Message from the IINIC 2016 Workshop Co-Chairs

Advanced information processing technologies have the potential to significantly accelerate research in different fields. In particular, techniques from Artificial Intelligence, Machine Learning, and Data Mining can assist researchers in the discovery of new knowledge for next generation applications. This workshop aims to attract state-of-the-art solutions and novel attempts in this direction.

The 9-th International Workshop on Intelligent Informatics and Natural Inspired Computing (IINIC 2016) will provide a platform for researchers to meet and exchange their thoughts. IINIC 2016 will be held in conjunction with the 10-th International Conference on Complex, Intelligent and Software Intensive Systems (CISIS 2016) from July 6-th to July 8-th, 2016, at Fukuoka Institute of Technology (FIT), Fukuoka, Japan.

Many people contributed to the success of IINIC 2016. We wish to thank the program committee members for their great effort. We also would like to express our gratitude to the main organizers of CISIS 2016 for their excellent work in organizing the conference. Last but not least, we would like to thank and congratulate all the contributing authors for their support to the workshop.

Hui-Huang Hsu, Tamkang University, Taiwan
Leonard Barolli, Fukuoka Institute of Technology, Japan
