## Keynote Address I

Information Technology: The Future is Here Today  
*Steve Mills, IBM Software Solutions, USA*

## Session 1: Advances in Formal Methods I

*Chair: Mark E. Davis, IBM Corporation, USA*

- Temporal Event Analysis and Program Understanding ............................................ 4  
  *W.E. Howden and G.M. Shi*
- FunZ Designs — A Bridge Between Z Specifications and Haskell Implementations .......... 12  
  *L.B. Sherrell and D.L. Carver*
- Automatic Generation of C++ Code from an ESCRO2 Specification .......................... 18  
  *P.C. Grabow and L. Liu*

## Session 2: Knowledge-Based Systems

*Chair: A. Hawkes, CMT, Inc., USA*

- A Multi-Dimensional Data Visualization Tool for Knowledge Discovery in Databases ... 26  
- A Knowledge-Based Approach for Worst-Case Timing Analysis of Microprocessor Systems ... 32  
  *S.M. Yuen and K.P. Lam*
- Knowledge Reuse through the Application of the Object Knowledge Canonical Form .......... 40  
  *K. Huarng and D.B. Simmons*

## Session 3: Panel: Software Industry Growth: Funding Based on Software Valuation

Software Industry Growth: Funding Based on Software Valuation .......................... 48  
*Chair: Hugh Ching, Post-Scientific Institute, Berkeley, USA*
*Panelists: Damon Matteo, Lawrence Livermore National Laboratory, USA*
*Ray Paul, Department of Defense, USA*
*Nicholas Petreley, Info World, USA*
*Chitoor V. Ramamoorthy, University of California at Berkeley, USA*
*Stephen S. Yau, Arizona State University, USA*
*Raymond Yeh, International Software Systems, Inc., USA*
# Session 4: Advances in Formal Methods II

*Chair: John D. Provence, Texas Instruments, Inc., USA*

  *X. He*
- Mechanical Synthesis of a Unification Algorithm in PowerEpsilon ........................................ 56  
  *M.-Y. Zhu and X.-B. Mo*
- Expressing JSD in Z .................................................................................................................... 62  
  *J. Lee, W.T. Huang, C.-K. Chang, and J.-I. Pan*

# Session 5: Modeling Techniques

*Chair: Rene Klösch, Vienna University of Technology, Austria*

- Design and Implementation of Multiple Type Objects in a Persistent Programming Language ............................................................... 70  
  *M. Aritsugi and A. Makinouchi*
- An Expanded View of Domain Modeling for Software Analogy ........................................................................................................ 77  
  *C.-H. Lung and J.E. Urban*
- Dynamic Hierarchy for Multiagent Air Combat ........................................................................ 83  
  *B. Stilman*

# Session 6: Panel: Software Technology in the 21st Century: A Technology Forecast

*Chair: Joseph P. Cavano, Rome Laboratory, U.S. Air Force*

- (Position Paper) Improving Software Process to Implement a Wireless Mobile Network ........................................................................... 91  
  *Panelist: Kimberly A. Gibson, Motorola, Inc., USA*
- (Position Paper) Parallel Software Engineering — Goals 2000 ........................................................................................................ 93  
  *Panelist: Carl Murphy, Accord Solutions, Inc., USA*
  *Panelist: Jim Browne, University of Texas, Austin, USA*
  *Panelist: Jeffrey Mohr, Information Technology Solutions, USA*

# Session 7: Software Support Leverage for Formal Methods

*Chair: Ming-Yuan Zhu, Beijing Institute of Systems Engineering, China*

- Requirement Specification in Pseudo-Natural Language in PROMIS ...................................................................................................... 96  
  *R. Lu, Z. Jin, and R. Wan*
- Checking Program Proofs Made Easy .......................................................................................... 102  
  *M. Schollmeyer and B. McMillin*
- An Approach to Animating Z Specifications .............................................................................. 108  
  *X. Jia*
Static Semantics and Priority Schemes for Statecharts ........................................ 114
H.S. Hong, J.H. Kim, S.D. Cha, and Y.R. Kwon

### Session 11: Object-Oriented Approach for Distributed Systems

**Chair:** Miriam A.M. Capretz, University of Aizu, Japan

Object-Oriented Design for a Distributed Priority Queue ..................................................... 192  
*P.-N. Lee, L. Miller, P.-C. Tai, and Y. Chen*

