2009 World Congress on Computer Science and Information Engineering

CSIE 2009

Table of Contents

Volume - 1

Conference Information - Volume 1 ........................................................................................................... xvii

COMMUNICATIONS AND MOBILE COMPUTING SYMPOSIUM - Volume 1

Ad Hoc, Body-Area and Sensor Networks - Volume 1

A Multiple Trees-Based Data Dissemination Scheme in Wireless Sensor Networks .......................................................... 1
KeZhong Lu and XiaoHui Lin

Developing Test System of Ad Hoc Network for Emergency Communications .................................................. 5
Fang Hong, Tao Yi, He Zhao, and Bian Xin

Researching on Communication Efficiency for the Mobile Physiological Information Monitor System Based on Zigbee .......................................................... 10
Jiao Teng, Zhang Kun, Zhang Yang, Wang Hua, Zhu XinYa, and Dong Xiuzhen

A Backbone Routing Protocol Based on the Connected Dominating Set in Ad Hoc Networks .......................................................... 14
Yao-Pin Tsai, Tzu-Ling Hsu, Ru-Sheng Liu, and Ying-Kwei Ho

Distributed Clustering Algorithm with Load Balancing in Wireless Sensor Network .......................................................... 19
Farruh Ishmanov and Sung Won Kim

Employing CHNN to Develop a Data Refining Algorithm for Wireless Sensor Networks .......................................................... 24
Joy Jong-Zong Chen, Chieh Chung Yu, Meng Tsun Hsieh, and Yi Nung Chung

Routing Design of Wireless Sensor Networks in Mine Monitoring System .......................................................... 32
Jinpeng Tian, Huichang Shi, Yifei Zhou, and WenLiang Guo
# Impact of Mobility in Ad Hoc Protocol Design
Arta Doci, Georgios Samakovitis, and Vijaya Raju

# Provisioning QoS in Wireless Sensor Networks Using a Simple Max-Min Fair Bandwidth Allocation
H.Z. Abidin and F.Y.A. Rahman

# Impact of Link Layer on Routing Protocols in Wireless Sensor Network
Franklin Fondjo Fotou, Vicky Y. Taffioti Yolong, and Pierre F. Tiako

# Method to Improve the Performance of Common Channel Framework
Junrong Yan, Shunyi Zhang, Jun Li, and Huibin Feng

# Wireless Sensor Network for Orchard Soil and Climate Monitoring
Haiqing Yang and Yong He

## Antennas, Propagation and Channel Modeling - Volume 1

<table>

Cooperative Communications - Volume 1

Architecture and Key Technologies of Interactive Intelligent Communication .................................................................110
Zhonggui Ma, Hongbo Wang, Xianwei Zhou, and Xuyan Tu

The Investigation of Inter-organizational Information Systems Capabilities in Hebei Province, China ....................................................115
Zhang Zhiying, Kang Kai, and Wang Yunfeng

A Technology of Agent-Cache Used in Mobile Computing Environment ........................................................................120
Rubing Liang and Qiong Liu

Cryptography - Volume 1

Remarks on Cryptanalysis of RSA Using Lattice Basis Reduction ..................................................................................125
Haijian Zhou, Ping Luo, Daoshun Wang, and Yiqi Dai

Efficient Schnorr Type Identity-Based Blind Signatures from Bilinear Pairings .............................................................130
Zhenjie Huang, Qunshan Chen, Rufen Huang, and Xuanzhi Lin

Grid, Cluster and P2P Computing - Volume 1

Understanding and Supporting Live and On-Demand Streaming Service ........................................................................135
Yun Tang, Qian Meng, Kaiyun Zhang, and Shiqiang Yang

Peer Caching Algorithm Based on Global Segment Popularity for P2P VoD System ............................................................................140
Liu Jie, Liu Yi-na, Cheng Ling-ling, and Tao Jun-cai

