Panel Session

Mapping from Enterprise Requirements to Commercial Middleware Platforms

The EDOC'97 panel will focus discussion on how enterprise requirements and designs are agreed and codified and based on that requirements analysis, how commercial middleware designs are realised.

The panelists include:
- Dr Richard Soley - Panel Chair, OMG, USA
- Kevin Tyson, Enterprise Engineering Associates, USA
- Sridhar Iyengar, Unisys, USA
- Charlie Kindel, Microsoft, USA
- Bryan Wood, Open IT, UK

Panelists will give their views on the following questions:
- how do you discover enterprise requirements?
- how do you codify enterprise requirements?
- how do you characterize middleware platforms?
- can requirements be mapped automatically to middleware?
- how do you choose between middleware levels and options?
