ECBS Infrastructure II

Advanced Hardware Architecture of a System of Interconnections in a Modern Commutation System

*Danko Miocinovic, Ivan Resetar, Miljan Cubrilo, and Mihajlo Katona*

Computer Based Emulation of Power Electronics Hardware

*Dušan Majstorović, Zoltan Pele, Aleksandar Kovačević, and Nikola Čelanović*

Hybrid Current Control Algorithm for Voltage Source Inverters

*Attila Kövári*

Education / Training

Designing and Implementing International RSIC Engineering Curriculum

*Ondrej Rysavy, Miroslav Sveda, Andrew J. Kornecki, Thomas B. Hilburn, Wojciech Grega, Adam Pilat, and Jean-Marc Thiriet*

Toward a Service-Oriented E-Learning Platform in Project Management

*Constanta-Nicoleta Bodea*

System Assessment

Image Analysis System for Measuring the Thickness of Train Brakes

*Jungwon Hwang, HyunCheol Kim, Yeul-Min Baek, and Whoi-Yul Kim*

Quality Assessment of D10 and DV25 Video Codecs for Broadcasting Purposes

*Ljubomir Jovanov, Ewout Vansteenkiste, Tom Beckers, Wim Ermens, and Wilfried Philips*

Content Based Video Quality Assessment Platform

*Nemanja Lukić, Dragan Kukolj, Maja Pokrić, Zoran Marčeta, Miodrag Temerinac, and Vladimir Zlokolica*

Test & Verification

A Simulation Environment for the On-Line Monitoring of a Fault Tolerant Flight Control Computer

*Marija Punt, Jovan Djordjevic, and Milo Tomasevic*

Multiple Scenario Approach for Pre-Silicon Hardware/Software Co-Verification

*Mihajlo Katona, Dragan Djukaric, and Djordje Cvejanovic*

Synthesizable SystemVerilog Assertions as a Methodology for SoC

*Ivan Kastelan and Zoran Krajacevic*

Embedded Software

Software Based Video Improvement Implementation

*Nemanja Lukić, Istvan Papp, Zoran Marčeta, and Miodrag Temerinac*
Security

Option Based Evaluation: Security Evaluation of IT Products Based on Options Theory .................................................................................................................................................................134

Haider Abbas, Louise Yngström, and Ahmed Hemani

Poster Session I Abstracts

Fuzzy Clustering in Searching Through Information ..........................................................................................................................142

Nataša Glišović

A Concept of System Usability Assessment: System Attentiveness as the Measure of Quality ...........................................................................................................................................................................144

Milan Z. Bjelica and Nikola Teslić

Sharing Private Data to Enhance and Enrich Services in Mobile Networks .................................................................................................146

Petar Jovanović, Vladimir Kovačević, and Istvan Papp

Poster Session II Abstracts

Orthogonal Array and Virtualization as a Method for Configuration Testing Improvement ...........................................................................................................................................................................148

Snežana Popović and Ljubomir Lazić

Video Processing Real-Time Algorithm Design Verification on Embedded System for HDTV ...........................................................................................................................................................................150

Vladimir Zlokolica, Radmila Uzelac, Goran Miljkovic, Tomislav Maruna, Miodrag Temerinac, and Nikola Teslic

Digital Sound Projector Implementation and Verification within DTV Embedded System ...........................................................................................................................................................................152

Teodora Petrović and Dragan Samardžija

Partitioning DSP Applications on a Multi-core Architecture Based on Load Balancing ...........................................................................................................................................................................154

Marija Tadic and Jelena Kovacevic

Author Index ...............................................................................................................................................................................................156
