Welcome Message from the Workshops Co-Chairs of

CISIS-2011 International Conference

Welcome to the Workshops of the Fifth International Conference on Complex, Intelligent and Software Intensive Systems (CISIS-2011) which will be held at Korean Bible University (KBU), Seoul, Korea in conjunction with IMIS-2011 International Conference.

We are pleased to notice that in response to our Call for Workshop Proposals we received 9 workshops proposals. The objective was to complement as much as possible the main theme of CISIS-2011 with specific topics of different workshops in order to cover topics from the three challenging areas of ICT-enabled applications: Software Intensive Systems, Complex Systems and Intelligent Systems.

As a result, 7 workshops are organized in conjunction with CISIS-2011 Conference. Some of these workshops are in third, fourth and fifth edition. The workshops are as following.

1. Fifth Workshop on Engineering Complex Distributed Systems (ECDS-2011)
3. Fourth International Workshop on Intelligent Interfaces for Human-Computer Interaction (IIHCI-2011)
6. Third International Workshop on Virtual Environment and Network-Oriented Applications (VENOA-2011)
7. First International Workshop on Intelligent Computing in Large-Scale Systems (ICLS-2011)

These workshops bring to the researchers conducting research in specific themes the opportunity to learn from this rich multi-disciplinary experience.

The Workshop Co-Chairs would like to thank CISIS-2011 International Conference Organizers for their help and support. We are grateful to the workshops organizers for their great efforts and hard work in proposing the workshops, selecting the papers, the interesting programs and for the arrangements of the workshops during the conference days. We are grateful to Dr. Makoto Ikeda, Fukuoka Institute of Technology, Japan for his excellent work and support as Web Administrator. We would like to give special thanks to the Local Organization Team of KBU.

We hope you enjoy the workshops programs and proceedings.