Intrusion Detection and Countermeasures - Volume 1

An Adaptive Approach of String Metrics Application in the Intrusion Detection Systems .............................................................145
Evgeniya Nikolova and Veselina Jecheva

Automated Risk Assessment for Sources and Targets of Vulnerability Exploitation ...........................................................................150
Hassan Rasheed and Randy Y.C. Chow

Mobile and Wireless Networks Security - Volume 1

Research on the Optimization of Encryption and Authentication Mode of EAX about Broadband Wireless Communications Equipment ..................................................................................155
Qingbo Zhang, Jiaming He, and Liu Li

Replay Protection at the Link Layer Security in Wireless Sensor Networks ...........................................................................160
Devesh Jinwala, Dhiren Patel, Sankita Patel, and K.S. Dasgupta
Modulation, Coding and Information Theory - Volume 1

Constant Power Signaling in Rayleigh Fading Channels: Joint Output Probability Distribution and Information Rate Bounds ................................................................. 166
Rauf Iqbal, Parastoo Sadeghi, and Thushara D. Abhayapala

OFDM and Multi-carrier Systems - Volume 1

Research of Peak-to-Average Power Ratio Reduction Improved Algorithm for MIMO-OFDM System ........................................................................................................ 171
Xu Yan, Wang Chunli, and Wang Qi
An Effective Low-Complexity Method for PAPR Reduction in OFDM-Based Systems .......................................................................................................................... 176
Li Yicai and Yang Shizhong
A Simplified NLS Frequency Offset Estimator for OFDM Systems .......................................................... 181
Yun Wu, Wen Chen, and Wu-Jun Xu

Optical Communications and Networking - Volume 1

A Real-Time Planning-Based Scheduling Policy with CAN for Automotive Communication Systems .................................................................................................. 186
Wanke Cao, Cheng Lin, Wei Zhou, and Fengchun Sun
Research on the Criterion of Wireless Optical Access System and Its Application .......................................................... 192
Zhao Li, Ke Xizheng, Yin Zhiyun, and Zhou Xiangchen
A Novel Optical Multiplexing Approach for Computer Interconnection and Optical Digital Transmission .................................................................................................. 197
Cheng Luo and Biao Chen

Other Topics in Communications - Volume 1

A Novel Family of Complex Hadamard Matrices with Cyclically Distinct Rows and Large Linear Span .............................................................. 203
Fanxin Zeng
OCDMA over WDM System Based on Chebyshev-Map Chaotic Spread Spectrum in Passive Optical Network .................................................................................................. 208
Zhizhua Zheng, Zongjue Qian, Guochu Shou, and Yihong Hu
A Multi-perspective Monitoring Engine for Hybrid Networks .......................................................................................................................... 212
Mao Weihua, Bai Xuesong, and She Huajun
Exponential Stability of Series CMS with a Single Storage Buffer .......................................................................................................................... 216
Wenlong Wang
Alternans Lowers the Scaling Exponent of Heartbeat Fluctuation Dynamics: A Detrended Fluctuation Analysis in Animal Models and Humans .................................................................................................. 221
Toru Yazawa, Katsunori Tanaka, and Tomoo Katsuyama
A Novel Algorithm for Critical Paths ................................................................................................................... 226
TianZhi Li

A Three-Layer Network Management System ........................................................................................................ 230
Jiang Guo, Heru Xue, and Raj Pamula

Design and Implementation of a Mobile GIS for Field Data Collection ................................................................. 235
Yongbin Yan, Jia Yu, Jianping Wu, and Suyan Ma

Improvement of the Fusing Genetic Algorithm and Ant Colony Algorithm in Virtual Enterprise Partner Selection Problem .......................................................................................................................... 242
Zhong Yao, Ranran Pan, and Fujun Lai

State Feedback Stabilization of Neutral Type Descriptor Systems ............................................................................ 247
Qi-xun Lan, Chao-yi Feng, and Jia-rong Liang

Study of Topological Dynamics and Periodicity of LEO Satellite Networks Based on Spectral Analysis .................. 252
Haiyan Wang, Sheng Wang, Hongfang Yu, Xiaoning Zhang, and Dan Liao

