Welcome Message from the Chairs

Conference Organization

International Program Committee

Technical Program Committee

International Reviewers

Technical Sponsors

Plenary Abstracts

---

Track: 01. Intelligent Systems

Awareness Behavioral Modelling for Fault Management of Agent-Based Computer Supported Cooperative Work .................................................................................................................. 1

   Amir Talaei-Khoei, Pradeep Ray, and Nandan Parameswaran

A Numerical Solution of the Dispersion Modeling in the Planetary Boundary Layer .............................................................................................................................................................................. 6

   Radim Dvorak, Frantisek Zboril, and Vaclav Simek

A New Method Based on Genetic Algorithms for Solving Traveling Salesman Problem ........................................................................................................................................................................... 11

   Farshad Frahadnia

Robust Feed-Forward Schemes for Anti-sway Control of Rotary Crane .......................................................... 17

   Mohd Ashraf Ahmad, Raja Mohd Taufika Raja Ismail, Mohd Syakirin Ramli,
   Nor Farizan Zakaria, and Nor Maniha Abd Ghani

Rough Set Based Data Mining Strategy for Analyzing Distance Protective Relay Operations .......................................................... 23

   Mohammad Lutfi Othman, Ishak Aris, Mahmod Senan Abdullah,
   Mohammad Liaquat Ali, and Mohammad Ridzal Othman
Hybrid Models in Dynamic Simulation of a Biological Water Treatment

Esko K. Juuso

A Novel Approach of Computer Vision Navigation for Mobile Tracking Robot

Jie Wu, Hussam M. Dahwa Abdulla, and Václav Snášel

STBC CDMA System Simulation in MIMO Channels with Correlative Model

Mehdi Rahmati and Vahid Tabataba Vakili

Track: 02. Hybrid Intelligent Systems

A New Hybrid Particle Swarm Optimization Algorithm for Handling Multiobjective Problem Using Fuzzy Clustering Technique

Lamia Benameur, Jihane Alami, and AbdelHakim El Imrani

Track: 03. Modelling Methods, Tools, and Techniques

A Review on Techniques Applied to Modelling, Simulating and Visualising Evolution of Physical Landscape

Isaac Kwadwo Nti, Philip J. Sallis, and Subana Shanamuganathan

One Tool for Building Visual Models

Vasyl Tereshchenko

Design of a Highly Safe Model Vehicle for Rear-End Collision Avoidance Considering Multiple Faults of Sensors

Takeshi Kasuga and Satoshi Yakubo

Data Processing for Simulation of Laser Beam Impact—Statistical Method for the Heat-Affected Area Detection

Jana Hájková

Technical Initial Problems and Automatic Transformation

Vlastimil Kaluža, Jan Kopriva, Jirí Kunovský, and Pavla Sehnalová

Simulating Infantry and Crowd Behaviors

Igor Petz, Branislav Sobota, and Ján Perháč

A Synthesis on Lyapunov Methods to the Estimation and Enlargement of Attraction Domain for Nonlinear Autonomous Systems

Faiçal Hamidi and Houssem Jerbi

Smart City Components Architecture

Mahmoud Al-Hader, Ahmad Rodzi, Abdul Rashid Sharif, and Noordin Ahmad

Integration of Thermal Dynamics and Lighting in Buildings with Object Oriented Multi-domain Approach

Anton Sodja and Borut Zupancic

Adaptive Neural Network Model Using the Immune System for Financial Time Series Forecasting

A.A. Mahdi, A.J. Hussain, and D. Al-Jumeily

Protocol Specification and Verification Using Process Algebra and Petri Nets

Slavomír Simonák, Štefan Hudák, and Štefan Korecko
Mathematical Modeling of Crown Forest Fire Initiation and Spread ..............................................................115
   Valeriy Perminov

**Track: 04. Agent-Based Modelling and Simulation**

A Simple Optimum-Time Firing Squad Synchronization Algorithm
for Two-Dimensional Rectangle Arrays ........................................................................................................120
   Hiroshi Umeo, Jean-Baptiste Yunès, and Takuya Yamawaki

An Agent Based Model for Uniform Access to Resources in Cooperative
Information Systems ........................................................................................................................................126
   Ouahrani Leila and Alimazighi Zaia

Agent-Based Simulation Model of Educational Process in the Student Group .............................................132
   Yuri A. Ivashkin and Evgenii A. Nazoikin

**Track: 06. Web-Based Simulation**

Using Web Services to Support Battlefield Visualization and Tactical Decision
Making .........................................................................................................................................................138
   Baki Koyuncu and Erkan Bostanci

Teleworking and Next Generation Cyberpace ............................................................................................142
   Eduard Babulak

**Track: 07. Visualization**

Object Oriented Terrain Modelling: Lessons Learned from Java3D
Development Issues ........................................................................................................................................147
   Mladjan Jovanovic and Dušan Starcevic

