Table of Contents

The Fifth International Conference on Computer and Information Technology (CIT 2005)

Preface ........................................................................................................................................................................xx
Committee Organization .................................................................................................................................................xxi
Committees ..................................................................................................................................................................xxiii

Keynote Speeches

The Birth, Evolution and Future of the Microprocessor ................................................................. 2
Masatoshi Shima, Visual Technology Inc., Japan

Web Service Interactions: Analysis and Design ............................................................................. 3
Jianwen Su, University of California, Santa Barbara, USA

Protein Structure Prediction and Interpretation with Support Vector Machines and Decision Trees ................................................................................................................................. 4
Yi Pan, Georgia State University, USA

Technical Sessions: Databases

Session A-1: Machine Learning

Study on Optimized Bandwidth Selection Approach of Drifting Learning ........................................ 6
R. Feng, Y. Zhang, and C. Song

SVM and Classification Ensembles Based High-Voltage Transmission Line Fault Diagnosis ................................................................. 11
B. Shen, M. Yao, and B. Yuan

A New Support Vector Machine for Multi-class Classification .......................................................... 18
Y. Tian, Z. Qi, and N. Deng

Forecasting the Flow of Data Packets in Web Using ANFISCH Predictor Tuned by Segmented Adaptive Support Vector Regression .................................................................................. 23
B. R. Chang

A Quantitative Study of the Effect of Missing Data in Classifiers .................................................... 28
P. Liu, L. Lei, and N. Wu

Session A-2: Database Applications

The Sketch Recognition and Query Interpretation by GSQL, a Geographical Sketch Query Language ......................................................................................................................... 34
F. Ferri, P. Grifoni, and M. Rafanelli

A Rule Reasoning Method and its Application ............................................................................ 39
F. Liu, S. Lv, and C. Chen
Spatial QBE Interface for Web GIS ................................................................. 44
    S. A. Rahman and S. Bhalla

Case Study: Distance-Based Image Retrieval in the MoBiOS DBMS................................................................. 49
    R. Mao, Q. Iqbal, W. Liu, and D. P. Miranker

Session A-3: Database Technologies

Non-blocking Disk-Tape Join Algorithm for Data on Tertiary Storage Systems ........................................................ 58
    B. Liu, J. Li, L. Nie, and Y. Zhang

An Approach to Tracking Data Derivation in Information Systems ................................................................. 65
    J. Shao, Y. Ibrahim, and S. M. Embury

A New Indexing Method for Approximate Search in Text Databases ................................................................. 70
    F. Shi and C. Mefford

Storage and Query over Encrypted Character and Numerical Data in Database ...................................................... 77
    Z.-F. Wang, W. Wang, and B.-L. Shi

Controlling FD and MVD Inferences in MLS ........................................................................................................ 82
    H. Yan, B. Liu, X. Yang, W. Wang, B. Shi, and G. Yang

Session A-4: Data Mining I

Structure Learning Based on Ordering of Sets ........................................................................................................ 88
    T. Du, S. Zhang, and Z. Wang

The Mining of Fuzzy Gradient in the Case of Materialized Cube ......................................................................... 93
    Y. Liu and J. Yin

Efficient Algorithms for Mining Maximal Frequent Concatenate Sequences in Biological Datasets ...................... 98
    J. Pan, P. Wang, W. Wang, B. Shi, and G. Yang

Incorporating with Recursive Model Training in Time Series Clustering ................................................................ 105
    J. Duan, W. Wang, B. Liu, Y. Xue, H. Zhou, and B. Shi

A Constructing Algorithm of Concept Lattice with Attribute Generalization Based on Cloud Models .................. 110

Session A-5: XML

Engineering XML Solutions Using Views ........................................................................................................... 116
    R. Rajugan, E. Chang, T. S. Dillon, and L. Feng

Storing Normalized XML Documents in Normalized Relations ............................................................................. 123
    Z. Tan, J. Xu, W. Wang, and B. Shi