Unequal Clustering Mechanism of LEACH Protocol for Wireless Sensor Networks ................................................ 258
Chen Xuhui, Yang Zhiming, and Cheng Huiyan

The Study on Difference among Flow Specifications in Internet ................................................................................. 263
Han Zhang and Wei Ding

Using Gray Relation and Quality Function Deployment in Service Quality of the Cable TV ........................................ 268
Nai-Hua Chen and Hsin-Yu Kuo

An Economic Analysis on Sharing Behavior in Peer-to-Peer Software Usage .......................................................... 273
Li-Hsien Chien and Jheng-Yi Wei

A New Stream Cipher Based on Coupled Map Lattices Map ..................................................................................... 278
Lin Jinqiu and Si Xicai

City Imaging after Kevin Lynch ................................................................................................................................... 283
Kaveh Fattahi and Hidetsugu Kobayashi

A Heuristic Algorithm for Topological Optimization of All-Optical Networks ........................................................ 288
A. Srinivasan and R. Parthiban

An Interoperability Infrastructure with Portable Prescription for Improving Patient Safety - The Framework of a National Standard in Taiwan ..................................................................................................... 293
Ching Huan Kuo, Yu-Chuan Li, Peisan Lee, and Yihua Wu

Other Topics in Computer and Network Security - Volume 1

A Dynamic Online Traffic Classification Methodology Based on Data Stream Mining ................................................ 298
Xu Tian, Qiong Sun, Xiaohong Huang, and Yan Ma

Bloom Filter Based Index for Query over Encrypted Character Strings in Database ................................................ 303
Lianzhong Liu and Jingfen Gai
Other Topics in Mobile Computing and Internet - Volume 1

ALBPS: An Adaptive Approach on Reduction Redundancy in Latency-Aware Peer-to-Peer Content Delivery System with Network Coding ..........................................................308
Yao Yu, Yu Zhou, and Sidan Du

A Framework and Prototype for Service Mobility .....................................................................315
Hongbo Si, Yue Wang, Jian Yuan, and Xiuming Shan

An Efficient Mixed-Mode Execution Environment for C on Mobile Phone Platforms .................................................................................................................................320
Taek-hoon Kim, Sung-ho Kim, Kirak Hong, Hwangho Kim, Jiin Park, Yousun Ko,
Bernd Burgstaller, and Bernhard Scholz

Other Topics in Wireless Communications and Networking - Volume 1

The Co-existing Interference Analysis between TD-SCDMA and WiMAX ........................................329
Yihong Hu, Guo-chu Shou, Zongjue Qian, and Yajie Xue

A New Node Localization Algorithm of Wireless Sensor Networks ........................................334
Changgeng Li, Juan Chen, and Xinbing Li

The Performance Analysis of Chan Location Algorithm in Cellular Network .............................339
Zhang Jian-wu, Yu Cheng-lei, and Ji Ying-ying

A Data Aggregation Model for Underground Wireless Sensor Network .......................................344
Tong Minming, Niu Jieru, Wang Hu, and Liu Xiaowen

A Kind of Survivability Evaluation Technique for Tactical Data Link Network .......................349
Ning Zhong, Zun-wen He, Jing-ming Kuang, and Zhi-hai Zhuo

The Wireless Remote Control System for Portable X-Ray Machine ........................................354
D. Suo, Y. Ham, and G. Yang

Spectrum Detection Based Cyclostationarity in Spectrum Pooling System .................................359
Guicai Yu, Tao Luo, Jinbo Wu, and Guangxin Yue

Unsplit-Field FDTD Simulation of a Mobile Phone Operating Near a Metal Wall .................................364
Terapass Jariyanorawiss, Nuttaka Homsup, and Wiroj Homsup

Stability of FAST TCP in Single-Link Multi-source Network ..................................................369
Heying Zhang, Lihong Peng, Baohua Fan, Jie Jiang, and Ying Zhang

