2010 Second International Conference on Computational Intelligence, Communication Systems and Networks

CICSyN 2010

Table of Contents

Message from General Chairs ...................................................................................................................xii
Conference Organization .............................................................................................................................xiii
International Program Committee ..............................................................................................................xiv
International Reviewers ...........................................................................................................................xv
Technical Sponsors .........................................................................................................................................xvi
Keynote Speakers ...........................................................................................................................................xvii
Tutorial .....................................................................................................................................................................xxi

Intelligent Systems

Nonlinear Neural Network Congestion Control Based on Genetic Algorithm
for TCP/IP Networks ........................................................................................................................................1

Modjtaba Rouhani, Mohammad Rasoul Tanhatalab, and Ali Shokohi-Rostami

A Multi-objective Gravitational Search Algorithm .........................................................................................7

Hamid Reza Hassanzadeh and Modjtaba Rouhani

An Intelligent Framework for the Classification of Premium and Regular Gasoline for Arson and Fuel Spill Investigation Based on Extreme Learning Machines ............................................................................................................................13

Sunday O. Olatunji and Imran A. Adeleke

AntNet with Reward-Penalty Reinforcement Learning ..............................................................................17

Pooia Lalbakhsh, Bahram Zaeri, Ali Lalbakhsh, and Mehdi N. Fesharaki

Some Recent Major Events and Considerations for Modelling and Simulation .............................................22

Richard Zobel

A Non-linear Function Approximation from Small Samples Based on Nadaraya-Watson Kernel Regression ........................................................................................................................................28

Mohd Ibrahim Shapiai, Zuwairie Ibrahim, Marzuki Khalid, Lee Wen Jau, and Vladimir Pavlovich
Key-Word Based Query Recognition in a Speech Corpus by Using Artificial Neural Networks .......................................................... 33
  Raji Sukumar A., Sarin Sukumar A., Firoz Shah A., and Babu Anto P.
Lane Detection for Intelligent Vehicles in Challenging Scenarios .......................................................................................... 37
  Yasemin Timar and Fatih Alagöz
A Modified Artificial Neural Network Learning Algorithm for Imbalanced Data Set Problem .......................................................... 44
  Asrul Adam, Ibrahim Shapiai, Zuwairie Ibrahim, Marzuki Khalid, Lim Chun Chew,
  Lee Wen Jau, and Junzo Watada
A Particle Swarm Optimization Approach for Routing in VLSI ..................................................................................................... 49
  M. Nasir Ayob, Zulkifli Md Yusof, Asrul Adam, Amar Faiz Zainal Abidin,
  Ismail Ibrahim, Zuwairie Ibrahim, Shahdan Sudin, N. Shaikh-Husin, and M. Khalil Hani
Context-Aware News Recommender in Mobile Hybrid P2P Network ....................................................................................... 54
  Kam Fung Yeung, Yanyan Yang, and David Ndzi
A Learning Rule-Based Robotics Hand Optimal Force Closure ............................................................................................... 60
  E. Mattar Al-Gallaf

Hybrid Intelligent Systems
A Straight Moving Path Planner for Mobile Robots in Static Environments
Using Cellular Automata .......................................................................................................................... 67
  Faranak Rahimi Soofiyani, Amir Masoud Rahmani, and Mehran Mohsenzadeh
Bacterial Foraging Algorithm with Adaptable Chemotactic Step Size ................................................................................ 72
  H. Supriyono and M.O. Tokhi
Genetic Algorithm-Artificial Neural Network (GA-ANN) Hybrid Intelligence for Cancer Diagnosis .............................................. 78
  Fadzil Ahmad, Nor Ashidi Mat-Isa, Zakaria Hussain, Rozan Boudville,
  and Muhammad Khusairi Osman
Data Mining Techniques for Modelling Seasonal Climate Effects on Grapevine Yield and Wine Quality .................................................. 84
  Subana Shanmuganath, Philip Sallis, and Ajit Narayanan
Data Mining Techniques for Modelling the Influence of Daily Extreme Weather Conditions on Grapevine, Wine Quality and Perennial Crop Yield ........................................................ 90
  Subana Shanmuganath, Philip Sallis, and Ajit Narayanan
Weather Forecasting Using Photovoltaic System and Neural Network ................................................................................. 96
  Iza Sazanita Isa, Saodah Omar, Zuraidi Saad, Norhayati Mohamad Noor,
  and Muhammad Khusairi Osman
Hybrid OCR Techniques for Cursive Script Languages - A Review and Applications .......................................................... 101
  Azam Beg, Faheem Ahmed, and Piers Campbell
## Sensor Nodes, Circuits, Devices, Wireless Sensor Networks

- **Simulation Model of the Scanner Servocontrols for the Orientation of a Fighter Aircraft by Using the Bond Graph Technique**
  
  
  M.L. Martinez, G. Romero, J. Maroto, and J. Felez

- **Multimode WSN: Improving Robustness, Fault Tolerance and Performance of Randomly Deployed Wireless Sensor Network**
  
