# 2016 Cybersecurity and Cyberforensics Conference

## CCC 2016

### Table of Contents

- **Message from the Conference General Chairs**: vii
- **Committees**: ix
- **Technical Program Committee**: x
- **List of Reviewers**: xii

### Session 1

- **Multilevel Fuzzy Inference System for Risk Adaptive Hybrid RFID Access Control System**: 1
  - *Malek Al-Zewairi, Dima Suleiman, and Adnan Shaout*
- **Towards Cloud Security Monitoring: A Case Study**: 8
  - *Umar Mukhtar Ismail, Syed Islam, and Shareeful Islam*
- **Analysis of Strong Password Using Keystroke Dynamics Authentication in Touch Screen Devices**: 15
  - *Asma Salem, Dema Zaidan, Andraws Swidan, and Ramzi Saifan*
- **Covert Communication Using Port Knocking**: 22
  - *Mariam Khader, Ali Hadi, and Amjad Hudaib*
- **Authentication Techniques for the Internet of Things: A Survey**: 28
  - *Maha Saadeh, Azzam Sleit, Mohammed Qatawneh, and Wesam Almobaideen*

### Session 2

- **IWNetFAF: An Integrated Wireless Network Forensic Analysis Framework**: 35
  - *Nadia Benchikha, Mohamed Krim, Khaled Zeraoulia, and Chafika Benzaid*
- **Windows Forensic Investigations Using PowerForensics Tool**: 41
  - *Akram Barakat and Ali Hadi*
- **Android Forensics: Investigating Social Networking Cybercrimes against Man-in-the-Middle Attacks**: 48
  - *Khulood Ali Al Zaabi*
- **Reviewing and Evaluating Existing File Carving Techniques for JPEG Files**: 55
  - *Esra'a Alshammary and Ali Hadi*
Session 3
A Proposed Model for Malicious Spam Detection in Email Systems of Educational Institutes .................................................................60
    Aisha Zaid, Ja’far Alqatawna, and Ammar Huneiti
A Preliminary Analysis of Drive-by Email Attacks in Educational Institutes .................................................................65
    Ja’far Alqatawna, Ali Hadi, Malek Al-Zwairi, and Mariam Khader
Boosting Usability for Protecting Online Banking Applications Against APTs .................................................................70
    Mohannad Alhanahnah and David Chadwick
Detecting Ransomware with Honeypot Techniques ..................................................................................................................77
    Chris Moore

Session 4
Analyzing CyberCrimes Strategies: The Case of Phishing Attack ......................................................................................82
    Rola Al Halaseh and Ja’far Alqatawna
Fraud Prevention Framework for Electronic Business Environments: Automatic Segregation of Online Phishing Attempts ..................................................................................................................89
    Nazeel Ghatasheh
Users Profiling Using Clickstream Data Analysis and Classification ..........................................................................................96
    Wedyan Alswiti, Ja’far Alqatawna, Bashar Al-Shboul, Hossam Faris, and Heba Hakh
Where are All the Cyber Terrorists? From Waiting for Cyber Attack to Understanding Audiences ..........................................................................................................................100
    Julian Droogan and Lise Waldek

Session 5
Management Attitudes toward Information Security in Omani Public Sector Organisations .................................................................107
    Fathiya Al-Izki and George R. S. Weir
Websites’ Input Validation and Input-Misuse-Based Attacks .................................................................................................113
    Izzat Alsmadi and Iyad Alazzam
Exploiting Vulnerability Disclosures: Statistical Framework and Case Study ........................................................................117
    MingJian Tang, Mamoun Alazab, and Yuxiu Luo
Detecting and Preventing SQL Injection Attacks: A Formal Approach ........................................................................123
    Mohammad Qbeah, Mohammad Alshraideh, and Khair Eddin Sabri
Experimental and Analytical Evaluation of the Impact of Security Compliance on System Performance of Web Applications ..................................................................................................................130
    John O. Babatunde