DBXML - Connecting XML with Relational Databases ...................................................................................... 130
    V. Tzvetkov and X. Wang
Content and Structure Based Approach for XML Similarity ................................................................. 136
   Y. Ma and R. Chbeir

Conceptual Design of an XML FACT Repository for Dispersed XML Document Warehouses & XML Marts ........................................................................................................ 141
   R. Rajugan, E. Chang, and T. S. Dillon

Session A-6: Data Mining II

A User-guided Association Rules Mining Method and Its Application .................................................. 150
   Y. Li

Non-Almost-Derivable Frequent Itemsets Mining ....................................................................................... 157
   X. Yang, Z. Wang, B. Liu, S. Zhang, W. Wang, and B. Shi

From Intent Reducts for Attribute Implications to Approximate Intent Reducts for Association Rules ................................................................................................................ 162
   Z. Xie and Z. Liu

A Multi-Supports-Based Sequential Pattern Mining Algorithm .............................................................. 170
   Y. Xiong and Y.-Y. Zhu

An Efficient Solution to Factor Drifting Problem in the pLSA Model ...................................................... 175
   L. Zhang, C. Li, Y. Xu, and B. Shi

Technical Sessions: Web Data Processing

Session B-1: Web Data Management

Towards Effective Web Resources Management - An Empirical Study and a Web Mining Approach ......................................................................................................................... 182
   I. S. Y. Kwan

Effectively Maintaining Multiple View Consistency in Web Warehouses .............................................. 187
   Y. Zhang and X. Qin

On a Hybrid Rule Based Recommender System ..................................................................................... 194
   F. Zhang and H.-Y. Chang

Effectively Maintaining Single View Consistency in Web Warehouses .................................................. 199
   Y. Zhang and X. Qin

A Layered View Model for XML Repositories & XML Data Warehouses ........................................... 206
   R. Rajugan, E. Chang, T. S. Dillon, and L. Feng

Session B-2: Web Intelligence

Super Parsing: Sentiment Classification Using Review Extraction ......................................................... 216
   J. Liu, J. Yao, and G. Wu

Spam Filtering Based on Preference Ranking .......................................................................................... 223
   M. Lan and W. Zhou

</tr>
</tbody>
</table>
Building Strongly-Reliable and High-Performance Storage Cluster
with Network Attached Storage Disks Using PCs......................................................... 315
  C. Bin, C. Xie, and H. Li

A Write-Prior Partitioning LRU Algorithm for the Multi-port Cache
in Disk Arrays ............................................................................................................. 322
  Y. Wang, G. Li, X. Wu, and S. Lin

A New Technique for Eliminating Data Migration in Logistic Evolution
Storage System ............................................................................................................ 327
  H.-Y. Li, C.-S. Xie, C. Bin, and Y. Liu

Session C-3: Grid Computing

A QoS-Based GFAM Scheduling Approach for Manufacturing Grid ..................... 334
  L. Liu, T. Yu, and Y. He

Dynamic Workflow in a Grid Enabled Problem Solving Environment ..................... 339
  Z. Zhao, A. Belloum, H. Yakali, P. Sloot, and B. Hertzberger

User-Oriented Job Management in a Grid Environment ............................................. 346
  C. Luan, G. Song, Y. Zheng, and G. Wei

Agent-Based Mobile Service Discovery in Grid Computing .................................... 351
  Y. He, W. Wen, H. Jin, and H. Liu

GOD Queuing: A Novel Grid-Based Resource Co-allocation Scheme
in Distributed Multimedia System .............................................................................. 356
  Z. Lv, Y. Zhong, W. Fu, and S. Zhang

Session C-4: Cooperative Information II

Target Tracking Based on the Dynamic Cluster Method in the Acoustic
Sensor Network .......................................................................................................... 362
  C. Zang, Y. Haibin, L. Wei, J. Bai, and G. Li

A Self-Adjusting Size-Based Load Balance Policy for Web Server Cluster .............. 368
  Z. Xiong, P. Yan, and J. Wang

