Session 1: Cloud Resource Management

Designing Contextualized Workflows in the Cloud .................................................................1
  Xiaoliang Fan, Fei Teng, and Haiwu He

A Dynamic Polling Strategy Based on Prediction Model for Large-Scale
Network Monitoring ...........................................................................................................8
  Qian Sun, Ling Gao, Hai Wang, and Chao Xu

An Effective Algorithm and Modeling for Information Resources Scheduling
in Cloud Computing ...........................................................................................................14
  Yaojun Han and Xuemei Luo

Research on Low Energy Consumption of Mass Data Download
in Smartphone .....................................................................................................................20
  Jie Ren, Hai Wang, and Ling Gao

Study of a Virtual Machine Migration Method .................................................................27
  Dancheng Li, Wei Wang, Quanzuo Li, and Donglin Ma

Holistic SLA Ontology for Cloud Service Evaluation .......................................................32
  Kahina Hamadache and Stamata Rizou

A Mechanism of Information-Centric Networking Based on Data Centers ....................40
  Ming Chen, Xi Weng, Xiulei Wang, Changyou Xing, and Guomin Zhang
Session 2: Cloud System Management and Application

A New Architecture for Cloud Computing System Protection ..........................................................46
Yasha Chen, Xinjie Zhao, Wen Li, and Jianpeng Zhao

A Tree-Based CP-ABE Scheme with Hidden Policy Supporting Secure Data Sharing in Cloud Computing ...........................................................................................................51
Runhua Xu, Yang Wang, and Bo Lang

SECloud: Binary Analyzing Using Symbolic Execution in the Cloud .......................................................58
Lin Zhou, Shuitao Gan, Xiaojun Qin, and Wenbao Han

Human Activity Recognition Model Based on Decision Tree .................................................................64
Lin Fan, Zhongmin Wang, and Hai Wang

Pushing the Limits in Event Normalisation to Improve Attack Detection in IDS/SIEM Systems .............................................................................................................69
Amir Azodi, David Jaeger, Feng Cheng, and Christoph Meinel

Classroom Assessment and Analysis System: Using Tablet PCs and Cloud Computing to Improve Effectiveness of Classroom Assessment ...........................................77
Hou Han, Dongqing Wang, and Jun Xu

Practical and Secure Outsourcing of Linear Algebra in the Cloud ............................................................81
Juan Zhang, Yanqin Zhu, and Fangyuan Jin

Session 3: Big Data Processing Technology I

Topic Detection Based on Group Average Hierarchical Clustering ............................................................88
Ni Gao, Ling Gao, Yiyue He, Hai Wang, and Qian Sun

A Bloom Filter-Based Approach for Efficient Mapreduce Query Processing on Ordered Datasets ..........................................................................................................................93
Zhijian Chen, Dan Wu, Wenyan Xie, Jiazhi Zeng, Jian He, and Di Wu

A Real Time Index Model for Big Data Based on DC-Tree ..........................................................................99
DanWei Chen and Jun Zhuang

A Method of Data Distribution for Distributed Cross Join ........................................................................105
Ping Lu, Shengmei Luo, Zhiping Wang, and Wenwu Qu

What-If Query Processing Policy for Big Data in OLAP System ...............................................................110
Huan Xu, Hao Luo, and Jiejue He

Session 4: Big Data Storage and Management

Rededup: Data Reallocation for Reading Performance Optimization in Deduplication System ..................117
Bin Lin, Shanshan Li, Xiangke Liao, and Jing Zhang
Understanding the Impacts of Solid-State Storage on the Hadoop Performance ............................................................125
   Dan Wu, Wenhai Luo, Wenyan Xie, Xiaoheng Ji, Jian He, and Di Wu

SEMMA: Secure Efficient Memory Management Approach in Virtual Environment .........................................................131
   Xian Chen, Wenzhi Chen, Peng Long, Zhongyong Lu, and Zonghui Wang

Superset: A Non-uniform Replica Placement Strategy towards High-Performance and Cost-Effective Distributed Storage Service .................................................................139
   Xiangyu Luo, Yun Wang, Zexi Zhang, and Hui Wang

Session 5: Big Data Processing Technology II
Cloud-Based Big Data Mining & Analyzing Services Platform Integrating R ..............................................................147
   Feng Ye, Zhi-Jian Wang, Fa-Chao Zhou, Ya-Pu Wang, and Yuan-Chao Zhou

A Configurable Simulation System Illustrated by the Case of Futures Trading ......................................................152
   Ning Sun, Junneng Nie, Haopeng Chen, and Fei Hu

Collaborative Book Recommendation Based on Readers' Borrowing Records ......................................................159
   Liu Xin, E Hailong, Song Junde, Song Meina, and Tong Junjie

A QoS-aware Service Group Evaluation Method among Similar Services in a Shared Service Community ......................164
   Yongying Xia, Xiaodong Fu, and Peng Lin

An Application of Recommender System with Mingle-TopN Algorithm on B2B Platform ..............................................170
   Pingsong Xia, Jieqin Xiao, and Chen Shu

Session 6: Big Data Processing Technology III
MREclat: An Algorithm for Parallel Mining Frequent Itemsets ..............................................................................177
   Zhigang Zhang, Genlin Ji, and Mengmeng Tang

Large Scale Nearest Neighbors Search Based on Neighborhood Graph ..........................................................181
   Wenhui Zhou, Chunfeng Yuan, Rong Gu, and Yihua Huang

Detection of Encrypted Data Based on Support Vector Data Description ..........................................................187
   Juan Meng, Yuhuan Zhou, and Zhisong Pan

Parallel Approach and Platform for Large-Scale WEB Data Extraction ..............................................................192
   Shen Yi, Shengsheng Shi, Haitao Wang, Wu Wei, Chunfeng Yuan, and Yihua Huang

Research of Data Provenance Semantic Annotation for Dependency Analysis ..........................................................197
   Guoyan Xu, Zhijian Wang, Li Yang, and Xiaoyi Sun

Author Index ...............................................................................................................................................205
