Proceedings

Computer Animation 2001

The Fourteenth Conference on Computer Animation

Seoul, Korea
November 7 – 8, 2001

Edited by
Hyeong-Seok Ko

Organized by
Graphics & Media Lab.,
College of Engineering at Seoul National University

Sponsored by
Korea Computer Graphics Society
SNU Brain Korea 21 IT Program
IEEE Computer Society
Computer Graphics Society

IEEE
COMPUTER
SOCIETY

Los Alamitos, California
Washington • Brussels • Tokyo
# Table of Contents

Computer Animation 2001

## Preface

 ix

## Conference Committees

 x

## Reviewers

 xii

## Facial Animation

Realistic 3D Facial Animation Parameters from Mirror-reflected Multi-view Video ...
  I. Lin, J. Yeh, M. Ouhyoung

Analysis and Synthesis of Facial Expressions with Hand-Generated Muscle Actuation Basis...
  B. Choe, H. Ko

Face Animation Based on Observed 3D Speech Dynamics...
  G. Kalberer, L. Gool

A Physically-based Model with Adaptive Refinement for Facial Animation...
  Y. Zhang, E. Prakash, E. Sung

## Animating Human Characters

Adaptive Gait Generation via Physiological Controls...
  S. Kuriyama, Y. Kurihara, T. Kaneko

T4: A Motion-capture-based Goal-directed Realtime Responsive Locomotion Engine...
  T. Tsumura, T. Yoshizuka, T. Nojirino, T. Noma

Constrained Framespace Interpolation...
  G. Ashraf, K. Wong

## Behavioral Animation

Through-the-eyes Control of a Virtual Humanoid...
  N. Courty, É. Marchand, B. Arnaldi

Pedestrians: Creating Agent Behaviors through Statistical Analysis of Observation Data...
  K. Ashida, S. Lee, J. Allbeck, H. Sun, N. Badler, D. Metaxas
Simulating Virtual Human Crowds with a Leader-Follower Model  
T. Li, Y. Jeng, S. Chang

Invited Presentation

Towards the Holodeck: Building Emotional Virtual Humans for Training  
J. Gratch

AI-based Animation

Integration of Optimization by Genetic Algorithms into an L-System-Based Animation System  
H. Noser, P. Stucki, H. Walser

AI-based Animation for Interactive Storytelling  
M. Cavazza, F. Charles, S. Mead

Physics-based Animation

Collision Resolutions in Cloth Simulation  
S. Huh, D. Metaxas, N. Badler

Animation Based in Dynamic Simulation Involving Irregular Objects with Non-Homogeneous Rugosities  
L. Rivera, P. Carvalho, L. Velho

An Implicit Finite Element Method for Elastic Solids in Contact  

Merging Deformable and Rigid Body Mechanics Simulation  
J. Junsson, J. Veersest, G. Kuczogi, I. Horvath

Virtual Humans

Virtual Body Morphing  
W. Lee, N. Magnenat-Thalmann

Interactive Modeling of the Human Musculature  
A. Aubel, D. Thalmann

Human Spine Posture Estimation from Video Images Based on Connected Vertebra Spheres Model  
D. Furukawa, K. Mori, Y. Suenaga

Animation Systems and Image Rendering

A Layered Approach to Deformable Modeling and Animation  
C. Chua, U. Neumann

Automatic In-betweening in Computer Assisted Animation by Exploiting 2.5D Modelling Techniques  
E. Fiore, P. Schaeken, K. Elens, F. Reeth
A New Mathematical Development for Radiosity Animation with Galerkin
A. Didier, B. Venceslas, M. Sylvain

Real-time Simulation

Automatic Simplification of Particle System Dynamics
D. O'Brien, S. Fisher, M. Lin

Real-time Cloth Simulation with Sparse Particles and Curved Faces
M. Oshita, A. Makinouchi

Real-time Simulation of Deformable Objects: Tools and Application
J. Brown, S. Sorkin, C. Bruyns, J. Latombe, K. Montgomery, M. Stephanides

Visually Believable Explosions in Real Time
C. Martins, J. Buchanan, J. Amanatides

Color Plates