Joint Management of Authorization for Dynamic Virtual Organization ................ 375
  W. Qiang, H. Jin, X. Shi, and D. Zou

A Novel Approach to Evaluate Trustworthiness and Uncertainty of Trust
Relationships in Peer-to-Peer Computing ................................................................. 382
  R. He, J. Niu, and K. Hu

WS-CABroker: A Novel Web Services-Based Multimedia Content Alliance
Broker Scheme ............................................................................................................ 389
  J. Wu, Z. Lv, Y. Zhong, and S. Zhang
Session D-1: Mobile Computing I

ECLS: An Efficient Cooperative Localization Scheme for Wireless Sensor and Actor Networks.................................................................396
P. Han, C. Gao, M. Yang, D. Mao, and B. Yu

A Dynamic-Cluster Energy-Aware Routing Algorithm Based on Neural Structure in the Wireless Sensor Networks........................................401
B. Guo, Z. Li, and Z.-J. Wei

Specification and Verification of Position Based Routing for Mobile Ad Hoc System ......................................................406
J. Xie and L. Huang

Energy-Efficient Adaptive Resource Management Strategy for Large-scale Mobile Ad Hoc Networks.................................................................410
S. Shi, J. Li, C. Wang, Y. Wu, and B. Liu

A High Performance Cluster-Based Flooding Algorithm for Wireless Ad Hoc Networks .........................................................................................417
R. Purtoosi, H. Taheri, A. Mohammadi, and F. Foroozan

Session D-2: Networking I

Randomized Parallel Scheduling Algorithm for Input Queued Crossbar Switches .................................................................424
Y. Zheng and W. Gao

Gossip-Based Multicast Loss Recovery Mechanisms in Group Key Distribution .........................................................................................429
Y. Yao, W. Fu, and S. Zhang

CMSM — A Closed Multi-Source IP Multicast Protocol .................................................................................................................................435
Y. Chen, N. Wang, Y. Li, and J. Lan

A Fuzzy Fair Packet Dropping Algorithm Supporting Differentiated Services .................................................................................................442
Y. Chen and L. Li

The Solution for Link Enhancement Problem Based on Ant Algorithm .................................................................................................447
Y. Liu, W. Teng, K. Xu, and H. Zhu

Session D-3: Wireless Networks

Research on Downlink Capacity for Broadband Wireless Access - VSF-OFCDM ........................................................................................454
P. Wang, Y. Zhao, and D. Cao

Frequency-Hopping Based Secure Schemes in Sensornets .................................................................................................................................459
J. Ma, Y. Zhong, and S. Zhang

An Improved Parallel Interference Cancellation Algorithm in DS/CDMA Communication System ........................................................................464
X. Geng, H. Hu, and Z. Liu
Performance Comparison of TCP Traffic over Mobile IPv4 and IPv6 Networks and a Mobile Network Deployment Approach ................................................................. 469
S. Chang, J. Park, Y. Won, M. Yang, and M.Y. Chung

On the Capacity of Hybrid Wireless Network in CDMA Scheme .............................................................. 474
Q.-Y. Dai, X. -L. Hu, Y.-Y. Zhang, and J. Zhao

Session D-4: Mobile Networking

A New Network Availability Algorithm for WDM Optical Networks .......................................................... 480
R. Lin, S. Wang, L. Li, and L. Guo

A Rotation-Based Quasi-Orthogonal Space-Time Block Coded OFDM System over Frequency-Selective Channels ........................................................................ 485
X. Lu, G. Zhu, Y. Liu, and X. Xiao

Performance Tradeoff with Adaptive Frame Length and Modulation in Wireless Network ................................ 490
Y. Hou, M. Hamamura, and S. Zhang

Application-Oriented Context Modeling and Reasoning in Pervasive Computing ........................................ 495
X. Lin, S. Li, Z. Yang, and W. Shi

Session D-5: Mobile Computing II

A Prediction-Based Approach to Concurrency Control Resulting in Low Blocking Rate under High-Quality Mobile Environment ......................................................... 502
X.-R. Li and B.-L. Shi

