu

Understanding Battery Degradation Phenomenon in Real-Life Electric Vehicle Use Based on Big Data ...........................................334
   Zhiyong Tian, Lai Tu, Chen Tian, Yi Wang, and Fan Zhang

Leveraging Mobile Signaling Data for Monitoring Vehicles on Highways in Real Time ..................................................340
   Yanling Cui, Qiang Ji, Fusang Zhang, and Beihong Jin

**Data Management and Storage I**

Ranking Node Importance in Large-Scale Complex Network: From a Perspective of Local Abnormal Links ..................................................350
   Ruan Yi-Run, Lao Song-Yang, Wang Jun-De, and Bai Liang

Association Rules Mining with Quantum Computing and Quantum Storage ...........................................354
   Qiang Gao, Fengli Zhang, Ruijin Wang, and Fan Zhou

Occlusion Detection in VLC Systems through Physical Layer Data Analysis .....................................................361
   Wen Ding, Ping Luo, Haisheng Tan, Rui Wang, and Jipeng Zhou

GreenSleep: A Multi-sleep Modes Based Scheduling of Servers for Cloud Data Center ........................................368
   Longxiang Fan, Chonglin Gu, Lining Qiao, Wenbin Wu, and Hejiao Huang

EasyRBF: Towards Infilling Missing Soil Data ........................................................................................................376
   Jia Shao, Guodong Sun, Gaoxiang Yang, Yanan Wang, and Xingjian Ding
Data Management and Storage II

The Design and Implementation of Vector Autoregressive Model and Structural Vector Autoregressive Model Based on Spark .................................................................386
   Tao Li, Xueyu Li, and Xu Zhang

Performance Evaluation of Deep Learning Tools in Docker Containers ..................................................395
   Pengfei Xu, Shaohuai Shi, and Xiaowen Chu

DAQ-Middleware: Data Acquisition Middleware Based on Internet of Things .............................................404
   Zhijin Qiu, Zhongwen Guo, Shuai Guo, Yingjian Liu, and Yu Wang

Big Data Management Performance Evaluation in Hadoop Ecosystem .................................................413
   Qing Liu, Yinjin Fu, Guiqiang Ni, and Jianmin Mei

An Auto-Scaling Framework for Containerized Elastic Applications ........................................................422
   Tian Ye, Xue Guangtao, Qian Shiyou, and Li Minglu

Author Index ............................................................................................................................................431
