Foreword ............................................................................................................................ vii

Workshop Committees ...................................................................................................... ix

## Assessment of Learning with Blocks Languages

Assessing Knowledge in Blocks-Based and Text-Based Programming Languages (POSITION) ........ 1
   Briana Morrison, *Georgia Tech, USA*

The Challenges of Studying Blocks-based Programming Environments (PAPER) ...................... 5
   David Weintrop, *Northwestern University, USA*
   Uri Wilensky, *Northwestern University, USA*

The Impact of Distractors in Programming Completion Puzzles on Novice Programmers (POSITION) . 9
   Kyle Harms, *Washington University in St. Louis, USA*

Java as a Second Language: Thoughts on a Linguistically-informed Transition to Typing Languages (POSITION) ................................................................. 11
   Eileen King, *Lakes International Language Academy, USA*

Learning Analytics for the Assessment of Interaction with App Inventor (POSITION) ............... 13
   Mark Sherman, *University of Massachusetts Lowell, USA*
   Fred Martin, *University of Massachusetts Lowell, USA*

Measuring Learning in an Open-Ended, Constructionist-Based Programming Camp: Developing a Set of Quantitative Measures from Qualitative Analysis (POSITION) ........................................ 15
   Deborah Fields, *Utah State University, USA*
   Lisa Quirke, *University of Toronto, Canada*
   Janell Amely, *Utah State University, USA*

Profiling Styles of Use in Alice: Identifying Patterns of Use by Observing Participants in Workshops with Alice (PAPER) ........................................................................................................ 19
   Leonel Vinicio Morales Díaz, *Universidad Francisco Marroquín, Guatemala*
   Laura Sanely Gaytán-Lugo, *Universidad de Colima, Mexico*
   Lissette Fleck, *Universidad Francisco Marroquín, Guatemala*

Quizly: A Live Coding Assessment Platform for App Inventor (PAPER) ................................. 25
   Francesco Maiorana, *University of Catania, Italy*
   Daniela Giordano, *University of Catania, Italy*
   Ralph Morelli, *Trinity College, USA*

## Blocks Language Design

Design of a Blocks-Based Environment for Introductory Programming in Python (PAPER) .......... 31
   Matthew Poole, *University of Portsmouth, UK*

Lambda in Blocks Languages: Lessons Learned (POSITION) .................................................. 35
   Brian Harvey, *University of California, Berkeley, USA*
Jens Mönig, *Communications Design Group, SAP Labs, Germany*

A Module System for a General-Purpose Blocks Language (PAPER) ................................ 39
Yoshiki Ohshima, *Communications Design Group, SAP Labs/Viewpoints Research Institute USA*
John Maloney, *Communications Design Group, SAP Labs, USA*
Jens Mönig, *Communications Design Group, SAP Labs, Germany*

Robotics Rule-Based Formalism to Specify Behaviors in a Visual Programming Environment
(POSITION) ............................................................................................................. 45
Daniela Marghitu, *Auburn University, USA*
Stephen Coy, *Microsoft FUSELABS, USA*

Ten Things We’ve Learned from Blockly (POSITION) .............................................. 49
Neil Fraser, *Google, USA*

**Blocks, Text, and Structured Editing**

Blocks at Your Fingertips: Blurring the Line Between Blocks and Text in GP (POSITION) ............. 51
Jens Mönig, *Communications Design Group, SAP, Germany*
Yoshiki Ohshima, *Communications Design Group, SAP/Viewpoints Research Institute, USA*
John Maloney, *Communications Design Group, SAP, USA*

Integrating Droplet into Applab — Improving The Usability of a Blocks-Based Text Editor (PAPER) ... 55
David Anthony Bau, *Philips Exeter Academy, USA*

Lack of Keyboard Support Cripples Block-Based Programming (POSITION) ......................... 59
Neil Brown, *University of Kent, UK*
Michael Kölling, *University of Kent, UK*
Amjad Altadmri, *University of Kent, UK*

Thinking in Blocks: Implications of using Abstract Syntax Trees as the underlying program model
(PAPER) ..................................................................................................................... 63
Daniel Wendel, *MIT Scheller Teacher Education Program, USA*
Paul Medlock-Walton, *MIT Scheller Teacher Education Program, USA*