Application Layer Software Fault Tolerance for Distributed Object-Oriented Systems ............................. 199  
*H.C. Kim and V.S.S. Nair*

IPCC++: A C++ Extension for InterProcess Communication with Objects ............................................ 205  
*S.S. Stubbs and D.L. Carver*

### Session 12: Metrics and Software Quality

**Chair:** Kaylan Basu, BNR, Inc., USA

A Policy Independent Metric for Process Selection in Distributed Systems .................................................. 212  
*Y. Cazabon and M. Bauer*

Quality Assessment for Multiple Server Cooperating Systems .......................................................... 218  
*I.-L. Yen and I.-R. Chen*

Improving Software Quality through a Novel Testing Strategy ......................................................... 224  
*X. Zeng, J.J.P. Tsai, and T.J. Weigert*

### Session 13: Prototyping and Testing

**Chair:** Deborah Cerino, Rome Laboratory, U.S. Air Force

Object State Testing for Object-Oriented Programs ................................................................. 232  
*J.Z. Gao, D. Kung, P. Hsia, Y. Toyoshima, and C. Chen*

A Test Strategy for Object-Oriented Programs .................................................................................. 239  
*D. Kung, J. Gao, P. Hsia, Y. Toyoshima, C. Chen*

Heirarchical Multimodel-Based Structural Consistency Support Tools for Specifying and Prototyping Complex Systems .............................................................. 245  
*W.K. Cheung, C.L. Nehaniv, K.T. Miura, and Y.S. Ho*

### Session 14: Distributed Algorithms and Environments

**Chair:** Jung W. Cho, Korea Advanced Institute of Science and Technology, Korea

Architectural Framework for Developing Concurrent Applications .................................................. 256  
*G. Bruno and R. Agarwal*

Creating a Distributed Environment Using Object-Oriented Technology ........................................ 262  
*C.K. Chang, B. Haswarey, and P. Mongkolwat*

Deriving Distributed Algorithms from a General Predicate Detector ............................................. 268  
*J.R. Mitchell and V.K. Garg*
### Session 15: Panel: DOD Software Acquisition: Best Practices Initiatives

**Chair:** Ray Paul, Office of the Under Secretary of Defense, USA  
**Panelists:** Norm Brown, Department of the Navy, USA  
Mike Evans, Computer and Concepts Associates, USA  
Mitch Perkins, Computer and Concepts Associates, USA  
Charles Roller, Computer and Concepts Associates, USA

### Session 16: Reengineering, Reverse Engineering, Reuse, and Customization

**Chair:** Luiz F. Capretz, University of Aizu, Japan  
C.-T. Chang and C.-S. Liu  
T. Yoshino, S. Uehara, T. Ookubo, S. Suguta, Y. Hotta, and M. Sonobe  
W.C. Chu and H. Yang  
* Problems Associated with the Customization of Structured Methods  
C.J. Hardy, J.B. Thompson, and H.M. Edwards

### Session 17: Distributed Multi-Media Systems: Tools and Techniques

**Chair:** Poh-Yee Wong, Information Technology Institute, Singapore  
HyperDisco: An Object-Oriented Hypermedia Framework for Flexible Software System Integration  
U.K. Wül  
Scheduling Dependent Real-Time Multimedia Tasks on Distributed Systems  
H. Mei  
* A Location Problem for Video on Demand Servers  
N.D. Prabhakkar

### Session 18: Panel: Software Testing

**Chair:** David C. Kung, University of Texas, Arlington, USA  
Panelists: Pei Hsia, University of Texas, Arlington, USA  
J.C. Huang, University of Houston, USA  
Ed Miller, Software Research Cooperation, USA  
Steve Thebaut, University of Florida, USA

### Friday Plenary Session: Keynote Address III

Technology Trends in Telecommunications: An Overview of Information Networks  
Hanafy Meleis, National Institute of Standards and Technology, USA
### Session 19: Software Process Improvements

**Chair:** Feng-Jian Wang, National Chiao Tung University, Taiwan

Evaluating the Effectiveness of Process Improvements on Software Development Cycle Time via System Dynamics Modeling

