Preface

On behalf of the Program Committee of the Fourth International Conference on Cooperative Information Systems (CoopIS’99), we would like to welcome you to the conference. We have put together an exciting program reflecting the inter-disciplinary and international nature of the conference. The program consists of nine technical paper sessions, two invited talks, two panel discussions on hot topics in cooperative information systems, and one tutorial.

The program was put together with the help of 47 eminent members of the Program Committee, who participated in the technical evaluation of 86 submissions from all over the world. Of those, 29 were accepted for presentation at the Conference and are included in these Proceedings. Subsequently, we will recommend 5 of these papers for inclusion, after revision and review, in a special issue of the International Journal of Cooperative Information Systems (IJCIS).

We thank the members of the program committee for their dedication and assistance. We also thank the General Chair, Mike Papazoglou, and the Organizing Committee, Michael O’Boyle and John Keane. We appreciate the help provided by Amit Sheth in hosting and maintaining the conference web site, and the early help provided by Tamer Oszu and Pericles Loucopoulos in the organization of the conference.

Umeshwar Dayal
Maurizio Lenzerini
Conference Committee

General Chair

Mike P. Papazoglou
Tilburg University,
The Netherlands

Program Chairs

Europe, Africa, Middle East:
Maurizio Lenzerini
Universita’ degli Studi di Roma “La Sapienza”,
Roma, Italy

Americas, Australia, Asia:
Umeshwar Dayal
Hewlett-Packard Laboratories,
Palo Alto, CA, USA

Organizing Chairs

Dr. Michael O Boyle
Department of Computer Science,
U. of Edinburgh, UK

John Keane
Department of Computation,
UMIST, UK
Program Committee

Alex Borgida (USA)            Stuart Madnick (USA)
Athman Bougettaya (Australia) Robert Meersman (Belgium)
Mokrane Bouzeghoub (France)  Ami Motro (USA)
Alex Buchmann (Germany)       John Mylopoulos (Canada)
Diego Calvanese (Italy)       Eric Neuhold (Germany)
Arbee Chen (Taiwan)           Maria Orlowska (Australia)
Qiming Chen (USA)             Aris Ouksel (USA)
Daniela Florescu (France)     Luigi Palopoli (Italy)
Anand Deshpande (India)       Alain Pirotte (Belgium)
Asuman Dogac (Turkey)         Louiqa Raschid (USA)
Carles Garcia Sierra (Spain)  Tore Risch (Sweden)
Dimitrios Georgakopoulous (USA) Arnie Rosenthal (USA)
Fausto Giunchiglia (Italy)    Marie Christine Rousset (France)
Luis Gravano (USA)            Marek Rusinkiewicz (USA)
Laura Haas (USA)              Felix Saltor (Spain)
Rick Hull (USA)               Sunil Sarin (USA)
Michael Huhns (USA)           Claudio Sartori (Italy)
Matthias Jarke (Germany)      Arne Solvberg (Norway)
Anant Jhingran (USA)          Stefano Spaccapietra (Switzerland)
Kamal Karlapalem (Hong Kong)  Martin Staudt (Switzerland)
Matthias Klush (Germany)      Kyu-Young Whang (Korea)
Witold Litwin (France)        Carson Woo (Canada)
Kecheng Liu (UK)              Clement Yu (USA)
Fred Lochovský (Hong Kong)
External Referees

Ramesh Agarwal
Don Baker
Alistair Barros
Boualem Benatallah
Tushar Chandra
Andrzej Cichocki
Guray Eruz
Murat Ezbiderli
Giuseppe De Giacomo

# Table of Contents

Fourth IECIS International Conference on Cooperative Information  
CoopIS’99

**General Chair’s Message** ........................................................................................................ viii

**Preface** ..................................................................................................................................... ix

**Conference Committee** ........................................................................................................... x

**Program Committee** ................................................................................................................ xi

**External Referees** .................................................................................................................... xii

**Invited Talks**

Negotiating Agents for Corporate-Wide Business Process Management ...................................... 2  
*Nick Jennings*

Models and Tools for Designing Data-Intensive WEB Applications ................................................ 3  
*Stefano Ceri*

**Panels**

Annotations: Digital Post-Its™ as an Information Model? ......................................................... 6  
*Chairs: Arnon Rosenthal and Scott Renner*

Panel on Data Warehouse Quality Issues ..................................................................................... 8  
*Chair: Yannis Vassiliou*

