DEXA 2001
Proceedings

12th International Workshop on Database and Expert Systems Applications

3-7 September 2001

Munich, Germany

Edited by
A M. Tjoa and R.R. Wagner

IEEE COMPUTER SOCIETY

Los Alamitos, California

Washington  Brussels  Tokyo
Table of Contents

12th International Workshop on Database and Expert Systems Applications (DEXA 2001)

Message from the Program Chairs ........................................................................................................... xxii
Program Committee ........................................................................................................................................ xxiii

W01: WEBH

First International Workshop on Electronic Business Hubs: XML, Metadata, Ontologies,
and Business Knowledge on the Web

Organizer: Stephanie Bressan, National University of Singapore

❖ Opening Session

Preliminary Ontology Modeling for B2B Content Integration ......................................................... 7
B. Omelayenko

Semantic B2B Integration Server Technology as Infrastructure for Electronic Hubs .................. 14
C. Bussler

❖ Session 1: Mediation

Designing a Three-Layer Ontology in a Web-Based Interconnection Scenario .......................... 21
S. Castano, V. De Antonellis, S. De Capitani di Vimercati, and M. Melchiori

Efficient XML Query Processing in Mediators ................................................................................. 27
L.-H. Yang, S. Tang, D. Yang, and L. Chen

An Architecture for Multidatabase Systems Based on CORBA and XML ................................. 32
L. Bing, L. ZhengDing, X. WeiJun, L. RuiXuan, Z. Wei, and M. Sarem

❖ Session 2: Applications

Building Portals for E-Biology ............................................................................................................. 41
Z. Lacroix

Knowledge Representation Architecture for Context Interchange Mediation:
Fixed Income Securities Investment Examples ................................................................................... 50
A. Moulton, S. Madnick, and M. Siegel

Requirements for XML Functionality in Relational Database Management Systems .................. 55
P. Brown, M. Herbach, A. Chaudhri, and A. Koern
Session 3: Query and Storage

Converting Relational Database into XML Document .............................. 61
J. Fong, F. Pang, and C. Bloom

Towards Grouping Constructs for Semistructured Data ........................... 66
F. Bry, D. Olteanu, and S. Schaffert

Towards XML Metamodel Patterns for XML Data Modeling ..................... 71
Z. Hu and G. Vollmar

Session 4: E-business

An E-store Developing Model for Minimizing the Impact of Procedural and
Cultural Change within an Enterprise .................................................. 79
I. Kwan

Agent Solutions for E-business Transactions ......................................... 84
I. Ibrahim, W. Schwinger, E. Weippl, J. Altmann, and W. Winiwarter

W02: PaDD
Fourth International Workshop on Parallel and Distributed Databases:
Innovative Applications and New Architectures

Organizers: Abdelkader Hamerlain & Franck Morvan, IRIT, University Paul Sabatier, France;
Harald Kosch & László Bőszörnényi, IIT, University Klagenfurt, Austria;
Lionel Brunie, LISI, INSA de Lyon, France

Session 1: Invited Address

Modeling Parallel and Distributed Computing Resources Using Structured
Metadata .................................................................................................. 95
Philipp Tomsich, Institute of Software Technology, Vienna University of Technology, Austria

Session 2: Parallelism Aspects

Experimenting with Object Navigation in Parallel Object Databases ........ 103
S. Sampaio, J. Smith, N. Paton, and P. Watson

Parallel and Distributed Methods for Image Retrieval with Dynamic Feature
Extraction on Cluster Architectures ...................................................... 110
O. Kao

Design and Evaluation of Database Multiprocessor Architecture with High Data
Availability ............................................................................................. 115
L. Sokolinsky
Session 3: Distribution Aspects

Block Level Query Scrambling Algorithm within Distributed Multi-database Environment
E. Vossough and J. Getta

Design of a Data Warehouse over Object-Oriented and Dynamically Evolving Data Sources
B. Czejdo, J. Eder, T. Morzy, and R. Wrembel

