HotDep Program

7th Workshop on Hot Topics in System Dependability (HotDep)

Monday – June 27th, 2011

Introduction..........................................................................................................................................164
Andreas Haeberlen, (University of Pennsylvania, USA), Mootaz Elnozahy, (IBM Research - Austin, USA)

Session 1: Dependable Storage

Integrated End-to-End Dependability in the Loris Storage Stack...........................................................................................................................................................................................................165
David C. van Moolenbroek, Raja Appuswamy, and Andrew S. Tanenbaum, (Vrije Universiteit, Amsterdam)

Scalable Byzantine Fault-Tolerant Storage.........................................................................................171
Ricardo Padilha and Fernando Pedone, (University of Lugano, Switzerland)

Lock-free Transactional Support for Large-scale Storage Systems.......................................................176
Flavio Junqueira, Benjamin Reed and Maysam Yabandeh (Yahoo! Research, USA)

Session 2: Security

TO BEnchmark or NOT TO BEnchmark Security: That is the question.............................................182
Afonso Araújo Neto and Marco Vieira, (University of Coimbra, Portugal)

Automated Vulnerability Discovery in Distributed Systems...........188
Radu Banabic, George Candea, and Rachid Guerraoui, (EPFL, Switzerland)
Limiting Cached-based Side-Channel in Multi-tenant Cloud using Dynamic Page Coloring..................................................194
Jichen Shi, Xiang Song, Haibo Chen, and Binyu Zang, (Fudan University, China)

Session 3: System and Software Reliability

Exterminating Bugs via Collective Information Recycling.........200
George Candea, (EPFL, Switzerland)

Platform-wide Deadlock Immunity for Mobile Phones .............205
Horatiu Jula, Thomas Rensch, and George Candea, (EPFL, Switzerland)

Enabling Sophisticated Analyses of x86 Binaries with RevGen .....211
Vitaly Chipounov and George Candea, (EPFL, Switzerland)

Session 4: Architectural Support for Dependability

Secure MMU: Architectural Support for Memory Isolation among Virtual Machines..........................................................217
Seongwook Jin and Jaehyuk Huh, (KAIST, Korea)

Transactional Memory for Dependable Embedded Systems........223
Christof Fetzer,( TU Dresden, Germany) and Pascal Felber, (University of Neuchatel, Switzerland)
