Preface
CMVIT 2017

The 2017 International Conference on Machine Vision and Information Technology (CMVIT 2017) will be held in Singapore during 17-19 February 2017. CMVIT 2017 is organized by Asia Pacific Institute of Science and Engineering, supported by HKSME, the University of Hong Kong, The Hong Kong Polytechnic University and other organizations. The conference provides a useful and wide platform for researchers and engineers to present their latest research findings and exchange their ideas in a broad range of Machine Vision and Information Technology topics. The participants of the conference were from different regions of the world, with background of either academia or industry, as well as enterprise. The success and prosperity of the conference is reflected by the high quality of the papers received.

There were 65 submissions received and 21 papers accepted after rigorous peer review. This proceeding is a compilation of the accepted papers, which represents an interesting outcome of the conference. Those papers cover many topics in Machine Vision and Information Technology, such as image classification, objection recognition, deep learning, image processing, augmented reality, RGB-D data processing, etc.

We would like to acknowledge all of those who supported CMVIT 2017. Each individual and institutional help were very important for the success of this conference. Especially we would like to thank the organizing committee for their valuable advices in the organization and helpful peer review of the papers.

We sincerely hope that CMVIT 2017 will be a forum for excellent discussions that will put forward new ideas and promote collaborative researches. We are sure that the proceedings will serve as an important research source of references and the knowledge, which will lead to not only scientific and engineering progress but also other new products and processes.

Zhang Lei, The Hong Kong Polytechnic University, Hong Kong
