Welcome Message
from the Workshop Organizers
ISSE 2011

To automatically provide human-centric services, it is desired to build smart environments for such a purpose. The background system needs to first detect and collect needed information in the environment via various sensors like video cameras, RFIDs, infrared sensors, motion sensors, pressure sensors, and ... etc. The information is then processed for understanding the context and intention of the people in the environment. Finally services are provided in a timely manner. Sensing technology, embedded systems, wireless communications, computer vision and intelligent methods are the core to build integrated smart environments. The first ISSE workshop was held in Fukuoka, Japan in Nov. 2010. The second edition of this workshop wishes to attract both state-of-the-art solutions and novel attempts in this field.

Second International Workshop on Intelligent Sensors and Smart Environments (ISSE 2011) will provide a platform for researchers to meet and exchange their thoughts. ISSE 2011 will be held in conjunction with the Fifth International Conference on Broadband and Wireless Computing, Communication and Applications (BWCCA 2011) in Barcelona, Spain from Oct. 26 to 28. We accepted 5 papers for ISSE-2011 workshop. All the papers were reviewed and recommended by at least two reviewers.

Many people contributed to the CFP and paper review of ISSE 2011. We wish to thank the program committee members for their great effort. We also would like to express our gratitude to the main organizers of BWCCA 2011, Prof. Leonard Barolli and Prof. Fatos Xhafa, for their excellent work in organizing the conference. Last but not least, we would like to thank and congratulate all the contributing authors for their support and excellent work.

General Co-chairs
Hui-Huang Hsu, Tamkang University, Taiwan
Chuan-Yu Chang, National Yunlin University of Science and Technology, Taiwan

Program Co-chairs
Chien-Cheng Lee, Yuan Ze University, Taiwan
Lih-Chyau Wuu, National Yunlin University of Science and Technology, Taiwan
