Message from the CIT 2015 Workshop/Symposium Chairs

Welcome to the Workshops and Symposia held in conjunction with the 15th IEEE International Conference on Computer and Information Technology (CIT 2015) in Liverpool, UK, during 26–28 October 2015.

This year’s program includes seven workshops and two symposia that cover a wide range of hot research topics addressing issues on the leading edge of research on computer and information technology:

1. The Sixth International Workshop on Wireless Networks and Multimedia (WNM 2015)
2. The Fourth International Workshop on Security and Optimization for Wireless Networks (SOWN 2015)
3. The Sixth International Workshop on Intelligent Communication and Social Networks (IntelNet 2015)
4. The International Workshop on Internet of Things: Smart Objects, Cloud and Applications (I-SOCA 2015)
5. The International Workshop on Social Media Mining and Analysis (SMMA 2015)
6. The International Symposium on Character and Text Understanding (WCTU 2015)

These workshops/symposia are an excellent complement to the overall scope of CIT 2015 and give additional values and interests. We hope that all of the selected papers will have significant impact on future research in the respective research areas.

The workshops were selected by considering the quality of the proposal adequacy to the scope of CIT 2015, and the CV of the organizers. We present our sincere appreciation to the workshop organizers for their hard work on designing the call for papers, assembling the program committee, managing the review process for the papers, and planning the workshop program. Thanks are extended to the workshop program committees, external reviewers, session chairs, contributing authors, and attendees. We would like to acknowledge the organization committees of CIT 2015 for their kind support and insightful guidance.

At the end, we wish that you find the workshops and symposia quite interesting and stimulating, and enjoy CIT 2015 along with the city of Liverpool.