**Track: 08. Security Modelling and Simulation**

Diagnosis of a Continuous Stirred Tank Reactor Using Kalman Filter ....................................................153
   Aicha Hsoumi, Rafika El Harabi, Saloua Bel Hadj Ali, and Mohamed Naceur Abdelkrim

**Track: 09. Simulation in Education**

Simulation as a New Approach to First Responders Training ....................................................................159
   Nadine Sturm, Karin Rainer, Gerhard Chroust, and Markus Roth

**Track: 13. Bio-informatics and Bio-medical Simulation**

Estimating the Parameters of Cyclin-Triggered Gene Expression in Cell Cycle
Control Network ........................................................................................................................................164
   Paola Lecca and Alida Palmisano

**Track: 14. Discrete Event and Real Time Systems**

Quasi Analytical State Observer in Real Time Learneable System .........................................................170
   Mikulas Alexik
Track: 15. Image, Speech, and Signal Processing

Using Patch Histogram of Detected Corners for Image Retrieval ................................................................. 176
  Muhammad Riaz and Jongan Park
Simulation of Target Range Measurement Process by Passive Optoelectronic Rangefinder ................................................................. 181
  Vladimir Cech and Jiri Jevicky
Vehicle Recognition System Using Singular Value Decomposition (SVD)
and Levenberg-Marquardt .......................................................................................................................... 187
  Zuraidi Saad, Muhammad Khusairi Osman, Zuli Imran Zulkafli, and Sopiah Ishak
A New Comparison Method for Full Reference Image Quality Metric .......................................................... 192
  Yu Han, Yunze Cai, and Xiaoming Xu

Track: 16. Human Factors and Social Issues

HPCgen—A Fast Generator of Contact Networks of Large Urban Cities
for Epidemiological Studies ......................................................................................................................... 198
  Tianyou Zhang, Soon Hong Soh, Xiuju Fu, Kee Khoon Lee, Limsoon Wong, Stefan Ma,
  Gaoxi Xiao, and Chee Keong Kwoh
Modeling Cognitive Distortions of Behavioural Finance ............................................................................. 204
  Nicola Miglietta and Marco Remondino

Track: 17. Engineering, Manufacturing, and Control

Solving LTI Descriptor (Regular) Differential Multi-Delay Systems Using
Matrix Pencil Theory ................................................................................................................................. 210
  Athanasios A. Pantelous
Control System Design for Solar Energy with LHTS to Fresh Air Conditioning ........................................... 216
  Lili Wang, Jun Yang, Xiaoguang Zhou, and Peng Li
Supply Air Temperature Control in an Industrial HVAC Pilot Plant Based
on Smith Predictor and Inward Approach .................................................................................................. 220
  Jakob Rehrl and Martin Horn
On the Synthesis of a Novel Nonlinear Feedback Control for Nonlinear Input-Affine Systems ...................... 226
  Wiem Jebri Jemai, Houssem Jerbi, and Mohamed Naceur Abdelkrim
 Modeling and Control of an Industrial Continuous Furnace ..................................................................... 231
  Lukas Bitschnau and Martin Kozek

Track: 18. Energy, Power Generation, and Distribution

The World in 2050—Challenges and Opportunities for Modelling
and Simulation (Invited Paper) ................................................................................................................... 237
  Richard Zobel
Track: 21. Parallel and Distributed Architectures and Systems

Services for Numerical Calculation ............................................................................................................................................. 245
   Eliza Consuela Isbasoiu

Simulation of Embedded Applications Implemented in Embedded Process
   Functional Language ........................................................................................................................................................................ 253
   Marek Behálek and Petr Šaloun

Distributed and Centralized Version of an Efficient Communication Protocol for Distributed Traffic Simulation ......................................................... 259
   Tomas Potuzak

Using Simulated Annealing for Task Scheduling in Distributed Systems .......................................................................................... 265
   Mostafa Haghi Kashani and Mohsen Jahanshahi

Track: 23. Performance Engineering of Computer and Communication Systems

Efficiency Analysis and Benchmarking of Telecommunication Sector In India .............................................................. 270
   Vineeta Saxena (Nigam), Tripta Thakur, and R.P. Singh

Computer Network Redesign through Clusters Consolidation and OPNET Modeler ..................................................................................................................................................................... 276
   Sami J. Habib, Paulvanna Nayaki Marimuthu, and Asha Merine Isaac

Performability Modelling of Handoff in Wireless Cellular Networks and the Exact Solution of System Models with Service Rates Dependent on Numbers of Originating and Handoff Calls ........................................................................................................ 282
   Enver Ever, Yonal Kirsal, and Orhan Gemikonaklı

Track: 24. Circuits, Sensors, and Devices

Peltier Effect Based Solar Powered Air Conditioning System ........................................................................................................ 288
   Rohit Sharma, Vivek Kumar Sehgal, Nitin, Abhinav Thakur, Adnan Munir Khan, Ashish Sharma, and Pankaj Sharma

Author Index ...................................................................................................................................................................................... 293
