Message from the CWECS 2015
Workshop Organizers

Welcome to Krakow, Poland and the Sixth International Workshop on Cloud, Wireless and e-Commerce Security (CWECS 2015), which is held in conjunction with the 10th International Conference on Broadband and Wireless Computing, Communication and Applications (BWCCA 2015) at Pedagogical University of Krakow, Poland from November 4 to November 6, 2015.

Computer network and communication have been a part of our everyday life. People use them to contact others almost anytime anywhere. However, hackers due to business benefits, enjoying their skill/professional achievement or some other reasons very often attack, intrude or penetrate our systems.

This is the key reason why computer/network security has been one of the important issues in computer research. Many researchers have tried to do their best to develop system security techniques and the methods to protect a system. But system attacks still occur worldwide every day. In fact, current system security technology is far away from prefect and should be continuously improved.

This workshop aims to present the innovative researches, methods and applications for cloud, wireless and e-commerce security. Other network related papers are also welcomed. The workshop contains high quality research papers, which were selected carefully by Program Committee Members.

It is impossible to organize such a successful program without the help of many individuals. We would like to express our appreciation to the authors of the submitted papers, and to the program committee members, who provided timely and significant reviews.

We hope all of you will enjoy CWECS 2015 and find this a productive opportunity to exchange ideas with many researchers.