Network-Based Fleet Management Systems for Streamline Maritime Operation - A Case Study of F Plastics Marine Corporation .........................................................374
Shiou-Yu Chen and Ji-Bin Suen

A New Hybrid Approach for Detection and Estimation in Wireless Sensor Networks ................379
Ayad M. Salhieh and Mohammed G. Obeidallah

Dynamic Framed Slotted ALOHA Algorithm Based on Bayesian Estimation in RFID System ................384
Qiaoling Tong, Xuecheng Zou, and Hengqing Tong
Performance Modeling and Analysis in Mobile Computing and Internet - Volume 1

Challenges for End-to-End Quality of Service in Heterogeneous Networks ............................................................389
Wen-an Zhou, Lu Liu, and Jun-de Song

Fixed WiMAX Downlink Spectral Efficiency and Throughput Measurements under Channel Impairments ..........................................................394
Pranesh Shah and Kalyan Mondal

A Virtual Multiple Terminal Scheduling Scheme in the Infrastructure Based Wireless LAN to Enhance the VoIP Capacity ..........................................................399
Yanchao Xing, Wei Huangfu, and Wenping Qiang

Pervasive/Ubiquitous Computing - Volume 1

Achieving Dependability through Dynamic Reconfiguration in Sensor Operating Systems ............................................................404
Ke Shi, Xuan Qin, Qifei Cheng, and Yidong Cheng

Protocols (Routing/Switching, Congestion Control, Multicasting) - Volume 1

Analysis of Time Delay of Packet on Multi-service System in Loop LAN ...............................................................409
Cai Qun, Luo Hongjun, Sun Jianhong, and Li Junsheng

CSMA/CA MAC Protocol Design for Topology Controlled Ad Hoc Networks:
A Cross Layer Approach ........................................................................................................................................413
Wonseok Baek, C.-C. Jay Kuo, and David S.L. Wei

Self-Selection Based Adaptive Routing for MANET .............................................................................................418
Hongpeng Wang and Zhongqiu Li

Ant Colony Based Routing Algorithm for Multi-sink Networks .................................................................................423
Weiya Wang, Weibing Li, Dongdong Chen, and Yuhui Han

Link Scheduling with Physical Interference Model for Throughput Improvement in Wireless Multi-hop Networks ..........................................................430
Shuai Fan, Lin Zhang, and Yong Ren

Security Modeling and Protocol Design - Volume 1

Iterative Composite Encryption Algorithm Based on Tea and Elgamal ........................................................................435
Qiu Bing-cheng, Yao Yang-xin, Zhang Xi-min, and Chen Yin-dong

Strand Space Model of Amended NS Protocol and Its Analysis ................................................................................439
Shimin Wei and Yuyan Guo

Signal and Multimedia Processing for Communications - Volume 1

Research on Identifying Video Frame and Getting the Decoding Priorities for Each Video Frame with DPI Technique on Cross-Layer Design ..........................................................443
Du Hai-qing, Tan Chun-hua, and Gao Jun-xiang

Dynamic Dictionary Design for SIP Signaling Compression ................................................................................448
Weihai Li, Yan Ma, Qing Ma, and Xiaohong Huang
A Fast Acquisition Method of DSSS Signal Based on Double FFT Layers ..................................................452  
Sun Guoliang

Signal and Modulation Type Detection Using Wavelet Transform .................................................................457  
Olusegun O. Odejide, Cajetan M. Akujuobi, Annamalai Annamalai, and Gerald Fudge

Ultra-Wideband - Volume 1

TOA Estimation for IR-UWB System Using Matrix Pencil .............................................................................461  
Rui Ding, Zhihong Qian, and Hong Jiang

Algorithms of Channel Estimation and Tracking in MB-OFDM UWB System ..............................................465  
Wang Jie, Shen Ke, and Jiang Liangcheng

