2011 Third International Conference on Communications and Mobile Computing

CMC 2011

Table of Contents

Preface ........................................................................................................................................................................... xv
Organizing Committee ................................................................................................................................................. xvi
Technical Program Committee .................................................................................................................................. xviii
Reviewers .................................................................................................................................................................... xxiv
Keynote and Plenary Speakers ................................................................................................................................. xxv

Computer and Network Security Symposium

Information Systems Security

A Security Policy of WLAN Data Transmission Based on Logistic Chaotic Modulation ................................................. 3

Wenjun Shi, Yuan Zhou, Zhihong Qian, Kecheng Shang, Xiaofan Zhang, and Meng Li

B-IRP: An Improving Integrity Report Protocol for Remote Attestation ....................................................................... 7

HongWei Zhou and JinHui Yuan

Efficient Taint Analysis with Taint Behavior Summary .................................................................................................. 11

Ruoyu Zhang, Shan Huang, and Zhengwei Qi

High-Speed Architecture Design and Implementation for SMS4-GCM ...................................................................... 15

Meng Zhao, Guochu Shou, Yihong Hu, and Zhigang Guo

Observation and Analysis on Spam Sending Behavior ................................................................................................. 19

Chun-Chao Yeh, Tsung-Yu Wang, and Hsiang-Yuan Fu

Temporal Ordered Image Encryption .......................................................................................................................... 23

Xiaoyi Zhou, Jixin Ma, Mitlos Petridis, and Wencai Du

The Power of Refresh: A Novel Mechanism for Securing Low Entropy PII ................................................................. 29

Yuqian Li, Yang Liu, Zhifang Liu, Jiwei Huang, and Zhen Chen
Mobile and Wireless Networks Security
Practicality Analysis of the Self-Healing Group Key Distribution Schemes for Resource-Constricted Wireless Sensor Networks .................................................................37
Qiuhua Wang
The Analysis and Optimization on M-commerce Secure Payment Model .................................................................41
Wei Jianping

Security Modeling and Protocol Design
A Collaborative Network Security Management System in Metropolitan Area Network ........................................................45
Beipeng Mu, Xinming Chen, and Zhen Chen
A New Intrusion Detection System Using Class and Sample Weighted C-support Vector Machine .................................................................51
Jiaqi Jiang, Ru Li, Tianhong Zheng, Feiqin Su, and Haicheng Li
Formal Analysis of Trusted Computing: One Case Study .................................................................55
HongWei Zhou and JinHui Yuan
Xinming Chen, Beipeng Mu, and Zhen Chen
On Mutual Support of Modern and Traditional Access Control Models with UCON and BLP as Case Study .................................................................65
Hui Feng, Wenchang Shi, Zhaohui Liang, and Bin Liang
TasteBuddy-based Version Selection Strategy for BitTorrent Users against Content Pollution .................................................................71
Lingyun Ruan, An’an Luo, and Zhen Chen

Analysis and Design of Automatic Code Generation System Based on J2EE .................................................................77
Guoyong Han, Hao Liu, Zhijun Zhang, Zhendong Liu, and Zhongyou Du
Apad: A QoS Guarantee System for Virtualized Enterprise Servers .................................................................81
Rui Wang, Fengqian Gao, Qiang Huang, Zhengwei Qi, and Haibing Guan
The Study on E-commerce Security Based on ECC and SET .................................................................85
Xiuhua Liu
Trustworthy Service Selection Scheme Based on Attribute Signature .................................................................88
Li Liu and Zhi-gang Chen

Mobile Computing and Internet Symposium

Embedded Systems
A Reconfigurable SoC for Block Ciphers with a Programmable Dataflow Structure .................................................................95
Ming Yan, Ziyu Yang, Sikun Li, and Liu Yang

</table>
Pervasive/Ubiquitous Computing and Intelligence

Mobile Embedded Health-Care System Working on Wireless Sensor Network ................................................................. 161
  Hye-Jin Lee, Dong-Oh Kim, Bub-Joo Kang, and Sang-Woo Ban

Protocols (Routing, Transport Layer,...)

