## Service Discovery and Composition

Towards Extending Service Discovery with Automated Composition Capabilities

*Roman Vaculin, Roman Neruda, and Katia Sycara*

Integrating a Decentralized Web Service Discovery System into the Internet Infrastructure

*Stephan Pöhlsen, Carsten Buschmann, and Christian Werner*

GLUE2: A Web Service Discovery Engine with Non-Functional Properties

*Alessio Carenini, Dario Cerizza, Marco Comerio, Emanuele Della Valle, Flavio De Paoli, Andrea Maurino, Matteo Palmonari, and Andrea Turati*

WSPAB: A Tool for Automatic Classification & Selection of Web Services Using Formal Concept Analysis

*Zeina Azmeh, Marianne Huchard, Chouki Tibermacin, Christelle Urtado, and Sylvain Vauttier*

The Analytical Hierarchy Process Approach for Prioritizing Features in the Selection of Web Service

*Manish Godse, Rajendra Sonar, and Shrikant Mulik*

## Service Testing and Simulation

Automatic Timed Test Case Generation for Web Services Composition

*Mounir Lallali, Fattha Zaidi, Ana Cavalli, and Iksoon Hwang*

Takuan: A Dynamic Invariant Generation System for WS-BPEL Compositions

*Manuel Palomo-Duarte, Antonio Garcia-Dominguez, and Inmaculada Medina-Bulo*
A Discrete-Events Simulation Approach for Evaluation of Service-Based Applications .......................................................... 73

Maha Driss, Yassine Jamoussi, Jean-Marc Jézéquel, and Henda Hajjami Ben Ghézala

Service Analysis

Automatic Protocol Conformance Checking of Recursive and Parallel BPEL Systems ........................................................................................................... 81

Andreas Both and Wolf Zimmermann

Checking Necessary Conditions for Control and Data Flow Compatibility between Business and Interaction Logics in Web Processes .......................................................... 92

María José Ibáñez, Pedro Álvarez, and Joaquín Ezpeleta

Beyond Soundness: On the Semantic Consistency of Executable Process Models .............................................................................. 102

Ingo Weber, Jörg Hoffmann, and Jan Mendling

Service Design

Variation Needs in Service-Based Systems .................................................................................................................. 115

Anna Ruokonen, Vilho Räisänen, Mika Siikarla, Kai Koskimies, and Tarja Systä

Secure Workflow Development from Early Requirements Analysis .............................................................................. 125

Magali Séguran, Cédric Hébert, and Ganna Frankova

Specifying and Constructing a Fault-Tolerant Composite Service .......................................................................................... 135

V.O. Onditi, Glen Dobson, John Hutchinson, James Walkerdine, and Pete Sawyer

Service Interaction and Adaptation

The Service Adaptation Machine .................................................................................................................. 145

Kenneth Wang, Marlon Dumas, Chun Ouyang, and Julien Vayssiere

Developing Process Mediator for Supporting Mediated Web Service Interactions .................................................................................. 155

Zhangbing Zhou, Sami Bhihi, Walid Gaaloul, and Manfred Hauswirth

Ontologising Interaction Behavior for Service-Oriented Enterprise Healthcare Integration .......................................................................................... 165

Ratnesh Sahay, Ronan Fox, and Manfred Hauswirth

Service Infrastructure and Deployment

Design and Implementation of Information Flow-sensitive Business Processes .......................................................... 177

Ustun Yildiz and Claude Godart

A Management Framework for WS-BPEL .................................................................................................................. 187