Web Services and Internet Computing - Volume 1

The Concept and Framework of All Network Service (ANS) ........................................................................470  
Kyeongseo Mike Hwang, Donghyeung Lee, Soon Young Huh, and SeungWon Seo

The Design and Research of Video Grid of Scalable Multilevel Architecture ..............................................477  
Zhao Hong, Yao Zheng-liang, Liu Xin-wen, and Cao Jie

Release-Waiting Farm: An Original Framework for Reducing the Pre-release Failures of Web Plug-In on Social Networking Site .................................................................482  
Xingliang Yu, Jing Li, and Hua Zhong

Multi-stage Dynamic Coordination Model for Large-Scale Crowd’s Activities Based on Multi-agent .................487  
Jin Li, Qimin Wu, Daoli Zhu, and Yihong Hu

The Extensions of OWL on Properties Exclusion and the Corresponding Semantic Parser ........................................492  
Yazhe Tang, Dan Wang, Fengfan Huang, and Heng Chang

Web, E-business, E-commerce, E-government Security - Volume 1

The Solution to Version Management of Car Web Components ..................................................................497  
Mingyi Mao, Zhicheng Chen, Qian Mo, and Tongqiang Jiang

An Efficient Homomorphic Coercion Resistant Voting Scheme Using Hierarchical Binary Search Tree .....................................................................................................................502  
Vinodu George and M.P. Sebastian

Developing Measures and Prioritizing Digital Capital of Real Estate Websites ..............................................508  
Chung-Chu Liu

Improvement of BW Multi-party Contract Signing Protocol: Model and Formal Analysis ................................512  
Xiangdong Li, Qingxian Wang, and Xiaoyan Jin

An Enhanced-Security Fair E-payment Protocol ............................................................................................516  
Wei Fan, Huaying Shu, Elizabeth Fife, and Qiang Yan
WLAN, WPAN, WMAN, and Wireless Wide Area Networks - Volume 1

A Cross-Layer Design-Based Power-Saving Mechanism for IEEE 802.16e .......................................................... 520
   Jianbin Xue, Aihua Zhang, Zhanting Yuan, Jie Cao, and Qiuyu Zhang
Global Patient Monitoring System Using IP-Enabled Ubiquitous Sensor Network .......................................................... 524
   Dhananjay Singh, Hsein-Ping Kew, U.S. Tiwary, Hoon-Jae Lee, and Wan-Young Chung
Scenario-Based Traffic Modeling for Data Emanating from Medical Instruments in Clinical Environment .................... 529
   Aftab Ahmad, Anton Riedl, W. Jason Naramore, Nee-Yin Chou, and Matthew Scott Alley
Dynamic Partial Overlapping Channel Assignment Based on Traffic Load ................................................................. 534
   Li Zhirong, Wang Wenmin, Luo Huiqiong, and Wang Rui
Downlink Capacity and Coverage of Mobile WiMAX with Array Antenna ............................................................... 538
   Yan Zhang and Fengxia Li

COMPUTER APPLICATIONS SYMPOSIUM - Volume 1

Bioinformatics - Volume 1

Dynamic Analysis of Feedback Loops in Extra-Cellular Signal Regulated Kinase Signal Network .......................................................... 543
   Yong Han, Yan Li, Yonghua Wang, Hua Fang, and Shuwei Zhang
Integrated Data Management and Analysis Environment for Medical Longitudinal Research with Machine Learning Based Prediction Models .......................................................... 552
   Mika Laaksonen, Barbara Simell, Tapio Salakoski, and Olli Simell
Table Based Parsing for RNA ........................................................................................................................................ 557
   Muhammed S. Al-Mulhem
A Graph-Based Approach for Clustering Analysis of Gene Expression Data by Using Topological Features .......................................................... 559
   Wenjun Wang, Junying Zhang, Jin Xu, and Yue Wang
Noise Estimation and Reduction in Microarray Images .................................................................................................. 564
   Guifang Shao, Hong Mi, Qifeng Zhou, and Linkai Luo
HAMFAST: Fast Hamming Distance Computation ........................................................................................................ 569
   Francesco Pappalardo, Cristiano Calonaci, Marzio Pennisi, Emilio Mastroiani, and Santo Motta
A Novel Post-Process Approach for Fast Marching Method in Liver CT Slices
Automatic Segmentation ........................................................................................................................................ 573
   Shaohui Huang, Boliang Wang, Xiaoli Hou, and Xiaoping Min
Structural Equation Modeling of Atherosclerotic Risk Factor Interactions ................................................................. 578
   Lawrence W.C. Chan
Biometric Modeling - Volume 1