ACK Offloading for Reliable Multipath Transfer over Self-Contention Wireless Network .................................................. 165
  Wang Yang, Hewu Li, and Jianping Wu

MASA+: An Improved MAC Scheme Based on MASA Algorithm .......................................................................................... 170
  Wenbin Zhang, Xiaozong Yang, Shaochuan Wu, and Jiayan Zhang

Understanding the Impact of Removing TCP Binary Exponential Backoff in Data Centers ................................................... 174
  Hongyun Zheng, Changjia Chen, and Chunming Qiao

Scheduling and Switching

Handling Multiple SIMs—A Framework Based on Software Restructuring Approach ......................................................... 178
  Mariam Nosheen and Muhammad Abuzar Fahiem

Web Services and Internet Computing

Improving Data Transmission in Web Applications via the Translation between XML and JSON ................................................. 182
  Guanhua Wang

Optical Communications and Networking Symposium

Optical (WDM/OCDM/OTDM) Network and Switch Architectures

Improving the GDG and GVD Tolerance of 42.7Gb/s Partial-DPSK by Optimized Power Imbalance ................................................ 189
  Yongming Cai, Yufeng Shao, Junwen Zhang, and Li Tao

Investigation of Pilot-Aided Phase Noise Compensation in CO-OFDM System ................................................................. 192
  Sicong Liu, Xue Chen, Yangyang Fan, Xian Zhou, and Bo Zhao

The DSP Algorithms Design of 112Gbit/s POLMUX- NRZ-DQPSK Digital Coherent Receiver .................................................... 195
  Xian Zhou, Xue Chen, Yangyang Fan, Bo Zhao, and Sicong Liu

The Investigation of Spectral-Efficient Coherent Optical OFDM for 400-Gb/s Per Channel .......................................................... 199
  Yangyang Fan, Xue Chen, Xian Zhou, Bo Zhao, and Sicong Liu
Optical Access Networks (PON, EPON, WDM-PON, ...)
A Novel Scheme of Application Layer Multicast in Passive Optical Networks .........................................................202
    Ning Wang, Xue Chen, Dongchao Ma, Qiu Zang, and Yangyang Chen
Generation of OFDM-MSK Signal and Its Application for Radio over Fiber System
in Future Access Network ........................................................................................................................................206
    Yufeng Shao and Nan Chi
Implementation of EPON Systems Supporting Accurate Time Synchronization ..............................................................210
    Zhen Wang, Mei Wang, Ke He, and Xue Chen

Other Topics
Design of Partial Liquid-Filled Hollow-Core Photonic Bandgap Fiber Polarizer .............................................................213
    Wenwen Qian, Chun-liu Zhao, Kai Ni, Juan kang, and Shangzhong Jin

Planning and Optimization of Optical Networks
A Novel Efficient Design of Node-Protecting p-Cycles in WDM Mesh Networks ..........................................................217
    Honghui Li, Brigitte Jaumard, and Xueliang Fu

Wireless Communications Symposium
Antennas, Channel Measurement/Modeling/Simulation, and RF Sub-systems
A 40Gbps SSB-OFDMA-PON Architecture Using Direct-Detection and Source-Free ONUs Supporting Dynamic Bandwidth Allocation ........................................................................................................223
    Bo Zhao and Xue Chen
A New Hybrid ARQ Scheme Employing Signal Constellation Rearrangement ..............................................................226
    Xiao-Bing Tong, Yuping Gong, and Yuming Zhang
Adaptive Double Threshold Energy Sensing Algorithm Based on Compressed Sensing over Wideband Frequency ......................................................................................................................................230
    Chao Li, Shoutao Lv, and Jian Liu
Chip Design of an UWB, High Gain and Low Noise Amplifier for Wireless Applications ................................................234
    Jhin-Fang Huang, Ming-Chun Hsu, Jiun-Yu Wen, and Ron-Yi Liu
Elastic Wave Signal Attenuation Characteristics in Layered Earth Channel ..................................................................238
    Jianjun Hao and Yuan Zhao
Fast Compressed Sensing-Based Sparse Multipath Channel Estimation with Smooth L0 Algorithm ..........................................................242
    Guan Gui, Qun Wan, and Wei Peng
Performance Analysis of Two-State Wireless Channel with Lagging Bound .................................................................246
    Liang Huang and Tony T. Lee
Research on the Improvements on Atallah’s Algorithm: A New Improved Algorithm on Atallah .........................................................250
    Shan Liu, Lijun Cao, Maohua Liu, and Jinghui Liu
The Construction of the Wireless Sensors Network Based on the Transmission Technology of the Next Generation of Digital Cable TV .......................................................... 254
Youwei Sun, Rong Chen, and Xinhua Ma