A Random Early Expiration Detection Based Buffer Management Algorithm for Real-Time Traffic over Wireless Networks .......................................................... 507
Y. Chen and L. Li

Heuristic and Distributed QoS Route Discovery for Mobile Ad hoc Networks ................................................ 512
P. Fu, J. Li, and D. Zhang

Efficient Localized Localization Algorithm for Wireless Sensor Networks .................................................. 517
K. Liu, S. Wang, F. Zhang, F. Hu, and C. Xu

A New Reliable Routing Method Based on Probabilistic Forwarding in Wireless Sensor Network .................. 524

Technical Sessions: Multimedia Processing

Session E-1: Human-Machine Interfaces

Comparison of Effective Target Width Calculation Methods for Pointing Task ............................................. 530
J. Kong and X. Ren
Multipresence Narrowcasting Operations Comprise a Media Meta-Mixer
Exponentiating Interface Value.................................................................................................................................535
M. Cohen

Comparative Study of Two Projective-Invariant Digital Watermarking Methods
Using Cross-Ratios and Line Intersections..............................................................................................................543
N. Pantuwong and N. Chotikakamthorn

Determining the Optimal Size of Handwriting Character Entry Boxes
for Pen-Based Systems ..............................................................................................................................................548
X. Ren

Mixed-Reality "Party-Line Night Club"-Synchronization of Networked Avatars
and Appliances with Mobile Phone Ringtones: Integrating java3D and
LAN-tap Roomware with J2ME.............................................................................................................................553
S. Ishikawa, Y. Saito, and M. Cohen

Session E-2: General Techniques and Algorithms I

Efficient Texture Mapping Using Minimum Cut ......................................................................................................560
J. Yue, W. Jin, W. Chen, and I.-F. Shen

A Robust and Topological Correct Marching Cube Algorithm without
Look-Up Table ..........................................................................................................................................................565
R. Xia, W. Liu, and Y. Wang

Colorimetric and Chemical Modeling Based Aging Simulation of
Dunhuang Murals ......................................................................................................................................................570
X. Shi and D. Lu

Progressive Matching Based on Segmentation for 3D Reconstruction .................................................................575
Y.-Z. Ma and W.-J. Liu

A Simplified MPC for Image Compression ...............................................................................................................580
C. Lv and Q. Zhao

Session E-3: Image Understanding

A Novel Method of Tongue Image Recognition .......................................................................................................586
W. Li, J. Xu, C. Zhou, and Z. Zhang

A Fingerprint Matching Algorithm Based on Delaunay Triangulation Net .............................................................591
N. Liu, Y. Yin, and H. Zhang

Manifold Learning for Image Denoising ...................................................................................................................596
R. Shi, I.-F. Shen, W. Chen, and S. Yang

An Adaptive Edge Detector Using Soft Mathematical Morphology ....................................................................603
X. Guo, Z. Xu, Y. Lu, and Y. Pang

Human Contour Extraction Using Level Set ...........................................................................................................608
L. Liu, S. Zhang, Y. Zhang, and X. Ye
Session E-4: General Techniques and Algorithms II

An EAWA Filter for Denoising of Filtering of Fluorescein Angiogram Sequences ................................................................. 614
   X. Guo, Z. Xu, Y. Lu, and Y. Pang

An Application of Fourier-Mellin Transform in Image Registration ......................................................................................... 619
   X. Guo, Z. Xu, Y. Lu, and Y. Pang

Region of Interest Image Coding Using IWT and Partial Bitplane Block Shift for Network Applications ........................................ 624
   L.-B. Zhang

A Shape Feature Based Image Retrieval in DCT Compressed-Domain ................................................................................... 629
   X. Zhang, G. Bian, and W. Xu

A Medical Image Segmentation Method Based on Watershed Transform .................................................................................. 634
   J.-X. Chen and S. Liu

