Message from the Workshop Co-Chairs of CISIS-2010 International Conference

Welcome to the Workshops of the Fourth International Conference on Complex, Intelligent and Software Intensive Systems (CISIS-2010) which will be held at Andrzej Frycz Modrzewski Cracow College, Krakow, Poland in conjunction with ARES-2010 International Conference.

This is the fourth edition, consolidating CISIS workshops as important international workshops in the field as regards both the number of submissions received and the number of workshops held within the CISIS conference. We are pleased to note that in response to our Call for Workshop Proposals about 17 workshop proposals were received. The objective was to complement as much as possible the main themes of CISIS-2010 with specific topics of different workshops in order to cover topics from the three challenging areas of ICT-enabled applications: Software Intensive Systems, Complex Systems and Intelligent Systems.

As a result, 12 workshops were organized in conjunction with CISIS-2010 Conference covering research on Grid and P2P Computing, Distributed and Multi-core Systems, Web services and Ontologies, Human Computer Interaction, Wireless Networks and Informatics in Biology and Medicine, among others. Some are now second, third or fourth editions. These workshops are:

1. Fourth International Workshop on P2P, Parallel, Grid and Internet Computing (3PGIC-2010)
3. Fourth International Workshop on Intelligent, Mobile and Internet Services in Ubiquitous Computing (IMIS-2010)
5. Third International Workshop on Ontology Alignment and Visualization (OnAV-2010)
6. Third International Workshop on Intelligent Interfaces for Human-Computer Interaction (IIHCI-2010)
7. Third International Workshop on Intelligent Informatics in Biology and Medicine (IIBM-2010)
8. Second International Workshop on Semantic Web/Grid Information and Services Discovery and Management (SWISM-2010)
9. Second International Workshop on Virtual Environment and Network-Oriented Applications (VENOA-2010)
10. First International Federated Workshop on Semantically-Enabled Systems Engineering and Coordination in Complex Software Intensive Systems (SENSE/COCOSS-2010)
11. First International Workshop on Autonomic Distributed Systems (ADiS-2010)

These workshops bring to the researchers conducting research in specific themes the opportunity to learn from this rich multi-disciplinary experience.

The Workshop Co-Chairs would like to thank the workshop organizers for their great efforts and hard work in proposing the workshop, selecting the papers, the interesting programs and for the arrangements of the workshop during the conference days. We are grateful to
Amin Anjomshoa for his excellent work and support with the *Confdriver* system. The support of the webmasters’ team of ARES and CISIS conferences is much appreciated.

We hope you enjoy the workshops programs and proceedings!

*Workshop Co-Chairs of CISIS-2010 International Conference*

Hui-Huang Hsu, Tamkang University, Taiwan
Arjan Durresi, Indiana University Purdue University at Indianapolis, USA
Minoru Uehara, Toyo University, Japan