The Research of Dual-Tunable Magnetoelectric Microwave Filters: Numerical Simulation of the Magnetoelectric Microwave Filters Based on Theoretical Model of Electric Tuning Ferromagnetic Resonance ................................................................. 258
Hao-Miao Zhou, Zhe-Lei Xia, and Juan-Hu Deng

Cognitive Radio and Software Defined Radio
A Power Control Game via New Pricing with Dynamic Coefficient in Cognitive Radio .................................................. 262
Shuang Wu, Xu Wang, and Jian Liu

A Spread Spectrum Audio Watermarking System with High Perceptual Quality .......................................................... 266
Xuemin Zhao, Yuhong Guo, Jian Liu, and Yonghong Yan

An Improved Game-theoretic Spectrum Sharing in Cognitive Radio Systems ......................................................... 270
Liang Ma and Qi Zhu

Cooperative and Non-cooperative WSPs in Dynamic Spectrum Leasing .......................................................... 274
Ya-zhen Ren, Qin-yu Zhang, and Pei-pei Chen

High Performance LDPC Decoder on CELL BE for WiMAX System .......................................................... 278
Juntao Zhao, Ming Zhao, Haibin Yang, Jianwen Chen, Xiang Chen, and Jing Wang

Loopy Belief Propagation Algorithm in Distributed Wireless Cooperative Spectrum Sensing .......................................................... 282
Xiang Fan and Zhiping Shi

Multichannel Cognitive MAC Protocol for Efficient Utilization of Wireless Spectrum .......................................................... 286
Salman Khan, Ali Nawaz Khan, and Saleem Akhtar

Throughput Analysis in Cooperative Sensing Networks over Imperfect Reporting Channel .......................................................... 290
Weiwei Cui, Haifeng Zhao, and Xaomin Mu

Cooperative Communications
A QoS-Driven Channel Allocation Strategy for Multiuser Cooperative Networks .......................................................... 294
Lingjuan Han, Sihai Zhang, and Wuyang Zhou

Broadband Analog Network Coding with Multiple Relays .......................................................... 299
Weiwei Yang, Yueqing Cai, and Xiaoning Liu

Modelling Energy Consumption for the Cooperative MAC Based on Opportunistic Relaying .......................................................... 303
Nan Li, Yueqing Cai, Xiaotie Xu, and Naiping Cheng

Novel Multiple Relay Selection Schemes in Two-Hop Cognitive Relay Networks .......................................................... 307
Jiali Xu, Haixia Zhang, Dongfeng Yuan, Qingqing Jin, and Cheng-Xiang Wang

Performance Analysis of Amplify-and-Forward Cooperative Communication Systems with Channel Estimation Errors over Nakagami-\(m\) Channels .......................................................... 311
Lei Wang, Yueqing Cai, Junquan Hu, and Weiwei Yang
Power Allocation for Bidirectional AF Relaying with Direct Link over Rayleigh Fading
Wei Yan, Yueming Cai, and Ning Li ................................................................. 315

Power Allocation for OFDM-DF Cooperative Communication
Yueyun Chen, Xining Hu, and Zhenhui Tan .......................................................... 319

Practical Cross-Layer Design Based on EGC and ARQ for DF-cooperative Sensor
Networks Qiuna Yan and Dian-Wu Yue ................................................................. 323

Cross-Layer Design and Optimization
Conflict-Free Transmission Schedule Based on Network Coding in Wireless Networks
Jing Wang, Xiangyang Liu, and Xinmei Wang ........................................................ 328

On the Performance of Multi-packet ARQ for Mobile Multicast
Haibo Wang and Hans-Peter Schwefel ................................................................. 332

Green Communications
Energy-Efficient Spectrum Leasing in Cognitive Relay Networks
Qingqing Jin, Haixia Zhang, Dongfeng Yuan, Jiali Xu, and Cheng-Xiang Wang ................................................................. 337

Modulation, Coding, and Information Theory
A High-Efficiency LDPC Encoder with Optimized Backtracking Algorithm
Zhibin Zeng ........................................................................................................ 341

An Improved Rate Matching Algorithm for 3GPP LTE Turbo Code
Long Yu, Xu Wang, and Jian Liu ........................................................................... 345

An Improved Staggered Modulation Method of 8-VSB
Xueping Li and Gang Yang ................................................................................... 349

Nonhomogeneous LDPC Codes and Their Application to Encrypted Communication
Kuen-Tsair Lay, Chin-Ho Hou, and Lun-Chung Peng ........................................ 353

Research of Different Quality Map Applying in Kalman Filter Phase Unwrapping
Man Yan, Guolin Liu, and Lifan Wang ................................................................ 358

