Preface

The papers in this volume were accepted for presentation at the Twenty-Second Annual IEEE Conference on Computational Complexity held June 13-16, 2007, in San Diego, California, as part of the ACM Federated Computing Research Conference. The conference was sponsored by the IEEE Computer Society, in cooperation with ACM SIGACT and EATCS.

The call for papers sought original contributions in all areas of computational complexity. In response, 90 papers were submitted. One submission was later retracted. From the submissions, the program committee selected 30 papers for presentation.

The program committee thanks SIGACT for use of its electronic submission server, Joe Killian for the software to run the submission server and the electronic program committee meeting, and Lisa O’Conner of the IEEE Computer Society for production of this volume.

The program committee graciously acknowledges the invaluable help of the researchers who reviewed the submitted papers.

Welcome to Complexity 2007!