An Easy System of Spatial Points Collection Based On ARtoolKit .................................582
   Hu Qing-xi, Liu Tao, and Yao Yuan
The Research on Offline Palmprint Identification .........................................................587
   Jiyi Li, Guangshun Shi, Yan Zheng, and Yuanfang Liu

Chemical Informatics - Volume 1

On-Line Production Planning Optimization Based on Message Bus of MES ..................591
   Xia Zhao, Lin Wang, Qihui Jin, Gaochong Wang, Zhaohong Fan, and Hongmei Yang

Computational Biology - Volume 1

Research for a Detection Method Based on Mutation of Network Stream
with the Fractal Characteristics .......................................................................................595
   Wu Yu
A Proposal to Handle Inconsistent Ontology with Fuzzy OWL .....................................599
   Hongbin Kong, Gang Xue, Xianglin He, and Shaowen Yao
Non-linear Bundle Adjustment for Electron Tomography .............................................604
   Sébastien Phan, James Bouwer, Jason Lanman, Masako Terada, and Albert Lawrence
The Dynamic Research of Health Resources in Chongqing City Based on
the Grey Majorized Model .............................................................................................613
   Qi Junju
Flight Patterns of Cletus rusticus (Stål) (Hemiptera: Coreidae) ......................................617
   Cui Jianxin and Cai Wanzhi
Determination of the Protein Content in Cordyceps militaris by Near Infrared
Spectroscopy Quantitative Model Based on Partial Least Squares Method ..................622
   Lu Jia-hui, Wang Di, Meng Qing-fan, Tian Hong-ru, and Teng Li-rong
Improving Kalign via Reconstruction of Phylogenetic Tree and Iteration .....................625
   Fan Yang, QingXin Zhu, and MingYuan Zhao
Webpage Duplicate Detection Using Combined POS and Sequence Alignment Algorithm .................................................................630
   Mohamed Elhadi and Amjad Al-Tobi
The Principles of the AV-FMS Computer Vision System .................................................635
   Yu Ge, Wu Penghui, and Liu Chunhuang
The Study of Database Application System Development Based
on Component and Framework ......................................................................................639
   Wang Zhen-hai
Modeling Research on Non-equidistant Optimum GM(1,1) Model and Its
Application Research to Metal Cutting .........................................................................643
   Youxin Luo, Weiyue Xiao, Xiaoyi Che, and Degang Liao
Imitation of Plants Inflorescence Based on Fusion of L System and IFS ......................647
   Xiang Li, Peng Chen, and Li Zhu
Computational Chemistry - Volume 1

Prediction of Gas Chromatographic Retention Index for Hydrocarbons in FCC Gasoline ................................................................. 651

Ling Ding, Xiaotong Zhang, Zhaolin Sun, Lijuan Song, and Ting Sun

Chemical Equilibrium Calculation of Complex System Based on Element Potential and Its Application .................................................. 656

Jinliang Wang, Chuanfu Zhang, Changren Tong, and Wenhai Zhang

Simulation Study of Dissociation Extraction in Separation of 3-picoline and 4-picoline ................................................................. 660

Jianhua Lv and Guomin Xiao

Computational Electromagnetics - Volume 1

Design of a Novel MR Rotary Brake ................................................................. 664

