Session 4: Grid Security

An Authentic Measurement Mechanism of Service for Trusted Grid ......................................................... 167
Yunfa Li, Xiangha Xu, Jian Wan, Hai Jin, Zongfen Han, and Xindong You

The Diffie-Hellman Authentication Test in the Strand-Space Mode ............................................................ 174
Chen Ming, Wu Kai-Gui, Xie Qi, and Wu Zhong-Fu

A General and Secure Certification-based Encryption Construction ........................................................... 182
Lu Yang and Li Jiguow

A Fuzzy Trust Evaluation Based Access Control in Grid Environment ....................................................... 190
Yi Chen, Junzhou Luo, and Xudong Ni

Security Research on an Information-Theoretically Secure Secret Key Agreement Using LDPC Matrices .................................................................197
Jia Yu, Yuan Luo, and Minglu Li

Session 5: Grid Applications

A Visual Scientific Workflow Designer for Chemists in Grid Environment ............................................. 211
Ying Chen, Ruisheng Zhang, Xiaoliang Fan, Chunyan Zhang, and Lian Li

An Adaptive MAS-Based Data Acquisition Model in ESESGrid ............................................................. 218
Wang Li, Wang Cong, Long Hao, and Di Rui-Hua

The Research and Development of ChemGrid in CGSP ...........................................................................223
Ying Zhao, Ye Yue, Xuelin Shi, Jianwei Li, and Atul Sajjanhar

An Adaptive System of Service-Oriented Visualization on the Grid ......................................................... 229
FuQiang Li, Bin Gong, and Cheng Xing

Applying BPEL to Chemical Research on Grid ......................................................................................... 235
Jiaxuan Wei, Ruisheng Zhang, Xiaoliang Fan, Chunyan Zhang, and Zhiguo Gong

Grid-Enabled Distributed Structural Engineering Experiment Management ............................................ 243
Yi Liang, Rui-Hua Di, Hao Long, Wang Li, Xuming Luo, Zheng Zhang, and Zijun Weng

Research and Implementation of Groupware in Chemical Collaborative Research Environment ................... 253
Chen Zhao, Ruisheng Zhang, Dongmei Yue, Ruipeng Wei, Yajuan Cheng, and Lian Li

JobGrid: Chinese College Graduates Employment Information Grid System .......................................... 259
Feng Zhao, Bin Zhou, Xiaoxing Sun, Hai Jin, and Song Wu

A Survey of Methods and Applications for Trace Analysis in Grid Systems ........................................... 264
Ying Zhao, Gang Shao, and Guangwen Yang

Flow Management with Service Differentiation for SIP Application Servers ............................................. 272
Jing Sun, Hongliang Yu, and Weimin Zheng
Session 6: Semantic Grid and Semantic Web

A New Automated Approach for Semantic Caching on XML Queries ................................................281
HamidReza Kermajani and Mehdi Abbasi

Research and Implementation of Domain-Specific Ontology Building
from Relational Database .........................................................................................................................289
Changjun Hu, Huayu Li, Xiaoming Zhang, and Chongchong Zhao

A Semantic-based Framework for Virtual Organization Management ..................................................294
Linhua Zhou, Huajun Chen, and Yuxin Mao

Taxonomy and an Ontology for Grid Metrics ..........................................................................................300
Siuyuan Ma, XiaosheDong, Yiduo Mei, Zhao Wang, and Zhengdong Zhu

Session 7: High Performance Computing

Research of a Grid-enabled Parallel Computational Model and Algorithm
Implementation ..........................................................................................................................................311
Yongmei Lei, Huaikou Miao, and Lijie Li

An Evaluation of Two-Stage Systematic Sampling in Micro-Architecture
Simulation ..................................................................................................................................................317
Zhibin Yu, Hai Jin, and Jie Chen

A Heterogeneous Data Parallel Computational Model for Cell Broadband
Engine .......................................................................................................................................................325
Bo Li, Hai Jin, Ran Zheng, and Qin Zhang

Scalable Resource Management System for High Productive Computing ............................................331
Yutong Lu, Nong Xiao, and Xuejun Yang

Dimension-Exchange-Based Load Balancing on Crossed Cubes ..........................................................338
Chong Yao, Keqiu Li, Jun Meng, and Wenyu Qu

Session 8: Peer-to-Peer Computing and Information Retrieval

Research Issues and Overview of Incentive-Compatible Topology Evolution
in Autonomous Overlay Networks .............................................................................................................345
Yufeng Wang and Akihiro Nakao

Profit Sharing Based Routing Trust Evaluation Algorithm in P2P Network ..........................................352
Liu Xiaoqian, Yang Shoubao, Guo Leitao, and Shen Kai

Author Index ........................................................................................................................................360