  Salvatore F. Pileggi, Carlos E. Palau, and Manuel Esteve

- **An Energy Model of the Ultra-Low-Power Transceiver nRF24L01 for Wireless Body Sensor Networks**
  
  Andreas Weder

- **Energy-Efficient Gradient Time Synchronization for Wireless Sensor Networks**
  
  Kittipat Apicharttrisorn, Supasate Choochaisri, and Chalermek Intanagonwiwat

- **Relay Selection Techniques in Cooperative Communication Using Game Theory**
  
  Mohsin Nazir and Nandana Rajatheva

- **Micro SOA Model for Managing and Integrating Wireless Sensor Network into IP-Based Networks**
  
  A. Sleman and R. Moeller

- **Password Renewal Enhancement for Dynamic Authentication in Wireless Sensor Networks**
  
  Farzad Kiani and Gokhan Dalkilic

- **Architecture for Faster RAM Controller Design with Inbuilt Memory**
  
  Mohd Wajid and Shashank SB

## RFIDs and Their Applications

- **Study on Performance of Some Typical Tag Collision Avoidance Algorithms**
  
  Jiang-Jie Gu and Zhi-Ying Yang

## Protocols and Standards

- **Cluster Based Peers Configuration Using HCNP in Peer-to-Peer Overlay Networks**
  
  Irum Kazmi, Saira Aslam, and M.Y. Javed

## Modeling and Performance

- **Microstrip Rectangular 4x1 Patch Array Antenna at 2.5GHz for WiMax Application**
  
  Norfishah Ab Wahab, Zulkipli Bin Maslan, Wan Norsyafizan W. Muhamad, and Norhayati Hamzah
EF-AQM: Efficient and Fair Bandwidth Allocation AQM Scheme for Wireless Networks ................................................................. 169
   Rafe Alasem and Hussein Abu-Mansour
Fuzzy Set-Based Analysis and Design of AQM Controller for Access Router in Heterogeneous Networks ................................ 173
   Rahim Rahmani, Theo Kanter, and Christer Åhlund
Spectral Analysis of Speech Quality in VoIP for G.729A and AMR-WB Speech Coders ......................................................................................... 182
   Sarabjeet Singh, Harjit Pal Singh, and Jasvir Singh
Simulation Study of Buffering in Manhattan Street Network in NS2 .................................................................................. 188
   Ravinder Bahl and Rakesh Kumar

Software Platforms and Middleware
Risk Identification, Mitigation and Avoidance Model for Handling Software Risk ........................................................................................................ 191
   Basit Shahzad and Abdullah S. Al-Mudimigh
Maximum Matching in a Partially Matched Bipartite Graph and Its Applications .................................................................................... 197
   Saran Krishnaswamy

An Intrusion Detection Architecture for Clustered Wireless Ad Hoc Networks .............................................................. 202
   Jaydip Sen
Applying Systems Engineering in Tactical Wireless Network Analysis with Bayesian Networks ............................................................ 208
   Philip Chan, Mo Mansuri, and Hong Man
Evaluation of SQL Injection Detection and Prevention Techniques ........................................................................................... 216
   Atefeh Tajpour and Mohammad Jorjor zade Shooshtrari
H.264 Compressed Domain Watermarking in Content Delivery Network (CDN) Environment ................................................................................. 222
   T. Chattopadhyay, Aniruddha Sinha, and Asmita Hardikar
Expert-Aware Approach: A New Approach to Improve Network Security Visualization Tool .................................................................................. 227
   Doris Hooi-Ten Wong, Kok-Soon Chai, Sureswaran Ramadass, and Nicolas Vavasseur

Discrete Event and Real Time Systems
A Discrete-Event Solver for Repairable Flow Networks with Complex Topology ........................................................................................................ 232
   Michael Tadinov
Discrete Time Linear Optimal Repetitive Control - A Low Order Controller Scheme ....................................................................................... 238
   Youde Han, David H. Owens, and Bing Chu

Image, Speech and Signal Processing

Artificial Neural Networks Based Algorithm for Identifying Engine Oil Parameters .......................................................... 244

A Novel Approach to Noise Reduction and Real-Time Enhancement of Speech Synthesis ........................................................................ 250

_M. Saadeq Rafiee and Ali Akbar Khazaei_

Non-linear Image Enhancement Using Opportunity Costs ........................................................................................................ 256

_Lung-Jen Wang and Ya-Chun Huang_

The Contourlet Transform with the Principal Component Analysis for Palmprint Recognition ......................................................... 262

_Maha Sharkas, Ibrahim El-Rube, and Mennat Allah Mostafa_

Analysis of Interpolated FIR Filter for VoIP in Noisy Environment .......................................................................................... 268

_Harjit Pal Singh, Sarabjeet Singh, R.K. Sarin, and Jasvir Singh_

Human Authentication Using Face and Fingerprint Biometrics .................................................................................................... 274