Using an Out-of-Core Technique for Clustering Large Data Sets
E. Masciari, C. Pizzutti, G. Raimondo, and D. Talia

Session 4: Emergent Projects

Modeling Quality Adaptation Capabilities of Audio-Visual Data
H. Kosch, L. Böszörményi, and H. Hellwagner

Software Architectures for Collaborative Proxies in Wide Area Information Systems
L. Brunie, D. Coquil, and S. Simon

W03: NbiS
Fourth International Workshop on Network-Based Information Systems
Organizer: Makoto Takizawa, Tokyo Denki University, Japan

Session 1: Algorithms and Protocols

A Fuzzy Admission Control Scheme for High-Speed Networks
L. Barolli, A. Koyama, T. Yamada, S. Yokoyama, T. Suganuma, and N. Shiratori

Construction of a Multiple Entities Communication Protocol by Compositional Approach
B. Bista and N. Shiratori

Autonomous Load Balance System for Distributed Servers Using Active Objects
S. Yamaguchi and K. Maruyama

Session 2: Distributed Objects

CORBA Based Approach to the Development of an Advanced Architecture in TINA Service Management System
# A Framework for Integrating Information Retrieval on CORBA
Y.-S. Chang and S.-M. Yuan

# QoS-Based Method for Compensating Multimedia Objects
M. Yokoyama, K. Tanaka, and M. Takizawa

## Session 3: Mobile Systems

### Network Status Observation for a Dynamic Object Relocation Protocol
T. Watanabe and M. Hara

### An Agent Based Education System for Cellular Phone
A. Koyama, A. Sasaki, L. Barolli, and Z. Cheng

### Traditional Japanese Crafting Presentation by Kansei Information Processing over Japan Gigabit Network
A. Miyakawa, K. Sugita, K. Hashimoto, T. Fukamachi, and Y. Shibata

## Session 4: Network Applications

### A Distributed Search Engine for Fresh Information Retrieval
N. Sato, M. Uehara, Y. Sakai, and H. Mori

### Using XML in a Web-Oriented Information System
P. Kroha and L. Gemeinhardt

### ADTP: A New Protocol for Data Processing over the Internet
J. Kwak, R. Elmasri, W. Choi, R.-C. Ye, and A. Mahareddy

### Cooperative Background Task Spaces and Its Evaluation
S. Yamaguchi, M. Takimoto, H. Aida, and T. Saito

---

## W04: LUMIS

### Third International Workshop on Logical and Uncertainty Models for Information Systems

Organizers: Mounia Lalmas - Queen Mary, University of London, United Kingdom

### Informational Inference via Information Flow
P. Bruza and D. Song

### Parallel between Situation and Interaction Retrieval
S. Dominich

### Rating the Impact of Logical Representations on Retrieval Performance
D. Losada and A. Barreiro

---

viii
Partial Probabilistic Interpretations and General Imaging
F. Lepage

W05: MIW
Second International Workshop on Management of Information on the Web
Organizer: Wendy X. Wu, Middlesex University, United Kingdom

Invited Address 1

Rating the Interest of Rules Induced from Data and within Texts
Yves Kodratoff, CNRS, France

Document Categorization and Retrieval Using Semantic Microfeatures and Growing Cell Structures
W. Deng and W. Wu

Statistical Analysis of Web Documents: A Proposal and a Case Study
P. Vittorini and P. Di Felice

Invited Address 2

Feature Weighting and Instance Selection for Collaborative Filtering
K. Yu, Z. Wen, X. Xu, and M. Ester

Model Based Predictive Prefetching
Q. Yang and Z. Zhang

A Comparison of Categorisation Algorithms for Predicting the Cellular Localization Sites of Proteins
P. Cairns, C. Huyck, I. Mitchell, and W. Wu

