REFS 2009 Session 1: Services Requirements Modelling Specification

Requirements Engineering Needs in a Solution and Infrastructure Improvement Project ................................................................. 1

Xiping Song, William Sherman, Beatrice Hwong, Brian Berenbach, and Gilberto Matos

Rediscovering Zachman Framework Using Ontology from a Requirement Engineering Perspective ......................................................... 3

Zhuozhi Chen and Rob Pooley
A Scenario-Based Architecture Evaluation Framework for Network Enabled Capability
Colin C. Venters, Duncan J. Russell, Lu Liu, Zongyang Luo, David E. Webster, and Jie Xu

Decomposition and Traceability in Software Design
Hung-Fu Chang and Stephen C-Y. Lu

Panel on Requirements Engineering for Services
Colette Rolland

ESAS 2009 Session 1: Semantic Mining
Variable Support Based Association Rule Mining
Rajul Anand, Ravi Agrawal, and Joydip Dhar
Social Graph Generation & Forecasting Using Social Network Mining
Marjaneh Safaei, Merve Sahan, and Mustafa Ilkan

ESAS 2009 Session 2: Mobile Agents
Mobile-Agent Approach for Mobile Code Localization in Ad hoc Networks
Youcef Zafoune, Aicha Mokhtari, and Rushed Kanawati
Implementing an Mobile Agent Platform for M-Commerce
Xining Li and Guillaume Autran
Semantic Web Enabled Composition of Semantic Web Services
Duygu Çelik and Atilla Elçi

ESAS 2009 Session 3: Semantic Agent Systems
An Architecture for Verification of Access Control Policies with Multi Agent System Ontologies
Fatih Tekbacak, Tugkan Tuglular, and Oguz Dikenelli
OWL Manipulation toward Building Semantic Applications and Agents
Pooyan Balouchian, Amin Almassian, and Atilla Elçi
Agent-Oriented Middleware for Mobile eLearning Services
S. Stoyanov, V. Valkanova, I. Ganchev, M. O’Droma, and H. Zedan

RTSOAA 2009 Session 1: RTSOAA Models
Real-Time Guarantees in Flexible Advance Reservations
Kleopatra Konstanteli, Dimosthenis Kyriazis, Theodora Varvarigou, Tommaso Cucinotta, and Gaetano Anastasi
Respecting Temporal Constraints in Virtualised Services
Tommaso Cucinotta, Gaetano Anastasi, and Luca Abeni
Building an Enterprise Service Bus for Real-Time SOA: A Messaging Middleware Stack
Luis Garcés-Erice
Design of MIDA, a Web-Based Diagnostic Application for Hydroelectric Generators ................................................................. 166
Luce Vouligny, Claude Hudon, and Duc Ngoc Nguyen
An Algorithm for Mining Frequent Items on Data Stream Using Fading Factor ............................................................ 172
Ling Chen, Shan Zhang, and Li Tu
Impacts Separation Framework for Performance Prediction of Middleware-Based Systems .......................................................... 178
Xiang Huang, Wenbo Zhang, Bo Zhang, and Jun Wei

SECASA 2009 Session 1
Context-Aware Trust Management for Peer-to-Peer Mobile Ad-Hoc Networks ................................................................. 188
R. Shankaran, V. Varadharajan, M. A. Orgun, and M. Hitchens
A Contextual Guidance Approach to Software Security ......................................................... 194
Philipp Schugerl, David Walsh, Juergen Rilling, and Philippe Charland
AlertMe: A Semantics-Based Context-Aware Notification System ................................................................. 200
Asterios Leonidis, George Baryannis, Xenofon Fafoutis, Maria Koroz, Niki Gazoni, Michail Dimitriou, Maria Koutsogiannaki, Aikaterini Boutsika, Myron Papadakis, Haridimos Papagiannakis, George Tesseris, Emmanouil Voskakis, Antonis Bikakis, and Grigoris Antoniou

SECASA 2009 Session 2
A Quality-Aware Context Middleware Specification for Context-Aware Computing ................................................................. 206
Yuanping Li and Ling Feng
Context Analysis of Intensional Languages ......................................................................................... 212
Weichang Du and Khaled Ben Hamed
Distributed Eductive Execution of Hybrid Intensional Programs .................................................................................... 218
Joey Paquet

SECASA 2009 Session 3
Relaxed Objects - Object Model for Context-Aware Applications .................................................................................... 225
Michal Kopecký and Michal Žemlička
Cartesian Programming: The TransLucid Programming Language ................................................................................ 231
John Plaice and Blanca Mancilla
Declarative Multithreaded Programming ......................................................................................... 237
Blanca Mancilla and John Plaice