Yun Dong-won, Son Young-su, Park Hee-chang, Choi Sang-kyu, and Park Cheol-hun

Implementation of Neural Network for Generalized Predictive Control: A Comparison between a Newton Raphson and Levenberg Marquardt Implementation ................................................................. 669

Sadhana K. Chidrawar, Sujata Bhaskarwar, and Balasaheb M. Patre

Efficiency Video Encryption Scheme Based on H.264 Coding Standard and Permutation Code Algorithm .................................................. 674

Zhang Qian, Wu Jin-mu, and Zhao Hai-xia

Computational Fluid Dynamics - Volume 1

Numerical Simulation of Dispersion of Air Pollutant around Buildings ......................................................................................... 679

Hailin Mu and Wang Peng

A Coupling Hydrodynamic Model of a Whole Basin ......................................................................................................................... 684

Zhu Hui-luan, Chen Yun-feng, and Zhang Yan-hui

Study on the Flow Field in the Chamber of a Fluidized Bed Opposed Superfine Jet Mill ................................................................. 689

Liu Xue-dong and Chen Zhong-shu

Computational Geometry - Volume 1

G2 Connection of Bézier Patches around a Common Corner ........................................................................................................... 694

Qingxian Meng and Huili Liu

A Topology Preserved Mesh Simplification Algorithm ..................................................................................................................... 698

Lirong Wang, Jinzhu Li, and Ichiro Hagiwara

An Efficient Registration Algorithm of Multi-view Three-Dimensional Images .................................................................................... 703

Lirong Wang, Fang Xu, and Ichiro Hagiwara

STEP-Based Research and Realization on CAD Data Transformation for Virtual Assembly ........................................................................ 707

Yuan Bin, Xiong Wei, and Wang Zu-wen
Sketch-Based 3D Sleeve Modeling and Reusing Method for Garment CAD .................................................. 711
   Yu-Lei Geng, Guo-Dong Lu, Jin Wang, and Wei-Long Li
A Fractal Image Compression Method Based on Block Classification and Quadtree Partition ................................................. 716
   Feng-qing Qin, Jun Min, Hong-rong Guo, and De-hui Yin

Computational Mathematics - Volume 1

Fast Algorithms for the Pseudo Walsh Transform Based on Order Numbers ................................................. 720
   Li Xiao-mei
A Fuzzy Evaluation Model of the Performance Evaluation for the Reverse Logistics Management ......................................... 724
   Wang Jun
Parameterized VERTEX COVER in Graphs of Small Degree ................................................................. 728
   P.J. Taillon
Shape Modification of B-Spline Curves via Constrained Optimization for Multi-target Points ......................................... 733
   Qingbiao Wu and Shuyi Tao
3D Fashion Fast Modeling from Photographs ......................................................................................... 738
   Wei-Long Li, Guo-Dong Lu, Yu-Lei Geng, and Jin Wang
Maximum Renamable Horn and Maximum Independent Sets ......................................................................... 743
   Yongbin Qin and Daoyun Xu

Computational Mechanics - Volume 1

The Study of a Creative Hand Hook Design Based on Computer Aided Design Technology ................................................. 748
   Chao Wang
Application of Strength Reduction FEM in Anti-sliding Stability at Dam Foundation ......................................... 751
   Si Jianhui, Jian Zheng, and Chen Xi
Free Vibration of Circular Plate with Oscillators and Elastic Supports at Arbitrary Positions by Integral Equation Method ................................................................. 755
   Wang Weidong, Cheng Gang, and Cheng Quan
Research on the Functional Scheme of Lean MES System ........................................................................ 760
   Wei Feng, Yalin Mo, and Zhang Jing
Solid Cellular Automaton Method for the Solution of Physical Field ........................................................................ 765
   Peng-Zhi Pan, Xia-Ting Feng, and Hui Zhou
Dynamical Response Simulation of Concrete Dam Subjected to Underwater Contact Explosion Load ................................................. 769
   Tiantang Yu

Author Index - Volume 1 ............................................................................................................................................. 775