The Maximum Processing Gain of the Spreading Signal in Multipath Fading Channels
Wanzhi Ma, Jun Wang, Ying Shen, and Youxi Tang ........................................... 362

Multiple Access Techniques (CDMA, TDMA, FDMA, OFDMA, ...)
A Multi-level Framed Slotted ALOHA Algorithm for RFID
Zhou Xin, Liu Ye, and Ding Jie ............................................................................ 367

A New Approach for Optimal Power Control in the Uplink of Cellular CDMA Systems
Xiaoyu Feng, Hsiao-Chun Wu, and Hong Jiang ................................................ 371

Blind Multiuser Detection in MC-CDMA: Schmidt-Orthogonalization and Subspace Tracking Kalman Filtering
Yinhui Yu, Jing (Tiffany) Li, Zhen Wang, Shingang Wang, and Huichuan Zhang .... 375
DFT Scrambling Vector OFDM and Its Performance Analysis ................................................................. 381
    Gao Zhou, Pingzhi Fan, Li Hao, and Naoki Suehiro

High Precision Multi-cell Channel Estimation Algorithm Based on Successive Interference Cancellation ............................................................................................................................................. 385
    Miaowen Wen, Xiang Cheng, Bo Ai, Xing Wei, Anpeng Huang, and Bingli Jiao

**OFDM and Multi-carrier Systems**

A Novel Iterative Equalization Algorithm Based on Signal Reconstruction for TDS-OFDM/ZP-OFDM Systems over Large Delay-Spread Channels .................................................................................. 389
    Ching-Sheng Ni, Yao-Nan Lee, and Shin-Shiuan Cheng

**Other Topics**

Handover Algorithm in WiMAX System .................................................................................................. 393
    Liyuan Xiao, Jiawei Yang, Leifang Hui, and Wen Zhang

Low Power CMOS High Speed Dual-Modulus 15/16 Prescaler for Wireless Communications ................................................................................................................................. 397
    Huimin Liu, Xiaoxing Zhang, Yujie Dai, and Yingjie Lv

**Satellite Communications**

Workflow Simulation of Equipment Command Based on HLA .................................................................. 401
    Le Chen, Xiaoliang Liu, Hongmin Yu, Chuanpeng Yang, and Haifeng Wang

**Signal Processing for Communications**

A Fast Fixed Point Iteration Algorithm for Sparse Channel Estimation .................................................. 405
    Xue Jiang, Wen-Jun Zeng, and En Cheng

A Frequency-Domain Estimation Scheme for Single-Tone Interference in OFDM Systems ......................... 409
    Tingting Zhao, Hui Zhao, Yuping Zhao, Xiang Cheng, and Bo Ai

A Subband Decision Feedback Equalizer for ATCS DTV Receivers with Improved Efficiency of Train Sequency .................................................................................................................. 413
    Lei Qin, Xiuchang Zhu, and Dong Hu

An Improved Combined Component Aggregated HARQ A/N .................................................................. 417
    Wentao Wang, Zhiping Shi, and Qingzhan Zeng

Analyses of Interferences between Component Carriers in Carrier Aggregation ........................................... 420
    Qingzhan Zeng, Zhiping Shi, Wentao Wang, and Zijia Hu

Array Calibration Based on Improved Instrumental Sensors Method .......................................................... 424
    Zeyang Dai, Xu Wang, and Jian Liu

Downlink Channel Estimation Based on Regularized Low-Pass Filter for Multi-antenna Mobile WiMAX Systems ..................................................................................................................... 429
    Dan Wang, Lei Yang, and Jiexin Pu

Multipath Channel Estimation Using Fast Least-Squares Algorithm .......................................................... 433
    Xue Jiang, Wen-Jun Zeng, En Cheng, and Cong-Ren Lin
Novel Robust Pilot Detection Method for Channel Estimation in Single-Carrier Frequency-Domain Equalization Systems .................................................................437
  Lu Lu, Hsiao-Chun Wu, and Hong Jiang

**Testbeds and Hardware Development**
Implementation of a 2x2 MIMO-OFDM Real-Time System on DSP/FPGA Platform ..................................................441
  Jian Sun, Nan Cen, and Dongfeng Yuan
Virtual Sieve: A Distributed Channel Assignment Algorithm Resolving the Hidden Node Problem .................................................................445
  Zhe Yu, Wei Feng, Wenzhu Zhang, Lin Zhang, and Yong Ren