An Approach to Develop Human Gene Disorder Database for Intelligent Variance Analysis of Genes and Its Products
N. Khan, S. Rahman, and T. Clarkson

W06: Electronic Government
Second International Workshop on Electronic Government
Organizer: Roland Traunmüller, University of Linz, Austria

Opening and Framework 1

Directions in E-government: Processes, Portals, Knowledge
R. Traunmüller and M. Wimmer

ix
PASSPORT: A Novel Architectural Model for the Provision of Seamless Cross-Border E-government Services ................................................................. 318
D. Gouscos, G. Mentzas, and P. Georgiadis

Information Technology for Redesigning Government/API, KM, Agents, and Avatars/ .............................................................. 323
A. Csetenyi

❖ Framework II

A Modular Approach to Developing E-public Services
K. Lenk

The Italian E-government Action Plan: From Gaining Efficiency to Rethinking Government ....................................................................................... 329
F. Virili

E-government: Developments in the US and UK ........................................... 334
P. Jackson and N. Curthoys

❖ Systemic Security

Public Key Certification Providers and E-government Assurance Agencies.
An Appraisal of Trust on the Internet ................................................................. 345
F. Galindo

E-government: Aspects of Security on Different Layers ................................ 350
M. Wimmer and B. von Bredow

❖ Platforms

An Integrated Platform for Realising Online One-Stop Government:
The eGOV Project ............................................................................................... 359
E. Tambouris

Implementation of E-government Using Knowledge-Based System .......... 364
J. Paralic and T. Sabol

Legal Knowledge Representation Using the Resource Description Framework (RDF) ............................................................ 369
P. Ebenhoch

❖ System Integration

Limitations for Interstate E-government and for Interdisciplinary Projects .................................................. 377
R. Riedl
Electronic Government and Software Confederations .......................................................... 383
J. Král and M. Žemlička

Information Technology Improves Most of the Democratic Voting Processes ...................... 388
A. Watson and V. Cordonnier

- Service Delivery

E-Vienna: Living Situation Based E-government and E-democracy ........................................ 397
L. Fischmann, G. Jakisch, and R. Riedel

Change Management, a Critical Success Factor for E-government ...................................... 402
A. Papantoniou, E. Hattab, F. Afrati, E. Kayafas, and V. Loumos

SIM: A Working Example of an E-government Service Infrastructure for Mountain Communities ................................................................. 407
F. Arcieri, E. Cappadozzi, E. Nardelli, and M. Talamo

Electronic Government Services for the Business Sector in Austria ..................................... 412
G. Aichholzer and R. Sperlich

Session 2

MEME: An Adaptive Email-Based Information Sharing System for Educational Institutions ................................................. 449
M. Dain and J. Brzezinski

Managing the Knowledge Contained in Electronic Documents: A Clustering Method for Text Mining ........................................ 454
S. Iiritano and M. Ruffolo

Reflecting Distributed Knowledge in IT Systems: A Three Layers Concept .......................................................... 459
M. Wimmer and R. Traunmüller

Session 3

Measuring Knowledge with Workflow Management Systems ............................................................................. 467
B. List, J. Schiefer, and R. Bruckner

Topic Maps — An Enabling Technology for Knowledge Management ............................................................... 472
K. Steiner, W. Essmayr, and R. Wagner

Another View on Knowledge

Efficient Management of Data in Proxy Cache .......................................................................................... 479
K. Cheng, Y. Kambayashi, and M. Mohania

WO8: WBC
First International Workshop on Web-Based Collaboration
Organizer: Waldemar Wieczoreczycki, The Poznan University of Economics, Poznan, Poland

Session 1: Survey of Cooperative Systems

Building Internet Learning Communities ........................................................................................................ 491
D. Casey

A Comparative Analysis of Web-Based Collaborative Systems .............................................................................. 496
G. Bafoutsou and G. Mentzas

