Keynote Talks

The Future of Thinking
Marc Stiegler, Visiting Scholar, HP Labs

Simple observation leads one to the conclusion, sometimes tragic and sometimes comic, that human beings do not think very well. There is, alas, a way to create worse thinking: by bringing a group of human beings together into a standards committee or a parliament. Here we look at ways in which the Web has already improved our thinking, and the ways in which the Web can improve our thinking in the future, with a special focus on the future of prediction markets.

New Media Design
Kristina Hooper Woolsey, New Media Thinking Project

The New Media Thinking project focuses on youth and media for learning: What new media skills are youth gaining spontaneously? Which of these should be systematically encouraged? How might these be developed when most adults and learning organizations are not expert in these areas? These issues will be the subject of this talk.