_Ashraf A. Darwish, Walaa M. Zaki, Omar M. Saad, Nadia M. Nassar, and Gerald Schaefer_

An Evolutionary Approach to Image Noise Cancellation Using Adaptive Particle Swarm Optimization (APSO) ................................................................. 279

_Syamala Jaya Sree P., Ravi Kant Verma, Pradeep Kumar, Rajesh Siddavatam, and S.P. Ghrera_

Enhancements of H.264 Encoder Performance Using Platform Specific Optimizations in Low Cost Dsp Platforms ......................... 285

_T. Chattopadhyay_

Implementation of FIR Interpolation Filter on TMS320C6713 for VoIP Analysis .................................................................................. 289

_Jasvir Singh, Harjit Pal Singh, and Sarabjeet Singh_

Digital Imaging in Pathology towards Detection and Analysis of Human Breast Cancer ......................................................................................... 295

_Samir Kumar Bandyopadhyay, Indra Kanta Maitra, and Souvik Banerjee_

Spectral Entropy for Epileptic Seizures Detection .................................................................................................................. 301

_Ahmad Mirzaei, Ahmad Ayatollahi, Parisa Gifani, and Leili Salehi_

Woods Recognition System Based on Local Binary Pattern ........................................................................................................ 308

_M. Nasirzadeh, A. Arab Khazaie, and Marzuki bin Khalid_

DTBSVMs: A New Approach for Road Sign Recognition ........................................................................................................ 314

_Hossein Pazhoumand-Dar and Mehdi Yaghobi_
Virtual Reality, Visualization and Computer Games

Visualisation of Earth Deformation in 2D
Nor Anita Fairos bt. Ismail, Sheikh Nasir Kamarudin, Mohd Sharfy bin Mohd Rahim, J.G. Liu, and P. Mason

Parallel and Distributed Architectures and Systems

A Binomial Heap Algorithm for Self-Recognition in Exclusive Management on Autonomic Grid Networks
Mehdi Bahrami and Peyman Arebi

An Implementation of Cellular Automata on Systolic Array
Ali Yarahmadi and Saeed Setayeshi

Tree Based Structured Management of Delivery Path for the Multi-path Streaming
Guochao Jing, Takeshi Tsuchiya, Katsuhiro Sebayashi, Kenji Shimizu, Mitsuru Maruyama, and Keiichi Koyanagi

Internet Modeling, Semantic Web and Ontologies

A Web Service for Practical Physics Solutions Using Simulation
Eliza Consuela Isbasoiu and Madalin Preotesescu

Ontology Driven Approach Enhancing Business Services Orchestration
Asta Krupaviciute and Jocelyne Fayn

Unsupervised Artificial Neural Nets for Modeling Movie Sentiment
William B. Claster, Dinh Quoc Hung, and Subana Shanmuganathan

Mobile Ad Hoc Networks

SaLAM: Scalable @ Location Advertisement Management in MANET
Amjad Osmani and Abolfazl T. Haghighat

Performance Analysis of TFRC and UDP over Mobile-IP Network with Computing Flows
Al-Samarraie Hosam, Hussein Qasim, Merza Abbas, Talal Jameel, Irfan Nafal, and Mahmoud Nofal

Implementation of GPRS-Based Positioning System Using PIC Microcontroller
Wael M. El-Medany, Alaaddin Alomary, Reyadh Al-Hakim, Sufyan Al-Irhayim, and Mustafa Nousif
Vehicular Technology and Networks

Performance of Dynamic MIMO Systems in Presence of Nakagami Fading Channel ................................................................. 369

Ravi Kumar, Rajiv Saxena, Abhay Sah, Saroj Gupta, and Tapesh Chandgothia

Air Interfaces

PAPR Reduction in OFDM Systems: Zadoff-Chu Matrix Transform Based Pre/Post-Coding Techniques ................................................................. 373

Imran Baig and Varun Jeoti

QoS for Voice and Video in Wireless Networks

Fair Hierarchical Scheduling with Capability of Handling Channel Failures in a Wireless LAN ................................................................. 378

Moutaz Saleh Mustafa and Basima Hani Hasan

Call Admission Control Policy for Integration of Voice/Data Traffic in Cellular Mobile Networks ................................................................. 384

Aytül Bozkurt, Erdem Uçar, and Rafet Akdeniz

Bio-informatics and Bio-medical Simulation

EEG Analysis for Brainwave Balancing Index (BBI) ................................................................................................................................. 389

Zunairah Hj Murat, Mohd Nasir Taib, Sahrim Lias, Ros Shilawani S. Abdul Kadir, Norizam Sulaiman, and Mahfuzah Mustafa

PAL: A Path Selection Algorithm for Life Critical Data ................................................................................................................................. 394

Sadik Armagan, Enda Fallon, and Yuansong Qiao

Author Index ................................................................................................................................................................................................. 400
