Preface

The papers in this volume were accepted for presentation at the 15th Annual IEEE Conference on Computational Complexity held from July 4-7, 2000 in Florence, Italy. The conference was sponsored by IEEE Computer Society, in cooperation with the ACM Special Interest Group on Algorithms and Computation Theory, and the European Association for Theoretical Computer Science, with assistance from Banca Toscana, Dipartimento di Sistemi e Informatica, Università degli Studi di Firenze, Gruppo Nazionale per l'Informatica Matematica, and Alitalia, (Official Carrier).

The call for papers sought original papers in all areas of computational complexity. The program committee selected 28 papers from 63 submitted papers. The program committee wishes to thank all who submitted papers. The volume contains also the abstracts of an invited lecture by Paul Beame and Tutorials by two members of the program committee.

The program committee thanks Steve Tate and Peter Shor for the electronic submission and electronic program committee software and for their help with using those programs. We would like to thank Frances Titsworth of the IEEE Computer Society for editing this volume.

The program committee acknowledges invaluable help of the following researchers in reviewing the submitted papers: Farid Ablayev, Eric Allender, Andris Ambainis, José Balcázar, David Mix Barrington, Martin Beaudry, Eli Ben-Sasson, Peter Clote, Harry Buhrman, Samuel Buss, Lance Fortnow, Peter Gacs, Oded Goldreich, Daniel Gottesman, Dima Grigoriev, Jan Krajíček, Clemens Lautemann, Alexis Maciel, Meena Mahajan, Pierre McKenzie, Toni Pitassi, Ken Regan, Omer Reingold, Steven Rudich, Alex Russell, Amit Sahai, Petr Savický, Jiří Sgall, John Shawe-Taylor, Peter Shor, Amir Shpilka, Georg Schnitger, Dan Simon, Michael Sipser, Amnon Ta-Shma, Pascal Tesson, Dieter Van Melkebeek, Heribert Vollmer, Sue Whitesides, Avi Wigderson, Haim Yadid, Andrew Yao, Francis Zane and Stanislav Žák.
