Message from the Chairs ........................................................................................................................... ix  
Organizing Committee ................................................................................................................................ xi  
Program Committee .................................................................................................................................. xiii  
Steering and Advisory Board Committees .............................................................................................. xv  
Reviewers ................................................................................................................................................... xvi  

## Session 1: Keynote

Getting from Here to There: Locomotion in Virtual Environments ...................................................... 3  
  *Mary Whitton*

## Session 2: Large Scale Simulation

CommPar: A Community-Based Model Partitioning Approach for Large-Scale Networked Social Dynamics Simulation ............................................................................................................ 7  
  *Bonan Hou and Yiping Yao*

Self-Adaptive Dynamic Load Balancing for Large-Scale HLA-Based Simulations ................................................. 14  
  *Robson Eduardo De Grande and Azzedine Boukerche*

Supporting the Decentralized Development of Large-Scale Distributed Real-Time LVC Simulation Systems with TENA (The Test and Training Enabling Architecture) ......................................................................................................................... 22  
  *J. Russell Noseworthy*

## Session 3: Virtual Reality and Virtual Worlds

QoS-Enabled ANFIS Dead Reckoning Algorithm for Distributed Interactive Simulation ................................................. 33  
  *Akram Hakiri, Pascal Berthou, and Thierry Gayraud*

Scale Virtual Worlds through Dynamic Load Balancing ...................................................................................... 43  
  *Huaiyu Liu and Mic Bowman*
Synchronization of Images from Multiple Cameras to Reconstruct a Moving Human

Carl Moore, Toby Duckworth, Rob Aspin, and David Roberts

MOSAIC - A Mobile Peer-to-Peer Networks-Based 3D Streaming Supplying Partner Protocol

Haifa Raja Maamar, Azzedine Boukerche, and Emil Petriu

Session 4: Algorithms and Languages for Simulation

Supporting Multi-dimensional Range Query in HD Tree

Yunfeng Gu, Azzedine Boukerche, Xun Ye, and Regina B. Araujo

Synchronised Range Queries in Distributed Simulations of Multi-agent Systems

Vinoth Suryanarayanan, Bart G. W. Craenen, and Georgios K. Theodoropoulos

Kiltera: A Language for Timed, Event-Driven, Mobile and Distributed Simulation

Ernesto Posse and Juergen Dingel

Session 5: Invited Talk

Battle Management Language Enables Rapid Integration of Command & Control with Simulation

J. Mark Pullen

Session 6: Simulation Studies

Scenario Based Modeling for Very Large Scale Simulations

Kashif Zia, Alois Ferscha, Andreas Riener, Martin Wirz, Daniel Roggen, Kamil Kloch, and Paul Lukowicz

AmI Technology Helps to Sustain Speed While Merging - A Data Driven Simulation Study on Madrid Motorway Ring M30

Andreas Riener, Kashif Zia, Alois Ferscha, Cristina Beltran Ruiz, and Juan Jesús Minguez Rubio

Understanding and Building Interoperable, Integrable and Composable Distributed Training Simulations

Rafaela V. Rocha, Regina B. Araújo, Márcio R. Campos, and Azzedine Boukerche

Session 7: Short Papers

Session 8: Performance

Performance Evaluation of PDES on Multi-core Clusters

Ketan Bahulkar, Nicole Hofmann, Deepak Jagtap, Nael Abu-Ghazaleh, and Dmitry Ponomarev

Global Lookahead Management (GLM) Protocol for Conservative DEVS Simulation

Shafagh Jafer and Gabriel Wainer
A Three-Phases Byzantine Fault Tolerance Mechanism for HLA-Based Simulation .................................................................................................................................................................................. 149
Zengxiang Li, Wentong Cai, Stephen John Turner, and Ke Pan

Session 9: Mobile and Sensor Networks

An Evolutionary Dynamic Approach for Designing Wireless Sensor Networks for Real Time Monitoring .................................................................................................................... 161
Flávio V. C. Martins, Eduardo G. Carrano, Elizabeth F. Wanner, Ricardo H. C. Takahashi, and Geraldo R. Mateus
Multilevel Predictions for the Aggregation of Data in Global Sensor Networks ........................................... 169
Andreas Benzing, Boris Koldehofe, Marco Völz, and Kurt Rothermel
SOAMANET: A Tool for Evaluating Service-Oriented Architectures on Mobile Ad-Hoc Networks .................................................................................................................... 179
Himanshu Neema, Anand Kashyap, Robert Kereskenyi, Yuan Xue, and Gabor Karsai
Location Aware Question Answering Based Product Searching in Mobile Handheld Devices ........................................................................................................................................................................ 189
SK Alamgir Hossain, A. S. M. Mahfujur Rahman, Thomas T. Tran, and Abdulmotaleb El Saddik

Short Papers

Distributed and Interactive Simulations Operating at Large Scale for Transcontinental Expeimentation ................................................................................................................................................................ 199
Thomas D. Gottschalk, Ke-Thia Yao, Gene Wagenbreth, Robert F. Lucas, and Dan M. Davis
Augmented Rendering of Makeup Features in a Smart Interactive Mirror System for Decision Support in Cosmetic Products Selection ........................................................................................................ 203
A. S. M. Mahfujur Rahman, Thomas T. Tran, Sk Alamgir Hossain, and Abdulmotaleb El Saddik
From DEVS to RTA-DEVS ........................................................................................................................................... 207
Hesham Saadawi and Gabriel Wainer
Semantics in Course of Action Modeling and Simulation ................................................................................. 211
Henrique C. Marques, José M. P. de Oliveira, and Paulo Cesar G. da Costa
Studying Characteristics of an Emulab Testbed for Scientifically Rigorous Experiments ................................................. 215
Andres Perez-Garcia, Christos Siaterlis, and Marcelo Masera
Parallel Simulation of Multi-agent Systems Using Terracotta ........................................................................ 219
Franco Cicirelli, Angelo Furfaro, Andrea Giordano, and Libero Nigro
Hierarchical Federation Composition for Information Hiding in HLA-Based Distributed Simulation .................. 223
Jung Hyun Ahn, Moon Gi Seok, Chang Ho Sung, and Tag Gon Kim
New Contributions for Simulating Large Distributed Systems .............................................................................. 227
Alberto Núñez, Javier Fernández, and Jesús Carretero
