Message from the ATSC-2010 Symposium Chairs

It is our great pleasure to welcome you to the 2nd International Symposium on Advanced Topics on Scalable Computing (ATSC-2010), which is held in conjunction with the 10th IEEE International Conference on Scalable Computing and Communications (ScalCom-2010) in Bradford, UK, 29 June – 1 July, 2010.

ATSC-2010 contains 11 invited high-quality papers which were selected from those submitted to the ScalCom-2010 main conference. All the papers were peer-reviewed by the members of the ScalCom-2010 Program Committee. The goal of this symposium is to provide an additional forum within ScalCom2010 for interaction among researchers and further discussion on the advanced topics on scalable computing. We invite submissions from academia, government, and industry presenting novel research on all theoretical and practical aspects of scalable computing including Internet/cluster/grid computing, mobile computing, peer-to-peer computing, trusted computing, multimedia services and information systems, multi-core architecture, pervasive/ubiquitous computing and intelligence, cloud computing, and performance evaluation.

We are grateful to the members of the ScalCom-2010 Program Committee for managing the reviews of the papers. We also would like to thank the authors for their valuable contributions to the success of this symposium.

Zhongyu (Joan) Lu, University of Huddersfield, UK
Junfeng Xu, Dalian University of Technology, China
Hatem Musbah Ibrahim, University of Bradford, UK
