Table of Contents

Workshop Organization.............................................................................................................................................ix
Program Committee....................................................................................................................................................x
External Reviewers ..................................................................................................................................................xii

International Workshop on Model-Based Design for Cyber-Physical Systems (MB4CP 2015)

MB4CP 2015 Keynote I: Dependability Modeling and Analysis Methods
Integrated in Model-Driven Industrial Architectural Frameworks .................................................................1
Andrea Bondavalli

MB4CP 2015 Keynote II: Resilience of Cyber-Physical Energy Systems ...............................................................3
Paulo Esteves Veríssimo

Workshop on Dependability Issues on SDN and NFV (DISN 2015)

SeReNe: On Establishing Secure and Resilient Networking Services for an SDN-based Multi-tenant Datacenter Environment ...........................................................................................................4
Chun-Jen Chung, Tianyi Xing, Dijiang Huang, Deep Medhi, and Kishor Trivedi

Video on Demand Hosted in Private Cloud: Availability Modeling and Sensitivity Analysis ..........................................................12
Rosangela Melo, Maria Clara Bezerra, Jamilson Dantas, Rubens Matos, Ivanildo Melo, and Paulo Maciel

Implementation of Failure Detector Based on Network Function Virtualization ..................................................19
Rogerio C. Turchetti and Elias Procopio Duarte
International Workshop on Recent Advances in the Dependability Assessment of Complex Systems (RADIANCE 2015)

RADIANCE 2015 Keynote: Challenges in Engineering Dependable Self-Adaptive Systems

Bradley Schmerl

RADIANCE 2015: Session I – Security and Dependability Analysis

Service Deterioration Analysis (SDA): An Early Development Phase Dependability Analysis Method

Georg Macher, Andrea Höller, Harald Sporer, Eric Armengaud, and Christian Kreiner

Quantifying the Impact of External Attacks on a Distributed Automatic Track Warning System

Leonardo Montecchi, Paolo Lollini, and Andrea Bondavalli

RADIANCE 2015: Session II – Agile Development and Natural Language Requirements

An Approach to Clustering and Sequencing of Textual Requirements

Ricardo Barbosa, Daniele Januario, Ana Estela Silva, Regina Moraes, and Paulo Martins

Semi-automatic Generation of Extended Finite State Machines from Natural Language Standard Documents

Juliana Galvani Greghi, Eliane Martins, and Ariadne Maria Brito Rizzoni Carvalho

RADIANCE 2015: Session III – Safety Assessment in Industrial Systems

An Asset-Based Development Approach for Availability and Safety Analysis on a Flood Alert System

Fumio Machida, Jianwen Xiang, Kumiko Tadano, and Shigeru Hosono

Cost Prediction for V&V and Certification Processes

Francesco Brancati, András Pataricza, Nuno Silva, Ábel Hegedűs, Laszlo Goncey, Andrea Bondavalli, and Rosaria Esposito

Assessment of Defect Type influence in Complex and Integrated Space Systems: Analysis Based on ODC and ISVV Issues

Nuno Silva, Marco Vieira, Dario Ricci, and Domenico Cotroneo
RADIANCE 2015: Session IV – Fault Injection for Complex Systems

A Virtual Fault Injection Framework for Reliability-Aware Software Development .................................................................69
   Andrea Höller, Georg Macher, Tobias Rauter, Johannes Iber, and Christian Kreiner
Towards Assessing Representativeness of Fault Injection-Generated Failure Data for Online Failure Prediction .................................................................75
   Ivano Irrera and Marco Vieira
Studying the Propagation of Failures in SOAs .......................................................................................................................81
   Cristiana Areias, João Carlos Cunha, and Marco Vieira

First Workshop on Safety and Security of Intelligent Vehicles (SSIV 2015)

SSIV 2015: Session I - Safety and Security of Intelligent Vehicles

   Roberto Gallo
Using Data Integrity as an Improvement Characteristic to Assess the Safety of ADS-B-based Systems ........................................................................88
   Daniel Baraldi Sesso, Lucio F. Vismari, Antonio V. Silva Neto,
   Paulo S. Cugnasca, and João B. Camargo Junior

SSIV 2015: Session II - Collision Avoidance and Control on Automotive and Aerial Vehicles

A Learning-Based Autonomous Control System Approach for Collision Avoidance within an Unmanned Aircraft ........................................................................96
   Thiago Toshio Matsumoto, Lúcio Flávio Vismari,
   Ricardo Alexandre Veiga Gimenes, Jorge Rady de Almeida Junior,
   and João B. Camargo Junior
Using Simulation, Fault Injection and Property-Based Testing to Evaluate Collision Avoidance of a Quadcopter System ........................................................................104
   Benjamin Vedder, Jonny Vinter, and Magnus Jonsson
Advantages in Crash Severity Prediction Using Vehicle to Vehicle Communication ........................................................................112
   Dennis Böehmlaender, Sinan Hasirlioglu, Vitor Yano, Christian Lauerer,
   Thomas Brandmeier, and Alessandro Zimmer
Heading Controller for a Fixed Wing UAV with Reduced Control Surfaces
Based on ANFIS ...............................................................................................................................118
Ian de Medeiros Esper and Paulo Fernando Ferreira Rosa

SSIV 2015: Session III - Design Issues for Autonomous Cooperating Objects
SSIV 2015 Keynote II: From Embedded Systems to Autonomous Cooperating Objects
....................................................................................................................................................124
Paulo Veríssimo
Model-Based Membership Verification in Vehicular Platoons .........................................................125
Mikael Asplund
Software Faults Emulation at Model-Level: Towards Automated Software
FMEA ................................................................................................................................................133
Valentina Bonfiglio, Leonardo Montecchi, Ivano Irrera, Francesco Rossi,
Paolo Lollini, and Andrea Bondavalli

SSIV 2015: Session IV - Automotive Safety through Environment Awareness
The Use of a Graphic Processing Unit (GPU) in a Real Time Visual Odometry
Application .......................................................................................................................................141
Jaime Armando Delgado Vargas and Paulo Roberto Gardel Kurka
Improving Intelligent Vehicle Dependability by Means of Infrastructure-Induced Tests
.........................................................................................................................................................147
Wilfried Steiner, Ayhan Mehmed, and Sasikumar Punnekkat

Author Index ....................................................................................................................................153