*D. Tsvet and J.S. Collofello*

A Horizontal Approach for Software Process Improvement

*O. Demirors and D.J. Frailey*

* Completely Automated and Self-Generating Software System

*H. Ching*

### Session 20: Multi-Media Storage Management and Applications

**Chair:** Bill Carroll, University of Texas, Arlington, USA

The Multimedia Desktop Conference System Adaptability in Network Traffic on LAN

*J.H. Jung and H.S. Yang*

Storing Continuous Media Objects Using Parallelism with Merging

*A.R. Watkins and E. Omiecinski*

FFU: Far-Future-Using Replacement Algorithms for Continuous Media Storage System

*T.-G. Kwon and S. Lee*

### Session 21: Panel: Software Development Standards

**Chair:** Mike Evans, Computer and Concepts Associates, USA

**Panelists:**
- Ray Paul, Office of the Under Secretary of Defense, USA
- Perry DeWeese, Boeing Company, USA
- Margaret Powell, Naval Information Systems Management Center, USA
- Ragu Singh, Department of the Navy, USA
- Dave Witten, Texas Instruments, USA
- Jean LeFevre, Unisys Corporation, USA

### Session 22: Multi-Paradigm Programming

**Chair:** Blayne Maring, GTE Telops, USA

**Logic Objects with Non-Monotonic Inheritance**

*D. Xu and G. Zheng*

Transformation of Relational Schemas to Object-Oriented Schemas

*W. Meng, A. Kamada, and Y.-H. Chang*

A Multiparadigm Programming Approach for Developing Knowledge-Based Systems

*P.K.C. Pun and H.J. Kahn*
Session 23: Software Development for Parallel and Distributed Systems

Chair: Yaw C. Chen, National Chiao Tung University, Taiwan

An Architecture-Independent Software Development Approach for Parallel Processing Systems ........................................ 370

S.S. Yau, D.-H. Bae, and J. Wang

Software Support for Asynchronous Computing Across Networks ........................................................................ 376

M.E. Cavender and X. Zhang

A Software Platform for Solving PDEs on Distributed Systems: Implementation Issues and Performance Prediction ........................................ 383

C.-C. Hui, M. Hamdi, and I. Ahmad

Session 24: Panel: Software Fault Tolerance

Software Fault Tolerance: Has it Arrived Yet? ........................................................................................................ 390

Chair: V.S.S. Nair, Southern Methodist University, USA

(Position Paper) Fault-Tolerant Software ................................................................................................................. 391

Panelist: Farokh B. Bastani, University of Houston, USA

(Position Paper) Quantitative Analysis of Software- and Hardware-Fault Tolerance ........................................ 392

Panelist: Joanne Bechta Dugan, University of Virginia, USA

Panelist: Kane Kim, University of California, Irvine, USA

(Position Paper) Software Fault Tolerance at the Operating System Level ....................................................... 393

Panelist: Luke Young, Tandem Computers, USA

Panelist: Vicki Rainey, E Systems, Inc., USA

Session 25: Software Security and Safety

Chair: Kinji Mori, Hitachi Ltd., Japan

A General Approach to Evaluation of Secure Systems ......................................................................................... 396

Q. Shi and N. Zhang

Enforcing Complex Security Policies for Commercial Applications ........................................................................... 402

I.-L. Kao and R. Chow

A Framework for Designing Safe Software Systems ............................................................................................ 409

S. Subramanian, R.V. Vishnuvajjala, R. Mojdehbakhsh, W.T. Tsai, and L. Elliott

Session 26: Applications

Chair: John B. Thompson, University of Sunderland, UK

Designing Chinese Typeface Using Components ............................................................................................... 416

P.Y.C. Wong and S.C. Hsu
Information Mediation System Design Strategy
Among Telecommunication Related Information Systems
F.-F. Shen, W.-Y. Lin, C.-Y. Wong,
C.-W. Cheng, and H.-S. Chen

* Applying Intelligent Decision-Support Systems to Logistics Operations
  P.-Y. Wong

Session 27: Panel: Alternative Approaches to Modeling Processes
Chair: Kenneth D. Shere, Systems Technology Group, Inc., USA
Panelists: Christian Goetze, University of Aizu, Japan
          Robert Lai, International Software Processs Const., USA
          Daniel Spar, Logic Works, Inc., USA
          Clement McGowan, Mitre Corporation, USA

Author Index

* Presentation Only
** Paper not received in time for publication in proceedings.