Session E-5: Networked Multimedia

A Novel Architecture for Video-on-Demand Services .............................................................................................................. 640
   F. Lin, X. Wang, and X. Xue

A Comparison of End-to-End Performance over Three Multicast Sending Rate Control Schemes for Internet DTV .............................................................. 645
   X. Wang, F. Li, and X. Xue

A Content-Based Broadcasted Sports Video Retrieval System Using Multiple Modalities: SportBR ........................................... 652
   H. Liu and H. Zhang

Error Resilience Schemes of H.264/AVC for 3G Conversational Video Services ................................................................... 657
   L. Liu, S. Zhang, X. Ye, and Y. Zhang

Location and Extraction of Broadcast in News Video Based on QGMM and BIC ............................................................... 662
   L. Guo, Y.-C. Shi, X.-Z. Zhou, and F. Zhang

Technical Sessions: Information Security

Session F-1: Security Schemes and Protocols

Formalized Security Model of Multi-proxy Signature Schemes ................................................................................................. 668
   Q. Wang, Z. Cao, and S. Wang

Efficient Non-interactive Deniable Authentication Protocols ................................................................................................. 673
   H. Qian, Z. Cao, L. Wang, and Q. Xue

   Y. Gu, Y. Fu, Y. Li, and X. Dong

**Technical Sessions: Software Engineering**

**Session H-1: Software Design and Program Analysis**

A Component Optimization Design Method based on Component Instance
Set Decomposition: Decreasing Component Reuse Cost                                                                         | 836  |
Z. Wang, X. Xu, and D. Zhan                                                                                                 |      |
Analysis of A Leader Election Algorithm in μCRL .................................................. 841
   T. Chen, T. Han, and J. Lu

Transformation from Test Language ATLAS to C++ ............................................. 848
   D.-G. Guo, L. Liu, and W.-J. Li

A Novel Approach for Web-Based Data Input Panel Design ................................ 853
   X. Zhang, X. Ren, and S. Lu

Distributed Code Generation Using Object Level Analysis ................................. 858
   T.-T. Tay, Y. Chu, and Y. Sun

Session H-2: Knowledge in Software Engineering

Extensible Platform Software Architecture Design and its Impact in the Embedded
Network Software Engineering ............................................................................. 864
   T. Yamakami

Detecting of Requirements Inconsistency: An Ontology-Based Approach .......... 869
   X. Zhu and Z. Jin

Knowledge-Based Experimental Development of Web Application Systems ...... 876
   M. Yoshida and N. Iwane

Weld Joint Modeling and Representation on Assembly Structure for Knowledge-Based
Design Support Systems ......................................................................................... 881
   Z. Zhang

An Intelligent Connector Based Framework for Dynamic Architecture ............... 888
   X. Peng, W. Zhao, L. Zhang, and Y. Wu

Session H-3: Software Process and Software Architecture

Optimizing Software Process Based on Risk Assessment and Control .................. 896
   R.-Z. Xu, P.-Y. Nie, Y. Sai, L.-H. Qu, and Y.-T. Lee

A Heterogeneous Evolutional Architecture for Embedded Software ................. 901
   X. Luan, J. Ying, and M. Wu

A Process Management Tool Supporting Component-Based Process
Development and Hierarchical Management Mechanism .................................... 906
   Y. Wang, D. Li, and X. He

Reuse-Oriented Process Component Representation and Retrieval .................... 911
   R.-Z. Xu, T. He, D.-S. Chu, Y.-J. Xue, and L.-Q. Qian

Some Experiments with the Performance of LAMP Architecture ..................... 916
   U. Ramana and T. Prabhakar

Session H-4: Software Testing and Formalization

#### Session I-2: E-Applications

- The Study on Common/Unique Issues in PLM/CAD Integration and a Design of Flexible Integration Architecture
  - Y. Xia, Z. Yang, L. Zhang, L. Hu, and Y. Zhang
  - Page 978
- Resource Allocation Based on Combinatorial Auction in E-manufacturing Environment
  - C. Lv, Y. Zhu, and C. Yin
  - Page 983
- HUA: An Interactive Calligraphy and Ink-Wash Painting System
  - J. Yin, X. Ren, and H. Ding
  - Page 989
- A SIP-Enabled Multimedia Service Framework for CERNET2
  - Q. Chen and J. Shen
  - Page 996
Session I-3: Service Technologies

