Proceedings

Ninth Euromicro Workshop on Real Time Systems

June 11 – 13, 1997

Toledo, Spain

IEEE Computer Society
Los Alamitos, California
Washington • Brussels • Tokyo
Table of Contents
Ninth Euromicro Workshop on Real Time Systems — 1997

Message from the Program Chair ................................................................. ix
Program and Organizing Committees ................................................. x
Reviewers ................................................................................................ xi

Opening and Keynote Session
Chair: H. Toetenel

Keynote Lecture
Information Technologies Research and Real Time Aspects in the Telecommunication Industry
J. del Prado

Session 1: Communications
Chair: H. Rzehak

Worst Case Response Time Analysis of Hard Real-Time Sporadic Traffic in
FIP Networks ................................................................................................. 3
P. Pedro, A. Burns

Is the DQDB Priority Mechanism Good Enough for the Network Intended
Real-Time Applications? ........................................................................... 11
R. Santos, M. Zambón, J. Santos, J. Orozco

A Prototype for Interprocess Communication Support, in Hardware .................. 18
J. Furunas, J. Adomat, L. Lindh, J. Stårner, P. Vörös

Dynamic Time-Deterministic Traffic in a Fiber-Optic WDM Star Network ............. 25
M. Jonsson, K. Börjesson, M. Legardt

Session 2: Applications I
Chair: S. Son

F-Timer: Dedicated FPGA to Real-Time Systems Design Support ...................... 35
A. Parisoto, A. Souza Jr., L. Carro,
M. Pontremoli, C. Pereira, A. Suzim

Analysis and Evaluation of a Real-Time Horticultural Autonomous Vehicle System ....... 41
A. Sanchez, F. Buendia, H. Hassan, A. Crespo, J. Marchant

Cell-Level Multiplex Scheduling to Support Multimedia Applications in
Real-Time Channels ................................................................................ 48
H. Kim, S. Lee

Session 3: Caching
Chair: E. v. Puttkamer

Hybrid Instruction Cache Partitioning for Preemptive Real-Time Systems .............. 56
J. Busquets-Mataix, J. Serrano, A. Wellings
Generalizing Timing Predictions to Set-Associative Caches

F. Mueller

The Effects of Cache Architecture on the Performance of Operating Systems in Multithreaded Processors

D. Lioupis, S. Milios

Predicting Pipelining and Caching Behavior of Hard Real-Time Programs

F. Stappert

Session 4: Scheduling I
Chair: G. Ciccarella

Guaranteeing Timing Constraints under Shortest Remaining Processing Time Scheduling

R. Davis, A. Burns, W. Walker

Characterization of Blocking Time in Real-Time Systems with Dynamic Priority Ceilings

P. Rodríguez, A. Molano, Á. Viña

A Conditional Aborable Priority Ceiling Protocol for Real-time Systems with Mixed Tasks

K. Lam, K. Cheung, J. Ng

A Preemptive Priority-based Disk I/O Subsystem for the Management of Hard Real-Time Disk Traffic

A. Molano, P. Rodríguez, Á. Viña

Session 5: Distributed Systems
Chair: H. Hansson

Design and Prototyping of Real-Time Systems using CSP and CML

L. Rischel, H. Sun

Static Scheduling of Pipelined Periodic Tasks in Distributed Real-Time Systems

G. Fohler, K. Ramamritham

On the Schedulability Analysis for Distributed Hard Real-Time Systems

J. Palencia Gutiérrrez, J. Gutiérrez García, M. González Harbour

A Picocell-Based Architecture for a Real-Time Mobile Virtual Reality

T. Pyssysalo, P. Pulli

Session 6: Applications II
Chair: E. Rutten

Schedulability Analysis of Fixed Priority Real-Time Systems with Offsets

I. Bate, A. Burns

Adaptive Fault-Tolerance with Statically Scheduled Real-Time Systems

G. Fohler

V. Gerogiannis, I. Caragiannis, M. Tsoukarellas
Work-in-Progress Session
Chair: G. Eschelbeck

Timing Specification and Rule-Based Systems ............................................................ 177
P. Zijderveld, I. Traore, R. Vingerhoeds, A. Sahraoui

OVOPS — An Object Oriented Implementation Framework for Protocol Engineering .......... 178
J. Harju, B. Silverajan

A Hardware/Software Codesign Methodology and Workbench for
Predictable Development of Hard Real-Time Systems ................................................. 179
J. Axelsson

Specialised Architecture of Dedicated Hardware Processors for
Real-Time Image Data Pre-Processing ........................................................................ 180
K. Wiatr

On the Scheduling of a Multipurpose Laboratory Analysis Instrument ......................... 181
K. Palletvuori, P. Luostarinen, K. Muurinen, O. Nevalainen

Hot Real-Time Issues Session
Chair: A. Burns

Session 7: Scheduling II
Chair: G. Hommel

Task Synchronisation for Distributed Real-Time Applications .................................. 184
C. Mourlas, C. Halatsis

A Scheme for Scheduling Hard Real-Time Applications in Open System Environment .......... 191
Z. Deng, J. Liu, J. Sun

Scheduling Analysis of Hybrid Real-Time Task Sets ............................................... 200
G. Buttazzo, G. Lipari

Handling Precedence Constraints with Neural Network Based
Real-Time Scheduling Algorithms .............................................................................. 207
C. Cardeira, M. Silva, Z. Mammeri

Session 8: Design and Verification
Chair: A. Törne

Object-Oriented Design of Real-Time Systems with Stereotypes ......................... 216
M. de Miguel, A. Alonso, J. de la Puente

K. Ghose, S. Aggarwal, P. Vasek, S. Chandra, A. Raghav, A. Ghosh, D. Vogel

Reuse and Reengineering of Multitasking Real-Time Applications in LACATRE .......... 233
J. Ponsignon, M. Maranzana, R. Aubry

Integrated Validation of Real-Time System Models .................................................... 241
J. Dueñas, A. Rendón, M. de Miguel
Session 9: Real-Time Data Organization
Chairman: F. Patricelli

Which Sorting Algorithms to Choose for Hard Real-Time Applications ................................................................. 250
  D. Mittermair, P. Puschner

Requirements for Real-Time Object-Oriented Database Models — How Much Is Too Much? .......................... 258
  J. Taina, S. Son

Supporting Timeliness and Security in Real-Time Database Systems................................................................. 266
  S. Son

Index of Authors ............................................................................................................................................... 275