Towards Making Block-Based Programming Accessible for Blind Users (POSITION) ............... 67
Stephanie Ludi, *Rochester Institute of Technology, USA*

**New Domains for Blocks Languages**

Block-Based Programming Abstractions for Explicit Parallel Computing (PAPER) ...................... 71
Annette Feng, *Virginia Tech, USA*
Eli Tilevich, *Virginia Tech, USA*
Wu-Chun Feng, *Virginia Tech, USA*

Blocks In, Blocks Out: A Language for 3D Models (PAPER) .............................................. 77
Chris Johnson, *University of Wisconsin, Eau Claire, USA*
Peter Bui, *University of Notre Dame, USA*

A Blocks-Based Editor for HTML Code (PAPER) .......................................................... 83
Saksham Aggarwal, *International Institute of Information Technology, India*
David Anthony Bau, *Phillips Exeter Academy, USA*
David Bau, *Google and MIT, USA*

From Interest to Usefulness with BlockPy, a Block-based, Educational Environment (POSITION)........87
Austin Bart, *Virginia Tech, USA*
Eli Tilevich, *Virginia Tech, USA*
Cliff Shaffer, *Virginia Tech, USA*
Dennis Kafura, *Virginia Tech, USA*

Pushing Blocks All the Way to C++ (PAPER).................................91
Jonathan Protzenko, *Microsoft Research, USA*

Scratch Data Blocks: Providing an API to the Scratch online community from within Scratch
(POSITION)..........................................................................................97
Sayamindu Dasgupta, *MIT, USA*

Using Blocks to Get More Blocks: Exploring Linked Data through Integration of Queries and Result Sets in
Block Programming (PAPER)..................................................................99
Paolo Bottoni, *Sapienza University of Rome, Italy*
Miguel Ceriani, *Sapienza University of Rome, Italy*

**New Features for Blocks Environments**

Incorporating Real World Non-coding Features into Block IDEs (POSITION).........................103
Mikala Streeter, *Georgia Tech, USA*

Online Community Members as Mentors for Novice Programmers (POSITION)......................105
Michelle Ichinco, *Washington University in St. Louis, USA*
Caitlin Kelleher, *Washington University in St. Louis, USA*

Programming Environments for Blocks Need First-Class Software Refactoring Support (POSITION)....109
Peeratham Techapalokul, *Virginia Tech, USA*
Eli Tilevich, *Virginia Tech, USA*

Transparency and Liveness in Programming Environments for Novices (POSITION)..............113
Steven Tanimoto, *University of Washington, USA*

Visual Debugging Technology with Pencil Code (POSITION)............................................115
Amanda Boss, *Harvard College, USA*
Cali Stenson, *Wellesley College, USA*
Jeremy Ruten, *University of Saskatchewan, Canada*

**Pedagogy of Blocks Languages**

App Inventor Instructional Resources for Creating Tangible Apps (POSITION)....................119
Krishnendu Roy, *Valdosta State University, USA*

Approaches for Teaching Computational Thinking Strategies in an Educational Game (POSITION)....121
Aaron Bauer, *University of Washington, USA*
Eric Butler, *University of Washington, USA*
Zoran Popović, *University of Washington, USA*
Blocks Versus Text: Ongoing Lessons from Bootstrap (POSITION) ..............................................125
Emmanuel Schanzer, Bootstrap, USA
Shriram Krishnamurthi, Brown University, USA
Kathi Fisler, WPI, USA

MUzECS: Embedded Blocks for Exploring Computer Science (PAPER) ...............................127
Matthew Bajzek, Marquette University, USA
Heather Bort, Marquette University, USA
Omokolade Hunpatin, Marquette University, USA
Luke Mivshek, Marquette University, USA
Tyler Much, Marquette University, USA
Casey O’Hare, Marquette University, USA
Dennis Brylow, Marquette University, USA

Middle School Experience with Visual Programming Environments (PAPER) .................... 133
Barbara Walters, vanbara, Inc., USA
Vicki Jones, vanbara, Inc., USA

Teaching and Learning through Creating Games in ScratchJr: Who Needs Variables Anyway!
(POSITION) .........................................................................................................................139
Aye Thuzar, The Pingry School, USA
Aung Nay, Zatna LLC, USA

Author Index .......................................................................................................................143