Ontology-Based Actively Discovering Potential Demands of Service Object .................................................. 1004
  M. Chen, G. Wu, J. Yuan, and J. Ma

Planning and Composition of Web Services with Dynamic Constraints Using Situation Calculus................................. 1009
  K. Nariai, I. Paik, and M. Shinozawa

An Automatic Summarization Service System Based on Web Services ........................................................ 1014
  Z. Wang, Y. Wang, C. Liu, and D. Liu

An Automatic Negotiation Method Based on CBR and Agent Reasoning .................................................. 1019
  F. Zhu, J. Guan, Y. Wang, J. Zhou, and B. Liao

Session J-1: Service-Oriented Applications

A Workflow Based E-learning Architecture in Service Environment .......................................................... 1026
  W. Kong, J. Luo, and T. Zhang

A Dynamic Web Service Based Data Mining Process System ................................................................. 1033
  C.-Y. Tsai and M.-H. Tsai

Knowledge Discovery Based on Web Robots in Collaborative Design .......................................................... 1040
  Y.-J. Wen, L. Tian, and B.-S Tong

A Service-Oriented Model for Wireless Sensor Networks with Internet ................................................. 1045
  J. Shi and W. Liu

Service-Oriented Knowledge Management on Virtual Organizations ........................................................ 1050
  H. Huang, Z. Shi, Y. Cheng, and L. Qiu

Session J-2: Service-Oriented Integration

Sharing Ontology Schema Information for Web Service Integration .................................................. 1056
  J. Huang, R. L. Z. Gutiérrez, B. M. García, and M. N. Huhns

Implementing Collaborative Manufacturing with Intelligent Web Services ........................................... 1063
  W. Shen, Y. Li, Q. Hao, S. Wang, and H. Ghenniwa

Internet Integration of 3D-CAD Design and Manufacturing for Complex Products ...................................... 1070
  H. Sakamoto and T. Kimura

Web Services Interoperability Testing Based on Ontology ........................................................................ 1075
  Y. Yu, N. Huang, and M. Ye

SOMG: A Service Oriented Manufacturing Grid System ............................................................................ 1080
  S. Liu, X. Meng, and Y. Tong
Session J-3: Service-Oriented Collaboration

Service-Oriented Business Solution Development Driven by Process Model .................................................. 1086
X. Shi, W. Han, Y. Huang, and Y. Li

A Quick XML Parser for Extracting Signatures of Secure Web Services .......................................................... 1093

A Practical Approach for Measuring IT-Support of Business Processes ......................................................... 1099
R. Hosseini

Contract-Driven Cooperation Development Process for Software Outsourcing .................................................. 1104
J. Xiao and Q. Wang

A Policy-Driven Autonomic System to Implement Web Services ......................................................................... 1109
Y. Peng, J. Gao, J. Hu, and B. Liao

Session J-4: Service-Oriented Composition

A Moderated Fuzzy Matchmaking for Web Services ............................................................................................ 1116
C.-L. Huang, K.-M. Chao, and C.-C. Lo

Dynamic Software Architecture Oriented Service Composition and Evolution .................................................. 1123
P. Yu, X. Ma, and J. Lu

Interactive Web Service Choice-Making Based on Extended QoS Model ............................................................ 1130

Zero-time Enterprise Modeling with Component Assembly and Process Model Optimization Techniques .......... 1135
W. Tan, S. Li, and F. Yang

Fully Decentralized DHT based Approach to Grid Service Discovery Using Overlay Networks .......................... 1140
Q. Xia, R. Yang, W. Wang, and D. Yang

Author Index ......................................................................................................................................................... 1046