Advanced Concepts for Next Generation Portals .......................................................................................... 501
C. Zirpins, H. Weinreich, A. Bartelt, and W. Lamersdorf

Session 2: Approaches to Cooperation Modeling

Collaborative Advertising over Internet with Agents .................................................................................. 509
M. Matskin
Collaborative Document Edition in a Highly Concurrent Environment ................................................................. 514
W. Picard

Modeling Cooperative Applications with Multi-user Interactions ........................................................................... 519
C. Haber

(Session 3: Cooperative Applications)

TeamSpace: An Environment for Team Articulation Work and Virtual Meetings ....................................................... 527
L. Fuchs, S. Poltrock, and I. Wetzel

Integrating Voice and Data Services for Mobile Internet Collaboration with the MOVE Middleware Architecture ........................................... 532
D. Carrega, H. Decker, H. Muyal, and M. Wallbaum

A System for Collaborative Music Composition over the Web ........................................................................ 537
S. Jordà and O. Wüst

W09: MDDS
Fourth International Workshop on Mobility in Databases and Distributed Systems

Organizer: Arkady Zaslavsky, Monash University, Australia

(Session 1: Invited Address)

An Architecture for Location Dependent Query Processing ..................................................................................... 549
Ayse Y. Seydim, Margaret H. Dunham, Southern Methodist University; Vijay Kumar, University of Missouri-Kansas City

(Session 2: Mobile Databases)

Mobile Database Procedures in MDBAS ........................................................................................................... 559
R. Vlach

BLIC, a Simple yet Efficient Concurrency Control Technique for Mobile Data Broadcast Environment ...................... 564
A. Al-Mogren and M. Dunham

A Power-Aware Technique to Manage Real-Time Database Transactions in Mobile Ad-Hoc Networks .............. 570
L. Gruenwald and S. Banik
Session 3: Mobile Agents

A System Based on Mobile Agents for Tracking Objects in a Location-Dependent Query Processing Environment .......................................................... 577
S. Ilarri, E. Mena, and A. Illarramendi

Verification of Itineraries for Mobile Agent Enabled Interorganizational Workflow .......................................................... 582
S. Ling and S. Loke

Dynamic Multi-signatures for Secure Autonomous Agents .......................................................... 587
P. Kotzanikolaou, M. Burmester, and V. Chrissikopoulos

Session 4

Analyzing Mobile Transactions Support for DBMS .......................................................... 595
P. Serrano-Alvarado, C. Roncancio, and M. Adiba

W10: HolOMas
Second International Workshop on Industrial Applications of Holonic and Multi-agent Systems

Organizer: Vladimir Marik, Czech Technical University/Rockwell Automation, CZ

Opening

Holons & Agents: Recent Development and Mutual Impacts .......................................................... 605
V. Marik and M. Pechoucek

Holonic Manufacturing Systems I

Reconfiguring Real-Time Holonic Manufacturing Systems .......................................................... 611
R. Brennan, M. Fletcher, and D. Norrie

Rationales for Holonic Manufacturing Systems in Chemical Process Industries .......................................................... 616
N. Chokshi and D. McFarlane

Holonic Manufacturing Systems II

Deadline Control in Holonic Manufacturing Using Mobile Agents .......................................................... 623
M. Fletcher, R. Brennan, and D. Norrie

The Application of ZELLS Agents in Manufacturing Environments .......................................................... 628
K. Glanzer, A. Hämmerle, and R. Geurts
Agent-Based Solutions

Material Handling Problem: FIPA Compliant Agent Implementation.............................................635
P. Vrba and V. Hrdonka

Adoption of an Agent-Based Production Planning Technology in the Manufacturing Industry.................................................................640
A. Riha, M. Pechoucek, H. Krautwurmova, P. Charvat, and A. Koumpis

Design & Modeling

A Realistic Substrate for Small-World Networks Modeling...............................................................649
C. Aguirre, F. Corbacho, and R. Huerta