QUORS 2009 Session 1: Service Based Systems
Formal Analysis of Services Compatibility ......................................................................................... 243
Xueqiang Gong, Jing Liu, Miaomiao Zhang, and Jueliang Hu
A Perspective on Middleware-Oriented Context-Aware Pervasive Systems ................................................................................ 249
Zakwan Jaroucheh, Xiaodong Liu, and Sally Smith
QUORS 2009 Session 2: Design Pattern and Advanced Software Design
Towards a Problem Oriented Engineering Theory of Pattern-Oriented Analysis and Design .................................................................255
Jerry Overton, Jon G. Hall, Lucia Rapanotti, and Yijun Yu
A Model-Driven Multicore Software Development Environment for Embedded System ..............................................................................261
Chihhsiong Shih, Chien-Ting Wu, Cheng-Yao Lin, Pao-Ann Hsiung,
Nien-Lin Hsueh, Chih-Hung Chang, Chorng-Shiuh Koong, and William C. Chu
Photon: A Domain-Specific Language for Testing Converged Applications ..................................................................................269
Anne Miller, Balaji Kumar, and Anukul Singhal

QUORS 2009 Session 3: Software Reuse
Using Artifact Flow Diagrams to Model Artifact Usage Anomalies ........................................................ ..................275
Hwai-Jung Hsu and Feng-Jian Wang
Dual-Container: Extending the EJB2.x Container to Support EJB3.0 ..................................................................................281
Ziyou Wang, Minghui Zhou, Donggang Cao, and Haiyan Zhao
Best Principles in the Design of Shared Software ..................................................................................287
Dino Konstantopoulos, John Marien, Mike Pinkerton, and Eric Braude

QUORS 2009 Session 4: Software Evolution
Domain Analysis in the Reengineering Process of a COBOL System ..................................................................................293
Richard Millham and Hongji Yang
A Business-Logic Based Framework for Evolving Software Systems ..................................................................................300
Mohammed Alawaidhi and Hongji Yang
A Constraint Based Bug Checking Approach for Python ..................................................................................306
Lin Chen, Baowen Xu, Tianlin Zhou, and Xiaoyu Zhou

STPSA 2009 Session 1
Agent Protection Based on the Use of Cryptographic Hardware ..................................................................................312
Antonio Muñoz, Antonio Maña, Rajesh Harjani, and Marioli Montenegro
Towards Usable Solutions to Graphical Password Hotspot Problem ..................................................................................318
Kemal Bicakci, Nart Bedin Atalay, Mustafa Yuceel, Hakan Gurbaslar,
and Burak Erdeniz
On Information Flow Forensics in Business Application Scenarios ..................................................................................324
Claus Wonnemann, Rafael Accorsi, and Günter Müller

STPSA 2009 Session 2
An Enforcement Architecture for Security and Trust Policies in Federated Web-Service-Based Systems ..................................................................................329
Zhengping Wu and Lifeng Wang
A Model for Privacy Policy Visualization ..................................................................................335
Kambiz Ghazinour, Maryam Majedi, and Ken Barker
STPSA 2009 Session 3
The Security Implication of Multiple Observers in a Distributed System ..................................................341
  Derek P. Ditch and Bruce M. McMillin
Defending Battery Exhaustion Attacks on Mobile Systems ..........................................................................347
  Sungyong Shin, Taek Lee, and Hoh Peter In
On Selecting Appropriate Development Processes and Requirements
Engineering Methods for Secure Software ......................................................................................................353
  Muhammad Umair Ahmed Khan and Mohammed Zulkernine

BINDIS 2009 Session 1: Service Creation and Management
A Cooperative Framework of Service Chain for Digital Library ...............................................................359
  Meng-xing Huang, Chun-xiao Xing, and Ji-jiang Yang
A Specialized Meta-scheduler for Business and Applications Constraints
Management ...................................................................................................................................................365
  Jérémie Chevalier and Stéphane Mouton
Towards Industry-Strength SLA Optimization Capabilities for Service Chains ........................................371
  Yang Li

BINDIS 2009 Session 2: Service Marketing and Inoperability
Matchmaking Using Natural Language Descriptions: Linking Customers with Enterprise Service Descriptions ..................................................................................................................376
  Joe Geldart, William Song, and Yang Li
An Investigation of the Role of Service Level Agreements in Classified Advertisement Websites ..................................................380
  Aijaz Soomro, William Song, and Yang Li

CFSE 2009 Session 1: Software System Forensics
Analysis of Redundant Traces for Consistency: With Examples from Electronic Messaging and Graphical Images ........................................................................................................................................386
  Fred Cohen
A Method for Historical Ext3 Inode to Filename Translation on Honeypots ................................................392
  Kevin D. Fairbanks, Ying H. Xia, and Henry L. Owen III
Log Data as Digital Evidence: What Secure Logging Protocols Have to Offer? ........................................398
  Rafael Accorsi