**Tutorial**

Web-based Information Access ...................................................................................................... 10  
*Tiziana Catarci*

**Integration and Interoperability**

Detection of Heterogeneities in a Multiple Text Database Environment ....................................... 22  
*W. Meng, C. Yu and K-L. Liu*

A Unified Graph-Based Framework for Deriving Nominal Interscheme Properties,  
Type Conflicts and Object Cluster Similarities ............................................................................. 34  
*L. Palopoli, D. Saccà, G. Terracina and D. Ursino*

Access Keys Warehouse: A New Approach to the Development of  
Cooperative Information Systems .............................................................................................. 46  
*F. Arcieri, E. Cappadozzi, P. Naggar, E. Nardelli and M. Talamo*

Discovering View Expressions from a Multi-Source Information System .................................. 57  
*Z. Kedad and M. Bouzeghoub*
Collaboration
Event Composition in Time-dependent Distributed Systems.................................................................70
  C. Liebig, M. Cilia and A. Buchmann
Providing Customized Process and Situation Awareness in the Collaboration
  Management Infrastructure....................................................................................................................79
  D. Baker, D. Georgakopoulos, H. Schuster, A. Cassandra and A. Cichocki
Modeling Interactions Based on Consistent Patterns ........................................................................92
  S. Srinivasa and M. Spiliopoulou

Workflow Exceptions and Versioning
Dynamic Workflow Schema Evolution Based on Workflow Type Versioning
  and Workflow Migration .....................................................................................................................104
  M. Kradolfer and A. Geppert
Generic Workflow Models: How to Handle Dynamic Change and Capture
  Management Information? ..................................................................................................................115
  W. van der Aalst
Modeling Exceptional Behaviors in Commercial Workflow Management Systems ......................127
  F. Casati and G. Pozzi

Web Information Systems
Constructing a Personal Web Map with Anytime-Control of Web Robots........................................140
  S. Yamada and N. Nagino
Looking at the Web through XML Glasses ........................................................................................148
  A. Sahuguet and F. Azavant
Learning Response Times for WebSources: A Comparison of a Web
  Prediction Tool (WebPT) and a Neural Network ..............................................................................160
  L. Bright, L. Raschid, V. Zadorozny, and T. Zhan
A Comprehensive Framework for Querying and Integrating WWW
  Data and Services ..............................................................................................................................172
  D. Konopnicki and O. Shmueli

E-Commerce
e-Commerce Bargain-Hunting with an UnBun Model ........................................................................186
  R. Yahalom and S. Madnick
A Formal Yet Practical Approach to Electronic Commerce ...............................................................197
  D. Konopnicki, L. Leiba, O. Shmueli and Y. Sagiv
A Distributed OLAP Infrastructure for E-Commerce ........................................................................209
  Q. Chen, U. Dayal and M. Hsu

Workflow Modeling
  J. Tang
Conceptual Workflow Schemas .............................................................................................................234
  K. Meyer-Wegener and M. Böhm
Cooperative Support for Office Work in the Insurance Business .....................................................243
  A. Margelisch, U. Reimer, M. Staudt and T. Vetterli
Mediators and Query Processing
Selectively Materializing Data in Mediators by Analyzing User Queries.................................................................256
   N. Ashish, C. Knoblock and C. Shahabi
Using Fagin’s Algorithm for Merging Ranked Results in Multimedia Middleware.................................267
   E. Wimmers, L. Haas, M. Roth and C. Braendli
Conflict Tolerant Queries in AURORA ....................................................................................................................279
   L. Yan and M. Özsu
Optimizing Queries in Distributed and Composable Mediators...............................................................................291
   V. Josifovski, T. Katchaounov and T. Risch

Agents
The Identification of Missing Information Resources through the Query Difference Operator........................................304
   M. Minock, M. Rusinkiewicz and B. Perry
Information Aggregation and Agent Interaction Patterns in InfoSleuth™...............................................................314
   B. Perry, M. Taylor and A. Unruh
ROPE: Role Oriented Programming Environment for Multiagent Systems .........................................................325
   M. Becht, T. Gurzki, J. Klarmann and M. Muscholl

Workflow Transactions
Modeling Extensions for Concurrent Workflow Coordination .............................................................336
   A. Barros and A. ter Hofstede
Semantics and Architecture of Global Transaction Support in Workflow Environments .......................................348
   P. Grefen, J. Vonk, E. Boertjes and P. Apers

Author Index.........................................................................................................................................................360