Towards an Axiomatic Framework to Support the Design of Holonic Systems..................................654
G. Franco and A. Batocchio

W11: INBOSA
First International Workshop on Internet Bots: Systems and Applications

Session 1: Internet Bots

A Script Language for Generating Internet-Bots ..................................................................................667
D. Chiu

An Information Concierge for the Web .................................................................................................672
F. Li, Z. Liu, Y. Huang, and W. Ng

Integrating Mobile Agents into Off-the-Shelf Web Servers: The M&M Approach...............................677
P. Marques, R. Fonseca, P. Simões, L. Silva, and J. Silva

Session 2: Mobile Agents

Using Mobile Agents in Telecommunications ...................................................................................685
D. van Thanh

Supporting Mobile Agent Applications Using Wrappers ........................................................................689
N. Sudmann and D. Johansen

Facility Provision Using Mobile Agents .............................................................................................696
E. Kvalvaag and D. van Thanh
Session 3: Agent Negotiation and Systems

Cooperative Multi-attribute Bilateral Online Negotiation for E-commerce ............................................. 703
L. Zhao, W.-K. Ng, and E.-P. Lim

Negotiation Tactics for Autonomous Agents ............................................................................................. 708
F. Lopes, N. Mamede, A. Novais, and H. Coelho

An Agent System Architecture for E-commerce ....................................................................................... 715
W. Suwu and A. Das

W12: E-negotiations

Second International Workshop on Negotiations in Electronic Markets: Beyond Price Discovery

Organizer: Michael Ströbel, IBM Research, Switzerland

Invited Address

E-service Composition: Supporting Dynamic Definition of Process-Oriented Negotiation Parameters ................................................. 727
G. Piccinelli, C. Preist, and C. Bartolini

Towards a Flexible Middleware Negotiation Facility for Distributed Components .................................................. 732
J. Andreoli and S. Castellani

An Infrastructure for Rule-Driven Negotiating Software Agents ........................................................................... 737
M. Benyoucef, H. Alj, and R. Keller

Efficiency and Flexibility of Multi-attribute Negotiations – The Role of Business Object Frameworks .............................................. 742
M. Rebstock

Coping with One-to-Many Multi-criteria Negotiations in Electronic Markets ................................................... 747
B. Van de Walle, S. Heitsch, and P. Faratin

Trust Issues and User Reactions to E-services and E-marketplaces: A Customer Survey ........................................ 752
N. Linketscher and M. Child
Organizer: Erich Schweighofer, Institute of Public International Law, Vienna University, Austria

-invited-address

The Ideal Audience and Artificial Intelligence and Law
Trevor Bench-Capon, The University of Liverpool, United Kingdom

-Session 1

Towards Electronic Contract Performance
A. Daskalopulu and T. Maibaum

Legal Information Access on the WEB. A Project for an Information System Model
A. Cammelli and E. Fameli

-Session 2

MILE Assessment: Turning Legal Information into Legal Advice
A. Boer

Ontology-Driven Access to Legal Information
D. Tiscornia

-Session 3

Electronic Documents in Legal Works
J. Muñoz

Improving the Quality of Labels for Self-Organising Maps Using Fine-Tuning
E. Schweighofer, A. Rauber, and M. Dittenbach
W14: QPMIDS
Fifth International Workshop on Query Processing
and Multimedia Issues in Distributed Systems

Organizer: Frederic Andries, National Institute of Informatics, Japan

- Multimedia Model and Processing Session
  
  On the Design of Copyright Protection Protocols for Multimedia Distribution
  Using Symmetric and Public-Key Watermarking
  S. Katzenbeisser

  The TAIM Intelligent Visual Database
  C. Nourani

  Robust Frame-Based Watermarking for Digital Video
  V. Cappellini, F. Bartolini, R. Caldelli, A. De Rosa, A. Piva, and M. Barni