**Ultra-wideband Communications**
Accurate Wireless Location and Tracking Technique for Indoor UWB Non-linear/Non-Gaussian Systems .................................................................449
  FuCheng Cao and Dan Wang
Equalization Analysis for OOK IR-UWB Using Energy Detector Receiver .................................................................453
  Juchang Li, Jinguo Quan, Sheng Zhang, and Xiaokang Lin
FFT-HQ Channel Estimating Algorithm in MB-OFDM UWB System .................................................................457
  Jianqiang Li, Zhihua Bao, and Shibing Zhang

**Vehicular Communications**
Assessment of LTE-R Using High Speed Railway Channel Model .................................................................461
  Ke Guan, Zhangdui Zhong, and Bo Ai
Distributed Periodic Access Scheme (DPAS) for the Periodic Safety Messages in the IEEE 802.11p WAVE .................................................................465
  Kwang-Jin Song, Chan-Hang Lee, Min-Su Woo, and Sung-Gi Min
SK-OFDM Robust to Frequency Selective Fading Channel with Spectral Nulls .................................................................469
  Bo Qin, Sheng Zhang, and Xiaokang Lin

**Wireless Networking Symposium**
**Ad Hoc, Body-Area, and Sensor Networks**
A Data Processing and Analysis Testbed for WSNs: Design and Implementation .................................................................475
  Peng Cheng, Xianghui Cao, Jiming Chen, Kejie Cao, Youxian Sun, and Xuemin (Sherman) Shen
Distributed Scheduling Algorithm for Barrier Coverage in Wireless Sensor Networks .................................................................481
  Dongsong Ban, Quanyou Feng, Gang Han, Wei Yang, Jie Jiang, and Wenhua Dou
HARVEST: A Task-objective Efficient Data Collection Scheme in Wireless Sensor and Actor Networks .................................................................485
  Mianxiong Dong, Kaoru Ota, Xu Li, Xuemin (Sherman) Shen, Song Guo, and Minyi Guo
Integrative Ranging and Positioning for IR-UWB Wireless Sensor Networks .................................................................489
  Shaohua Wu, Qiaoling Zhang, Qinyu Zhang, and Haiping Yao
LC-MAC: An Efficient MAC Protocol for the Long-Chain Wireless Sensor Networks .................................................495  
Chen Fang, Hao Liu, and LiLi Qian

Simultaneous Transmission Slot Allocation Mechanism in Wireless Sensor Networks ..............................................501  
Jugen Nie, Deshi Li, Yanyan Han, and Shikun Xie

ZigBee Wireless Sensor Network Using Physics-Based Optimally Sampling for Soil Moisture Measurement .................................................................505  
Ke Li, Huibo Jia, and Mingyan Liu

Other Topics

Application of Data Mining for Enterprise Digital Marketing Strategy Making .............................................................509  
Kuo-Qin Yan, Shu-Ching Wang, Shun-Sheng Wang, and Yi-Ping Lin

Protocols (Routing/Switching, Flow and Congestion Control, Multicasting,...)

Delay Analysis of Wireless Broadcasting Retransmission Algorithm Based on Network Coding .................................................................513  
Xianzhong Tian and Aijiao Chen

Resource Management, Mobility Management, and Admission Control

The Optimal Time-Dependent Throughput Analysis of Cognitive Radio Networks ..........................................................518  
Junhua Liang and Wenjun Zhang

Wireless Networks for Vehicle, Underwater, UAVs Communications

Design and Implementation for Ambulance Route Search Based on the Internet of Things ...........................................................................................................523  
Xu Wang and Jian Liu

Evaluation of Forward Error Correction Scheme for Underwater Wireless Optical Communication ...........................................................................................................527  
Xinsheng Yu, Weiwei Jin, Meihong Sui, and Zhigong Lan

WLAN, WPAN, WMAN, and Wireless Wide Area Networks

A Markov Model of the 802.11 Distributed Coordination Function: Part I—The Characteristic Equation of Network Throughput ...........................................................................................................531  
Dongjie Yin, Pui King Wong, and Tony T. Lee

A Markov Model of the 802.11 Distributed Coordination Function: Part II—Stability Analysis ...........................................................................................................535  
Pui King Wong, Dongjie Yin, and Tony T. Lee

On the Effectiveness of Retransmission in Preserving Frame Error Rate over IEEE 802.11e/a WLANs ...........................................................................................................539  
Chie Dou and Chih-Wei Wu

Author Index .........................................................................................................................................................................545
