Welcome Message for the SES Workshop

The First International Workshop on Sustainable Enterprise Software (SES2011) is the international workshop on advances in theory, systems, and applications for enterprise software. Enterprise software is used in organizations, such as in a business or government, as opposed to software chosen by individuals. The sustainability of enterprise software is an important topic. Our workshop focuses on the invention of sustainable software based on artificial intelligence, e-commerce, and intelligent web technologies.

The topics of the workshop are

- Collaboration and Negotiation Technologies
- Multi-Agent Systems and Artificial Intelligence
- e-Business and e-Commerce
- Semantic Web
- Intelligent Web Applications
- Ubiquitous Computing
- Cloud Computing
- Collective Intelligence
- Green Computing
- Surveys on Sustainable Information Systems

The increase of business research activities can be observed in a variety of the fields. Though there have been several workshops on business and services focusing on enterprise software, there is little interaction so far among researchers. The aim of this workshop is to encourage activities in this field, and to bring together world-wide researchers with an interest in enterprise software. Unlike the conventional conferences, this workshop will mainly discuss and explore scientific and practical problems as raised by the participants. Especially, we provide discussions for understanding the importance of sustainability and the relationships between enterprise software and AI techniques. This year we had 11 submissions. Each paper was reviewed by at least two program committee members. We accepted all of the submissions with some minor revisions.

Takayuki Ito, Tokuro Matsuo, and Naoki Fukuta
SES2011 Organizers

Reviewers for the SES 2011 Workshop

Takayuki Ito, Nagoya Institute of Technology, Japan
Katsuhide Fujita, University of Tokyo, Japan
Takanori Terashima, Miyagi University, Japan
Naoki Fukuta, Shizuoka University, Japan
Tokuro Matsuo, Yamagata University, Japan