- Multimedia Tool And Multimedia Design Session
  
  Project Xanadu: XML- and Active-Database-Unified Approach to Distributed
  E-commerce
  H. Ishikawa, S. Yokoyama, S. Ishiki, and M. Ohta

  Distributed Television Production for Distance Education with a
  Customizable Internet Platform
  S. Naegele-Jackson, N. Eschbaum, and P. Holleczek

  Definition and Application of Rules for the Adequate Designing of XML
  Documents for the Hyper-Automaton System
  C. Machado, G. Federizzi, and P. Menezes

- Special Track on "Image-Based Geospatial Databases"

- Invited Address
  
  Query Evaluation and Presentation Planning within a Spatial Mediator:
  Extending XML-Based Mediation to Heterogeneous Sources of GIS and
  Imagery Data
  Ilya Zaslavsky, Armanath Gupta, Bertram Ludäscher, and Shabbar Tambawala,
  San Diego Supercomputer Center, University of California at San Diego

- Session
  
  A Study on the Indexing of Satellite Images at NASA Regional Application
  Center
  C. Ghirardini, S. Chun, V. Atluri, I. Kamel, and N. Adam

xviii
Spatiotemporal Lifelines in Support of Video Queries ................................................................. 865
A. Stefanidis, P. Partsinevelos, K. Eickhorst, and P. Agouris

Web-Enabled Raster GIS Services for Large Image and Map Databases ........................................ 870
P. Baumann

Registration of Maps Using Deformable Contours in Global Atlas ............................................ 875
F. Lee, L. Yee, and S. Bressan

W15: KEES
First International Workshop on Knowledge Extraction for Enterprise Services

Organizer: G. S. Loo, University of Auckland, New Zealand

❖ Session 1

Agent-Based Knowledge Extraction Services inside Enterprise Data Warehousing Systems Environments ................................................................. 887
A. Lourenço, J. Gonçalves, and O. Belo

Flexible Web-Based Decision Support System Generator (FWDSSG) Utilising Software Agents ................................................................. 892
C.-S. Dong and G. Loo

❖ Session 2

Modeling Temporal Consistency in Data Warehouses ................................................................ 901
R. Bruckner, B. List, J. Schiefer, and A. Tjoa

Aspect-Oriented Technology for Business Applications: A Case Study in Stock Trading ............................................................................. 906
F. Akkawi, A. Bader, and T. Elrad

A Soft Systems Methodology Model for Clinical Decision Support Systems (SSMM-CDSS) ............................................................................... 909
G. Loo and P. Lee

❖ Session 3

Significant Conceptual Modelling – A Health Care Enterprise Case Study .................................. 917
P. Gottgtroy and M. Gottgtroy

Knowledge Extraction and Recorded Design Decisions
T. Torabi

xix
A Framework for Business Rule Presentation .......................................................... 922
G. Fu, J. Shao, S. Embury, W. Gray, and X. Liu

W16: Dlib
First International Workshop on Digital Libraries

Organizers: Dieter Merkl & Andreas Rauber, Technical University of Vienna, Austria

Session 1: Metadata

The Object-Oriented Document Model of a Meta-system for Existing Digital Libraries ................................................................. 933
M. Bauer and G. Specht

Towards a Two-Layered Video Metadata Model ..................................................... 937
C. Tsinaraki, S. Papadomanolakis, and S. Christodoulakis

A Metadata Approach for Designing Configurable Interfaces in Digital Libraries ....................................................................................... 942
A. Moura, L. da Silva, and M. Campos

Session 2: Retrieval

Web Document Summarisation: A Task-Oriented Evaluation .................................. 951
R. White, I. Ruthven, and J. Jose

Hierarchical Structural Approach to Improving the Browsability of Web Search Engine Results ............................................................. 956
H. Cui and O. Zaiane

IR and AI: Using Co-occurrence Theory to Generate Lightweight Ontologies ......... 961
Y. Ding and R. Engels

Author Index ........................................................................................................... 967