CFSE 2009 Session 2: Protection Testing and Computer Forensics
Acer Aspire One Netbooks: A Forensic Challenge .......................................................................................404
  Amrit Pal Singh, Michael Lavine, Benjamin Turnbull, and Trupti Shiralkar
Penetration Testing for Spam Filters ............................................................................................................410
  Yugesh Madhavan, João W. Cangussu, and Ram Dantu
SAPSE 2009 Session 1: Service Collaboration and Access Control

Policy Composition Based on Petri Nets .................................................................416
   Hejiao Huang and Hélène Kirchner
Verification of Access Control Policies for REA Business Processes ....................422
   Vahid R. Karimi and Donald D. Cowan
Towards the Verification of Services Collaboration ............................................428
   Yue Xie, Dehui Du, Jing Liu, and Zuohua Ding

SAPSE 2009 Session 2: Service Security and Protection

Towards Validating Security Protocol Deployment in the Wild ..................................434
   Luca Compagna, Ulrich Flegel, and Volkmar Lotz
On a Classification Approach for SOA Vulnerabilities ........................................439
   Lutz Lowis and Rafael Accorsi
SN2K Attacks and Honest Services .......................................................................445
   Ashish Kundu
PhishCatch - A Phishing Detection Tool ................................................................451
   Weider D. Yu, Shruti Nargundkar, and Nagapriya Tiruthani

IWSC 2009 Session 2

Adaptive Control Framework for Software Components: Case-Based Reasoning Approach .................................................................457
   Mykóla Tkachúk, Sergii Polkóvnikov, and Sergiy Brónin
Modeling Simulink Diagrams Using Input/Output Extended Finite Automata ............462
   Changyan Zhou and Ratnesh Kumar
T3: Secure, Scalable, Distributed Data Movement and Remote System Control for Enterprise Level Cyber Security .................................................................468
   Gregory S. Thomas, Bill Nickless, David R. Thiede, Ian Gorton, Bill J. Pitre,
   Jason E. Christy, Liz Faultersack, and Jeffery A. Mauth

IWSC 2009 Session 3

A Control-Based Approach to Balance Services Performance and Security for Adaptive Service Based Systems (ASBS) .................................................................473
   Chang Liu, Changhai Jiang, Hai Hu, Kai-Yuan Cai, Dazhi Huang,
   and Stephen S. Yau
Prevention of Sequential Message Loss in CAN Systems .....................................479
   Shengbing Jiang and Ratnesh Kumar
Risk-Based Adaptive Group Testing of Semantic Web Services .............................485
   Xiaoying Bai and Ron S. Kenett
CORCS 2009 Session 1: Modeling and Optimization of Component-Based Systems
Optimizing Component-Based Embedded Software .......................................................... 491
  Olivier Lobry, Juan Navas, and Jean-Philippe Babau
Towards a Unified Behavioral Model for Component-Based
and Service-Oriented Systems .......................................................................................... 497
  Aida Čaušević and Aneta Vulgarakis

CORCS 2009 Session 2: Analyzing Complex Real-Time and Embedded Systems
Testing with Large Parameter Sets for the Development of Embedded Systems in the Automation Domain ................................................................. 504
  Florian Kantz, Thomas Ruschival, Philipp Nenninger, and Detlef Streitferdt
Transformational Specification of Complex Legacy Real-Time Systems via Semantic Anchoring ............................................................... 510
  Yue Lu, Antonio Cicchetti, Stefan Bygde, Johan Kraft, Thomas Nolte, and Christer Norström

IEESD 2009 Session 1
An Integrative Approach for Embedded Software Design with UML and Simulink ................................................................................................. 516
  Tibor Farkas, Carsten Neumann, and Andreas Hinnerichs
'State of the Art' in Using Agile Methods for Embedded Systems Development ................. 522
  Jayakanth Srinivasan, Radu Dobrin, and Kristina Lundqvist
Test Case Mutation in Hybrid State Space for Reduction of No-Fault-Found Test Results in the Industrial Automation Domain ................................ 528
  Thomas Ruschival, Philipp Nenninger, Florian Kantz, and Detlef Streitferdt

STA 2009 Session 1: Test Automation I
Implementing an Effective Test Automation Framework .................................................. 534
  Eun Ha Kim, Jong Chae Na, and Seok Moon Ryoo
GUI-Based Testing of Boundary Overflow Vulnerability ................................................. 539
  T. Tuglular, C. A. Muftuoglu, O. Kaya, F. Belli, and M. Linschulte

STA 2009 Session 2: Test Automation II
Test Selection Prioritization Strategy ............................................................................. 545
  Rajesh Subramanyan and Christof J. Budnik
Automatic Testing of Program Security Vulnerabilities ............................................... 550
  Hossain Shahriar and Mohammad Zulkemine
A New Mutation Analysis Method for Testing Java Exception Handling ......................... 556
  Changbing Ji, Zhenyu Chen, Baowen Xu, and Ziyuan Wang

Author Index - Workshops ............................................................................................... 563
